QUITAQUE, BRISCOE CO., TEXAS — THURSDAY, JANUARY 15, 1970

PRICE SEVEN CENTS PER COPY

Three Fine Trophies

Bobby Clay, Ronald Clay, and M. C. Jones proudly display their trophy Auodad sheep they tagged in last week's hunt. The sheep were all killed on

the Jim Stroup Ranch. All three were good sized. Bobby's ram field dressed 202 pounds one of the largest reported this year. Salt's sheep weighed 196, also

one of the bigger ones reported. Ronald's sheep weighed 178 lbs. field dressed, not quite as big as the other two, but still a very nice trophy.

Mildred Reed Is Candidate For Re-election

I wish to take the opportunity at this time to announce my candidacy for re-election to the office of County Treasurer of Briscoe County, subject to the Democratic Primary May 2, 1970.

It has been my pleasure to serve the people of Briscoe County in this capacity since 1964, and I feel that the experience I have gained will enable me to serve you more efficiently in the coming term.

I thank you for your cooperation in the past, and solicit your support and influence in the future.

Mildred Reed

Mrs. Nell Lyles has returned home from Jal, N. M. where she spent the holidays with Mr. and Mrs. Burl Clark and family.

Mr. and Mrs. Joe Pinkerton of Plainview were dinner guests Saturday of Mrs. Fred Lacy. Later, they visited other relatives and friends.

BRISCOE COUNTY COMMISSIONERS CONSIDERING SEPARATING OFFICE OF SHERIFF, TAX ASSESSOR-COLL.

Among other things to come before the Briscoe County Commissioners' Court at the regular meeting on January 12 was the question of separation of the office of Sheriff, Tax Assessor-Collector into two offices, with the Sheriff to have nothing to do with the tax assessing or collection, and the other office to have no connection with the office of sheriff in a direct manner. Briscoe County has an elected sheriff but if the office of Tax Collector and Assessor is created it would be necessary to elect someone to fill this office. This may call for two elections.

First would be the question of dividing the above-named office. This would be FOR or AGAINST and the people will decide by vote if they want to make this change. The next task would be in getting some names on the ballots as candidates for Tax Assessor & Collector.

The election to decide if this change is wanted will probably come in the latter part of February. If the vote in the first election is FOR, then we expect to set names on the ballot in time for the May 2nd Primary Election.

Final notice of Election will be published soon.

Sick Report --

B. K. Blankenship returned to his home Saturday after spending several days in the hospital at Lockney. At the latest report, he is doing fine.

Mrs. Wendell Farley returned home Friday afternoon from the High Plains Baptist Hospital in Amarillo after spending a week there. She is still having some trouble with her back but is getting around.

Mr. and Mrs. Jack Bell attended the Cotton Bowl football game in Dallas New Years Day between Texas U. and Notre Dame.

Mrs. Lefty Jones, who underwent surgery in Dallas two weeks ago returned home Monday. Mrs. Jones left the hospital and spent a few days with Mr. and Mrs. Johnny Lacy in Mineral Wells, then went to Wichita Falls for a visit with her sister. Mrs. Jones then went on to Kirklane where she visited at the home of her parents. Mr. and Mrs. O. J. Rickman. Mrs. Rickman returned home with her daughter to visit awhile.

Mrs. J. A. Watson spent from Sunday, January 4 until Thursday of last week in Lockney General Hospital, suffering with a severe cold. She reports that she is feeling better now. The Watson's son and his wife, Mr. and Mrs. Verl Watson, have moved to Quitaque from Albany and are living on the Theo Geisler Ranch where the Carl Woods family formerly lived and he is working for B. F. Sammann of Lockney.

Jake Huddleston is back in the hospital in Memphis.

JAMES CATHEY TO RECEIVE 15-YEAR SERVICE PIN

Mr. and Mrs. James Cathey will attend an awards banquet at the Country Club in Lubbock Friday night of this week where Mr. Cathey will receive a 15-Year Pin from Pioneer Natural Gas Company. The Tribune will have more about this in a later issue.

Ann Clements and Paul spent the weekend in Lubbock.

Mr. and Mrs. Leonard Crabb of Silverton visited Mrs. W. W. Cain Sunday afternoon.

Mrs. Bruce Eddleman visited Mrs. Cain Sunday afternoon.

H. S. Gilberts To Observe 50th Anniversary

Mr. and Mrs. H. S. Gilbert of Flomot will observe their 50th wedding anniversary on Sunday, January 25. An informal reception will be had that afternoon in their home. Friends and acquaintances are invited to call between the hours of 2 and 5 p. m.

Mr. and Mrs. Bob Lane, J. H. and Glen of Lockney, and Mr. and Mrs. Wilburn Martin, Marilee and David of Flomot will assist their parents as hosts for the occasion.

ASSIGNMENT TO MADIGAN GENERAL HOSPITAL

Private First Class Michael Lee Baird, USA, was recently assigned and is now on duty at Madigan General Hospital, Tacoma, Washington.

A native of Quitaque, Texas, Pfc. Baird graduated from Quitaque High School and Texas Technological University in Lubbock, receiving a degree in Psychology. After entering the Army on August 1, 1969, he completed basic training at Fort Bliss, Texas and Medical Field Service School at Fort Sam Houston, Texas.

He is the son of Mr. and Mrs. J. B. Baird of Quitaque. PFC's wife, Sarah, resides in Houston.

Mr. and Mrs. Jack Bradley of Dalhart spent weekend before last in Quitaque visiting his mother, Mrs. J. T. Bradley and his sister and her husband Mr. and Mrs. Dick Taylor.

Mrs. W. E. Morrison spent last week with her daughters and their families at Plainview. She accompanied the Leon Lanes of Turkey to her home Friday.

Mrs. Cantrell's Funeral To Be Friday Afternoon

Funeral services for Mrs. Liew Cantrell, 71, who died early Wednesday in the Hall County Hospital at Memphis, will be conducted at the United Methodist Church at Quitaque at 2:00 p. m. Friday. Interment will be in Rest Haven Cemetery.

An obituary will appear in next week's issue of The Tribune.

YOUNG WAYLAND STUDENT IN DESPERATE NEED OF HELP

Sherry Stark, who is a student at Wayland Baptist College, called The Valley Tribune and asked if this newspaper could help publicize the fact that a young man, a student at Wayland is very seriously ill with a kidney disease and to live has two ways of doing this: He must either have a kidney transplant or buy a machine to aid his kidneys, the cost of this machine to be \$60,000.00. General Mills has heard of the plight of this young man and has said if 600,000 coupons are collected of the labels of their products, they will pay for the machine. This must be done real soon. Miss Stark said. She said she thinks this project is going to be publicized nationwide and help will come from all over the country.

Miss Stark said that she will be home this weekend and will appreciate any help that can be given and can furnish information.

Mr. and Mrs. Rayburn White and children of Garden City, Kan., and Mr. and Mrs. Wayne White and children of Ruidoso, N. M. spent the recent holidays with their parents, Mr. and Mrs. J. P. White.

Close Games Spice District Competition

Close, hotly contested games has been the feature of many of the district basketball games the past week.

Quitaque and Turkey tangled in a pair of thrillers at Turkey last Friday night and when the firing was over each school had won a ball game, but the results were just about the opposite of what many fans had sort of figured they would be, for the Pantherettes took a 50 - 47 win over the Turkettes, and the Turks edged the Panthers 60-56.

Both games were very close all way and could have gone either way.

The Turkettes had taken a 13 point decision over the Pantherettes in the Clarendon tournament, but this game was undecided until the final buzzer and no more than five points ever separated the two in the score.

The Turkettes were ahead by two points, 13 - 11 at the end of the first period of play and still held a 27-26 advantage at half-time. Quitaque went ahead 30-29 early in the third period and were never behind again, although the Turkettes tied the score a 41-41 early in the fourth quarter. The Pantherettes led 36-32 at the end of the third quarter.

Jackie Cheatham, who seems to thrive against the toughest teams, fired in 40 points for scoring honors. Sally Case was high for Turkey with 28 points.

Glenna Ramsey scored 7 points for the Pantherettes and Wanda

Ramsey hit for 2 points. Debbie Lane tossed in 13 points for Turkey, Lindy Ham, Lanita Farley and Vicki Ham each scored 2 points.

The boys game was more of same as the Turks and Panthers went at it hammer and tongs.

The Panthers started fast and built up a 13-6 lead midway of the first period only to see the Turks rally to come along and lead 15-14 at the end of the first period. The Turks fashioned a 5 - point margin in the second quarter, only to have the visitors go ahead 31-30 at half-time.

The Panthers put together a spurt in the third quarter and led one time by six points only to see the Turks whittle the margin to a single point, 44-43 at the end of three quarters.

Stanley Price and Gary Chandler shared scoring honors for Quitaque with 16 points each. Perry Brunson scored 12 points, Jerry Merrell, 7, Danny Jones 3, and Scotty Stark 2 points.

For the winners, Mike King hit for 18 for high honors, Rod Adamson scored 17 points, 10 of them free shots and it was his free shooting in the fourth period that provided the winning margin; Rod Setliff scored 14 points, Sam McKay 8 and Dennis King scored 3 points.

Tuesday night the Quitaque teams drove down to Estelline for a pair of games and won both of them, although the Pantherettes had to hang on to take a 41-40 decision over the Bearettes. The

Panthers had no trouble with the Bears, winning 59 - 28 with all hands seeing action.

Jackie Cheatham scored 22 points for the winners, Wanda Ramsey collected 13 points and Glenna Ramsey hit for 6 points.

A very familiar name was the sparkplug for Estelline - Rapp, Jan Rapp scored 23 for the losers. Stanley Price scored 19 points for the winners; Brunson was next with 13.

Turkey was at Matador Tuesday night and once again divided a pair of very close games.

The Turkettes lost another heartbreaker, this one a 44 - 42 decision to Matador. Sally Case scored 25 points for Turkey.

Rod Adamson tossed in 31 points to spark the Turks to a 58-57 win over the Matadors.

The Tuesday win leaves the Turks 2-0 in district play. They are currently tied with Flomot as both are unbeaten district. They will come untied Tuesday night of next week when the two meet at Turkey.

Quitaque goes to Paducah Friday night for a pair of non-district games. Tuesday night of next week Quitaque goes to Matador to wind up the first half of district play.

Turkey hosts Estelline Friday night, then Flomot Tuesday night.

Flomot won the boys game at Estelline last Friday night. The Bearettes won over the Flomot girls. The Tribune did not get a report on the Flomot games, just the results.

W. F. Brittain Seeks Re-election

W. F. (Pat) Brittain of Turkey this week authorized The Valley Tribune to announce that he is a candidate for re-election to the office of Commissioner of Precinct No. 4, Hall County. His candidacy is based upon the outcome of the Democratic Party Primaries.

In making his announcement, Commissioner Brittain made the following statement to the voters of his precinct:

"After giving the matter much thought, I have decided to offer myself to serve my precinct as Commissioner for another term. You are familiar with my record in past years. The experience I have gained has made it possible for me to function in my official capacity in a better way.

"I want to take this opportunity to thank all of you for your votes in the past; especially for your interest and cooperation in solving the problems of our precinct and county.

"In the months to come, I will be contacting most of you, and will welcome your ideas if you will give them to me.

"Meanwhile, give careful consideration to my offer to serve you for another term in this important office.

Respectfully submitted,
W. F. (Pat) Brittain"

DAVID DRISKILL SAW THE BOB HOPE CHRISTMAS SHOW

The Bob Hope Christmas Show which was staged in Da Nang on Christmas Day, was seen by David Driskill, son of Mr. and Mrs. G. P. Driskill, Jr. of Turkey. David is stationed on a tug boat in the harbor at Da Nang. The tug boat has a crew of six, and one ticket was given to the crew and lots were drawn to see who got the ticket, and David was the winner. He reported enjoying the show very much.

Those from out of town who attended the funeral for J. M. Hale included Mr. and Mrs. Keith Rankins, Plainview; Mr. and Mrs. Claude Hickey of Dismitt; Gerald Hickey, and Mrs. A. B. Hickey, Memphis; Mr. and Mrs. Alex Glass, Hereford; and Mr. and Mrs. Cecil Hancock of Borger.

FUNERAL HELD AT BORGER FOR FORMER OBITUARY MAN

Funeral services for Jess E. Love, 57, of Borger, a former resident of Quitaque, who died late Saturday night at North Plains Hospital at Borger, after a long illness, were held Tuesday in the Wesley Methodist Church.

The Rev. Walter G. White, pastor, officiated, assisted by the Rev. Carlton Thompson, pastor of the First United Methodist Church. Burial with Masonic Rites was in West Lawn Memorial Park by Minton Funeral Home.

Mr. Love was born in Jacksboro, attended school in Quitaque. He was a ranch hand for several years in the North Plains area. He was foreman for the Watkins Ranch for a time. In 1944, Mr. Love went to work for the Borger Police Department, and in 1945 became a deputy with the Hutchinson County Sheriff Department and served in that capacity until the time of death.

Mr. Love was a member of the Adobe Walls Masonic Lodge 1355, Eastern Star, 1059, of which he was the past Worthy Patron, a charter member of Hutchinson County Sheriff Posse and was a past president of that organization. He was also a graduate of the Federal Bureau of Investigation School.

Survivors include his wife, Thelma, of the home; one son, Doyle of Borger; a daughter, Mrs. C. R. Lyles of Borger; three brothers, Phillip of Salinas, Calif., O. C. of Albuquerque, N. M., and Bill of Amarillo; four sisters, Mrs. Luther Barrett of Redding, Calif., Mrs. John Renfro of Washington, D. C., Mrs. W. A. Garvin and Mrs. J. R. Browder, both of Amarillo; seven grandchildren, and one great-grandchild.

Ruby Goodnight Announces For Re-election

Ruby Goodnight, of Memphis, Texas, this week authorized The Valley Tribune to announce that she is a candidate for reelection to the office of County and District Clerk of Hall County, subject to the action of the voters in the Democratic Primary. In making her intention known, she submitted the following statement:

"To the Citizens of Hall County, Texas,

"I am announcing to the people of Hall County my candidacy for the office of County and District Clerk. I appreciate the generous support and cooperation I have received during my tenure in this office. I have tried to repay you for this trust by giving the people of Hall County the kind of service they deserve from their County and District Clerk. I sincerely hope my efforts have met with your approval.

"I would appreciate your vote and influence on my behalf in the forthcoming election.

Respectfully,
Ruby Goodnight"

WAYLAND FLYING QUEENS RESCHEDULE GAMES

PLAINVIEW — Hutcherson Flying Queen Coach Harley Redin has announced that the two games with Ranger Junior College originally scheduled January 19 and 20 in Plainview have been rescheduled for February 20 and 21.

The Feb. 20 game is set for 3 p. m. in Estacado Junior High Gym with the Saturday night contest slated for 6:30 in Plainview High Gym as a preliminary to the Wayland Pioneer-Midwestern game at 8 o'clock.

The January 23 game with Ouachita Baptist University has been moved to Estacado Gym and will begin at 8 p. m. The same two teams will meet at 6:30 January 24 in PHS gym before the Pioneers play Wiley College of Marshall in a District 8 NATA contest.

TURKEY INDUSTRIAL COMMITTEE MAKES BUSINESS TRIP TO AUSTIN

The Turkey Industrial Committee had nine of its members in Austin Tuesday for an Industrial School Meeting. Those attending the meeting were Lee Vardy, W. W. Mullin, Billy Fuston, J. T. Mullin, Byron Young, J. B. Tabor, Jess Lipscomb, Jack Lack and U. F. Coker, Jr.

Mr. and Mrs. Johnny Peery and girls visited over the weekend in Seymour with their son and family, Mr. and Mrs. Pete Peery.

Mrs. Joe Husband of Marietta, Okla. is in Turkey this week visiting relatives and friends.

Mr. and Mrs. Pat Brittain were in Plainview Sunday visiting the Jack Kinnikin.

New Arrivals --

Mr. and Mrs. Lee McDonald of Anton are the parents of a new baby daughter, Stacie Lanelle, born Tuesday, December 30, 1969. The newborn weighed 7 lbs., 10 ozs.

Grandparents are Mr. and Mrs. Harvey Blackstone, Enochs, Texas and Mr. and Mrs. Horace McDonald, Quitaque.

Great-grandparents are Mr. and Mrs. T. G. Brown of Moran, and Mr. and Mrs. Ike Reed of Quitaque.

Mr. and Mrs. Rodney Hammons of Clarendon are the parents of a baby daughter, born Wednesday, January 7 at 10:00 a. m. in the Hall County Hospital at Memphis. She weighed 7 lbs., 2 ozs. and has been named Robyn DeAnn.

Maternal grandparents are Mr. and Mrs. H. G. Martin of Tulsa, and Mrs. Allen Matthews is the maternal grandmother.

Any erroneous reflections upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of The Valley Tribune will be gladly corrected upon its being brought to the attention of the publishers.

Hail Suppression Program Studied

An experimental hail suppression study was discussed by representatives of the county extension office, ASCS and SCS in a meeting at the Soil Conservation Service offices here Friday morning.

F. F. (Flip) Calhoun of Plainview, a member of the Texas Water Development Board's weather modification advisory committee, reported on a study conducted by Atmospherics Inc. of Fresno, California.

This was an informal meeting, and no formal action was taken by the panel of agricultural agency representatives who attended.

The study covered nine High Plains counties, including Hockley, Lubbock, Crosby, Lamb, Hale, Floyd, Castro, Swisher and Briscoe.

Calhoun said the study indicated it would be feasible to establish a hail suppression program in the area.

Calhoun is meeting with local Technical Action Panels to sound out interest in implementing a research program in a pilot area. A regional meeting of all interested persons is scheduled January 6 at the Hale County Agricultural Center in Plainview.

The study proposed a research program for a 3,000-square-mile area north and east of a Lubbock-

Plainview line. Cloud seeding would be the hail-suppression technique employed.

"We're not talking about stopping all hailstorms, but evidence indicates we could, with a properly mounted program, anticipate 50 to 70 per cent reduction in hail damage over a target area," Calhoun said.

While the cost would depend on the exact area covered and other details which would have to be completed before the project could be initiated, one research proposal would carry an annual price tag of about \$136,000.

The proposal, Calhoun said, "offers a terrific opportunity to the area." He said the potential cost-benefit ratio "could really be astronomical."

Calhoun said the research program would involve treating every possible hailstorm approaching the target area in a five-month hailstorm period each year. The research program would cover three years.

The study, Calhoun said, showed there are an average of 25 "hailstorm days" a year in the nine-county area.

If the pilot project proved successful, a full-scale operational program could be established. Some of the costs associated with research would be eliminated in an operational-type program.

"This should not be construed as just an agricultural program," Calhoun, a farmer, emphasized. "People in the cities and towns should be every bit as interested as farmers because of the large amount of damage hail does to personal property in this area."

The report by Atmospherics Inc. said estimates indicate hail produces a \$15 million average annual crop loss in a 23-county High Plains area. This figure was based on experiences cited in the study area.

One insurance company office at Plainview was quoted as saying it had paid out more than \$1 million in hail-damage claims in the May-August period this year. This was reported to have represented \$4 in claims for every \$1 of premium payments.

This company's estimate of total claims paid by all agencies in the area on damages from hailstorms on June 10 and June 13 was \$4.5 million, according to the report.

Calhoun said ideas for financing the pilot project will be discussed later if sufficient interest in the program is shown. The TWDB is reported to lack the funds to carry out the research work.

THE FEASIBILITY REPORT
 Hail damage to agricultural property and crops in the Panhandle of Texas has long been recognized as a major influence on the total economy of the state.

Until the past two or three years the potential of hail suppression through artificial nucleation of clouds has not been fully recognized as a feasible method for the modification of this natural phenomenon.

Results for recent research and operational programs have indicated a better understanding of thunderstorm models as well as significant improvements in cloud seeding devices and related application technology.

For these reasons, on March 24, Atmospherics Inc. submitted an unsolicited proposal to the Texas Water Development Board. This proposal called for "A Feasibility Study Concerned with the Development of a Hail Suppression Research Program in Texas."

In general the proposal outlined a study to be conducted in a 3,000 square mile area.

In October, representatives of Atmospherics Inc. with the aid of Calhoun and other Plainview area residents, schools and other sources, conducted the study in the nine-county area which includes Briscoe.

The contract executed called for investigation into areas involving the climatology of the area, accumulated data on hail damage to agricultural and personal property, on-site investigations of the study area, personal interviews throughout the area, compilation of data related to a hail suppression program and to determine approximate costs of a research program and subsequent programs related to both research and operational activities.

November 18, the report was compiled and presented to the TWDB. In the report, Thomas J. Henderson, president of Atmospherics Inc., and Donald Dickering, assistant, who made the "on-site" investigations, stated that under the original goals established for this feasibility study, the total 5,500 square miles of interest was to include approximately six counties, within which a 3,000 square mile area would occupy a principal area of interest for possible

From LeeWards Design Center

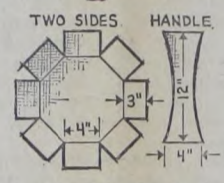

Decorated Burlap Bag

Here's an interesting handicraft project that is easy, fast and most rewarding.

You may even have most of the materials needed in your workbasket. And you can use left over pieces of old knitting yarn for decorative touches.

We have made a most useful and attractive carry-all bag out of burlap. You can use any color or grade of burlap you like, or can substitute some other strong fabric such as tapestry or mohair.

Cut out two pieces of fabric in the shape shown. And

also cut out the piece for the handle.

Put the two side pieces

together by overlapping the tabs. We glued ours, but you

can stitch them together if you prefer.

This can be done by hand, or by turning the bag inside out, on your machine.

Then attach the handle, again by either stitching or gluing. If you glue, be sure that all yarn ends are well covered so that there are no loose ends.

Decorate the sides of your bag with colorful yarn in

circlets, fleurets or even initials. I used scraps of shocking pink, bright orange and bright olive for these touches and it is most attractive.

You can also use ribbon straw for your decorative effects. Most handicraft stores have this material.

If your scrap basket does not have all the items needed, you'll find them, and a lot more, including complete kits, in the catalog put out by LeeWards, the art needlework center of General Mills.

They'll be glad to send you a copy without charge. Just send your name and address to LeeWards, Dept. DF, 840 N. State St., Elgin, Ill. 60120.

hail suppression research.

However, the subsequent on-site investigations revealed a need to expand the total area of interest to include nine counties covering some 8,500 square miles.

The report studying the climate stated that from Lubbock on the south to Tulia on the north, the climate can be described as semi-arid. It is the transitional area between desert conditions on the west and relatively humid climate to the east and southeast.

Temperatures range between a mean daily maximum of 74 degrees F and a mean daily minimum of 44 degrees. Highest temperature on record is about 110 degrees with a record minimum of near -16 degrees.

Temperatures are variable but the greatest changes occur during the winter months when frequent surges of cold air move down from the north. The winter cold periods rarely last longer than two or three days before west and southwest surface winds bring the warming trends.

Summer days are hot but low in humidity and good wind circulation minimize any extended uncomfortable periods.

Precipitation is most frequently the result of summer thunderstorm activities. Like temperature, the monthly and annual precipitation amounts are variable.

Records indicate an annual minimum of less than nine inches to a maximum of nearly 40 inches. Maximum amounts in any 24-hour period have reached seven inches. A few monthly totals have been recorded which are greater than

the record minimum annual amount.

Maximum rainfall usually occurs during May, June and July when the warm moist air flows northward from the Gulf of Mexico. Sixty-five to 70 per cent of the total annual precipitation occurs during the May-September period. The report pointed out the need for hail suppression research in this area.

According to those compiling the report, "In other areas of the United States and abroad, we have found a significant correlation between the months which produce maximum cumulonimbus cloud activity and months which produce maximum hail frequency."

"This does not seem to be the

Helps stop ordinary dandruff

A \$2.98 Value for Only \$2.00

"THE SHOP"

Phone 2951 - Turkey

case in the primary area of interest covered by this report," they stated.

The report related that examination of weather data showed that the months of June, July and August produced the greatest frequency of cumulonimbus cloud activity while the months of April, May and June produced the maximum hail frequency.

"Available data is insufficient to explain which precipitation mechanism might be responsible for hail within a particular regime of cumulonimbus developments.

"In any case, it is obvious that some particular mechanism might be responsible for hailfall in the spring months and is not available during the later summer period even though cumulonimbus activity continues to be persistent," the report stated.

The area northwest of Plainview has a higher hail frequency than any other area in Texas. However, it is only about half the frequency found in the small area of Southeastern Wyoming, Southwestern Nebraska and Northeastern Colorado, the report said.

Pointing to the costs and losses incurred by hailstorms in the study area, the report stated reasonable estimates indicate in the larger 23-county Panhandle area, hail produces a \$15 million average annual crop loss.

In summary, the report stated that investigation has produced a broad spectrum of information related to severity of hailfall and the attitudes of people toward programs designed to modify this phenomenon.

In the first case, the severity of hail within this area is such that hail suppression programs can be designed so apparent results could be identified in a relatively short period of time.

In the second case, general attitudes of the people within the area are ones of impatient acceptance. There is a lot of the "Let's

get moving on something" outlook. However, experience in other areas of the United States and abroad indicates that people's emotion - accomplishment curve suffers some peculiar extremes.

Caution always is advised before plunging ahead with programs which may lack the necessary considerations of "people problems."

"We emphasize again that in this particular area of Texas, the problem appears minimal," the report stated.

In addition to favorable operational features there is a sympathetic academic community within or adjacent to the study area. Supplementing this college and university potential are the agricultural research communities which have expressed interest in hail suppression activities and related cooperative efforts. With resident acceptance, academic cooperation, agricultural research interest and a favorable operational base, the area appears unique for a significant multi-faceted program, the report said.

This report was prepared as phase one of a three-phase program which would include an applied hail suppression research program in the area and, if successful, an operational program.

REPORT OF THE 66th ANNUAL FARMERS UNION CONVENTION HELD AT ABILENE, TEXAS

Mr. and Mrs. Virgil Blakney attended as delegates of the Turkey Farmers Union.

Keynote speaker was the vice-president, Clell Carpenter of Midcontinent Farmers Association. He brought a very informative speech. Midcontinent Association is a good friend of Farmers Union, and Mr. Carpenter said, "Don't think that Farmers Union voices are not heard in the halls of Congress loud and clear!"

He praised Jay Naman, president of Texas Farmers Union, for his strong leadership. He also stated that the Secretary of Agriculture was "shook" when 24 major farm organizations walked into his office and asked for the 1965 Farm Act with improvements. The Secretary of Agriculture was not expecting these organizations to be banded together.

Another speaker was Ray Watson, president of Illinois F. U., who brought a good talk. It was stated that soybeans are \$5.41 per bushel in Japan. "Kind of beats our prices, doesn't it?"

Senator Yarborough challenged us to do a better job. He said the people up North didn't believe him when he stated F. U. originated in Texas because they have a much larger membership than Texas. He also stated the "Big Money Men" don't vote for him because he's for the little guy.

He said, "Farmers are paying 1969 prices and high taxes but are receiving 1942 prices for the farm products sold; also, farmers are paying more interest than it costs them for fuel to operate their farms." He said Texas is the only state in the Cotton Belt that voted Democrat.

Jay Naman says, "Once there was a time when we voted our choice and were represented on local, state and federal levels, but that is no longer true." Representatives and congressmen are now elected by the city vote and we are not represented in Washington.

Mr. Naman predicts that the words "family farm" will not be in the vocabulary of the Agriculture Department. In essence, we must speak for ourselves through

strong organization; hence the need for every farmer to band together with others so our voices can be heard.

We can't afford the luxury of doing nothing; we must be organized to be heard and use every action to preserve our family farm and livelihood. By the year 2000 it will take twice as much food to feed the world as it does today. If we lose our family farms, where will the food come from and what will the prices be?

A lot of business was attended to, including about 35 pages of resolutions, or policy statements, were amended and adopted.

Here are a few policies adopted:

1. That county projected yields be at least 95% of projected yields for the previous year. We were told that the State of Texas was cut 13% across the board in 1969.

2. Recommended stronger bargaining power for farmers.

3. Favor a cotton program that will, at the earliest possible time, support prices on the production of the domestic allotment at 100% parity.

4. Support utilization and marketing research and promotion program for cotton, so long as it is administered by farmers; however, we oppose this if not administered by farmers.

5. We protest the use of micro-naire penalties as a means to lower the price of cotton and recommend that premiums be increased on good "mikes" to compensate for the loss on high and low "mikes."

6. We urge price of cottonseed be raised to 1968 levels.

7. We urge the U. S. Department of Agriculture to conduct a crash program aimed at complete eradication of all cotton insects and diseases.

8. We urge each F. U. local to have a continuing publicity and public relations campaign among their city neighbors designed to: (a) educate consumers, (b) initiate a nationwide publicity campaign to explain F. U. policies, (c) establish committees to refute false and misleading propaganda, and (d) inform the American public of the needs and workings of farm programs.

Texas F. U. favors direct payments and was a leader in the pas-

sage of the 1965 Farm Act, making these payments possible.

We feel that this is a step forward in getting the farmer his rightful share.

The 1965 Farm Act, as extended, established programs for cotton, wheat, feed grains, wool and rice. We strongly favor the acreage allotment in the peanut program, with any changes keeping 100% parity.

We welcome all those to our cause who would join in the fight for the preservation, with dignity, of the family farmer and the rural community.

National Farmers Union Convention will be in Denver, Colorado March 11-14, 1970. There will be a fly-in to Washington January 18, 1970. The Turkey F. U. plans to send a representative as we have in the past.

The Rev. and Mrs. Eddie Burkett and children, Gregory and Kimberly of Plainview visited with Mr. and Mrs. Clayton Bond New Year's Day. They also visited other friends in the Flomot community.

Visiting in the home of Mr. and Mrs. Wilburn Martin of Flomot New Year's Day were Mr. and Mrs. Bob Lane of Lockney and Mr. and Mrs. H. S. Gilbert of Flomot. Visiting with the Martins on Saturday were Mrs. Pace Cramer and Carolyn of Arlington.

Saturday morning, January 3, at 7:00 a.m. the men and boys of the First Baptist Church of Flomot and any friends were served breakfast in the fellowship hall at the church. During the breakfast preliminary plans were made for the upcoming Baptist Mens' Day program.

From The County Agent's Office

COTTONSEED PICTURE LOOKS BLEAK
Weather conditions on the South Plains this summer and fall have

been anything but ideal for producing quality planting seed. Now a good possibility exists that cottonseed of acceptable quality from this year's crop will be in short supply.

"There are two big reasons for this gloomy outlook," says Dr. Bob Metzger, area agronomist with the Texas Agricultural Extension Service. "First, the early freeze resulted in immature seed by stopping lint and seed development in the northern portions of the High Plains. Secondly, the exposure of mature seed to prolonged wet spells in open cotton was equally detrimental."

"While excessive moisture is the main culprit that has brought on seed deterioration, we are fortunate that the temperature was relatively low during these wet periods. Otherwise, the results could have been disastrous."

Early preliminary tests of new-crop cottonseed indicate higher than normal free fatty acid content. Since this type acid is an indicator and by-product of seed deterioration, it may serve as an ominous warning of things to come, the agronomist points out.

A free fatty acid content of one percent or more indicates some degree of deterioration. Such seed will not only be more sensitive in storage but will also be more susceptible to mold growth during germination and to seed decay organisms in the field.

Free fatty acid does not tell us the whole story. But Metzger urges producers to use this test as a preliminary guide for rejecting or keeping a seed lot for planting purposes so that any sub-standard seed can be sold for milling purposes. Also, they should get a germination test as quickly as possible for any seed to be saved for planting.

"Several other points should receive careful attention in preserving seed quality. When harvesting, make sure the cotton is dry. This means removing all green material that carries moisture. About eight percent moisture is desirable for seed cotton. Cotton with a moisture content about 12 percent left on a trailer for even short periods can cause heat and ruin good seed quickly, especially since most seed has had some previous deterioration in the field."

Ginning is another area where steps can be taken to preserve quality. Operating with a tight

seed roll and excessive fan speeds often contribute to mechanical injury of seed. Such seed are more susceptible to further damage when exposed to acid in the delinting process.

Another aspect of seed quality is varietal purity. Variety mixtures can be avoided by ginning in larger lots of 10 bales or more. Seed rolls should be dumped and other equipment cleaned between varieties. Of course, this problem can be solved best with one-

ing and seed treatment operation. "Furthermore, once the seed is in the bag, make sure it's stored in a dry place away from harmful chemicals. We can do nothing to reverse seed deterioration that has already occurred in the field, but close supervision will go a long way toward maintaining our present seed quality."

dream castles

Deep inside each person, where no one can see, stands a dream castle. The nature of it varies according to one's character and personality. An artist may dream of creating a masterpiece—not yet painted—which will inspire many people. Another person may see a vision of how he can make life happier for others.

Everyone must believe in his dream in order to go forward with patience.

Jesus hoped that the world would bear His message through the uneducated fishermen He chose as His close companions. He did not give up His dream that the disciples would carry on His work... even when they argued over places of honor in heaven... or when Peter denied any connection with Him.

His dream came true. Showing courage and faith, this small group of twelve grew through centuries into today's worldwide congregation of millions.

You will find inspiration and help for your dreams of spiritual accomplishment when you attend the church of your choice.

Shirttail Sermon

"Lord, to whom shall we go?" (John 6:68)

When Jesus gave lessons of depth which were difficult to understand and hard to follow, "many of his disciples went back and walked with Him no more." Jesus then asked the twelve, "Will ye also go away?"

Peter answered for them all, "Lord to whom shall we go? Thou hast the words of eternal life. And we believe, and are sure, that thou art that Christ, the Son of the living God."

As the teachings of Jesus sifted men in the long ago, so do they today. As the Master seeks to lift them above their shallowness, as he requires them to walk by faith instead of sight, as he demands devotion and sacrifice, many turn from him. But the words of Peter come ringing across the centuries to arrest and challenge us. If we turn from Jesus, to whom shall we go? Can we find happiness and redemption in this world? In the

philosophies of men? In science? In materialism? In pleasure? No! As Peter confessed by the Sea of Galilee, Jesus only has the words of eternal life. He alone is the Christ, the Son of the living God. He alone can give life meaning and show us the way to the eternal shore.

Don't turn away from the Master! There is none other to whom you can go!
Jack Hutton

ATTEND YOUTH RALLY AT RALLS MONDAY NIGHT

Several members of the Quitaque Assembly of God Church attended a Youth Rally at Ralls Monday night. They were the Rev. and Mrs. James Smith, Mr. and Mrs. Jesse Ray Lambright and son, Rodney, Cecil Rice and son, Zeldon.

HAPPILY WAITING SHOWER HONORS MRS. LAMBRIGHT

Mrs. Jesse Lambright was honored with a Happily Waiting Shower Tuesday afternoon in the home of Mrs. Odie Reagan. A good number attended the shower and several sent gifts who were unable to attend. Guests were served pink cake squares and punch.

Mr. and Mrs. Bill Woods and Mr. and Mrs. Wayne Whittington spent from Friday evening until Monday in Phoenix, Arizona. The Woods visited Mrs. Annie

Gregg and family, and the Whittingtons visited his uncle, J. H. Brummett, and family. Wayne's mother, Mrs. R. D. Whittington of Richmond, Calif. joined them at the home of her brother. They report a fine trip and a most enjoyable visit with relatives and friends.

Will Lyon observed his 82nd birthday anniversary Wednesday of last week. Mr. and Mrs. J. W. Lyon, Jr. of Silverton came down and brought dinner for them that night. Mrs. J. W. Lyon had just returned from a visit in Tennessee and she brought good Tennessee country ham and all the trimmings. Mrs. Glenn Ramsey baked a cake for Mr. Lyon. Mrs. Lyon reports that her husband had a wonderful birthday.

A group of Turkey young people went to Tulia last Saturday, Jan. 10 to attend for a youth meeting. Those attending were Juana Cotton, Dianna Johnson, Doris Yivens, Jon Etto Peery, Leckie Fuston, Denise Lyles, Charmalint Fuston, Connie Ferguson, Merilyn Maxwell, Joan Ferguson, and Doris Ann Yivens. Glenda Cotten of Canyon came down with a group of young people.

Mr. and Mrs. George Johnson drove to Wichita Falls Saturday night where they met the Gary Johnsons for a visit.

Mrs. Homer Lane and Mrs. Mark Lane were in Plainview Friday.

QUITAQUE FHA TO MEET MONDAY, JANUARY 19

The regular meeting of the Quitaque FHA will be held Monday, January 19, at 7:00 p. m.

Guest speaker for the month will be Delene Tyler, who will speak on the topic, "Managing Home and Career". We hope all members will be present for this meeting. The FHA girls have had many interesting activities this past school term, which include the Christmas Party for the three and four year-olds of the community.

We also sent Christmas Cards to the State Hospital in Wichita Falls. The girls donated food and clothing to a needy family of the community, thus making their Christmas much brighter.
— Reporter: Pam Loudermilk

Mr. and Mrs. Bud Bailey visited his mother and sister, Mrs. H. J. Bailey and Mrs. H. B. Pinckard, in Lubbock Sunday.

Mr. and Mrs. Wesley Conway and family of St. John, Kansas visited her mother and sister, Mrs. Gladys Wilson, and Mrs. Ricky Fuston and her family. Mr. and Mrs. Conway also attended a convention in Lubbock over the weekend.

Mrs. Migdon Cox of Dora, N. M. visited her parents, Mr. and Mrs. R. F. Pepper last week.

Mr. and Mrs. Leland Pinkerton and family of Lubbock visited his mother, Mrs. Vera Pinkerton over the weekend.

Mr. and Mrs. Doc Williams, Mr. and Mrs. Jim Majors, and Mrs. W. A. Majors spent the weekend in Vernon with Mr. and Mrs. Ernie Rogers.

Mr. and Mrs. Danny Holland and baby of Lubbock visited his parents, Mr. and Mrs. Mutt Holland over the weekend.

Mr. and Mrs. Bob Young of Vermillion, Ohio visited over the holidays with the Leroy Stones.

Sunday visitors at the Leroy Stone home were Mrs. Ellia Kindle, Mrs. Dorsie Smith, and Mrs. Tom Smith of Childress and Mrs. Sam Stone of Turkey.

Mrs. M. T. Blume spent the recent holidays in Houston with her son and family, Mr. and Mrs. David Blume.

Mrs. H. Gipson of Amarillo returned home Thursday of last week to her home after visiting with her mother, Mrs. Fred Lacy.

Mrs. Birt Lane of Plainview visited Monday in Turkey with his parents, Mr. and Mrs. Leon Lane.

Texas Grain Sorghum Producers Board to Establish Advisory Groups

The Texas Grain Sorghum Producers Board has asked the assistance of the Texas Agricultural Extension Service in its effort to establish an advisory committee in the 29-county High Plains area.

The committee was proposed by the TGSPB immediately after the Board members were elected in early October in order to give the Board broader representation and to develop a closer working relationship between the Board and local producers.

Extension Service District Agricultural Agents Billy C. Gunter of Lubbock and W. W. Grisham, Jr., of Amarillo pointed out that

they would encourage all county agricultural agents in the 29 counties to consult with their County Program Building Committees on the appointment of advisors to the TGSPB.

"It is hoped that the Crops Subcommittee of each county Program Building Committee will select one producer as an advisor," said Gunter and Grisham. "This individual would then serve in an advisory capacity from that particular county to the 12-man Board. We would also encourage the Crops Subcommittee to invite a representative of the Board to present an annual report and discuss other matters involving the TGSPB."

K. B. Parish of Springlake, chairman of the Board, in explaining the advisory committee pointed out, "This program is for farmers, directed by farmers, and we feel this committee will play an active and important role in our administration of research and market development. We want to assure each grain farmer that his investment will work to give the best possible return."

The TGSPB was formed following the passage of a referendum for assessing five cents per ton on grain sorghum produced in the area. These funds will be used in programs of research, disease and insect control, education and promotion designed to encourage efficient production, marketing and use of grain sorghum. This program is designed to ultimately improve the net income position of grain farmers.

The Board is made up of area producers elected to the responsibility of administering these funds for programs which it believes most vital to grain sorghum producers on the High Plains.

HARRY BARNHILL HEADS NEW BANK IN TARRANT COUNTY

The Bank of Crowley, capitalized at \$300,000, opened for business Monday at 121 Texas St. in Crowley. It is the 35th bank in Tarrant County.

Chairman of the Board of Directors and President is Harry E. Barnhill. He has been in the banking business for 18 years, and formerly was president of Peoples State Bank of Turkey.

Also serving on the Board are W. C. Hampton, Sidney H. Poynter, Charles Sewell, Herby Balley and Arnold Haley, all of Crowley, and Charles A. Fischer, of Fort Worth.

FIRE TOLL IN A SINGLE DAY 21 DEATHS	COMPENSATION - FIRE INJURIES \$2,465,000	PROPERTY DAMAGE \$5,000,000
---	--	---------------------------------------

MEDICINE'S CONTRIBUTION FIGHTING BURN SHOCK AND AIDING RECOVERY	MAJOR ADVANCES IN SKIN GRAFTS	NEW "MIRACLE" DRESSINGS A BURN IS AN OPEN WOUND!
---	--------------------------------------	--

Between sunset today and sunset tomorrow, 21 persons will lose their lives in fires. Last year, fires killed 7,500 persons in the United States.

Financial costs, too, are astronomical. More than \$900 million was paid to men and women through workmen's compensation last year for fire-caused injuries and loss of pay.

Property losses due to fire damage are increasing. Five years ago, such damage amounted to about \$3,835,000 per day. Last year, property losses totaled more than \$5 million per day.

Fortunately, and in spite of a greater population and greater fire damage, there is a decrease in loss of life due to fires. Many attribute this to improved medical knowledge, facilities, and techniques of care in severe burn cases.

"Perhaps the most encouraging thing in the fight to save lives endangered by burns is the rapidly-increasing ability of doctors and hospitals to cope with even the most serious cases," said W. O. Elson, medical research director, Health Care division, Kendall Company.

New Ways to Fight Burns
"Prior to 1941," Elson reported, "burns were treated with tannic acid, chemical dyes, ointments, and salves. Today, we realize that the greatest danger of all in most burn cases is infection. Doctors today will treat burns as open wounds; that is, they protect them in every possible way against infection. Many hospitals have special 'burn teams' and 'burn wards'."

But the best defense of all against burns is eternal vigilance in halting fires, points out the National Fire Protection Association and the National Safety Council.

"Also, the Kendall Company and other makers of hospital and consumer health supplies have made enormous strides in the dressings and bandages they now have available to fight burn-damage," Elson continued.

"One of these is the 'ouch-less dressing' called 'Telfa,' which can be applied directly to a burn or other open wound. Telfa dressings are covered with a thin, perforated, layer of plastic — which permits the wound to breathe and allows free drainage, without itself sticking to the wound."

"Such bandages can be removed or changed without breaking open the healing skin, or without causing new pain," Elson concluded.

Skin-Grafts Save Lives
The scientist also pointed out that another of medicine's major advances in the treatment of burn injuries is in the field of skin-grafting. The progress made in the replacement of burned skin — often saves lives, and even more frequently, avoids massive scarring and other cosmetic damage.

But the best defense of all against burns is eternal vigilance in halting fires, points out the National Fire Protection Association and the National Safety Council.

Grapefruit is a great breakfast beginner.

Chilled halves of this delightful fruit perk up the appetite and at the same time provide vitamin C—the vitamin which is needed daily because it is not stored in the body.

Grapefruit supplies are large this year, according to the U. S. Department of Agriculture. Florida's production is down from a year ago, but much of the decline is in the seeded varieties which are used mostly in processing. The Texas crop is expected to be the largest in 20 years.

USDA's Consumer and Marketing Service reports plentiful supplies of grapefruit during January, so serve this citrus treat often to your family.

FRUIT - MEAT SALAD
1/2 medium head lettuce
1 medium grapefruit
1 medium orange
1 cup cut-up canned chopped meat

or canned luncheon meat

1 stalk celery
Salt and pepper
Sugar, to taste
Salad dressing

Tear lettuce into bite-sized pieces. Put into large bowl. Peel and section grapefruit and orange. Add grapefruit sections, orange sections and meat to lettuce. Cut up celery and add to salad. Add salt, pepper, sugar, to taste. Mix in your favorite salad dressing. Makes 6 servings, 1 cup each.

The poinsettia is the favorite Christmas flower. While usually considered because of its Christmas colors of red and green, many are now available having pink or white bracts.

The poinsettia flower is very inconspicuous; it is the colorful bracts or modified leaves just below the flower that are noticed. For longer lasting plants, select one having bracts which are large and well colored, and one on which the small flower at the tip is just starting to open. Open flowers and shedding pollen are indications of mature plants which may not hold up through the holiday season. Poinsettias are subject to cold damage so to prolong their usefulness keep the plants out of drafts and away from opening doors to prevent sudden temperature changes. Do not place in the discharge blast of the circulating air furnaces as it will dry them out rapidly.

Poinsettias require ample moisture and frequently shed their leaves if allowed to dry out. How-

ever excessive moisture can cause a similar damage. Any water standing in the tray beneath the pot should be emptied after each watering. Water-logged soil damages the roots and shortens the life of the plant.

Keep out of reach of children. One leaf eaten can kill a child.

For the individual who has everything, a potted plant for the office or home will make a delightful gift and one that will be appreciated for a considerable period of time.

While poinsettias are usually first choice as Christmas plants, for something different you might consider the kalanchoe, erusalem Cherry, or Christmas begonia.

A few handy tips on the care of these other Christmas flowers are given below:

Kalanchoe—Keep this plant in a sunny window. This plant flowers when the days are short consequently they are difficult to re-flower in the home if carried over for another year. Lights used in the home provide long days and plants fail to set flower buds. They do make excellent foliage plants once the flowers are faded. Just remove the flower stalk and use as a foliage plant.

Christmas begonia—This plant will continue to bloom for several

months if you select one that has very few open flowers. Don't allow the soil to become completely dry or the flowers won't last. Keep the plant in a cool room near a sunny window.

Cyclaman—For a long flower life place the plant in a cool room at night. This plant is difficult to reflower and requires greenhouse conditions to do so.
