PRODUCER DRILLED NEAR CITY

T. S. HOLDEN DRILLS IN 50 BARREL WELL WEST CROSS PLAINS

Spotlight was focussed on the Cross Plains West Field this week when T. S. Holden and associates' No. B6 Cavanaugh, was drilled in for a production estimated at over 50 barrels. Bottom hole was about 1650 in the West Field sand. The pay was reached Sunday.

The new producer is 450 feet east of a 50 barrel well drilled by Holden two years ago. It is located in an area that has been yielding commercial production over ten years. It was learned Wednesday from sources close to Holden that he contemplates drilling a wildcat to the same sand, the test to be located southeast of the new producer, however plans were said to be indefinite.

Holden was reported to be very enthusiastic over prospects for the west Cross Plains area.

After deliberating only 15 minutes, a jury in forty second district court at Baird last week exonerated J. M. (Pete) Eudie of charges of armed robbery in connection with a filling station "stick-up" between Putnam and Baird last November ninth.

Charlie Coats, station agent, was able to give only a vague description of the man that robbed him of \$18 in cash and \$300 in checks. Coats' recollection of the robber concerned chiefly the voice and the hat he wore.

Eudie surrendered to officers in Baird and in January confessed to a charge of "high-jacking" and was given a prison sentence of five years.

"SPRING MADNESS" IS BOOKED AT LIBERTY

"Spring Madness" brings to the Liberty Theatre Saturday night private then Sunday and Monday a story of the young people who fall in love before graduation, without thought of the economic factor. They just take it for granted that two can live as cheaply as one.

Maudie O'Sullivan, as the New England college girl, brings you the atmosphere of the sorority houses with charming realism. Lev Ayres, as the Harvard last year man, suddenly realizes that his career hangs in the balance. He is already pledged to go abroad for two years immediately after his graduation. He explains all this to the girl and she accepts it bravely.

Their friends join in the new complications, which ensue just prior to the Spring Dance. It really begins to look pretty bad for Harvard—but when he sees the girl in the arms of another man—all of his caution goes by the boards and so does the trip to Europe.

You'll laugh at and with these young cyclones in their swank college clothes—and you'll enjoy them every minute.

Experiments in Eastland county indicate that more marketable potatoes were grown last year where medium sized potatoes were used instead of smaller ones." Brison said yesterday.

FSA MAKING LOANS TO MORE FARMERS

The Farm Security Administration is now making loans to some of the most able farmers in the county and is not limited, as it once was, to the farmer who has been on relief. It was made known today by J. S. McKnight, FSA's county supervisor.

"Let me say right here that Farm Security Administration loans are made only to those who are unable to obtain adequate financing from other sources," the supervisor said.

"The borrower who can get the financing which he needs from a bank or from any other private financial institution is not eligible for an FSA loan. But there are some types of loan which even fairly large farmers and ranchers can obtain only from FSA."

Farm Security has made many loans this year to farmers or ranchmen who were in need of more capital to buy livestock or to rent more acreage. In these cases, the operators can get their debts adjusted. Farm Security will not lend to a man who is in such a hard situation that he has no prospect of paying off old debts as well as new. If the old debts are too heavy, FSA helps to work out an agreement with creditors by which the debts are scaled down.

"Many of these borrowers are fairly large operators, and the loans sometimes run to several thousand dollars," the supervisor said.

He also pointed out another type of farmer served by FSA, who can get all the money he wants at the bank for his individual operations. But he may occasionally need to use big-scale equipment for a few days, or a purchased site, and yet have too little need of it to own one himself. He is eligible for one of the cooperative enterprises which FSA is financing.

An estimated 12,000 boys and girls filled the grounds to very near overflowing. The boys are getting their experiences and observations and it is hoped some of the letters can be printed next week.

While the Texas Agricultural Station have not developed any of the hybrid corns due to the great diversity of climates and soils and neither do they recommend any of the Northern hybrids a very promising new variety of corn for West Texas conditions has been developed. Golden June is the name of this corn and last year at the Chillicothe station it yielded 47 bushels per acre compared to 34 bushels for supercoper, 31 for yellow dent. In order to try this corn under Callahan county conditions the following people will plant demonstration plots of about one acre: Steve Foster and Dave Foster, 4-H club boy of Atwell, Norrell Long of Drossy, S. S. Harville of Olin, Forrest Scott of Cottonwood, Roy Kendrick, of Denton.

For blue bugs try this remedy: Put one half gallon of carbolic acid in 5 gallons of coal oil and spray the house and roosts, and any other places that the insects stay. The above is recommended by the AAM College as being the best remedy available and it is also good for flies.

Cattle in this part of the country are especially at this season of the year a need mineral stated Dr. T. O. Booth, State Veterinarian, of the Livestock Sanitary Commission who visited in the county last week. A good mineral mixture can also be prepared at a cost of about one and one fourth cents per pound by mixing equal parts by weight of salt, bone meal, and oyster shell flour. This mixture should be put out in salt troughs so that all livestock may take it free choice.

W. I. Glass, District agent, will hold a program planning meeting in Baird, Friday, March 24 at 2:30 p.m., in the county court room. It is hoped all members of the farm demonstration council and heads of other government agencies can attend the meeting.

SABANNO BAPTIST CHURCH NEWS Last Sunday was an excellent day with the attendance at Sunday School almost reached the one hundred mark. Many more came in for the preaching service.

We are hoping that Sunday, March 19th will be a banner day with more than a hundred in Sunday School and a fine attendance at both church services.

Remember that Bro. Thrash will fill the pulpit Sunday night at 7:30 p.m. We are expected a house well filled.

Most Cordially, C. E. Poe, pastor

CARD OF THANKS

We take this means of extending our heartfelt thanks and deep appreciation to friends and neighbors who were so kind during our recent bereavement, caused by the passing of our beloved husband and father. Words fail miserably to express the real appreciation that is on our hearts.

Our prayer is that the Lord from whom all blessings come may repay each and everyone of you abundantly for the kindness rendered us during those sad hours.

WITH OUR WILDLIFE

By JOHN R. WOOD State Game Warden

Note: The author wishes to thank Mr. O. F. Etheredge, State Game Warden, for the following article on Fish Pond Improvement.

Fish Pond Improvement A few weeks ago there was listed in this column certain qualifications a body of water must possess for successful propagation of fish life.

As a general rule the small tanks and lakes of this section of Texas, practically without exception, have very muddy bottoms, and in these cases the percentage of fish that will hatch and survive is very small because the mud settling on the tanks or lakes have adequate spawning areas.

Basins—This use of coarse gravel, placed in piles about 18 inches in diameter, spaced about 10 feet apart in water four or five feet deep, makes a very good place for bass to spawn. It will not be necessary to shape the gravel, because the fish will construct them to their own liking.

placed one to every ten or fifteen feet. Catfish—The catfish demand an entirely different type of place in which to spawn. Catfish will spawn in holes under rocks, in hollow logs, hollow tile, old cream cans and in most any place in which they can get and where the bottom of the spawning place can be swept clean.
