THE CISCO DAILY PRESS

Combined With Cisco Daily News and Cisco American and Round-Up November 1, 1937

In an area of beautiful, benevolent climate, at ideal altitude, blessed with an abundance of the purest, soft lake water, possessing the best in recreational facilities, situated on the Bankhead, all-weather transcontinental route, with two railroads and many highways, Cisco is the best place in Texas to live and to work.

VOLUME XVIII.

CISCO, TEXAS, SUNDAY, FEBRUARY 20, 1938

NUMBER 168

NEW LOCATION SELECTED FOR STOCK SHOW

Through the Editor's Spectacles
By GEORGE

"Pencil-Farmer No. 1" and the three "Pencil-Farmerettes" arrived in town Saturday to spend a short week-end with friends. "Pencil-Farmer No. 1," for the information of those who have never become acquainted with this treasured genius of agricultural science, is E. H. Varnell. The three "Pencil-Farmerettes" are Mrs. Varnell and Mary Evelyn, 12, and Janice, 3. They are spending the time here as guests of Mr. and Mrs. R. N. Cluck, and visiting among the numerous friends that they acquired while Varnell was vocational agriculture instructor at Cisco high school.

Several years ago he moved up to a position with the soil conservation service of the United States department of agriculture and since that time has been in charge of the great Duck Creek conservation project with headquarters at Garland.

Varnell, noted for his gadgets, his mediocre golf and his worse crappie fishing, has a kindly disposition which quite belies his efficiency in getting things done.

He is really one of the finest fellows in the world and it sort of brings back old times to see his grin again.

Rennie is no more. The saucy little brown spitz that for a number of years had been a member of the J. D. Lauderdale family met his fate the other day by the brute strength and slashing fangs of a German police dog. He crawled home, frightfully torn, and died the next day.

Rennie, a pert little creature, grown grayish with his years, was as devoted to his master, Jack, as the family was devoted to him. I don't believe he ever did a wrong. His only error was that he thought the world was a place to live in and be free. He found out that mistake too late when he met the police dog. Perhaps a lot of us humans are making the same mistake.

The majority of best advised opinion here holds that the cold wave of Thursday and Friday did little damage to fruit. Blooms pinched from the trees Saturday at noon showed the buds still green, rather than brownish-black as they would be if the frost had killed them. Some damage was done, of course, but probably not enough to seriously curtail the crop.

Loboes Lose to Cross Plains in Tournament

The Cisco Loboes were eliminated from the District League basketball tournament at Breckenridge in the second game Saturday morning at 9 o'clock. Cross Plains defeated the Loboes 18 to 12 in a set-to in which a second half slump on the part of the Cisco team featured. The Cisco five scored only two points in that half.

Friday night the Loboes defeated Weibert 26 to 19 in the first round.

HOPES FOR FDR VISIT

AUSTIN, Feb. 19 (AP)—Governor Allred, returned from Washington, said today that he had hopes that President Roosevelt will visit Texas next summer.

Weather

East Texas: Sunday fair and warmer.
West Texas: Sunday partly cloudy and warmer.

BELIEVE LOSS OF FRUIT BY COLD SLIGHT

Wet Freeze Helps to Protect Blooms from Temperature

Consensus of agricultural opinion here following Thursday's and Friday's cold wave, was that the low temperatures had not done serious damage to fruit crops. Although the thermometer at one time dropped to 25 degrees above zero, the rain and mist provided a protective coating of ice that was believed to have resisted the destructive influence of the cold to such a degree that most of the new blossoms were saved.

Examination of blooming trees Saturday did not show damage to the buds, it was said. The extent of any damage, however, could not be determined until the influence of the cold had had time to reveal itself on the blossoms.

Low point of the freeze was reached at 10 o'clock Friday morning when temperatures dropped to 25 degrees. From that point, however, it began a rise and fell only to 30 early Saturday morning. Late Saturday afternoon it was 42 degrees. Rising temperatures were promised for Sunday.

RELIEF FROM COLD AND FLOODS

Clear skies and rising temperature Saturday cheered Texans besieged by several days rain that sent streams out of their banks, interrupted rail and highway traffic, evicting many bottomland families from their homes. Many low areas remained flooded today, but most of the main highways were opened. The only reported flood death was that of Buddy Ramsey, a cowhand who fell from his horse into the swirling water near Carrollton. The Red River north of Denison was down to 16 feet today.

Insurgents Begin Teruel Encirclement

HENDAYE, France, Feb. 19 (AP)—Spanish insurgents officially announced today that the encirclement of Teruel in their South Aragon offensive had begun Thursday. They said that a vast quantity of arms and ammunition had been seized and a large number of prisoners taken.

Insurgents said that they had "intimations" from the garrison of 2,000 that they would like to discuss terms for the surrender of Teruel.

Charges Union Head Approved Terrorism

PORTLAND, Ore., Feb. 19 (AP)—Detective Captain John Keegan said today that James R. Scott, 30, business agent for the AFL warehousemen's union, had signed a statement alleging that certain acts of labor terrorism were approved by A. I. Rosser, AFL teamsters union chieftain here, before they were committed.

Big Bend Reptiles Sent to Washington

SANTA FE, N. M., Feb. 19—Specimens of snakes, frogs, lizards and turtles from the proposed Big Bend park area of Texas have been sent to the permanent reptile collection of the National museum at Washington.

Among the 50 specimens of reptiles and amphibians were three types of rattlesnakes, blind, garter, chicken, bull, red, and black racers, regal ringnecked and copper-head snakes.

Destroyers in Full Dress Drill

With the attention of the entire world centered on new armaments, Uncle Sam sends five of his newest destroyers churning through Pacific waters, as shown above, serving notice that America can protect her own. The new vessels, most modern in design and equipment, look grim as though bound on a belligerent mission. Actually, they are engaging in annual practice maneuvers off the west coast.

Crisis Created by Gestures to Italy

LONDON, Feb. 19 (AP)—The British cabinet today struggled in an urgent session with the widely reported crisis between Premier Neville Chamberlain and Foreign Secretary Anthony Eden over Chamberlain's new friendship gestures to Italy. Some diplomatic quarters were advised that Eden threatened to bolt the government if Chamberlain sacrificed Eden's League of Nations ideals for a quick bargain with Mussolini.

TEST OF NEW BOMB ADVISED

Terrible Effect Is Claimed

WASHINGTON, Feb. 19 (AP)—Chairman Vinson, of the house naval committee, today suggested using part of the \$15,000,000 experimental fund to test the mysterious new "aerial bomb" which the inventor said would revolutionize the United States' defenses. Lester P. Barlow, the inventor, said the new bombs dropped from tremendous heights would "blanket" an area 10 miles square in four minutes and cripple battleships by destroying auxiliary ships supplying larger vessels.

Sanford to Be New Scoutmaster

Bob Sanford will assume his duties as scoutmaster of Boy Scout Troop No. 4, which meets at the First Methodist church, within the next three weeks, following resignation of E. L. Hazlewood.

Sanford has been meeting with the troop and will visit the troops of Ernest Hittson at the First Presbyterian church and John at the First Baptist church before taking over the direction of Troop 4, he said.

LEADER DIES

FORT STOCKTON, Feb. 19 (AP)—Henry M. Long, 63, business, religious and civic leader of west Texas, died Thursday night. He will be buried here tomorrow. He entered the Methodist ministry at Glenrose in 1899. He served churches at Hico, Stephenville, Fort Worth, Cleburne and Vernon.

Post Office to Close on Tuesday

The Cisco post office will be closed all day Tuesday in observance of Washington's birthday, it was announced by Postmaster L. H. McCrea.

GUN ACCIDENT KILLS DOTHAN MAN SATURDAY

Jack Moudy, Half-Brother of Arch Bint Is Found Dead

Jack Moudy, 51, prominent farmer of the Dothan community and a half brother of County Comm'r Arch Bint, was found shot to death about 6 o'clock Saturday afternoon near his home at Dothan. A charge from a shotgun with which he had been hunting struck him in the left breast as the gun discharged while he was crawling through a fence.

The body was found by one of the younger sons of W. B. Starr of the Van Horn community who was on his way to Dothan. It lay not far from the road.

The body was brought to Green Funeral home at Cisco where it is being prepared for burial. Funeral arrangements had not been made Saturday night.

Mr. Moudy, who made his home with his mother, Mrs. B. F. Moudy, had lived in the Dothan community practically all his life.

Survivors include his mother, a sister, Mrs. Joe White of California, and Mr. Bint.

Three Listed as Dead in Storm Reported Alive

RODESSA, La., Feb. 19 (AP)—Sam Goldman, chairman of the Caddo parish chapter of the Red Cross, said today that three persons reported dead in Thursday night's tornado here were reported alive today. The mangled condition of bodies and duplication of identities may cause one or more names to be deleted from the list of dead, but Goldman estimated that the death toll was between 20 and 25.

Boy Scouts and state police searched the adjacent low wooded area today for additional bodies. Goldman said more than 75 were homeless. Meanwhile workers began replacing the destroyed homes and buildings.

Rescuers still were digging into the splintered wreckage along Supply Street, which bore the brunt of the terrific blow, when trucks laden with lumber rumbled into the stricken area and workers set about replacing the destroyed houses and buildings.

Almost as soon as debris was cleared away crews began laying the framework for the new structures.

WPA Labor State WPA administrator James H. Crutcher sent cheering word that the federal agency would provide labor for the rehabilitation work.

The disaster area was closely patrolled by Louisiana state police under the direction of Assistant Supt. Murphy Roden of Shreveport.

Keep Curious Away They kept curious sightseers away, cleared highways for the steady flow of trucks and protected the personal belongings of the victims.

Inhabitants of the area—those who were able—returned to their collapsed homes to recover what they could. They stacked their possessions neatly in front of their shattered houses and discussed plans for rebuilding. Their hearts were heavy but their spirit strong.

Searchers who dug into the storm-made bog Friday night found no additional victims and expressed relief the death toll would run no higher.

Property damage was estimated as high as \$500,000, including the destruction of seven oil derricks which were blown to the ground. Work in the huge Rodessa field was curtailed as oil companies assigned their crews to the rehabilitation work.

Victims of "Living Death"

These young women, all believed slowly dying of radium poisoning, heard Mrs. Catherine Donohue, who worked with them in a plant of the Radium Watch Dial Co., describe at an Illinois Industrial Compensation hearing at Ottawa the "living death" that doctors say is certain to kill her. Fourteen women are seeking compensation. Nine already have died. The women pictured above, who were to be questioned during the hearing, are Frances O'Connell, Margaret Glacinski, Helen Munch and Marie Rossiter.

Cluck Re-Elected Teachers President

R. N. Cluck, superintendent of Cisco public schools, was re-elected president of the Eastland County Teachers association Saturday in a session at Eastland which witnessed adoption of a new constitution to enable affiliation with the Texas State Teachers association.

H. D. Thomason, superintendent of Carbon schools, was elected first vice president; Cleo Powell, principal of Ranger high school, second vice president; Miss Lois Lowery of Gorman, secretary, and Guy T. Smith, Colony principal, treasurer.

Delegates to represent the Eastland county association at the district meeting of the state association, were named as P. B. Little, Eastland superintendent; A. C. Bradley, principal of Cisco west ward, and W. T. Walton, superintendent of Ranger public schools.

The next meeting of the county association will be held late this spring. About 300 teachers attended the session Saturday.

COTTON WOULD GET VAST SUM

Quarter Million for Compliance

WASHINGTON, Feb. 19 (AP)—Compliance with the administration's new farm program, officials estimated today, would put about a quarter of a billion dollars subsidy payments into the pockets of the nation's cotton farmers. If the growers plant no more than the 26,300,000 acres Secretary Wallace allotted to crops and observe other conditions, they would be eligible to receive between 110 and \$130,000,000 from the half billion dollars authorized for the general farm program. They also would receive \$130,000,000 in price-adjustment payments on cotton produced last year.

New Minister Makes Residence Here

Cisco Church of Christ Sunday welcomes to its pulpit W. M. McFarland, its new minister, who moved to the city last week from Rising Star, where he had been serving that congregation since September, 1936. He is making his home at 1701 D avenue.

The new minister is a native of Bartlett, Williamson county, Texas. He is the son of Mr. and Mrs. W. H. McFarland, who are now residing at Littlefield. On graduating from high school, Mr. McFarland was awarded a scholarship at Abilene Christian college. In continuing his education, he attended Texas Technological school at Lubbock. He has studied Baptist theology under Dr. William Francis Fry, formerly head of the Bible department of Hardin-Simmons university; he studied for a short time under Dr. John L. Power, the late lamented rector emeritus of St. John's Episcopal church of Brownwood; and is now continuing his studies in a Presbyterian school. During his ministry, Mr. McFarland has served in many towns of Texas, his chief work being done among the cities on the plains near Lubbock.

45 DIE IN SNOWSLIDES

TOKYO, Feb. 19 (AP)—Snow avalanches on Saghalien island today caused the deaths of 45 persons. Eleven fishermen's houses were buried.

LOT IN FRONT OF CITY HALL WILL BE USED

Exhibits to Be Open Next Friday and Saturday

The Eastland County Livestock show will be held this year on the vacant lot adjoining the Mancill building across Seventh street from the city hall, it was announced today. Sheds already existing there will be utilized for building the stalls in which the entries will be housed. T. G. Caudle, agricultural secretary of the chamber of commerce and superintendent of the fair, said. These will form excellent accommodations for the animals, he said.

Indications are that the show will draw entries from a wider range of territory than was the case last year. The beef and dairy cattle and sheep sections are expected to be particularly interesting.

The new location of the show is also due to enhance attendance. Plans for entertainment during the show, which will open Friday, February 25, and continue through Saturday, are being made.

Arrangements are in charge of a committee selected by the chamber of commerce and consisting of Dr. F. E. Clark, Sutton Crofts, S. E. Hittson and G. P. Mitham, Jr. Mitham will serve as superintendent of the beef cattle section; F. E. Harrell of the sheep and goats; Will Poe of the hogs and Clarence Dill of the Future Farmer dairy cattle division.

Judging will be done by R. M. Milhollin of San Angelo and Leon Ransom, assistant county agent of Taylor county. The judging will start promptly at 2 o'clock Friday afternoon, with sheep, goats and hogs first. Beef and dairy cattle will be judged Saturday afternoon at 2 o'clock. All animals

(CONTINUED ON PAGE EIGHT)

10,000 Gallons of Acid Placed in Donovan

The Hickok Donovan No. 1, testing the Ellenberger lime in the district a mile and half south of the same company's Van Parmer No. 1 discovery well, late Saturday was cleaning out after a second acid treatment with 10,000 gallons. Total depth of the well is 4,280 feet. An initial treatment with 1,000 gallons failed to increase the showing.

If the acid fails to develop commercial production and does not go into the water, it is probable the well will be drilled deeper. The Lone Star Gas company was rigging up for its Van Parmer No. 2, offsetting the Hickok Van Parmer Ellenberger discovery well northwest of Cisco about 8 miles. This well is located in the north half of Section 447, SPRR survey, 600 feet from the west line and 662 feet from the south line. It is 1321 feet west of the Hickok Van Parmer.

The same company was drilling around 3100 feet in its Thomas, also an offset to the Hickok Van Parmer.

The Lone Star Van Parmer No. 1, gas well, being deepened to the Ellenberger and 800 feet west of the company's Cozart, deepened for Ellenberger production gauged at 288 barrels daily, was shut down for repairs.

The Chastain et al Weddington well on the north lack shore, three and a half miles northwest of Cisco, which was plugged back to the Caddo lime in an effort to complete for oil, has drilled out plug and was going back to the lower Ranger to complete for gas. The well was drilling at 3450 feet.

Woman Directs Fossil Excavations

CANYON, Feb. 19—Mrs. C. Sturt Johnston, one of the few women paleontologists in this area, is directing the excavation of fossil beds in the Texas panhandle, sponsored by the Works Progress Administration.

The specimens obtained will be exhibited at the west Texas museum here. Mrs. J. A. Hill is painting the backgrounds for exhibit cases for housing the fossils.

2,491 Cars of Eggs and Poultry Shipped

AUSTIN, Feb. 19 (Sp.)—Rail shipments of poultry and eggs from Texas to interstate points totaled 2,491 cars in 1937, compared with 2,206 cars in 1936 and the depression low of 1,814 cars in 1935, the University of Texas bureau of business research has reported.

In 1937 a total of 687 cars of chickens were shipped out of the state by rail compared with 454 cars the year before, an increase of 51 per cent; while the corresponding figures for turkeys were 1,366

cars and 1,158 cars respectively, an increase of 18 per cent in 1937 over 1936.

Interstate rail shipments of eggs from Texas amounted to only 436 cars compared with 598 cars in 1936, a decline of 27 per cent. Receipts of eggs from other states by rail during 1937 totaled 160 cars, almost identical to the 162 cars brought in during 1936.

Texas poultry and eggs were widely distributed over the country, reaching 35 states and the District of Columbia.

Galileo demonstrated in 1632 that the earth revolved around the sun.

Man Has Been Hunting Cool Spots Ever Since the Dawn of History

When the mercury starts climbing, both men and beast hunt a shady spot.

They've been doing it for many centuries.

Rumor hath it that the caveman went so far as to douse perishable foods in cool streams of water in an attempt to preserve his next meal from the ravages of Old Sol.

Which leads up to the fact that modern electric refrigeration is a far cry from the first recorded cooling system, tried out by the ancient Greeks and Egyptians before the birth of Christ.

According to O. J. Russell, local manager for the West Texas Utilities company, the first refrigeration was accomplished by filling shallow earthen dishes with water and covering them with sugar cane. This crude apparatus was then placed on a roof, where, exposed to the air currents or fanned by slaves, some of the water was evaporated during the night and with it went some of the heat. Loss of the heat left the remaining water considerably cooler. The chilled water was then placed around bottles of wine to cool them. Clever, eh?

Romans Used Snow
Nero—he who fiddled while Rome burned—is given credit for discovering the preservative powers of snow. Hundreds of his slaves brought bales of snow from the Apennine Mountains down to the emperor's courtyard where it was buried in deep trenches insulated with sod and straw. It kept for weeks and was used for cooling wines, fruits and fish that formed part of the Roman feasts.

In the 16th century, a Venetian, Sanct Sanctorius, concocted a mixture of one-third salt and two-thirds snow by which he produced a temperature cold enough to freeze water.

It is said that Lord Francis Bacon contracted the pneumonia of which he died while stuffing a fowl with snow to study the effects of such treatment. His last question was: "Does the fowl still

keep?" Thus developed the science of food preservation in its cruder stages.

"Nature herself took a hand," Russell says, "by supplying cooler temperatures in springs, wells and cellars. These were used for a great many years and even today in some cases. However, the temperature is rarely below the 50-degree danger line which now is known to be necessary for safe food preservation."

Old-Fashioned Box
The use of natural ice, he recalled, preceded development of the mechanical ice plant and electric refrigeration.

"The old-fashioned ice box went a long way toward making people conscious of the need for food preservation," he opines. "It performed a real service in the past."

In 1880 a Chicago packing plant installed the first mechanical refrigeration equipment used by that industry, revolutionizing the whole system of feeding the people of this nation.

Electric refrigeration for the household followed.

"Do you remember how crude the old family bus of a decade or so ago looks today?" Russell asks. "It cost three or four times as much to operate the old models as it does the streamlined machine nowadays. Well, the same is true of the old model refrigerators. But the new electric ones! Shucks,

man! They give the women-folks year-round temperatures of 40 or 50 degrees for what it costs to smoke three cigarettes a day!"

Romney Club Enjoys Quilting Meetings

The Romney Home Demonstration club met in regular session at the home of Mrs. J. B. Webb, Tuesday, February 8, to quilt for Mrs. Webb's daughter, Mrs. Alvin Stroebel. A delicious dinner was enjoyed by 19 women, and two quilts were removed from the frames.

In the afternoon the president held a short business meeting, the members voting to pay the annual assessment of five cents per member to the educational fund.

On February 15 the club met with Mrs. Johnny Trigg. We had

a very pleasant day with 14 women coming to quilt; two quilts were quilted again, which brings the number we've helped quilt to 16. These quiltings are growing in popularity, and we busy farm women look forward to them with eagerness. While doing a real service for someone, we can enjoy a visit with a large number, also.

Our next meeting will be with Mrs. C. L. Carmichael, Tuesday, Feb. 22, when Miss Ramey will test our pressure cookers, and the next quilting will be with Pearl White on March 1. We are hoping the Weather Man will continue to favor our meetings.—Reporter.

Argentina is planning to establish a government commission to control and administer the national petroleum reserves, establish pipe lines and regulate trade in petroleum products.

A United States Department of Agriculture scientist has discovered that an enzyme obtained from ripe cheese, when added to foods containing oil, prevents them becoming rancid.

Advertising is not an expense—its the life blood of any business.

What's The World Coming To? You'll Run Your Own Plane in 1963, or 140-Mile-Hour Car

While we marvel at the strides of science and industry in the last quarter century, researchers are charting advances equally remarkable for the next 25 years. This is the first of five articles in which Alexander R. George, after talking with the planners, pictures life in 1963 as it shapes up in the laboratories and on the drafting boards of 1938.

By ALEXANDER R. GEORGE
AP Feature Service Writer
Only 35 years have passed since President "Teddy" Roosevelt was praised by the newspapers for his "characteristic courage" in riding an automobile.

Today more people in the United States ride automobiles than use toothbrushes. Teddy's grandchildren can cross the Pacific in a passenger plane, and transport pushes on toward undreamed speed and comfort.

Stratosphere Travel
From scientists and technicians who toil on devices to cater to a populace which travels more than any other in world history, comes this preview of transportation in 1963:

1. Air travel de luxe — The China-bound North Orient Express slips through the placid stratosphere. In the air-conditioned dining-dancing salon, New York importer Jack McGee tops off lunch with strawberries and cream some 25,000 feet above the frozen tundra of the Arctic.

He and his 200 fellow-passengers are on a two-and-a-half-day flight from New York to Peiping. In deep-cushioned chairs they enjoy a television presentation of the football game between McGee's own Fighting Irish and the Golden Gophers of Minnesota.

After dinner and dancing to melodies from San Francisco, McGee chats by radio telephone with his wife in their Long Island home.

Pipe dream? Not if you take the word of conservative aviators. Technicians now are working on super-charged engines and cabins for high-altitude atmosphere, and there is serious talk that coast-to-coast sub-stratosphere trips will be offered the traveler in two or three years.

The Family Plane
2. Middle class family flying — On a sizzling Sunday morning in July, Groceriesman Joe Shultz of Topeka, Kas., drives his airplane from the home garage down to Topeka's Field for private fliers. Mrs. Shultz, the two children and

an automatic ice cream freezer are with Joe as he takes off in his low-priced "fool-proof" plane for a Sunday outing in the Colorado mountain country.

Flight of fancy? Aeronautical folks are confident all this will come true within 25 years. Roadable aircraft already are here. The steady improvement in small planes, plus American marketing talent, a generation growing up determined to fly and the vast air "roominess" of the United States, presage flying by a sizeable percentage of the population. Experts say volume demand will bring mass production and low-priced aircraft.

Pleasure Driving At 140
3. Motoring in 1963—Vermonters Aaron Snowbound and family leave home in a blue-gray dolphin of the highways for an autumnal week-end at the national capital.

Their 1963 car is a bit bulbous-nosed, boasts "dining-car window visibility," super-safety glass all around and perfected air conditioning. The feather-weight metal auto, streamlined like a fish, has

a thick outer layer of rubber to reduce collision hazards.

Chemically-treated fuels help make the compact power plant almost 100 per cent efficient. The Snowbounds have put a half-pint of essence of heliotrope in the fuel tank to make the exhaust fumes pleasant for other drivers on the road.

Papa Snowbound turns the dolphin onto a six-lane superhighway (with bypasses at all towns). The perfectly-engineered road is illuminated at night, the paving is skid-resisting and self-de-icing. With automatic gears, automatic brakes and perfect stabilization, the car almost drives itself. It can do 140 miles an hour, but the Snowbounds, being conservative, ease along at 78.

Vibrationless Trains
4. The train in 1963—The Cornbelt Comet glides out of Chicago, its horn trumpeting a melodious au revoir to suburbanites. Picking up speed, the metallic rabbit of the rails soon is a maize-striped streak of cornflower blue in the prairie dusk.

Says Iowa Farmer Hoffman to his hired man as they watch the streamliner whizz toward Des Moines: "Looks like she's hitting 130 tonight, Hank."

In the softly-illuminated, vibrationless dining car of the Comet, white-haired Henry A. Wallace, former secretary of agriculture, dines on corn-fed chicken and quick-frozen golden bantam corn.

Behind the dine ris the music-movie-television salon, air-conditioned, noise-muffled, free of dirt and bacteria.

Fading from the American scene is the old "iron horse." In its place are quiet, slip-streamed versions of the "steam snorter," electric and diesel-electric locomotives.

Piling up in the transportation graveyard also is that venerable carrier of freight, the wooden box-car. The "side-door pullman," which endeared itself to the wanderers of the open road, is rapidly being displaced by an all-purpose light-weight metal car to carry everything from mushrooms to machinery.

These cars, which can be loaded or unloaded from six sides, have the fleet, joltless qualities embodied in the passenger trains that have replaced old "Number 6."

For amateur use a radio loud-speaker that also can be used as a microphone has been designed that is only three inches in diameter, while a new volume control is as small as a dime.

Handkerchiefs having each quarter a different color have been invented by a Texas man to enable a man to match his necktie, shirt or socks without having a large supply of handkerchiefs.

GUNSIGHT

Mr. and Mrs. Tobe Boles and Mr. and Mrs. E. W. Boles and Mrs. Tom Baker were guests of Mr. and Mrs. Charlie Hitson of Mineral Wells Friday.

Mrs. Charlie Richardson left Thursday for the bedside of her daughter, Miss Vera, who is sick at the home of her sister, Mrs. A. C. Smith, at Luther, Texas.

Mr. and Mrs. Bill Marshall visited Mrs. Marshall's brother, J. M. Blackburn, and Mrs. Blackburn Wednesday.

Mrs. Mae Gentry and daughter, Jo Ann, visited in the J. M. Blackburn home Tuesday evening.

D. Tompson, formerly of this place, is seriously ill at the home

of his daughter, Mrs. Myrtle Wallace, of Breckenridge.

Mrs. Tom Holland visited Mrs. Bertie Dye Monday.

Mrs. Nora Baggett gave her brother of Wayland a birthday party Saturday night.

Gunsight was well represented at the singing at Corinth Sunday night.

Mrs. Mary Thorpe has returned to her home at Christoval after a week's visit with relatives here.

Mrs. Martha Thorpe is much better after a week's illness.

Mr. and Mrs. Jack Shepard are having a fire place built of native rock.

Mr. and Mrs. Tom Holland and

son spent the week-end at Comanche.

Sam Murphy is having his horse recovered.

An ELECTRIC REFRIGERATOR saves enough to pay its own way

ALL 4 WAYS

.. or You May Not Save At All!

1. on **FOOD**
2. on **ICE**
3. on **UPKEEP**
4. on **CURRENT**

'MEMBER how crude the old family bus of a decade or so ago seems today? Cost three or four times as much to operate as the present efficient machine. Well, Sir, the same is true of electric refrigerators. They blazed the trail, bringing the greatest domestic improvement of all time into every other West Texas home by 1937. So now, in 1938, there is no comparison with those pioneer models. Electric refrigeration of today gives absolute food protection with temperatures around 40 to 45 degrees—the only safe temperature. No other form of mechanical refrigeration can offer this guarantee at any price. But Electric Refrigeration gives that guarantee at a cost which drops to less than 3 cents a day!

Electric Refrigeration

with year-round low temperature of 40-45 degrees

Costs as Little as 2 3/4¢ a Day

DON'T BE FOOLED IN JULY BY THE KIND THAT'S GOOD ONLY IN FEBRUARY!

Try their statements and you will be saved the expense of trying the box with insufficient low temperatures for West Texas summer weather.

East Cisco Baptist Church Sunday school 9:45. Morning worship 11 o'clock. B.Y.P.U. 7 p. m. Evening worship 8 p. m.—Rev. Hubert Christian, pastor.

Fundamentalist Church Rev. M. M. Briggs of Tye will preach at the Fundamentalist Baptist church Saturday evening at 7:30 and at both the morning and evening hours Sunday.

Christian Science Services "Mind" is the subject of the lesson-sermon which will be read in all Churches of Christ, Scientist, on Sunday, February 20.

The golden text is: "O Lord, how great are thy works and thy thoughts are very deep." (Psalms 92:5).

Among the citations which comprise the lesson-sermon is the following from the Bible: "God spake all these words, saying, 'Thou shalt have no other gods before me'" (Exodus 20:1,3).

The lesson-sermon also includes the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "It should be thoroughly understood that all men have one mind, one God and Father, one life, Truth and Love. Mankind will become perfect in proportion as this fact becomes apparent, war will cease and the true brotherhood of man will be established." (page 467).

A funnel shaped automatic coupling has been invented for automobile trailers, operating as soon as the hitching post of a trailer encounters any part of an opening on the back of an automobile.

Mrs. Fee Hostess to Twentieth Century Club

Mrs. George P. Fee was hostess when the Twentieth Century club met Friday afternoon at the clubhouse. In keeping with the program subject, "Health and Safety," a lively debate on the question, "Resolved: That Proper Nutrition is a More Important Factor Toward Contentment Than a Large Payroll," was entered into with Mmes. J. E. Moriarty and Edward Lee taking the affirmative and Mmes. J. E. Spencer and Hubert Seale the negative sides. After a brief discussion, it was the judge's decision that the affirmative side won the debate.

Those present were Mmes. Fee, Moriarty, Lee, Spencer, Seale, J. T. Anderson, J. R. Burnett, J. J. Butts, E. P. Crawford, T. J. Dean, S. E. Hittson, C. C. Jones, G. B. Kelly, W. J. Leach, J. C. McAfee, William Reagan, John Shertzer, Homer Slicker and C. R. West.

BIRTH ANNOUNCEMENT

Mr. and Mrs. E. B. Berry are the parents of a son born Saturday at Graham hospital.

Miss Sisk Becomes Bride of Mr. Johnson

The marriage of Miss Olene Sisk and Mr. L. E. Johnson, Jr., was solemnized Thursday afternoon by Rev. Hubert Christian, pastor of the East Cisco Baptist church, performing the ceremony at his home. The bride is the daughter of Mrs. S. E. Sisk and the groom son of Mr. and Mrs. L. E. Johnson, Sr. The couple will make their home in Cisco where Mr. Johnson is employed.

Observes Birthday With Slumber Party

Celebrating her 13th birthday, Berna Marjorie Goldberg, daughter of Mr. and Mrs. M. E. Goldberg, entertained with a slumber party in her home Friday night. As the guests arrived, they presented the honoree with lovely gifts. Games and contests were enjoyed and at midnight light refreshments were served.

Those present were Berna Marjorie, Jane Gilman, Marilyn Shertzer, Brenda Louise Warwick, Pollyanna Porter and Margaret Ann McDonald.

Faster Believes Dean Went too Far

AMARILLO, Feb. 19—John H. Runyon, Amarillo furniture dealer who practices fasting, believes Rev. Israel H. Noe carried a Biblical theory too far.

without food, said that the Bible mentioned 40-day fasts. "When I reach the point where I can go 40 days without eating I will have found life," said Runyon, whose regulated diet consists largely of popcorn.

carried his fasting too far—almost to death. New Location— (CONTINUED FROM PAGE 1)

WHAT IT MEANS: How Big Is Big In The Navy?

By MORGAN M. BEATTY AP Feature Service Writer WASHINGTON, February 19.—The "super-navy" stories dotting the newspapers these days are full of astronomical tonnage figures, gun bores and other technical gear to make them useful to experts.

But for your armchair strategist these figures are just so many red herring, assuming, of course, that your amateur has absorbed no more than the garden variety of mathematics and never saw a fleet in action.

In ordinary terms, just how big is the United States navy, its battleships and guns? What damage could these floating fortresses do?

Here is the answer measured by commonplace yardsticks: The navy represents a \$3,000,000,000 investment. The plant itself—ships and shore stations—is an investment in property value comparable to the total investments of the United States Steel corporation, the world's largest industrial combine, with investments of \$2,000,000,000.

Supplies include everything from fuel to funeral flags, from potatoes to paint. Take paint. The navy keeps on hand about \$1,500,000 worth of paint ingredients. Mix 'em up and you've got enough to daub three generous coats inside and out on every home in a city the size of Galveston, Texas, Jackson, Mich., or Asheville, N. C.

1 Ship Equals 2 Bridges The navy's personnel, including the marine corps, is 120,000 men, enough to populate a city as big as Albany, N. Y., or Spokane, Wash.

Now look at the navy's huge battle wagons, say, a 750-foot 35,000-tonner. If you could stand one on its nose beside the Empire State building, you could reach out of the 60th story window of

the building and touch the ship's stern. A battle wagon weighs as much as two and a half Brooklyn bridges. At \$60,000,000 apiece, they cost as much as the new George Washington bridge across the Hudson at New York City.

Most dreadnaughts have a speed of only 26 miles an hour, but they require power plants producing 25,000 to 30,000 horsepower on demand. That's enough to supply all the power and light required to run a city like Lincoln, Neb., Pasadena, Calif., or Shreveport, La.

A battleship wallowing along at top speed can burn 300 tons of fuel oil a day. You could heat an average home all winter with the oil a first class battleship can burn in 20 minutes.

Gun Equals Locomotive How about big guns? Most main battery weapons these days are 16-inch rifles; the muzzles are 16 inches in diameter. The gun weighs a trifling 128 tons, about the same as an ordinary locomotive. They are about as long as a locomotive and its tender—66 feet.

A 16-incher fires a shell that stands as high as a dainty young lady, say Janet Gaynor. But height is the only thing a 16-in. shell has in common with a miss. The projectile weighs 2,100 pounds, just a little under the average small automobile, and it takes six bushels of TNT to shoot it the maximum range of 20 miles.

Food By The Ton The projectile travels 2,800 feet a second on leaving the muzzle, or about six times faster than the speediest airplanes. The force required to shoot these shells 20 miles is 100,000 foot-tons at the muzzle, which, if harnessed to a hoist, could lift the battleship itself three feet.

The navy can do what a thrifty housewife would like to serve three square meals to a husky man for 50 cents a day in quantity, of course, the navy buys in quantity. In a month's time our gobs consume 2,300,000 pounds of refrigerated meat, 205,000 dozen eggs, 160,000 pounds of butter and 2,230,000 pounds of potatoes. Top this off with about a million pounds each of fresh vegetables and fruits and 6,000,000 pounds of rice, flour, beans and canned goods—and you've assured every man in the navy his six pounds of food a day.

FOR SALE OR TRADE—5-room house. Also 5 rooms of furniture. 610 W 9th. 168-3t

11 Texans Die Daily From Tuberculosis

AUSTIN, Feb. 19 (Sp.)—Dr. Geo. W. Cox, state health officer, states that slightly more than eleven Texans die each day from tuberculosis. In other words, only four thousand persons died of this disease last year.

In these days of economy, when the seeds of disease are being sown in the bodies of undernourished children, the prevention of tuberculosis is more necessary than ever.

Tuberculosis has been known for centuries and constant search for a specific cure has been the goal of doctors for many years. However, no medicine, yet discovered, will cure this disease.

By inserting electrical heating elements in the glass to keep its temperature above that of the surrounding air a Mexican has invented bathroom mirrors that do not condense moisture and become fogged.

The greatest loss of life from this disease is between the ages of 20 to 40 years, and its economic cost to families and the State is enormous. Tuberculosis can be arrested if found in its early stages, therefore, the State Department of Health urges that every one not feeling up to par should go to their family physician for a complete physical examination.
