

"AS I SEE IT"

By Jack McCarty

This department still feels a bit like bragging this week. We are speaking, of course, of the football victory won by the Buffaloes over a strong Santa Anna eleven...

The Buffs meet one of the strongest teams in the district when they tangle with the Dublin Lions here Friday night...

We salute the oil industry of the nation on their annual observance of "Oil Progress Week" now in progress.

Just a century ago, six years before the first oil well was drilled, a lumber company at Titusville, Pa., made an arrangement with a local citizen...

This first "oil operator" gathered three to four gallons of petroleum a day, and used it for lighting the saw mill and lubricating the machinery.

Today, when two million oil industry workers are providing America with more than seven million barrels of oil a day, petroleum is still used for lighting and lubrication.

But there are a thousand other places where petroleum and its derivatives contribute to the needs of today's world.

Thus - in the sense of depending on petroleum for their jobs - millions of people are "oil men" today without realizing it.

A wise man once wrote a prayer for true happiness and we re-print for our readers, as follows:

"Let me do my work each day; and if the darkened hours of despair overcome me, may I not forget the strength that comforted me in the desolation of other times."

"Spare me from bitterness and from the sharp passions of unguarded moments. May I not forget that poverty and riches are of the spirit."

"Lift my eyes from the earth, and let me not forget the uses of the stars. Forbid that I should judge others lest I condemn myself."

Work Is Going Ahead On New Road-Bed For Highway 36

Workers for the construction firm of Hansen & Galbraith are making fast headway on the contract for grading and bridge work on the new roadbed for Highway 36, which is being rerouted through the south part of town.

The right-of-way has been cleared of all trees and brush and other obstacles from the junction here to the Pioneer Cemetery, just east of the town of Pioneer and crews are now engaged in bridge-building and grading work.

When completed the new highway will provide through traffic with a straight road from here to the Lake-wood County Club, thus doing away with several narrow bridges and dangerous curves.

Contractor on this phase of the work expect to complete their part of the job within the next 30 days if good weather prevails.

Pictured above is Pfc. Willard Meador, son of Mr. and Mrs. Robert M. Meador of Cross Plains, who is stationed with the 98th Military Police Battalion on Okinawa.

Mr. and Mrs. Meador received the following letter from their sons commanding officer, Capt. Harold D. Asbury, in regard to their son. Dear Mr. and Mrs. Meador:

I would like to take this opportunity to inform you that your son, Willard, is a member of this organization and is doing an outstanding job as a Military Policeman. I know you must be very proud of him.

We, of the Military Police Corps, work very hard and long hours, but we take a great deal of pride in our outfit and in the way we perform our duty and carry out the spirit of our motto, "Of the troops - for the troops." Your son, Willard, has been a vital factor in helping us carry out our mission on Okinawa.

In this organization, which is housed in a new modern concrete barracks, we have one of the finest mess halls on the Island and our cooks do a splendid job in preparing the food.

For recreation we have a day room equipped for reading, writing, listening to the radio, pool table, ping-pong table, checkers, chess and card games. In addition there is a bar installed for the comfort of the men of this organization.

I am writing to you at this time so that you will have some idea of the conditions your son is working under, and to tell you that every effort is being made to make him feel "at home" away from home.

It is indeed a pleasure to command a company composed of such fine upstanding young men as your son. He is a credit to you and to the Military Service.

Sincerely yours, Harold D. Asbury, Capt. MPC, Commanding

Buffaloes Win Over Mountaineers By Score Of 18-13; Play Dublin Here Friday Night

Showing real improvement over previous games, the Cross Plains Buffaloes unleashed a lightning ground attack at Santa Anna last Friday night to defeat the highly-touted Santa Anna Mountaineers by a score of 18-13, before a large Mountaineer homecoming crowd.

The Buffaloes drew first blood about midway in the first quarter. A fumble by Santa Anna's Jay Steward was recovered by Cross Plains on the Santa Anna 46 yard line.

In two plays, Robison and Kenneth Beeler moved the ball to the Mountaineer 23. A five-yard penalty against the Buffs set the ball back to the 23. Beeler, playing left half-back, took a handoff from Robison and raced down to the Santa Anna 4. On the next play he made the touchdown. The kick for the extra point by Right Tackle Bill Sipes went wide.

About four minutes deep in the second quarter, Cross Plains tallied its second touchdown. The Buffs took the ball after a Santa Anna punt on their own 31 yard line. From there, making three first downs in the process, Robison, Beeler and Right Halfback Gene Bush moved the ball down to the Santa Anna 19. Beeler took the pigskin over the goal from this point, swinging wide to the right. Sipes' kick was no good for the point.

Santa Anna scored its first touchdown immediately after, when Left Halfback Jay Steward took the Buffs' kickoff on his own 19-yard line and never stopped until after he crossed the Cross Plains goal line. By the time he reached mid-field, he was three strides in front of all the other players and he maintained this lead until he went over the doublestripes. Dean Bass, fullback for the Mountaineers, attempted to drop-kick the extra point, but the ball went high and not far enough forward.

Just before the half ended, Santa Anna put on another sustained drive, going from the Santa Anna 43 to the Buffs' 9 yard line before losing the ball on a fourth-down fumble. The half ended with Cross Plains on its own 5-yard line and leading by a score of 12-6.

A little more than half-way through the third period, Cross Plains made its final touchdown. The drive started on their own 42 yard line, where a Santa Anna punt had rolled out of bounds.

A series of quick-opening plays by Robison, Beeler and Bush moved the ball forward to the Santa Anna 3. From there, on the third down, Robison sneaked the ball across from his upback position. Sipes' kick was again no good.

In the opening minutes of the final quarter, the Mountaineers began a determined drive that ended in their second and final touchdown.

Santa Anna took the ball from their own 25-yard line after a Cross Plains punt. Jay Steward, in about three plays, ran the ball down to the Cross Plains 25. At that point, a 15-yard penalty against Cross Plains, followed by another 5-yard penalty set the Mountaineers up on the Buffaloes' 5.

Santa Anna drew a 5-yard penalty for offsides. Then, with first down and goal to go, Santa Anna quarterback Wes tossed a pass to Charles McClellan, who was standing all by himself in the right end zone. Danny Johnson, Mountaineer left tackle, booted the extra point.

That was about the extent of Santa Anna's threats to overtake the Buffaloes. Cross Plains took the ball on kickoff and managed to move it from their own 25-yard line to the Mountaineer 31 before being forced to punt. Santa Anna made about 14 yards then lost some 10 before punting out to the Cross Plains 33. The Buffaloes moved from the 33 to the Santa Anna 39 as the game ended.

The Mountaineers lost the services of Donald Trull, one of their speediest backs, early in the second period. He received an ankle injury.

The game was Cross Plains second win of the season, and also their second District 7-A victory. Santa Anna has now lost three and won one game.

TRAVELING TEXAS: Since Congress adjourned and I came back to Texas, I have done a lot of traveling. I have visited in literally hundreds of towns and have talked with thousands of Texans.

I really enjoy this part of my job. It is a great pleasure to travel over our wonderful State. It is a genuine privilege to get to talk with so many of my fellow Texans.

Before the next session of Congress begins in January, I hope to have spent some time in every congressional district.

SOUND SENSE: I find that Texans generally have their traditionally sensible attitude toward the problems facing our nation.

They want no backing down from the Communists.

They uphold a strong national defense program.

They want United States aid to foreign countries sharply curtailed.

They favor a non-partisan approach to our international and domestic problems.

They want and need an early lightening of their tax burdens.

They oppose weakening the Taft-Hartley Act.

These are among the subjects on which most Texans have very definite opinions. It helps me greatly, during this between-sessions period to get their views.

FARM PROBLEM: My travels have taken me through many important agricultural areas of Texas. In all of them, I have found a deep uneasiness on the part of the people about the future of agriculture.

Drought and falling prices have put the farmer and rancher between a rock and a hard place. They need help.

The future agricultural program is one of the most important matters that will come before the session of Congress beginning next January. Between now and then, I would like to hear from as many of you as care to write me about the kind of program you think will best meet the situation.

COST OF LIVING: Unfortunately, the fall in farm prices has been of little or no help to the consumer.

An official Government report says living costs are now at an all-time high. The food price index is up. One factor behind the increase is said to be higher prices for beef

and veal. The farmer gets less. The cattleman gets less. But the consumer pays more.

SALES TAX: It looks as if the Administration is backing away fast from the idea of trying to get a sales tax through the next session of Congress. The President has said he opposes a sales tax. He left the way open, however, for possible support of a "manufacturer's excise tax."

I personally think we must make further cuts in Government spending. Economy is not easy for a government or for an individual. But sometimes it is necessary. This is such a time.

THRIFTY MEAT MEALS: The Department of Agriculture has published a booklet containing over 100 recipes and suggestions for the selection, preparation, and serving of the cheaper grades and cuts of beef, pork, veal, and lamb. Name of the booklet is "Meat for Thrifty meals." If you would like to have a copy, write my Washington office and say so. It will be sent promptly.

BE SEEING YOU: I hope to see many of you in person within the next few weeks. It's great to be home. And rubbing up against so

much good Texas thinking is going to be very helpful to me when Congress meets again.

Mr. and Mrs. Fonia Worthy spent the week end in Fort Worth with Mr. and Mrs. Fred Morris, Jr., and the Orban Young family. They also attended the State Fair in Dallas during the week end.

Mr. and Mrs. N. L. Long, Jr., of Snyder spent the week end with homefolks.

Mrs. Ben Atwood and daughters, Jo and June visited their daughter and sister, Mrs. Darwin Anderson, and family in Coleman Sunday.

Mr. and Mrs. Dale Bishop and son were visiting in Abilene Sunday.

Mr. and Mrs. Arthur Boyle and children left for their home in Bonham Saturday after spending a week with their parents, Mr. and Mrs. Ira Hall and Mr. and Mrs. D. A. Boyle of Burkett. They spent Saturday night in Arlington with Mr. and Mrs. Charles Kunkel enroute home.

HEALTH NOTES

Austin—Guilty of pretzel posture? Does your body profile look like the bent part of a capital "D"?

Then harken to the words of State Health Officer Geo. W. Cox as he explains that good health and appearance have their starting point in good posture.

Here's how you, too, can obtain the stance of a Grecian god or goddess, as the case may be:

Hold your head high and pull your chin in until your eye level is parallel to the ground. Pull your shoulders back and make the shoulder blades form as near a flat surface as possible. Raise your chest up and push it forward until the buttons strain. Draw your abdomen up and in, and when you breathe make sure it's your chest that raises and falls rather than the abdomen. Flatten the lower part of your back, tucking the buttocks as close under the hips as possible. Tip your back down. Hold your knees straight but not stiff. Put your feet parallel, with the weight evenly balanced.

A good posture can be had without stiffness or strain, so don't exaggerate.

Some people feel it is more comfortable to walk, stand, or sit in a slouchy position, drooped over like a wilted weed. In your vain attempt for more comfort in daily activity, don't forget that the true secret of good posture is to keep the body well balanced throughout the day.

The old saying has it that "there's a place for everything," and Dr. Cox says that goes for the human body. Each organ has a specific space in which its function is performed. The vital organs—heart, lungs, abdomen, etc.—tend to be cramped when the body is slumped over.

Cramped lungs cannot deliver a full supply of oxygen; circulation is slowed up when the heart is cramped; and a cramped stomach impairs digestion.

"Remember," the doctor cautions, "true comfort and true relaxation comes with good posture."

In the street parlance that means "straighten up, friend, you'll feel better."

Mr. and Mrs. Charles Sullivan and family of Weatherford spent Sunday night and Monday here with her parents, Mr. and Mrs. Lee Bishop.

Mr. and Mrs. Bill Wagner visited with friends here for a short while Friday morning. The Wagners were returning to their home in Amarillo from Temple where he had received a medical check-up.

Mrs. Zola Plumlee is vacationing with her daughters in Midland, Stanton and New Mexico this week.

Mr. and Mrs. F. R. Anderson were in Lubbock visiting their son and wife, Mr. and Mrs. Robert Anderson, and attended the Texas Tech-A&M game Saturday.

Mrs. Lester Mannering of Colorado City spent the week end here with her father, C. B. Beeler, and other relatives.

Capt. and Mrs. R. G. Thompson and sons spent Sunday night here with his parents, Mr. and Mrs. Richard Thompson. They left Monday for Big Spring to make their home.

Mr. and Mrs. J. L. Helm of Floydada spent from Thursday to Saturday of last week here visiting with O. M. Smith.

RUPTURE SHIELD EXPERT HERE

H. M. Shevnan, widely known expert of Chicago, will personally be at the Wooten Hotel, Abilene, Sunday and Monday, October 25 and 26 only, from 9 a.m. to 4 p.m.

Mr. Shevnan says: The Zoetic Shield is a tremendous improvement over all former methods, effecting immediate results. It will not only hold the rupture perfectly no matter the size or location but it will increase the circulation, strengthen the weakened parts, and thereby close the opening in ten days on the average case, regardless of heavy lifting, straining or any position the body may assume. A nationally known scientific method. No under straps or cumbersome arrangements and absolutely no medicines or medical treatments.

Mr. Shevnan will be glad to demonstrate with out charge. 7344 No. Ridge Boulevard, Apt. 8B, Chicago 45.

Large incisional hernia or rupture following surgical operation especially solicited.

LIQUID OR TABLETS—SAME FAST RELIEF

RHEUMATIC VICTIM THROWS AWAY CANE

Thanks to **AR-PAN-EX Tablets** "I have had terrible pains in my knees for over two years and couldn't walk without a cane," writes Mrs. Mary Creamer, St. Louis, Mo., "About two months ago a friend suggested AR-PAN-EX Tablets. I took a bottle and the pains left my legs and by the time I finished my third bottle I was walking without any pains at all."

The big reason why AR-PAN-EX works best, is because it contains seven special ingredients—works seven ways at once—speeds long-lasting relief to chronic deep-seated agony; increases energy and resistance; and tones system. Sensational new formula of a prominent Eastern Scientist, scientifically "film-coated" to prevent useless, distressing action in the stomach. "Film-coating" dissolves in the small intestine where oil pain-relieving medicine is quickly released into the bloodstream—speeds fullest possible relief.

Positively Nothing Like AR-PAN-EX

Thousands of men and women suffering from crippling torture of deep-seated rheumatic, arthritic pains get sure, faster, relief, by taking AR-PAN-EX Tablets. Be guided by them. If your druggist is out of AR-PAN-EX he will be glad to order it for you.

Bayou Philosopher In Favor Of Getting Energy From Sun If It Can Be Done Without A Meter

Editor's note: The Bayou Philosopher on his Johnson grass farm on the Bayou has a wild idea this week, which he won't get anywhere with.

Dear editor:

I was out here yesterday afternoon drainin the oil from my tractor so I could use it in my car for a trip to town, some people say this is a big waste of time but my time is cheaper than lubricatin oil, and as I was wipin my hands off on a newspaper after I got the oil swapped I noticed an article and while it was a little hard to read on account of the smear I sat down and leaned against the car fender and read it.

This article said the world's supply of oil may play out in about 70 years and the supply of atomic power in 75 years, and we'd better get busy figurin out a way to draw energy from the sun.

Now I'm not disturbed over this matter, I believe the supply of oil, whatever it is, will last longer than my car or my tractor either, and even if it didn't I can think of worse things than not bein able to plow on account of a dry crank case, and anyway lack of oil ain't the only thing that frequently keeps me from drivin to town in my car, the spark plugs, for example, or the radiator, or a flat tire, or my wife.

But I am interested in this plan to draw energy from the sun, that is, energy to run vehicles, not me, I got all the energy I want, which is enough to get by on but not enough to be forcin me to be splittin the breeze goin up one row and down another, in fact you might say me and my energy are in perfect balance, and I intend to keep it that way.

The phase of this new source of energy though that interests me is not whether or not scientists can do it. I believe they can, anybody who can invent an automobile without a gear shift and a strapless bathin suit you can dive in, can figure out a way to draw energy out of the sun.

What I want scientists to be spendin their time on is figurin out a way to get this energy to me without the use of a meter.

We got all the metered energy we can handle, what this country needs is some meter-less variety. If they have to go back to puttin gear shifts in cars or straps on women's bathin suits in order to remove the meter from this new source of energy, I'm willin. I don't care what makes a light bulb burn or a pump work or a stove heat up, provided scientists could figure out some way to get the stuff to me without runnin it through a meter.

I look for this day to arrive though about the same date they eliminate taxes.

Yours faithfully,
J. A.

Pioneer HD Club Meets At Club House Oct. 7

Mrs. Mildred Crow, Home Demonstration agent, met with the Pioneer club, at the club house, Wednesday, October 7, to bring the lesson on "Background for the Living Room." She showed the effect of color on floors, wall and ceilings in creating a feeling of warmth or coolness in rooms of different exposures to light. She also proved that to produce the same amount of light in two identical rooms, except for light and dark walls, it requires more than twice as much electricity in the one with dark walls.

In a previous meeting, officers for the new year were elected as follows: president, Mrs. Joe Fleming; vice president, Mrs. Calvin Roady; secretary-treasurer, Mrs. Bart Borwin; Council delegate, Mrs. S. O. Skinner, and reporter, Mrs. Henry McCoy.

Mrs. Skinner was elected as treasurer for the cemetery fund.

The next club meeting will be October 21.

Mrs. H. G. Barnett and daughter of Albany visited Mr. and Mrs. Earl Barnett here Saturday.

Mr. and Mrs. Cecil Champion of Comanche visited friends here Sunday.

Mr. and Mrs. Travis Renfro of Abilene visited their parents, Mr. and Mrs. J. H. McElroy and Mrs. Lem Renfro, Sunday.

Mrs. J. A. Burton and Mack Williams were called to Midland Friday of last week to be at the bedside of their sister and daughter, Mrs. Drucie Bell Shaw, who is seriously ill. Mrs. Burton returned home Monday afternoon and Mr. Williams remained with his daughter.

Mr. and Mrs. Jack Strickland and daughter of Texas City arrived in Cross Plains Monday morning to spend their vacation with his parents, Mr. and Mrs. W. A. Strickland. The two families went to Dallas Tuesday to spend a few days with Mr. and Mrs. Ray Curry and daughter.

Washington

"As It Looks From Here"

OMAR BURLESON
Congressman
17th District

Washington—During the few days since my return to Washington, I am able to gather a few impressions which might indicate future courses

of action on the part of the Administration.

On the domestic side, the farm program and what to do with farm surpluses is undoubtedly the biggest problem to be faced. Some of the good intentions voiced earlier by Mr. Benson, Secretary of Agriculture, have now gone out the window. The impression is that they are now facing realities, instead of theories.

On the national and international scene, the number one question is how to get our defenses and military power to the fact that Russia has the hydrogen bomb.

President Eisenhower has made some pretty strong statements to

LET'S TALK LIVESTOCK BY TED GOULDY

Fort Worth—Some sort of price support program appears certain for livestock. About the only thing that could prevent this would be a turn-about that resulted in a sharp rise in cattle and other species of meat animals.

Latest straw in the wind: The House Agriculture Committee late last week called on Agriculture Secretary Benson to extend price supports to cattle immediately to prevent "economic disaster" to producers.

Latest newspaper poll conducted by the Amarillo Daily News netted a majority of votes in favor of supports.

The proposal outlined by the House Committee was for support at a certain level for "choice" grade cattle. While there are relatively few "choice" grading cattle produced in the Southwest, the reflected strength that would result from encouraging Corn Belt feeders would help prices here.

Secretary Benson has shown no inclination toward support prices for livestock, and in general is dedicated to self-help attitude toward the farm problem. Self-help is increasingly difficult for stockmen.

Most observers feel that when the chips are down the present administration will come with a program of supports, etc., not too much at variance with programs already established. Right now a lot of fat is being trimmed off Department of Agriculture programs.

Along with this fat there are many die-hard New Deal and Fair Deal political appointees being forced to resign or be fired.

No doubt about it, the farm program is shaping up as the No. 1 issue in political circles and the next congressional and presidential elections are sure to be decided on that issue.

At Fort Worth Monday the trade on cattle and calves was slow due to the big run. Probably 50 percent or more of the grown cattle were cows. Prices were weaker, most cows and bulls 50 cents off, and some bidders trying for bigger reductions. Tuppy fat calves were steady, but stocker trade was very narrow again. Good and choice grain fed steers and yearlings were very scarce, selling from \$17 to \$24, and common and medium grassers drew \$9 to \$15. Cull yearlings sold down to \$17.

Fat cows drew \$8.50 to \$11.00, and canners and cutters drew \$5.00 to \$8.50, some shells below \$5.00. Bulls

wake us up to the possible danger. It seems to me he is going to have to do some very plain talking in order that the entire nation may know something of the awfulness of such a possible bomb attack.

There is current newspaper talk about an agreement with Russia to disarm, or at least to control the output of the hydrogen bombs. It should first be understood that Russia has offered to discuss such an agreement, but as usual with the Russians, there is a catch to it. They would probably agree to most anything, but they have balked at any arrangement for inspection to see that the agreement is carried out.

Other things shaping up for the coming Session of the Congress are: the matter of taxes; balancing the budget; revisions in the Social Security laws; recommendations for changes in the Taft-Hartley Law; and numerous items of unfinished business carried over from the last Congress.

The next Session of the Congress promises to be busier than the last. The new Administration put off a great many things until it was more experienced on which action will need to be taken.

During my visit back home, I greatly enjoyed talking to people and getting their views. It is hoped that everyone will continue to give me the benefit of their thinking and suggestions on the issues vitally affecting all of us. Never before in history has the public been so well-informed on so many subjects as our people are today. It is true that there is also a goodly amount of misinformation, too, but usually we are able to sift the grain from the trash and come up with a pretty clear attitude on what is happening. It is often confusing enough without such distractions, but it seems most people feel they must take a greater interest in public affairs. In my opinion, those who feel that way are correct. In these days our very survival may depend on it.

The Department of Agriculture has announced a hay program for the drought areas similar to the emergency livestock feed. The difference in their thinking is that the hay program should be worked through local feed dealers. Ten million dollars is earmarked for the purpose, most of which will go for cost of transportation. Shipping charges from the North and Midwest where hay is available amount to about the purchase price at the source of supply.

HEALTH NOTES

Austin—Nursing home operators from all over Texas will convene in Austin October 19 for a two-day discussion on how they can give the best care to the old folks whom fate has placed in their hands.

The meeting, to be held in the auditorium of the State Department of Health, will open at 10 a. m. on Monday, October 19, and last through the following day.

State Health Officer Geo. W. Cox, long-time champion of Texas' oldsters, promised that operators who attend will hear an outstanding panel of speakers cover the various problems associated with running a nursing home.

Specifically urged to attend are home operators who have been granted a temporary license under terms of the nursing home licensing law passed by the last legislature.

Subjects to be discussed during the 2-day meeting include an interpretation of the licensing law; medical and nursing services in nursing homes; sanitation and building standards, rules and regulations of acceptable operation.

Dr. Cox calls the problem of handling aged citizens "one of the most pressing facing our leaders today."

"These people belong to a generation which time is shoving harshly aside," the health official said. "They deserve something better than to be forgotten."

The State Legislature apparently agrees with that sentiment. During its last session, a mandatory licensing law was enacted for all nursing and convalescent homes.

Designed to raise the standard of care given home residents, the law gives the State Department of Health authority to inspect all

drew \$7 to \$11, a few above and below that range.

Good and choice fat calves drew \$12.50 to \$16, a few heavies to \$16.50. Common and medium kinds drew \$9 to \$12, with culls from \$7 to \$9. Stocker steer calves drew \$10 to \$16, one top load \$17. Heifer calves drew \$14 down. Stocker and feeder steers and yearlings sold from \$9 to \$14.50. A few stocker cows drew \$7 to \$10.50.

Fog prices tumbled to the lowest point since last Spring (April) and top hogs drew \$21.25 to \$21.50. Sows held steady at \$18 to \$20.50. Underweights drew \$19 to \$21.

Slaughter ewes at Fort Worth Monday were weak to around 50 cents lower. Fat lambs were steady to weak, however the quality of the run was lower than usual and liberal fills offset some of the lower bids. Feeder lambs drew strong prices.

Sports Afield

By Ted Kesting

Col. Townsend Whelen, an associate editor of Sports Afield magazine and one of the top authorities on camping, thinks sportsmen should pay more attention to system. When packing your equipment get up a system and stick to it. Have a place for everything and everything in its place. It means less labor, time and confusion in traveling and in camp, and you have more time for fishing or hunting.

For easy handling your outfit should be packed in bundles, boxes or packs weighing not over fifty pounds. Generally these will be divided into rolls of tentage and bedding, a box or pack of cooking and eating utensils, a personal kit of clothing, and the boxes or bags containing grub.

The kitchen kit will consist of utensils and food you will use the first meal after you pitch camp. This kit should contain everything necessary for the cook to get right to work as soon as you arrive at your campsite.

For an auto or pack-horse trip, all these will pack nicely in one of the panniers or boxes, and if you line the inside with tin and bore four small holes at the bottom corners, you can also use it for an icebox when it is unpacked. For a canoe trip Whelen likes to use a wicker pack basket for the cook kit since it

homes for health, safety and humane treatment of all residents.

Attendance at the October meeting will acquaint home operators with what is expected of them, said Dr. Cox.

holds everything easily and on portages the pots and pans do not dig into his back.

Your personal kit will contain extra clothing and may be packed in another pannier, a packsack or a side-opening duffel bag. Pack these articles-like clothes that you will not use every day-in the bottom, and wrap up anything breakable in the clothing. Those articles that you use daily, such as your toilet kit, towel, repair kit, tackle box, and gun-cleaning kit, have on top so that you can get at them readily.

The grub should be packed in panniers for pack-horse transportation, or in duffel bags or large

packsacks for canoe travel. Dry grub like cereals, flour, dried fruit, etc., are best packed in light, water-proof cotton sacks holding 5, 10, or 20 pounds (these you can make or get from most camp outfitters) each tagged with its contents. Put butter and syrup in friction-top cans, and wrap bacon and ham in waxed paper. Your canned goods can go as they are in the outside container, but if this is a packsack, place them on the outside away from your back. Use system here too, with the grub that you will use during the first few days most convenient.

Gasoline

Natural Gas

for Sunday driving . . . or

to cook next Sunday's roast?

Most people think only of gasolines, lubricants, and fuel oils when the petroleum industry is mentioned. The fact is, practically all oil producers are also natural gas producers. So today the driller of a wildcat, or exploratory well, calls his venture successful if the well discovers either oil or gas.

If it is an oil well, then he has helped to supply the country's increasing needs for oil and oil products; if it is a gas well, he has discovered additional supplies of an efficient, economical fuel for household and industrial use.

The petroleum industry's development and conservation of the country's natural gas resources is a practical demonstration of the progress to which Oil Progress Week invites attention.

Beginning with the location of the well, advanced geological and geophysical studies of underground formations aid in the selection of likely oil or gas producing areas, but still the odds against a wildcat well producing either gas or oil are eight to one.

If a natural gas field is discovered, reservoir engineers immediately begin their studies to determine the best producing methods to conserve the underground energy and to obtain the maximum production for the longest possible time.

If the gas that is discovered is "wet," it is processed in gasoline plants which remove the liquid parts and send them to refineries for further processing into motor fuels and aviation gasolines, or to petrochemical plants to be converted into a long list of useful chemical products, among which are the plastics and synthetic fabrics with which you are so familiar. "Dry" gas, the residue from gasoline plants, and sometimes produced direct from the gas field, is the natural gas that burns in literally millions of homes throughout America and under the boilers of thousands of American industries.

So, whether a wildcat well discovers oil for gasoline or natural gas for the kitchen stove, it adds to the available energy resources of the most highly mechanized nation on earth; it supplies products essential for today's and tomorrow's high living standards; it gives additional strength to measures for National defense.

Q. I'm a teacher and a World War II veteran. I've been spending my summers going to school under the GI Bill. This coming summer I wonder if I could take a course to get credits I need in order to renew my teaching certificate.

A. No, you could not. Summer-time GI training by teachers may not be taken just to renew certificate or keep it in force. But it may be taken if it will lead to a higher or more advanced certificate than the one you now have.

Q. I understand that under the Korean GI Bill a veteran can't take a course leading to an objective he's already reached. Does that mean I wouldn't be allowed to enroll in a bar review course? I've never taken one and that's the only course I want.

A. You would be permitted to take a bar review course under the Korean GI Bill, to reach the objective of lawyer. Such a course generally is accepted as necessary to fulfill the requirements of that objective.

Q. I've gone back on active military duty, and my National Service Life Insurance policy is under waiver. Will I collect dividends during the period the waiver is in effect?

A. No. Dividends may not be paid on policies during the period when the premium waiver is in effect.

Giles asked the oil companies about the land on which they would like to make bids. Fourteen companies responded, asking that 650,000 acres be put on sale.

Giles' recommendation, approved by the School Land Board, was that 500,000 acres be auctioned.

 Quilt talking about a recession, Governor Shivers advised Texans at a speech in Dallas.

There is more danger that Americans will talk themselves into a depression than there is that the economy itself will bog down, the governor told an audience of 700.

Texas' industrial growth will continue at ever-increasing rates, the governor predicted. The Gulf Coast is becoming the nation's chemical center, and Dallas will be the nation's textile manufacturing center, Shivers said.

He cited other signs to indicate that the state is in good financial condition.

They think the candidate is a natural who will appeal strongly to the voters.

— t p a —
 Everything is set for the visit of President Eisenhower to the home of Governor Shivers at Sharyland, near Mission.

Arriving on October 17, the president will remain there until the 19th when he will attend dedication ceremonies of Falcon Dam on the Rio Grande.

President Ruiz Cortines of Mexico will also take part in the celebration.

Austin—Texas politics, long brewing, boiled over with the announcement of Reuben Senterfitt that he intends to run for governor next year.

That puts the 1954 campaigning activity in motion.

It means that prospective candidates for governor must seriously consider making up their minds now about next year's plans.

Most of them have been waiting for Governor Allan Shivers to declare his intentions.

But Senterfitt, by his announcement, placed himself in the forefront of gubernatorial candidates—for the time being at least.

What will he do if Shivers comes out for re-election? Said Senterfitt: "I'm just going to wait and see what he does, and then I'll talk about that."

Senterfitt placed himself in this position: If Shivers runs again, Senterfitt can get out of the race—or stay in, depending on how he feels about it. If Shivers decides not to run, Senterfitt has a head start on the other candidates.

Obviously, Senterfitt thinks Shivers will not be a candidate for governor next year.

Reporters asked Shivers for his comment on the situation. The reply was, "No comment."

Senterfitt has served two terms as speaker of the house. Conservative, quiet and an able organizer, Senterfitt, who is serving his seventh term as a representative of the San Saba district, is highly regarded by fellow-members of the Legislature.

— t p a —
 There were developments also in the prospective race for U. S. Senator.

Lyndon Johnson, the incumbent, has visited widely over the state. He has said that he expects no major opponent next year.

But Jack Porter of Houston, Republican national committeeman, has promised that there will be someone running against Johnson.

Several prospects have been mentioned for the senatorial race, including Congressman Martin Dies and Robert Stripling, former chief investigator for the House Un-American Activities committee.

Reliable inside information is, however, that the anti-Johnson people have just about settled on their man. They are working behind the scenes and preparing a smash announcement.
