WANTS TO BORE FOR OIL

Oklah'm'n Wants to Bore In Oil Field

N. A. Taylor of Custer City, Okla., came here Friday, and has been going over the country with W. Bralley of Nimrod investigating the oil prospects. Mr. Taylor says he has had 15 years experience in well-drilling and that he knows he understands the business and can go as deep as any well-driller. He is a believer in oil in paying quantities in the Cross Plains country, and proposes to put down wells to bore in this field at his own expense, provided he can secure leases on enough land. He says he can furnish plenty of evidence as to his financial ability to carry out his contract, and that when the leases are secured he can in 60 days have his outfit here ready to go to work. He wants a lease on 3,000 to 4,000 acres of land near down, guaranteeing to bring in oil in paying quantities or no pay, if it is a paying well one that will produce 15 barrels a day. He remarks that he has all kinds of confidence in there being oil in this section, and he would not be willing to make a contract like that he proposes to execute. As to what the people here think of this proposal we will have more to say anon, at this time not being able to get a general expression.

THE FRUIT CROP

In conversation with a number of farmers who raise fruit we have been told that despite the fact that we have not so many hard freezes of late and the general report and belief that the early fruit had not killed, about one-third of all the peach crop that ripens from July to September is saved, all earlier peaches suffering more. This has been also in reference to apples, peaches, etc. Everybody expects that we have left some of the peaches, plums, or quinces. Apples, being a later crop, have a good prospect so far. The fruit crop, while very few depend on it for a subsistence, is a very important side line to the sad help and its success, meaning so much to all who like fruit as a food, is looked upon with more or less interest by the entire country.

COTTON STILL COMING IN

W. D. Drury of the Burnt Branch community was here Monday delivering 43 bales of cotton he sold last week at 7.50. Mr. Drury raised 60 bales on his farm, the other 17 bales being already sold. His batch of cotton is probably the largest single lot of cotton sold here lately.

J. W. Newton of Cross Cut last week sold 22 bales at 8.60.

Milt Jones of Atwell Monday sold nine bales at 8.40, delivery made at the time.

DEAD WAGON

We have just added to our undertaking department a nice hearse. This is a nice asset to the town and community in that the proper respect can be shown the dead by the use of a hearse instead of wagon. At any time day or night, such is needed we will be glad to serve you.

TO BE HERE INDEFINITELY

Photographer N. A. Watkins has leased for an indefinite length of time the Geo. Swan studio and will run it in connection with his studio at Rising Star. Mr. Watkins has been running the studio for some time but has only lately known that he would continue to do so. He is one of the best photographers in the country. He will be here hereafter, the first three days of each week. If you need any work in his line you would no doubt do well to give him a trial.

NOT A HYPOTHETICAL CASE

Lee Browning who lives only a few miles north of town has had the value of his town newspaper brought home to him. A few days ago he was trying to find a market for some hens. Upon being asked why he had not sold them when the special poultry car was here he replied that he knew nothing of it. He didn't take The Review and failed to get a circular, at the time being busy with his crop. He says that the extra money he would have received from his chickens on this deal would pay for a year's subscription to The Review two or three times over. He is now a believer in his home newspaper. The Review actually offers a service in the advertising it carries to its readers as well as to those doing the advertising. Mr. Browning's case as regards the loss he suffered is repeated time and time again by those who do not take their home papers.

Kansas City, Mo. March 1, 1915. Mr. E. C. Shackelford, Cross Plains, Texas.—Dear Sir:—The following has been received from W. E. Green at Sabanna Texas, a satisfied customer. I put up and filled a Tulsa Silo on my farm last July. I began to feed it to fifteen Jersey cattle the first of November and have just gotten to the bottom of it and have found it good from top to bottom. The silage kept perfectly. Mine is a thirty ton. I wish that I had another one for spring feeding. I have never turned a tap since it was put up and joints and hoops remain the same. I heartily recommend the Tulsa Silo especially to the farmer and dairyman.

Yours truly, THE TULSA SILO COMPANY.
