

# SPAIN PLANS REFORMS UPON WIDE SCALE

By WILLIAM H. LANDER  
United Press Staff Correspondent  
MADRID, May 26.—The Spanish Republic has gone in for reforms on a profound basis, but has avoided the circus-like measures which featured the days of the general Dictator, the late General Primo de Rivera.

When Primo de Rivera took hold of running the country—aided by a strict censorship of the press—he attempted to make sweeping reforms in the bureaucratic organizations in the capital. Government employees must all go to work daily and hence many, who for years had not gone to their offices at all, suddenly appeared and found no place to work, since there were not enough desks to go around both for those who habitually worked and those who did not work but drew salaries, although it easily could have been done away with all the employees of its predecessor, has respected all those in the employ of the civil service who continue in their jobs just as if nothing had happened. And no strenuous orders have been issued to the employees, demanding a full day's work from them, for example.

One of the biggest changes to be effected by the overthrow of the monarchy will be in the field of education. Spain's illiterate population is approximately half its inhabitants. When Primo de Rivera came into power he quickly offered a solution. Since half could read and write, and the other half could not—why all that was necessary was for the half that did know how to teach the other half and in a few months the country would be 100 per cent literate. And to set an example, he proposed himself to teach four persons how to read and write. For a few days four boys would come to his office for their lessons, but he soon found that this would not work. Now royal palaces in some places will be converted into schools; new ones will be constructed in others; and many of the school houses which Primo built but left unprovided with teachers will now get teachers. The University City, started as a monument to ex-King Alfonso XIII, will be completed.

**SPORTS EDITOR WINS**  
BROWNWOOD, May 26.—Bruce M. Francis, sports editor of the Brownwood Bulletin, Brownwood, has won the Heart O' Texas Press association golf championship for three out of four years. The sports writer won the cup for 1931 at a tournament staged at the Coleman Country club, making the nine hole course twice for a total score of 86. Par is 90 for nine holes.

**BUILDING NEW MILL**  
DALHART, May 26.—Work started last week on the second unit of the Mayfield Grain & Feed Co. mill here. When completed the mill will cost \$20,000 and will have a storage capacity of 9000 bushels. Construction of a 25,000 bushel capacity elevator to cost \$8,000 to \$10,000 will start immediately after the wheat rush.

**PLAN GOLF TOURNEY**  
DALHART, May 26.—One of the gala events of the North Plains—the Dalhart Country club golf tournament is scheduled for June 7 and 8. The course here is rated one of the best in the Panhandle. More than \$300 in prizes will be given.

**SCHOOL BOND ELECTION**  
DALHART, May 26.—A \$50,000 school bond election to erect a new school here has been called for June 2. Addition of a teacher in high school last year and primary teacher this coming year are making expanded facilities imperative.

## Romance May Be the Net Result

No announcement has been made thus far, but friends of Betty Nuthall and P. D. Spence momentarily are expecting to hear that the outstanding British tennis stars will become a permanent doubles team in matrimony. This picture of Spence and the smiling Betty, who holds the American singles title, was taken recently on an English court where the pair have been playing together regularly.

## Twins, Triplets in One Family

If baby causes you a lot of worry, just consider the problems which must have confronted Mr. Louis Ribran, above, of Terre Haute, Ind., in rearing her twins and triplets, besides three other children. The triplets are John, Elizabeth and Anne. The twins are Bernard and Leonard.

**PICKS WRONG HAT**  
KANSAS CITY, Mo., May 26.—Leslie Hafford, hurried from a restaurant here and grabbed what he thought was his hat. He soon found that he had taken another's by mistake. In his own hat he had tucked \$37 in bills. He recovered neither hat nor cash.

## NEW ENGLAND'S FISHING FLEETS ARE EXPANDING

By HENRY MINOTT  
United Press Staff Correspondent  
BOSTON, May 26.—New England is still America's principal fish market, just as it was in the romantic days of the clipper ship.

A survey by the United Press indicates that fleets flying out of the more important fishing ports of the northeastern group of states are growing larger year by year; that the number of men engaged in the industry is increasing; and that the volume of fish is getting greater. Whereas less than 650 ships comprised the fleets of the ten principal New England ports ten years ago, 798 vessels now go out to the grounds from these same points today.

During that decade the Boston fleet, for example, has grown from 104 to 226 ships; the Newport, R. I. fleet, from 77 to 89; and the New London, Conn., fleet, from 16 to 64. Lesser gains have been registered at Gloucester, Nantucket, and Rockland, Me. Only the fleets of Provincetown, New Bedford, Edgartown and Portland, Me., have shrunk.

Nearly 10,000 men are employed in the commercial fisheries of Massachusetts alone. For the nine successive year, a new record for groundfish receipts at Boston was established in 1930. Receipts for the year totaled 264,795,800 pounds, compared with 254,216,162 pounds in 1929. The term "groundfish" means cod, haddock, pollock, hake, cusk, halibut and flounders.

The mackerel catch for 1930 amounted to 42,806,378 pounds, compared with 42,540,295 the previous year.

The 1930 swordfish fleet of 87 ships represented the largest fleet which ever participated in this branch of the industry.

Total value of all fish landed here last year was \$10,868,671, compared with \$10,730,903 in 1929.

Boston fish receipts have gained enormously in recent years as modern packing and icing methods, improved transportation, and new systems of preparing fresh fish have stimulated demand and increased consumption.

With modern methods have come younger fishermen captains, but a few famed oldtime skippers still go out with the New England fleets. These include Captain George Perry of the Boston schooner Marjorie Parker, Captain Joseph Leavitt of the Gloucester schooner Governor Fuller, and Captain Ernst Parsons of the Boston schooner Lark.

Savage storms which ravage New England's rockbound coast take a heavy toll among the fleets. Last year 18 fishing vessels were lost, compared with 23 in 1929.

**THIRTEENTH CHILD BOY**  
WHEELING, W. Va., May 26.—The stork brought the 13th child to Mr. and Mrs. Norman Peabody on the 13th of the month. Little No. 13 was a boy. The stork's selection broke a tie of six boys and six girls in the Peabody family.

**PETRIED TREE FOUND**  
NAPER, Neb., May 26.—Jess and John Boettcher, farmers living near here, have unearthed a giant petrified tree. The trunk measures three feet four inches through and the petrified trunk stands over eight feet high.

## Old Blue-Back Speller Displayed

AUSTIN, May 26.—Memories of olden times will be revived for many by the sight of the familiar old blue-back speller which forms a part of the display of relics of the past in the University of Texas library. This exhibit of articles related to early pioneer life in Texas was arranged by Mrs. Mattie Austin Hatcher, University archivist, from gifts made to the library by Mrs. Allie Cockrell Belcher of Austin.

An old fashioned album, small in size and containing, appropriately a picture of a Tom Thumb bride and groom, as well as other family pictures, is among the relics which belonged to Mrs. Belcher's family. Shuttles used in early Texas days, and scraps of home-spun woven during pioneer days are also shown. Three pieces of cloth were given to Mrs. Belcher by Mrs. Wilcox, mother of Walter Wilcox of Austin, whose photograph is also shown with her small son.

A hand woven counterpane, made during the Civil War, by Mrs. Heard of Fayette county, was also given to the library by Mrs. Belcher and is prominently displayed in the exhibit.

In addition to these Texasana, Mrs. Belcher has presented the University library with valuable files of Geographic Magazine and World's

Work, and with posters of the World War.

**LIVE TOAD IN ROCK**  
RENO, Nev., May 26.—Two Elko prospectors assert that they recently found a living toad imbedded in a sandstone slab at the bottom of a 50 foot shaft in the old Bull Run mining district. The toad was very much alive and was apparently as surprised as his rescuers. Blinking his eyes he hepped from his bed and disappeared in a nearby crevice.

**WATCH SALESMANSHIP**  
WASHINGTON, May 26.—George Marshall, lawyer of Marlboro, Md., was called recently by county police to question three young Newark, N. J., men who had been arrested when 23 watches were found on them. After convincing Marshall that they merely were dealers in second-hand watches, the men sold him a watch and departed.

**PUBLISHER 59 YEARS**  
ALLEGAN, Mich., May 26.—Fifty-nine years as a newspaper publisher is the distinction of E. C. Reid, who this month celebrated his fiftieth anniversary as publisher of the Allegan Gazette, one of the oldest weekly newspapers in southwestern Michigan.

# Consider your Adam's Apple!!\*

## Don't Rasp Your Throat With Harsh Irritants

"Reach for a LUCKY instead"

Place your finger on your Adam's Apple. You are actually touching your larynx—this is your voice box—it contains your vocal chords. When you consider your Adam's Apple you are considering your throat—your vocal chords.

What is the effect of modern Ultra Violet Rays upon tobacco? Dr. E. E. Free, one of America's well-known scientists, who was retained by us to study Lucky Strike's manufacturing process, addressing the Illuminating Engineering Society, said:

"The essential effect of the Ultra Violet is the production of better tobacco and of cigarettes regarded by virtually all smokers who have tested them as milder and with a lesser tendency to cause throat irritation."

Here in America LUCKY STRIKE is the only cigarette that employs Ultra Violet Rays in connection with its exclusive "TOASTING" Process—the only cigarette that brings you the benefits of the exclusive "TOASTING" Process which expels certain harsh irritants present in all raw tobaccos.

TUNE IN—The Lucky Strike Dance Orchestra, every Tuesday, Thursday and Saturday evening over N. B. C. networks.

## Game Preserve to Be Surveyed

WASHINGTON, May 26.—Several wild life societies have accepted invitations from the Forest Service to cooperate in a study of wild life and game conditions in the Kaibab National Forest of Arizona, in June, it was announced here by C. Pachford, assistant forester in charge of range movement.

Overcrowding of the preserves of the Kaibab National Forest, particularly in the Grand Canyon preserve, necessitated the removal of a part of the game there, particularly deer, by trans-shipment to other forests in the Southwest and by restricted hunting.

The Forest Service points with pride to its work in the Kaibab Forest, where absolute protection has so increased the stock that it was necessary to reduce it by hunting. It is also remarkable, the Service says, that of the 5,261 hunters in the area during the past five years there was only one accident and no fatalities.

The abundance of game on these preserves of the Southwest is expected to furnish ample supply for the survey.

## Half Million Spent on Panhandle Roads

AMARILLO, May 26.—About 125 miles of Panhandle highways have been improved since the first of this year according to a survey of road work in northwest Texas. Cost of the improvements total nearly \$500,000.

Five new contracts let at the last session of the state highway department have not yet begun. Among completed projects was the improvement of highway 117 thru Hutchinson, Hansford and Ochiltree counties at a cost of more than \$60,000, represented by grading and drainage structures.

Highway engineers are limnating curves from highway 33 from Canyon west to Deaf Smith county a distance of 15 miles. With other improvements on this route the work will cost about \$28,000. Other jobs are under construction in Randall, Wheeler and Gray counties.

Gilmer—\$30,000 high school auditorium completed.
