

# THE CISCO WEEKLY CITIZEN

VOLUME FOUR

CISCO, TEXAS, FRIDAY, JULY 6, 1934

NUMBER 44

## Pipe For Cisco Gas Corporation To Be Here By July 12th

Work on the Cisco Gas Corporation system is expected to begin by July 12, stated R. L. Ponsler, who said pipe is now en route by boat from Philadelphia to Houston, where it will be loaded on board of cars for Cisco just as soon as it reaches that port. This pipe, with the exception of four cars, was loaded out of the mills at Philadelphia June 26, and the remaining four cars were loaded out June 30. This pipe is expected to begin arriving next Wednesday or Thursday for the gas system of the Cisco Gas Corporation. Mr. Ponsler said that just as soon as this material reaches Cisco work will start on the new gas plant. A few men will be put to work at once, and the laborers will be increased as the work program is organized.

It is understood that a member of the city commission is now at work securing rights of way and easements where private property is involved.

### Proposed to go into Eastland

Mr. Ponsler stated that his company had made Eastland the same proposition it made to Cisco, and the matter is now being considered by the city commission of that city.

Representatives of the Lone Star Gas Grabbers, the Citizen is informed, have evidently seen that its monopoly in Eastland county is endangered, for the Lone Star has reduced its gas rates to Eastland citizens from \$1.50 per 1000 to 50 cents. However, the Citizen learns, that the Lone Star is not taking any chances on retroactive action of Eastland, for before it consented to give that city relief in reduced rates it secured the enactment of an ordinance providing that it was not obligated to refund to that city the excess dollar it had filched from the people of Eastland.

This reduction will not interfere with the Cisco Gas Corporation going into Eastland, as over 700 had signed to take gas from the new corporation, it is understood.

The Lone Star representatives were at the commission meeting and contested the franchise to the Cisco Gas Corporation, when they told the commission that by "a stroke of the pen they could put the Hickok company out of business." He referred to the agreement submitted some time ago by Mr. Hickok offering to sell to the Lone Star its gas production, which the

## Tentative Plans Are For Opening Cisco's State Bank July 16

It was stated by authorities of the Cisco State Bank that the tentative plans are still for the opening of the bank, in the former home of the Cisco Banking Co., July 16. The state banking department last week granted this institution a charter, and it was reported that everything indicated that the necessary funds would be available by that date. Of course it is understood that some slight delays may occur, but such are not foreseen at this time.

The Cisco State bank will commence business with a capital stock of \$50,000 and \$10,000 surplus.

Officers have already been elected, but the Citizen was informed that only the president had been designated. This office has been awarded to Mr. J. H. Reynolds.

Lone Star turned down. Mr. Ponsler, who represented the Hickok interests, told the commission that this offer was made before negotiations were initiated with Cisco. In refuting this statement Ponsler submitted a proposition from the Lone Star to sell to the Hickok interests the Community Natural Hijackers plant, and it is reported here that Hickok did make the Lone Star an offer of \$25,000 for their holdings, as they had offered to build a new system for Cisco, they could only use the meters owned by the Hijackers. This, it is understood, was refused by Mr. Chase, of the Lone Star Gas Grabbers.

### Kinnaird Playing With Lone Star

It has reached Cisco that at previous meetings Mr. Donald Kinnaird, acting mayor of Eastland's city commission, and a candidate for floater, while claiming credit for securing a reduction in the gas rates for that city, is evidently playing with the Hijackers. He was not present at the two previous meetings when the Eastland commission was due to consider the application of the Cisco Gas Corporation for a franchise, but called a meeting of the commission when the Lone Star representative appeared to contest the granting of a franchise to the Hickok interests.

As the matter now stands the Eastland commission will pass on the Cisco Gas Corporation for a franchise next Monday night.

Advertise in the Citizen.

## Henson Williamson and Miss Era Cass Mappe Wed in Waco

Taking his friends by surprise, Henson Williamson arrived here Sunday afternoon and announced that the lady accompanying him was Mrs. L. Henson Williamson. The couple were married Saturday afternoon in the parlors of the Austin Avenue Methodist church, at Waco, at 2:30 o'clock, the Rev. Dr. Hartsfield, pastor of that church, officiating.

Not only was this marriage a surprise to Henson's friends, but it was surprising to his sister, Miss Helen, who was not apprised of the approaching nuptials till the arrival of the newly-weds. Miss Helen was aware of the attachment of her brother to Miss Mappe, and had extended her an invitation to visit her for the week previous, but was told by Henson that she would have to defer her visit until this week, but she said she had no idea she would receive a sister instead of a guest until they arrived and announced their marriage.

The romance which culminated in this marriage had its beginning while Henson was engaged in engineering work with the federal geodetic work at Crawford.

Mrs. Williamson is a niece of Dr. and Mrs. J. W. Compton, prominent citizens of Crawford. Mr. Williamson is the youngest son of Former Mayor and Mrs. J. M. Williamson, and is a rising young civil engineer with a promising future.

Mr. Williamson and his bride are cordially welcomed here, where they will be at home at the Williamson residence, West Seventh street and Avenue H.

## TRUCK LOADED WITH CATTLE BURNS ON EASTLAND HIGHWAY

A truck, loaded with cattle, caught on fire Sunday night two miles east of Cisco on the Eastland highway. However, the driver managed to stop his truck and release his cattle from the flaming vehicle before any of them were seriously injured.

He did not know exactly what caused the fire, but thought that possibly a spark from a live wire hit the gasoline tank, thus causing a minor explosion. His truck was almost completely destroyed. He had no insurance.

E. K. Winge, Route 4, was here Monday.

## JUDGE JOHN H. SHARP WOULD SUCCEED JUDGE GREENWOOD

JUDGE JOHN H. SHARP  
Of Ellis Co. Candidate for Associate Justice of the Supreme Court.

## Cisco Masonic Lodges Install Their Officers For The Ensuing Year

Officers of the Masonic lodges, for the ensuing Masonic year were duly installed at a special meeting held at Masonic Temple on the evening of June 25. Those who were inducted into their respective stations were:

**Cisco Lodge No. 556, A. F. & A. M.**  
Anthony Petronis, worshipful master; Frank P. Yarger, senior warden; Frank R. Leach, junior warden; E. J. Poe, treasurer; L. D. Wilson, secretary; George Boyd, tiler. Subordinate officers: C. C. Carmany, senior deacon; Rex Moore, junior deacon; J. E. Proctor, senior steward; R. H. Walker, junior steward; J. Stuart Pearce, chaplin; Irvine Nicholson, installing officer; Haywood, marshal.

**Cisco Chapter No. 190, R. A. M.**  
Haywood Cabaness, high priest; William T. Tanner, king; George Boyd, treasurer; L. D. Wilson, secretary; D. K. Scott, captain of host; C. S. Karalits, principal sojourner; Wm. Reagan, royal arch captain; R. L. Ponsler, master of third veil; Anthony Petronis, master of second veil; Frank P. Yarger, master of first veil; Irvine Nicholson, guard. George Boyd, installing officer; R. E. Grantham, marshal.

**Cisco Council No. 128, R. & S. M.**  
Irvine Nicholson, T. I. M.; George Boyd, treasurer; L. D. Wilson, recorder; Haywood Cabaness, captain of the

## Tom Hunter Only Man Offering a Cure Of Present Depression

AUSTIN, July 3.—"Only through the application of the basic cures necessary to accomplish a recovery can the rehabilitation of the indigents on our relief rolls be achieved on a permanent basis," Tom F. Hunter, of Wichita Falls declared here Tuesday night.

"Tom Hunter is the only candidate in the race for governor who points out the basic ills for which our plight in Texas can be charged and is the only candidate who offers specific measures to cure these ills.

"Before there can be any permanent assurance of jobs money must be placed in circulation in Texas, and to get that money in circulation two things must be done. These major aims of a recovery program are the restoration of an easy, available credit and the retention in Texas as a buying power for its people the uncounted millions of profits from our natural wealth which are being taken out of this state by the oil trust, the utilities monopoly, the chain stores and other special combines which are destroying our independent business.

"An easy available credit can not be restored unless real estate, our basic wealth and of necessity, our basic collateral, is relieved of its unfair tax burden so that it may be returned to a profit-paying basis. To do this, there must be a reallocation of the tax burden so that the great combines of wealth may be compelled to pay their just share.

"As long as real estate, bringing us only 15 per cent of our income is forced to pay 77 per cent of our ad valorem tax, it can not show a profit and is therefore not in demand as collateral. The other 85 per cent of our income, which bears only 23 per cent of the tax burden, must be made to pay its fair share."

### VACATIONING IN NEW MEXICO

Mr. and Mrs. J. E. Hart, of 410 E. 18th street, have departed for an extended trip to points in New Mexico, and Colorado. They expect to be gone about two weeks.

Mrs. M. E. Townsend and Mrs. Mary Anderson, of Moran, were shopping in Cisco Monday.

guard; R. E. Grantham, C. of C.; W. J. Britain, steward; Frank P. Yarger, sentry; L. D. Wilson, installing officer; George Boyd, marshal.

See the world's greatest World's Fair! Rail rates are down—variety of reduced short and long limit fares and low cost all-expense and escorted tours. For literature and information, see, phone or write the Katy Agent.

**Lotief Announces To Succeed Himself For The 107th District**

Elsewhere will be found the formal announcement of Cecil A. Lotief, of Cross Plains, present flatorial representative of the 107th district, composed of Eastland and Callahan counties. Lotief was a pleasant caller at the Citizen office Monday. "I believe it will be to the best interest of Eastland county to elect a man with legislative experience to the next legislature," Lotief said. "No man can do justice by his constituents during his first term. Hon. Oscar Chastain is not a candidate this year, and a new man will take his place. If a new man is chosen as floater, Eastland and Callahan will have two new men in the legislature, consequently will not be as well represented as would be the case if an experienced representative is sent to the legislature. This is one of the reasons I am urging my candidacy. I feel that, by reason of my experience, I can better serve you than can a man without the experience I have gained. Then, too, I feel that Callahan is entitled to the floater, as Eastland will have its own representative from the 106th district, and has the senator, as Senator Collie's term will not expire until two years.

"I shall appreciate the vote of the people of Eastland and Callahan counties, which is the Democratic custom of endorsing their representative for the second term, if he has been faithful to the trust reposed in him. This I have tried to be, and I believe I have served my district faithfully and tirelessly, and if returned in the July primaries the experience I have gained will enable me to accomplish more for my people, and the state, than was possible during my first term."

**John H. Sharp Seeks Position of Associate Judge Supreme Court**

Judge John H. Sharp was in Cisco last week in behalf of his candidacy for associate justice of the supreme court to succeed Judge Thomas B. Greenwood, who is not a candidate. He was born in Robertson county and educated in the public schools of this state, and Southwestern University at Georgetown, where he graduated.

Judge Sharp moved to Ellis county and for more than twenty five years was actively engaged in the practice of law, and by reason of his marked success as a lawyer in the private practice, he was first appointed a member of the commission of appeals by the governor in 1929. When the law was amended in 1930, so as to make the judges of the commission appointive by the supreme court, Judge Sharp was reappointed by the court for a term of six years. He still holds that position. There is no branch of work coming before the supreme court with which he is not familiar from actual daily experience.

Judge Sharp believes that cases should be disposed of without undue delay and at the least expense to litigants. Based upon his long and varied experience as a practicing lawyer and his services as a member of the supreme court commission, he asks the people of this state for the promotion.

Sidney G. Beard was in Cisco Saturday.

W. L. and Van Parmer, of the Dothan community, were greeting friends in Cisco Saturday.

FOR SALE—One new standard Underwood typewriter. Bargain. 304 E. 7th St. 40-tfc.

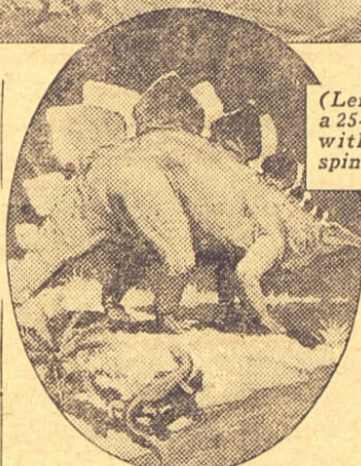

**Strange Lives of the Dinosaurs, in a New Book**

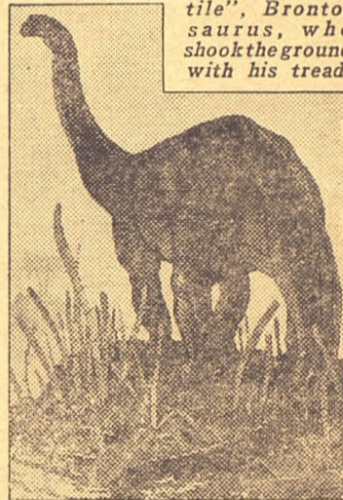

(Above) Tyrannosaurus Rex, fiercest of flesh-eaters, attacking his ancient enemy, Triceratops.

THE DINOSAURS, those strange monsters inhabiting the earth many ages ago, are described and pictured in the "Sinclair Dinosaur Book", issued for use by high schools, colleges, and libraries. The book is scientifically accurate in all details, its production having been supervised by Barnum Brown, Curator of Fossil Reptiles at the American Museum of Natural History, New York.

The dinosaurs in their native surroundings, also engaged in their terrible fights, are shown in a series of original paintings by James E. Allen. Reproductions of these paintings in full color illustrate the book. Among the illustrations is also a reproduction of a nest of dinosaur eggs discovered in Mongolia by an expedition from the American Museum of Natural History. Lives of the dinosaurs are described in authoritative text. The book includes a geologic time chart covering a cycle of almost 2,000,000,000 years, together with pictures of characteristic life appearing in all periods known to science. For the information of students

(Left) Stegosaurus, a 25-foot plant eater, with armor-plated spine and spiked tail.

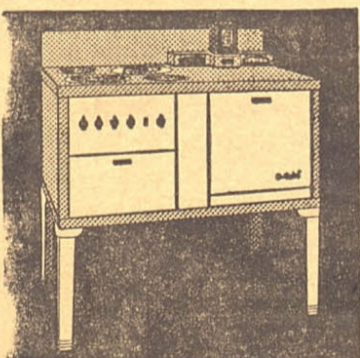

(Below) The "thunder reptile", Brontosaurus, who shook the ground with his tread.

who may have opportunity to study dinosaurs at first hand, the book lists natural history museums in the United States which display actual dinosaur remains. The demand for further information about these weird beasts which was created by the Sinclair Dinosaur Exhibit at the Chicago World's Fair led to the production of the book by the Sinclair Refining Company, New York.

"You're Lucky, Helen, to Have a NEW ELECTRIC RANGE"

You, too, can be lucky. Do as hundreds of women are doing. Investigate the marvels of electric cooking. FAST to operate... CLEAN to your home and health... DEPENDABLE in service... ECONOMICAL to your household budget... AUTOMATIC in its execution of cooking duties.

ONCE YOU HAVE cooked electrically on a new Hot-point range you'll never be satisfied with any other method. The new, better method of cooking eliminates all guesswork, watching and waiting. It gives you a clean flameless heat that cooks meat and vegetables in their own delicious juices with little or no water—all their healthful food elements and delicious flavors sealed in—not boiled away.

Do you know that your increased use of Electric Service is billed on a surprisingly low rate schedule... and adds only a small amount to your total bill?

**West Texas Utilities Company**

**Citizen is Endorsed By Abilene Attorney On Its Independence**

The fearless and independent attitude of the Cisco Citizen seems to please one of the foremost attorneys of West Texas. Harry Tom King, of the law firm of Kirby, King & Overshiner, pays the Citizen a neat compliment in ordering the Citizen sent to his address. Many Cisco people, for whom the Citizen has waged a relentless warfare, might emulate the example of Mr. King, and more liberally contribute to the support of the newspaper who is fighting for your interests.

When Harry Tom King was a young man, just entering the practice of law, the Citizen editor knew him, and then we predicted a successful career for him as an attorney. That he has justified our predictions is seen in the splendid legal practice he and his firm has acquired. This firm is now recognized as one of the leading legal firms of West Texas.

But the bouquet handed us by Harry Tom, is highly appreciated, is contained in the following letter received Tuesday morning:

My Dear Kennon:  
 "I acknowledge receipt of a couple of copies of your paper, the Cisco Weekly Citizen. I like the way you get out your little paper and particularly the way you express yourself on matters of public interest. It is my opinion that the function of a newspaper editor is to mold opinion. I like to see them fair but I like to see them take a position on everything that comes along.  
 "To show my appreciation, I hand you herewith my check payable to your order in the sum of \$1.00. Send me your paper for a year."

Dry weather is still the best time for killing Bermuda grass, as shown by a report to the county agent by T. J. Morris, of Carbon. Mr. Morris shallow-plowed this patch of Bermuda then kept running a spring tooth harrow over it until all of the roots had been pulled to the surface, thus completely killing out the grass. This demonstration was carried out several years ago but the method of control still holds good. It is a well known fact that Johnson grass may also be killed in a similar manner.

**Matthew S. Sloan Elected President of Katy Railroad System**

Matthew S. Sloan, who has been chairman of the board of the Missouri-Kansas-Texas Lines since April, this week assumed complete charge of the railroad's operations as well as its policies, by accepting the dual position of chairman and president. He was named president upon his return to New York after spending two months in traveling over the system. Mr. Sloan told he had found the Katy in excellent physical condition, efficiently staffed and well operated, and said he contemplated no changes in personnel.

According to Agent J. C. King, Mr. Sloan has announced to all Katy employees that he will devote his entire attention to the affairs of the railroad and that his chief aim will be to keep the Katy progressively active in the development of the Southwest and to maintain and improve its record for efficient service. He will leave New York immediately to take over his duties and plans to spend a major portion of his time traveling through the four states served by the Katy.

"Mr. Sloan feels that only by knowing the territory it serves, and by enjoying close personal contact with the business people of the Katy-served communities, can he successfully direct the company's activities," said Mr. King. For that reason he has said that his headquarters will be 'on the line,' which in railroad parlance means anywhere on the system. Immediately after his election as chairman Mr. Sloan made a thorough inspection of the railroad and followed that with another intensive tour which took him to most of the larger Katy cities. He has declared that he is going to ex-

tend his get-acquainted tour to include the entire system, so it is likely that he will be in Cisco in the near future."

**GASOLINE WILL CONTROL WORMS IN ALL POULTRY**

The use of gasoline for control of worms in poultry has a strong advocate in Bob Smith, of Okra, who last spring treated 400 chickens with less than two quarts of gasoline. Plain gasoline is used. One teaspoonful is the dose for grown chickens and two teaspoonfuls for turkeys. Due to danger of strangulation the gasolifne must be inserted down the throat with a small syringe carrying a 2 to 3 inch piece of rubber tubing on the nipple. For small chickens an eyedropper may be used. County Agent Patterson states that nature will take care of most cases of colds and roupe if the birds are relieved of intestinal worms.

A card from Mr. A. J. Olson says they are now in Berkley Calif., enjoying that delightful climate where the temperature averages about 75 degrees.

N. J. Tarver, of Nimrod, was here Saturday.

Faith in righteousness, faith in good, has run like a golden vein throughout human history. And human progress has been proportional to the richness of the vein.—Duncan Sinclair.

**THE "GENERAL'S" RACKETS**

This glorious Fourth was the inspiration that prompted the "general" to pull another of his rackets. But as the Citizen stated recently, in this instance, the racket was worth while, and the result commendable, unlike many he has imposed upon the Cisco public in the past. The "Anniversary" Edition, which appeared June 28, is a creditable special issue for any city of Cisco's dimension's, and the Citizen is free to compliment the "general" and his able editor on the results achieved, not only as a financial success, but from the literary and historical point of view. However, this anniversary edition seems to be about six months previous, Feb. 13 is the News' birthday.

Enclosed in the regular issue of the string daily is the magazine four-column section of 48 pages, containing numerous illustrations of Cisco people, business establishments and scenes of interest in and near the city. To produce a special edition of this magnitude required many hours of laborious effort on the part of the editorial, advertising and mechanical departments, and no doubt added considerable revenues to the treasury of the Austin-owned publication, and depleted the circulating medium of Cisco considerably.

Of course to accomplish this result it required some of the "general's" well-known high pressure methods, but the Citizen believes that is excusable by reason of the success of the issue.

However, in the brief sketch of the establishment of the Daily News there are some inaccuracies, which might be expected, as Editor Butler was not familiar with the details. These inaccuracies are immaterial details. Instead of B.S. Huey being the first president of the Cisco Printing and Publishing Co., W. W. Bell was the first president. G. W. Fisk was not publisher of the Round-Up when the inspiration of the daily newspaper was conceived. Claude L. Gaines, F. E. Shepherd and the Citizen editor were publishing the Weekly Round-Up under a lease contract with Mr. Fisk. It was these parties, with W. E. Morris, W. W. Downing, president and secretary of the chamber of commerce, W. W. Bell, R. W. Mancill and others of Cisco, and W. B. Kelly, Clifton, Ariz., cooperating, who conceived the idea of establishing a daily newspaper, who began soliciting funds to make it possible, At

the time the corporation was formed October, 1919, the Round-Up was published in the building now occupied by the Cisco Citizen.

The original promoters of the daily newspapers met with small success in their efforts to raise sufficient funds to put over the enterprise, and it was then that B. S. Huey stepped into the breach and saved the day by underwriting the corporation and made it a reality. Only, perhaps, the enterprising spirit manifested by Mr. Huey made the daily newspaper possible. So, to Mr. Huey is due the credit of the establishment of Cisco's first and only daily newspaper. Later he succeeded Mr. Bell as president, and continued the executive officer until Mr. O'Flaherty acquired the controlling interest.

But, as stated above, these details are immaterial, and the Citizen only mentions them to keep the record straight.

But it was indeed a creditable issue, and we know of the enormous work required to get it off the press in the short time consumed. One familiar with newspaper work know that the mechanical department must have worked early and late in this labor by giving the organization its untiring cooperation, for which the foremen, linotype operators, pressmen and other back shop employes are entitled to due credit. Knowing the work performed in the back-shop the Citizen expected to hear of the mechanical force being presented with a liberal bonus, since the ear-marks of the edition indicates a financial success. In this we were disappointed. Instead of a bonus the force was only paid straight time for overtime, in violation of the code, and all were docked one day's pay—for July 4th—when there was no paper.

So the "general", the Citizen is informed, had to spoil a good thing by such a small act, simply to enrich the treasury of the out-of-town owners of the paper.

According to street rumors the taking of one day's pay from the printers is not appreciated by the victims, especially as the deduction of salary was made in advance. Usually most papers especially dailies, give their mechanical force time off with pay, for national holidays. It is reported on the street that the foreman has already given the "general" notice that his resignation will be effective as soon as his successor can be placed on the job.

'Tis a pity to spoil such a nice job by a demonstration of such a small act of ingratitude.

**CHARGE NRA FOSTERING MONOPOLIES**

Charging that the NRA is fostering monopolies and the greatest vehicle through which trusts and monopolies may throttle and suppress independent and small industries, the Clarence Darrow national recovery review board, has issued its third and last report on the injustice of the administration of the NRA, which the report charged had become an adjunct of depression, rather than its foe. Even the casual observer agrees with the Darrow committee, for even in the smaller

communities it is noticeable that monopoly has more power than was the case before the Sherman anti-trust law was suspended.

It was indeed a sad day for the independent industries when the national government called a hiatus in the enforcement of the Sherman law, which removed the last deterrent of monopoly to suppress and kill off the smaller concerns.

The board says that its investigations show that the codes do not only permit but fosters monopolistic practices, and the small enterprise is not only suppressed but in many instances its exit is facilitated, and nothing has been done about it. The purpose of the NRA codes seems to be to more securely entrench the monopolistic sway of the great interests. The answer of thousands of small enterprises has been to drive the car of depression still more relentlessly over them, the report stated.

The people agree with the report when it says "to deliver industry into the hands of the greatest and most ruthless units by the withdrawal of the protection of the anti-trust laws was a grave error. Not in many years have monopolistic tendencies in industries been so forwarded and strengthened as they have been through perversion of an act excellently intended to restore prosperity and promote the general welfare, and the sooner they are recognized and bravely dealt with the better for the nation and the people."

The report in substance stated that, as the Citizen has frequently pointed out, there can be no prosperity until there is a more equitable distribution of the country's wealth, certainly not so long as one per cent of the nation's population is allowed to control 60 per cent of the nation's wealth.

It required a volume of type-written pages for Administrator Johnson and Attorney Richburg to answer the first report, and will probably keep them busy working overnight to answer the broadside fired by the Darrow committee. And the thing that hurts most the report tells of condition just as they exist, which are patent to all observers.

It was indeed a sorry day for the people when the anti-trust law was suspended, and the quicker it is restored to its rightful functioning the sooner the people will get relief. Monopolistic greed knows not the law of moderation, but their greed will always demand as much or more than the traffic will bear.

The small industrialists and the consuming public will welcome the day when the oppression of the national recovery act is recognized by the federal administration, and the drastic provisions of the codes are suspended.

Gen. Lazao Cardenas was elected Mexico's 45th constitutional president, last Sunday in that nation's most uneventful national election that has been held in the history of the Southern Republic.

**First Church Of Christ, Scientist**

First Church of Christ, Scientist, of Eastland, authorized branch of The Mother Church, The First Church of Christ, Scientist, of Boston, Mass., holds services every Sabbath morning at 11 and each Wednesday night at 8. In William McCraw of Dallas County the people of Texas have an opportunity to elect an Attorney General who is an experienced civil lawyer, an accomplished criminal prosecutor, and a man who is not connected directly or indirectly with the big interests. To safeguard the interest of Texas the people should vote for William McCraw for Attorney General.

Lesson-Sermon which will be read in all Churches of Christ, Scientist, on Sunday, July 8.

The Golden Text is: "The bread of God is he which cometh down from heaven, and giveth life unto the world." (John 6:33).

Among the citations which comprise the Lesson-Sermon is the following from the Bible; "Behold, I stand at the door, and knock: if any man hear my voice, and open the door, I will come in to him, and sup with him, and he with me." (Revelation 3:20).

The Lesson-Sermon also includes the following passage from the Christian Science textbook "Science and Health with Key to the Scriptures" by Mary Baker Eddy; "Jesus established his church and maintained his mission in a spiritual foundation of Christ-healing. He taught his follower that his religion had a divine Principle, which would cast out error and heal both the sick and the sinning. He claimed no intelligence, action, nor life separate from God. Despite the persecution this brought upon him, he used his divine power to save men both bodily and spiritually." (page 136).

**POLITICAL ANNOUNCEMENTS**

**George Owens Was Buried Wednesday Died Tuesday A. M.**

We mourn today the passing of our friend and fellow citizen, George Owens, who died Tuesday morning at 8:20 at his residence, 408 East Sixth street. Funeral services were conducted at the Green Funeral Home chapel at 2 o'clock Wednesday afternoon, and the remains were buried in Oakwood cemetery.

George Owens was a native of Liberty county, Texas, where he was born Nov. 9, 1878, and has been a resident of Cisco since 1919. He came here with the Humble Company from Houston, with which he remained until several years ago, when he established a business of his own by purchasing the service station on East Sixth street, in the 300 block, which he operated until recently, being forced by his impaired health to retire from active business. For several years he has been in ill health, but none intimate with him believed that his malady portended fatal results, at least not so early, therefore the news of his passing shocked and grieved those friends who today are mourning his demise. His death came easy, devoid of pain or suffering, and quietly he laid himself down to sleep as a little child, nestling in its bed, after receiving the maternal goodnight kiss.

George Owens was 55 years of age at the time of his passing, and in his death his wife loses a devoted husband and sympathetic companion; his only son, George Owens, Jr., six years of age, who will miss that paternal guidance and nurture that are his inherent right. We mingle our tears with the bereaved in this, their darkest hour, for whom we commend the Father's loving protection, who said "I will be a protector to the widow, and a father to the fatherless."

**Mr. and Mrs. Edward Mancill Visited In Cisco Last Friday**

Mr. and Mrs. Edward Mancill were guests of their mother, Mrs. J. W. Mancill, last Friday, returning Saturday to Jacksonville, where Mr. Mancill is located, with the Humble Company.

This was the first visit home of this couple since their marriage in Garland June 28.

The many friends of "Dick" Mancill were not informed of his marriage until his recent visit home, but the entire bunch want to extend congratulations, and wish him all the felicity anticipated during his married life. He is one of Cisco's most popular and highly esteemed young men, and nothing but the richest blessings were offered in the felicitations he received.

Mr. Mancill and Miss Erma Fenelle were married in Garland, Texas, June 28. Her home was in Wichita Falls.

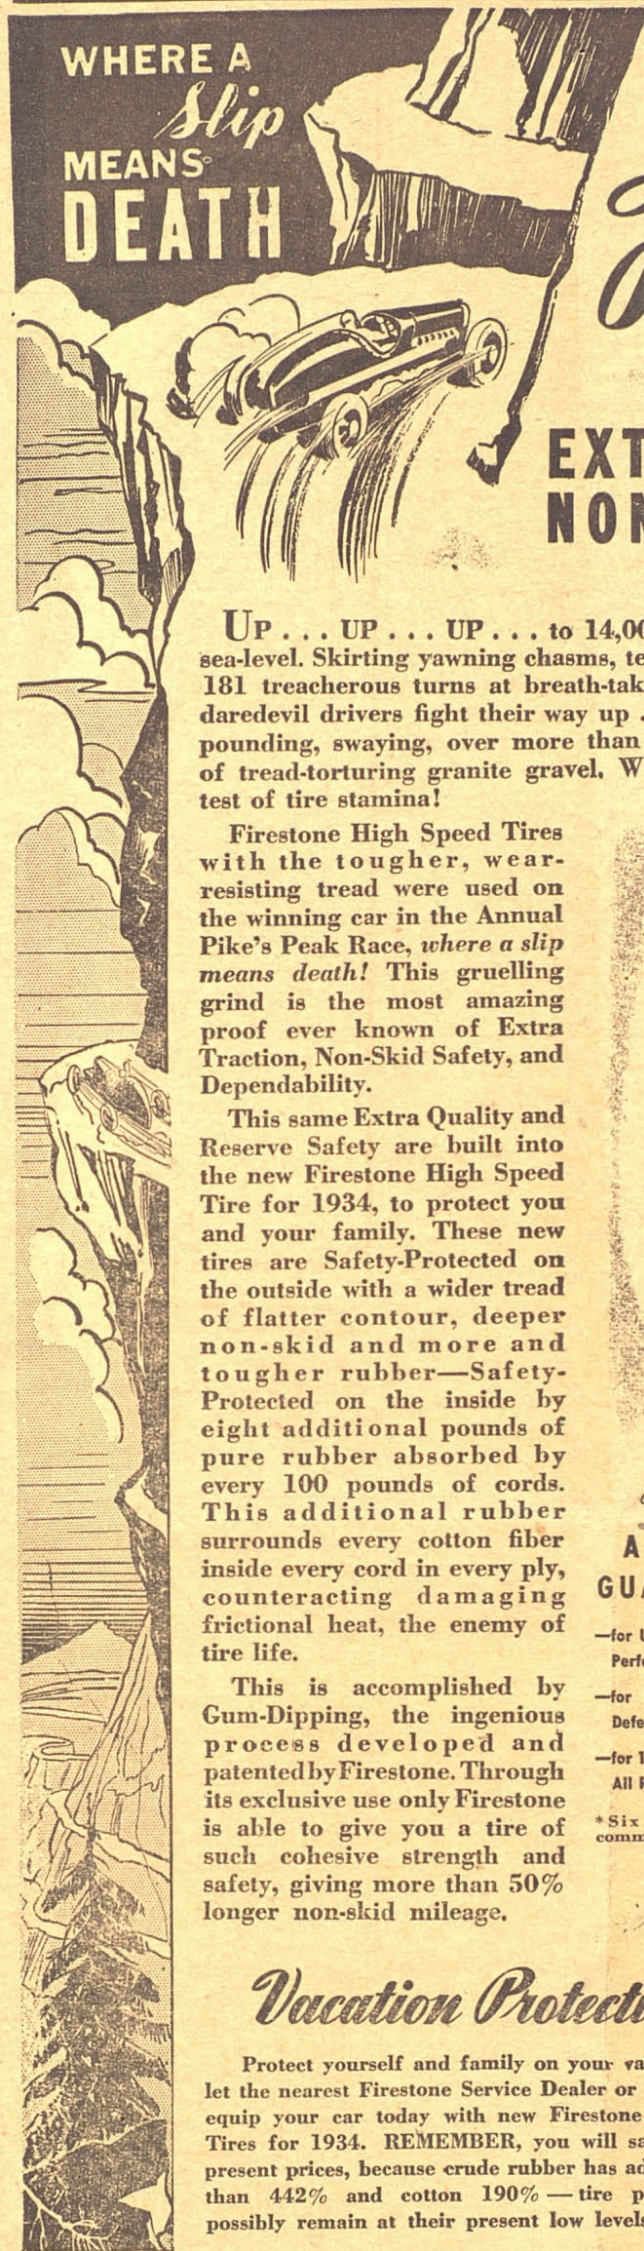

**High School Economics Teacher Bride of West Ward School Principal**

It was a quiet forenoon wedding when the Rev. E. S. James, pastor of the First Baptist church, spoke the words that united in marriage two of Cisco's popular teachers. The contracting pair being Miss Juanita Bounds, economics teacher of the Cisco high school, and Mr. Howard H. Goss, principal of the West Ward school.

The ceremony was performed in the parlors of the home of Mr. and Mrs. L. A. White, 509 West Broadway, in the presence of only the relatives and close friends of the contracting couple. Attired in a modish black net gown, black hat, patent leather pumps, bags and gloves of white, harmonizing with the pique trim of her dress, and carrying a bouquet of lilies, snapdragons and pink roses, the bride presented a picture of loveliness, which reflected the beautiful character of the woman whom Mr. Goss has chosen as his mate, from Hymen's altar over the primrose path of their matrimonial career.

Following the early morning nuptials the newly weds departed on a motor trip for a brief honeymoon, which will carry them to Monterey, and other Mexican cities of interest. For this trip the bride was adorned in a becoming going away costume of brown ensembles and white accessories.

A daughter of Mr. and Mrs. Bounds,

*Most Amazing Proof Ever Known*

**OF EXTRA TRACTION AND NON-SKID SAFETY**

Up... UP... UP... to 14,000 feet above sea-level. Skirting yawning chasms, tearing around 181 treacherous turns at breath-taking speeds—daredevil drivers fight their way up... grinding, pounding, swaying, over more than twelve miles of tread-torturing granite gravel. What a terrific test of tire stamina!

Firestone High Speed Tires with the tougher, wear-resisting tread were used on the winning car in the Annual Pike's Peak Race, where a slip means death! This gruelling grind is the most amazing proof ever known of Extra Traction, Non-Skid Safety, and Dependability.

This same Extra Quality and Reserve Safety are built into the new Firestone High Speed Tire for 1934, to protect you and your family. These new tires are Safety-Protected on the outside with a wider tread of flatter contour, deeper non-skid and more and tougher rubber—Safety-Protected on the inside by eight additional pounds of pure rubber absorbed by every 100 pounds of cords. This additional rubber surrounds every cotton fiber inside every cord in every ply, counteracting damaging frictional heat, the enemy of tire life.

This is accomplished by Gum-Dipping, the ingenious process developed and patented by Firestone. Through its exclusive use only Firestone is able to give you a tire of such cohesive strength and safety, giving more than 50% longer non-skid mileage.

*Vacation Protection!*

Protect yourself and family on your vacation trip—let the nearest Firestone Service Dealer or Service Store equip your car today with new Firestone High Speed Tires for 1934. REMEMBER, you will save money at present prices, because crude rubber has advanced more than 442% and cotton 190%—tire prices cannot possibly remain at their present low levels.

of Stamford, Mrs. Goss, after graduating from the Stamford high school received her degree of bachelor of science from the C. I. A. at Denton, after studying at Simmons university at Abilene, she came to Cisco two years ago from Rotan where she was head of home economics department of that high school.

Mr. Goss was reared in Rising Star, the son of Mr. and Mrs. G. G. Goss, where he graduated from the high school, and later receiving his higher education at Howard Payne college and Texas Christian University. After receiving his degree of bachelor and master of science at the University of Oklahoma he came to Cisco three years

ago to accept the position of principal of the West Ward school.

Here for the ceremony were Mr. and Mrs. G. G. Goss, of Rising Star; Mr. and Mrs. R. W. Bounds, Miss Virginia Bounds and Mrs. R. H. Bounds, all of Stamford.

**Fundamentalist Services**

Rev. Clark Mackey, pastor of the Corinth Baptist church of Abilene, will preach to the Fundamentalist congregation Sunday at both the morning hour, 11 o'clock, and the evening services, at 8:30 o'clock. The services will be held in the 1200 block on Avenue E. Sunday School at 6:45. All are invited.

Rev. J. E. Johnson, of this denomination, is conducting a series of services at the Methodist church at Romney this week. Cisco people, and those living in the surrounding territory, are cordially invited to attend these services.

**AGNEW SERVICE STATION WINS IN CONOCO ONTEST**

The Agnew Service Station was winner in the Conoco sales contest, staged Tuesday, July 3. All stations in Cisco and Breckenridge participated in this sales contest, which resulted in the Agnew station selling more Conoco products than any station in either

of the two cities. The sales M. L. Agnew rung up during the day were for 1,555 gallons of gasoline and 30 1-2 gallons of oil. His nearest competitor was the company station at Breckenridge, which accounted for 1,180 gallons of gas. In addition to the 1,555 gallons of gasoline sold the Agnew station also sold \$100 worth of coupon books.

This winning is accentuated when it is understood that the Agnew station is located four blocks off the main business section, while the runner-up Breckenridge competitor is located on one of the most popular corners in that city.
