OIL ACTIVITY IN AND AROUND

CRYSTAL FALLS, Tex., July 2 This city does not believe that Italy's * rest offer to take all available American coal * * * * * * * * * * * * at \$50 a ton will cause it to go coalless this winter, even if natural gas in uncured, for the entire Crystal Falls coun- erty Cafe. try is underlaid with a deep strata of coal, pronounced as good as any that comes from the Thurber mines. There is such an abundance of coal in this region that in many places at crops out of the hills, in the small branches and even in the bottom of Clear Flork river.

Many years ago the Jack Wiser mine one mile west of town was worked for fuel, which was used in gins, mills and burned in homes throughout Stephens The Sloan mines were also worked. Nearly all the fue! used by the county at the court house and in its other branches came from the improvisedly worked mines in the Crystal Falls territory. However, the mines were abandoned several years ago because of the roughness of roads and the facility with which coal could be obtained from Thurber by rail.

It was stated to a representative of the West Texas Chamber of Commerce that seventeen feet strata of coal were found at a depth of 300 to 315 feet in all of the more than 50 wells which are being drilled or have been drilled in this territory, thereby indicating the richness and extent of this great coal field, from which ne coal is now being taken, except by a few local families to keep them comfortable during the wintery days.

The coal fields of this section in time will become one of the greatest assets of this section. Development will come with the railroads which are now projected toward this region. The coal mines will probably be more extensive than any others in the Southwest. In fact, it is believed this entire country is one vast cost reserve.

THE WISE SHOPPER WILL

The average person is now of the belief that merchandise will be lower as fall approaches, and, therefore, is waiting until then to make their purchases. This is all wrong, as these people will find to their sorrow when fall arrives and they find prices higher than now. The wholesale prices will have to drop before merchandise can be sold at lower prices than now-and all indications point to higher prices instead of lower. Why wait to buy? Slashing reductions have been made on every article in this great sale, and you can save much money by buying now. Do not delay-come in here tomorrow and make these savings while it is possible.

Brewing Schlitz -An Exact Science

CHLITZ cannot be made in a day or a week. Months Sare required for its proper aging, in order that it may not offend your stomach.

From 1660, when the Dutch scientist, Leeuwenhoek, was first to examine fermentation under a microscope, through over a hundred years of experiment, when scientists 'emonstrated that fermentation results from vegetable activity, to Pasteur who originated the accepted process of sterilization to kill ferments after their work was complete, the brewing of a cereal beverage has been the creation of science.

You who savor the smoothness, the tang, the delicious flavor of Schlitz do not realize the vast work of chemistry and biology which lies behind this master brew.

No "two-day" beverage, no "green" drink, no "experiment in velocity" yields flavor and purity equal to Schlitz. Such beverages, rushed through to meet a hurried demand, will set your stomach churning, cause flatulence and indigestion.

Avoid these interior discomforts; drink Schlitz. For Schlitz is fully fermented, aged, and brewed scientifically.

in Brown Bottles

On sale wherever drinks are sold. Or, order a case for your home from

A Pleasant Retreat at Which to Eat

THIS place is becoming popular, because the food is so extremely tasty and enjoyable—yet, those who come here tell us that there are various other attractions almost as compelling as the food. The pleasant surroundings, the orchestra music, environment, the alert courtesy of our attendants, the immaculate napery, cutlery and china, the association with people of refined discrimination, the freedom from summer heat and kitchen odors, are all factors that make it an inducement for families to forego summer cooking at home.

You'll appreciate the good food and service you'll find here at reasonable

One Thousand Legacy Hidden for 14 Years Is Found in Garret

International News Service

ROCKAWAY, N. Y., July 1—A touching scene was laid fourteen years ago in the old Abrams homestead in Ocean avenue, East Rockaway, when, her children gathered around her, Jane Ann Abrams died. Beckening her oldest daughter to her side, she whispered: "In the attic—some money—under the —" and then she sank back into the pillows dead.

The daughter was Mrs. Charles Smith.

She and her husband inherited the old house and have lived in it ever since. They often searched the attic, but in vain, and finally decided the money must have been a myth.

Here's the story:

Miss Butler starter.

Royal George, her put in T. J. Kitchin, a she was to have been the liner she decided

The roof leaked this spring, and ow ing to the high cost of labor, Smith decided to repair it. While at work recently he suddenly called to his wife

Under the shingles, wedged in tightly between the rafters and the chimney, he had found a tin box. In it was a canvas "shot bag." He brought it down and emptied it on the front porch. It was a little shower of gold coins—fives. tens and twenties. The Smiths counted exactly \$1000.

CHOPS AND STOCK IN FOARD COUNTY ESTIMATED AS GREAT

Special to The News.

CROWELL, Tex., July 2.—The estimated production of farm crops for Foard county for 1919 and 1920, as fur mished today to the West Texas Chamber of Commerce is as follows:

Wheat 1,500,000 bushels and 1,000,000 bushels; oats 120,000 bushels and 480,000 bushels; corn 6000 bushels and 6000 bushels; maize 2500 tons and 2500 tons; cotion 9000 bales and 20,000 bales. The first of each series of figures is for 1919 and the second 1920.

There are 402,000 acres in Foard county with only 120,000 acres in cultivation.

Over 120,000 acres in fallow this year due to lack of labor to work the land. All this land is susceptible to cultivation at small expense.

The raising of registered live stock in Foard county is one of the principal vocations. There are at least ten registered hog breeders in the county and as many registered cattle breeders. The boys' hog club with a membership of 66 has registered Poland Chinas of the big bone type. Recently Dr. Hill purchased 30 head of registered Hereford bulls from a Kansas breeder and will use them for his herd here.

A new invention for motorists is a attachment to the gasoline tank whice whistles when the supply is getting low

Cupid's Job Poor; Girl Jilts Lover and Returns to Parents

International News Service.

NEW YORK, July 2. — Dan Cupid pulls some queer turns every once in in a while. One of his latest jobs is considered peorly done by Canadian authorities and officials of the United States have concurred in their decision.

States have concurred in their decision.

And as a result Captain Paul Miller,
English army officer, and Miss Nell Butler of Manchester, England, have returned to their native soil.

Meanwhile Captain T. J. Kitchin, Canadian become the jilted lover,

Miss Butler started for Halifax on the Royal George, her passage paid by Captain T. J. Kitchin, a Canadian, to whom she was to have been married. Aboard the liner she decided to become the wife of her fellow passenger, Captain Miller Captain Kitchin acquiesced, but the Canadian immigration authorities said she would have to live up to the origin

At the examination it was brought out that from Halifax to New York she was a "paid" passenger and therefore had some claim to admission to the United States ,whereas she would have been automatically barred as a deportee had, she not paid her passage but depended on the Cunard Line to transport her in accordance with the law's requirements in the cases of deportees.

However, the board decided this was an inconsequential detail, so they sailed.

WOMEN HAVE C. OF C. BRANCH IN DES MOINES ORGANIZATION

Associated Press,
DES MOINES, Iowa, July 2.—As a
complete unit of the Des Moines Chamber of Commerce a department of women's affairs has ben organized and now
has about 325 business women as members. It is said here to be the first
organization of its kind so affiliated
with a chamber of commerce in the
United States.

The women are represented on the council of members of the chamber. They have their own separate meeting day for business matters and have their own boards and committees. So far there are three general subdivisions for the women—public affairs, business affairs and organization affairs. There are also divisions according to occupations, among the classifications being industries, insurance, doctors, lawyers, teachers, banking, etc.

Several general meetings and numerous committee metings already have been held by the women. Miss Luella Clark, connected with an insurance company, is chairman of the new departSATURDAY
