## Professional Wrestling Tonight At College Gym—8 o'Clock

A bang-up program is in store for Wrestling fans of this area at the College gym tonight as the Lions Club makes a second attempt to feature this favorite sport. The first attempt was squashed two weeks ago by the drifting snow which brought all activities to a stand-still.

The wrestlers featured at that time moved on to other localities but wrestling promoters came up with another good card for this event. The first match will be between Dory Funk and Frank Murdoch which may turn into any kind of an affair before it is finished and the second match will be a tag team affair featuring four Negro girl wrestlers. Fans are expecting and will probably see plenty of hair-pulling in this event. Reports are that these girls really put on a "worth the money" show. The four taking part in the tag-team match will be Babs Wingo, Kathleen Wimbley, Louis Green and Ethel Johnson.

Both events will be two out of three falls with a one hour time limit. The wrestling will begin at 8 o'clock. There will be lots of ringside seats but none will be reserved. It will be a first come, first served affair and the price of admission will be \$1 for adults and 50 cents for children.

## Services Held Tues. For Cave-in Victim

Funeral services were held Tuesday afternoon at the Church of Christ for Robert Emory Partain with Clarence Tilley, Minister of the local church, and Rev. T. H. Harmonson, pastor of the Martin Baptist Church officiating.

Robert, age 10, died of suffocation Sunday afternoon when he was trapped in a cave-in near his home about 2½ miles north of Ashtola. He was playing in a cave located in a canyon near the family home. His 8 year old sister, Roberta, found his feet sticking out of the cave-in and ran home to tell her mother.

Mrs. Partain rushed to the scene and sent her daughter for more help. When neighbors arrived Mrs. Partain had dug her son out with her bare hands. Artificial respiration and oxygen were administered but failed to revive the youth.

Robert's father was in Amarillo at the time, visiting his mother, Mrs. Audrey Partain.

Survivors are the parents, Mr. and Mrs. R. R. Partain, a sister, Roberta, one brother, Rudy Partain, all of Ashtola, and his grandmother, Mrs. Audrey Partain, Amarillo.

Pallbearers were Leo Wallace, Joe Tom Lovell, Harold Graham and C. W. Tolleson.

Burial was in Citizens Cemetery with the Murphy Funeral Home in charge of arrangements.

## Clarendon Comets And Bulldogs In Double-Header Friday Night

On Friday night, February 17, you will have an opportunity to see some more good basketball as the Comets meet Iowa Wesleyan College and the Bulldogs meet Odessa College.

The Iowa Wesleyan College of Mt. Pleasant, Iowa has one of the great teams in the country. This was proved last week when they lost a 38-36 game to the Wayland College team. Last year the Iowa team was one of the best in the National Tournament. They should be much better this year as they have added All American 6' 3" Barbara Sipes to the squad.

Last week the Bulldogs met the Odessa College in Odessa and lost by a 72-76 score. This week the Bulldogs will be out to get revenge for that defeat.

Don't forget to come out to this big double-header on Friday, February 17. The Comets and Bulldogs need your support in these games.

## Lions Featuring Aunt Jemima At Pancake Supper

### FRIDAY NITE BASKETBALL GAMES TO FOLLOW

In a spirit of helping encourage the attendance at the basketball games Friday night, the Lions Club is having their annual pancake supper. As a special feature of the pancake supper, Aunt Jemima will be present to lend her hand at making the pancakes a success.

Fifty cents (50c) will pay for all the pancakes, bacon and sausage, and coffee that you can hold, and the Lions Club will be disappointed if you don't go back for second helpings.

Serving will begin at the Lions Club Hall tomorrow night at 5:30, and continue through 7:30.

Since you will be away from home anyway when you go to eat those delicious pancakes, the Lions Club is suggesting that you then go to the College Gym to see the two college basketball games between the Clarendon College Comets and the girls from Iowa Wesleyan College who are ranked as second in the nation, and the game between Clarendon College Bulldogs and the boys from Odessa. Both games should be two of the best of the season.

**THE LION'S TALE**

By Carl Allmond

The sunshine brought Boss Lion Lowe back to life Tuesday. We surmise he is doing his own weather forecasting—he and the board of directors have two full nights planned for Clarendon. They have decided to have the wrestling, good or bad weather; 8 o'clock is the time, College gym, Thursday, Feb. 16th. An unusual feature, that evening, will be when four colored women wrestle a tag match. You may have seen them last week on TV. Frankie Murdock and Dory Funk will wrestle the main event; we think Dory can whip Frankie. If he can't, we are in favor of sending Dory back to the ranch, and challenging Frankie ourselves.

Friday night there will be another of those good, wholesome pancake-with-bacon suppers—all you can eat for 50c. Aunt Jemima pancake flour will be used, and Aunt Jemima, herself, will appear in person. The supper starts at 5:30 and closes at 7:30; starting early enough that you may eat your pancakes, then go on to the basketball games which start at 7:00. The girls play Wesleyan College of Iowa; they rate second in the nation. The boys follow, playing Odessa. A big night—all the pancakes and bacon you can eat for 50c, then two good basketball games at the gym.

Well—Drennan took us by surprise; didn't have a program, in fact, didn't even appear. John Gillham and Flip Breedlove were there, but no one knew the magic word, so they just sat there "meek as lambs". Guess Drennan wanted to remind us just who the chairman of the program committee is, and how well he can handle those two boys. Because of

**THE BENSON BLOOPER**

The recent Harper's Magazine article condemning the American farmer as a master of chicanery, artifice and trickery in robbing the public treasury was another excellent example of ignorance at work with a poison pen. In the first place, it was obvious that the writer was completely devoid of any understanding of the farm economy of this country. In the second place, it was most obvious that the article was not intended as a contribution toward the solution of the farm crisis. Third, it was clear that the article was written and published with a total disregard of the human element involved in the farm situation. It was (perhaps, one of the most vicious pieces of propaganda that has yet been loosed against the agricultural segment of our economy and was published in a city magazine for city consumption.

Although the article was highly praised in a letter signed by the Secretary of Agriculture, Mr. Ezra Taft Benson, the said Secretary, when the matter was made public, promptly denied having read the article or the letter that he signed praising it. He promptly issued a statement that the article did not reflect his views. In all fairness I must say that I feel that Mr. Benson is definitely telling the truth when he tried to disassociate himself with the letter praising such a distorted statement concerning our farm people. Any man who would underwrite such conclusions as those in that article would be out of his mind and certainly not qualified to serve as Secretary of Agriculture or in any other official position concerning the farm economy. I feel that Mr. Benson's situation is, perhaps, one of neglect, not only in signing such a letter, but in permit-

ting those who wrote the letter and whose views are undoubtedly reflected thereby to remain on the public payroll in the Department of Agriculture. We all know that the physical operation of all the Departments is in the hands of lesser officials and other employees, that it would be humanly impossible for the Secretary, himself, to do even a little bit of the physical work required in administering the overall operation. Therein lies the sadness of the present situation. The letter reflects the thinking of the lesser officials who are charged with the administration of the programs. It further reflects that these programs are undoubtedly in the hands of city people who were never on a farm, or people who have been away from the farm so long that they have taken up city ways and forgotten the problems of their forebears.

The article would have been more factual had it pictured the American farmer as the victim of the masters of chicanery, artifice and trickery and have stated that it would appear that some of those masters or their willing slaves had infiltrated into the Department of Agriculture.

If Mr. Benson is sincere in saying that the letter does not reflect his views, he has it in his power to correct the bad situation that prevails. He can relieve his Department and the American farmer of those who are presently fostering such views and apparently enjoying their power of administration.

**The Declaration of Washington**  
British Prime Minister Anthony Eden has just concluded his speech to the House of Representatives. Prior to his appearance in our Chamber, he had addressed the United States Senate. He delivered a prepared speech and then turned to extemporaneous remarks. Like most other people, he is a much better speaker extemporaneously than when delivering his remarks from a prepared text. He pointed out with great detail the criticisms that had been directed against England on the foreign aid issue and then remarked that England

was not seeking more money, that she was now able to stand on her own economic feet and expected to continue to do so in the future. Needless to say, this pronouncement met with loud applause. He was soundly applauded for several other statements during his talk. On one of these there was a political division. He made some kind remarks about General Marshall which were met with applause from the Democratic side of the aisle and silence on the Republican side. He called attention to the fact that the night before, he and the President of the United States had signed the Declaration of Washington. I am sure you are all familiar with the terms of that Declaration, as it has been published in full in most papers. Although embodying many general terms, it is primarily directed at the number one trouble spot of the world, to wit, the Near East. If conflict can be avoided in that area, much will be gained. As it presently stands, a small spark could start a severe conflagration. Let us hope that the people involved will heed the call of peace and recognize the policies stated in the Declaration of Washington.

**Reactions Observed In Nutritional Experiments With Baby Chicks**

AUSTIN — Instantaneous reactions have been observed in nutritional experiments with baby chicks by University of Texas scientists. Chicks are shown to require various minerals, amino acids and vitamins from the moment they take their first food in the outside world.

Previously, nutritional experiments with chicks, as well as small mammals, have been of several weeks' duration, since it was assumed that such periods of time were needed to get significant results. The University scientists found, however, that by exercising particular care in weighing the chicks, they could observe indicative growth responses overnight.

The experiments were conducted by Dr. Roger J. Williams, director of the University's Biochemical Institute, and Dr. Betty G. DeBusk, one of the Institute's research scientists, through the Institute and the Clayton Foundation for Research.

Results of the chick experiments will be valuable in testing for unknown vitamins and in improving food-compounding for poultry, Dr. Williams explained.

"We hope the tests will aid in the discovery of new vitamins which in turn will improve human nutrition," he said.

The University researchers suggest that the same experimental technique be applied to other young fowl. They believe the new method of observing instantaneous results will be invaluable for early culling in poultry-breeding experiments.

"Many Panhandle farmers and ranchers have already filed tax returns for the 1955 calendar year," John R. Sanderson, Social Security Administration, Amarillo, Texas, announced today. "This year for the first time they have paid self-employment tax for social security protection. Sanderson emphasized that all farmers who netted \$400 or more in 1955 from farming must file these returns by April 15, 1956. Proper tax returns and advice concerning taxes can be obtained from the District Director of Internal Revenue, Amarillo.

Sanderson explained, "This social security credit will mean much to farm families. Suppose we take the case of a young farmer with a wife and child. His

earnings up to \$4200 a year are taxable for social security. In the event he should die soon after the close of his second crop year under social security and had made the maximum of \$4200 in both years, the widow and small child would receive a monthly benefit of \$162.80.

"Few farmers make \$4200 a year," Sanderson continued. "Let us consider an instance where the farmer makes \$1200 a year on an average. At that rate he can qualify for \$55 per month when he is 65. His wife, after reaching 65, may qualify for \$27.50 per month, or a total of \$82.50 for the two. If a farmer who makes \$1200 each year (two crop years is the minimum requirement) after 1954 should die, survived by a widow and two young children, \$82.60 could be paid them every month, terminating when the youngest child reaches 18. Payments to the widow could be resumed when she reaches 65.

"Write your Social Security Office in Amarillo, Texas, for a

## HEALTH NOTES

Texas State Dept. of Health

**AUSTIN** — "Health examinations won't prevent old age, but many tens of thousands of persons, whose records of these examinations have been studied, have not only been helped to live longer, but also be sturdier and healthier, and enjoy more comfort and happiness by following the advice of the physicians who have made such examinations," declared Dr. Henry A. Holle, Commissioner of Health.

Once the individual leaves school, he assumes the responsibility not only for his choice of work and method of living, but also for his continued good health. But he often fails to apply the available methods of preventing disease and prolonging life. Hardly a day passes in which our attention is not called to the untimely death of some prominent person or acquaintance, which may be attributed to a preventable disease. So something should be done in the way of educating the adult group of the population, so they will voluntarily carry out those measures which prolong life and maintain good health.

It is our firm belief that if the diseases of the gastrointestinal tract, which includes the lips, tongue, teeth, mouth, stomach and bowels, are recognized in their early stage, their progress may be curtailed, adequate treatment advised, and many deaths prevented.

Today the medical profession realizes that many childhood diseases are now under control and that our present problems must center about the adult, encouraging periodic check-ups. Is semi-annual consultation with your physician too great a premium to pay for many years of additional life, freedom from suffering and consequently short periods of hospitalization?

Try for the goal that's afar Or you will be contented To stay where you are.

The Comets were unable to hit the basket in the first quarter and trailed 19-9 at the end of the quarter. The Queens increased the lead to 33 to 17 at half time. The Comets had difficulty hitting from the free throw line as well as from the field. They scored on eight of 18 free throws. The Queens scored on 16 of 19 at the free throw line.

Jo Ann Crawford was the leading scorer for the Comets with 22 points. Jo Ann had trouble on free pitches, getting six of thirteen for the game. Louise Short scored 12 points and Dianne Templeton had 6.

The starters for the Comets were Jo Ann Crawford, Rosilyn Range, and Louise Short at forwards, and Dianne Templeton, Marjorie Iribek and Patsy Vincent at guards. Dorothea Starker and Lola Duhon played some at guard and Susie Jones and Barbara Holub played some at the forward positions.

The Bulldogs meet the Odessa College five in the second game Friday night, Feb. 17th.

### THREE IDENTIFY MYSTERY FARM NUMBER 39

We finally got Mystery Farm, No. 39 positively identified this past week. In fact three persons positively identified the farm which is located just over the northwest county line in Armstrong County. Mrs. K. C. Reed drew out for the free subscription to the Leader. R. C. (Rob) Hill drew out for the two free movie tickets and Mrs. Leland Lewis drew out for one free movie ticket.

The one call we received on the farm last week was incorrect so no prizes were awarded.

### High School Girls Defeat Wellington 64 to 40

Last Thursday afternoon the Clarendon High School girls went to Wellington for the final district game of the year. The Clarendon girls came out on top in a 64-40 score.

Harlene Smith led the scoring with 33 points, while Elizabeth Smith had 27 points and Nedra Hodge had 4.

The girls starting the game for Clarendon were Harlene Smith, Elizabeth Smith, and Nedra Hodge at forwards, and Glenda Borden, Jo Ann Bennett, and Joyce Hall, at guards. Joyce Hall left the game in the third quarter with five fouls and Barbara Darnell finished the game at the guard position.

Other girls making the trip to Wellington were Ola Putman, Joyce Eddings, Virginia Taylor, Beth Lambeth, and Suzanne Sandifer.

The Clarendon girls finished with 6 wins and 2 defeats in conference play. Both defeats were by Memphis in two over-time games.

With the win over Wellington the girls won a place in the District tournament to be held in Lefors on February 16, 17, 18th.

The Clarendon girls will play in the District Tournament in Lefors on Thursday night at 7 o'clock. The opponents for that game will be the Stinnett girls. The Stinnett girls finished first in the other half of the District.

### Jr. High Teams Defeat Shamrock

Both the Jr. High Colts and the Fillies were victorious in their games with Shamrock here Monday night. The boys won 28-22 and the girls won 33-14.

The Colts came from behind to defeat the Laddies. Earlier in the season they defeated Shamrock by one point. During most of the game it was touch and go for both teams until late in the fourth quarter when the Laddies picked up a four point lead. With the last three minutes the home team began to get the range on the basket and soon overhauled the Shamrock team. The Colts now lead the league with four wins and no losses. Next week they wind up league play with Alanreed at Alanreed Monday night and Lefors here Thursday, February 23rd.

The Jr. High Fillies won their game over the Lassies with very little effort as the 33-14 score indicates. The high point girl for the Fillies was Maggie Morrow with 13 points followed by Ann Slavin and Judy Johnson.

Both teams will resume play in the Lela Tournament Friday of this week with the Colts playing Wellington at 7 p. m. and the girls will play at 11 a. m. The Lela tournament was snowed out soon after it was started on the week end of the 1st thru the 4th.

The Organist Guild met in Amarillo Monday evening, February 13th, opening with dinner at the Silver Grill. Following, the group adjourned to the First Baptist Church where Eddie Melin, of Cooper and Melin, was in charge of the program.

Mr. Melin played a number of recordings made by E. Power Biggs, Virgil Fox and Albert Sweitzer using some of the oldest and largest organs in England, Holland and Germany. Adding to the interest of the program, Melin explained and commented on each recording. He stressed the fact that many of the instruments used were two or three hundred years old. In conclusion these recordings were compared.

Attending this fine program were Harold Clampitt, June Day, and Miss Mantie Graves.

### College Bulldogs Win Over Howard County 93 to 74

Last Saturday night the Clarendon College Bulldogs defeated the Howard County team from Big Spring by a 93-74 score. This was the second meeting of the two teams. Previously Howard County won over the Bulldogs in Big Spring by a 106-100 score.

Again the Bulldogs were not at top strength for the game. Billy White had been ill during the week and was unable to start the game. Sherman Cosper had an infected throat but he was able to play the entire game.

Gary Kunka was forced to leave the game early in the second half with a badly sprained ankle. Carrol Stepp left the game with five fouls late in the first half. Billy White entered the game when Stepp left with five fouls.

The Bulldogs took the lead with the first basket of the game and were never overtaken. The Bulldogs held a 21-16 lead at the end of the first quarter. At the end of the first half the Bulldogs were leading by a 43-39 score. The Bulldogs were in complete control during the second half of the game.

The Bulldogs controlled the backboards both on offense and defense. Bob Garton, Boyd White, and Sherman Cosper played exceptionally well on rebounds.

Bob Garton was high point man for the game with 25 points. Gary Kunka had 16 points, Sherman Cosper 12, Billy White 12, Boyd White 12, Carrol Stepp 10 and Don Reeves 6.

### BENSON STRESSES IMPORTANCE OF AGRICULTURE TO WELL BEING:

Whatever the future of this country may hold—Whatever progress we may make in levels of living, in standards of health, in material prosperity—much will depend on how well we fit farming into the future. In these words, Secretary of Agriculture, Ezra Taft Benson, recently summed up the place of Agriculture in the Nation's well being.

As the Secretary expressed it, "We will be able to go no faster in industry than we go in Agriculture, because food always comes first. Our lives, our vitality, our ability, our health all depend on food. We have been able to build the tremendous industries this country now possesses only because year after year a smaller and yet smaller proportion of our people were needed in agriculture. Today only about 13 percent of our people are on

farms. And about two million farms—around 40 percent of the total—produce nearly 90 percent of all farm products sold! In the future, still more Americans will depend for their lives on still fewer farms. We must fit our farms for the future. We must have a strong and productive and prosperous Agriculture."

### John T. Forbis Of Childress Announces Candidacy For Office Of District Attorney

Through a period of many years the people of this state have developed and placed upon themselves a system of rules and regulations to guide their conduct.

History has proven that this system of penal statutes is based upon reason, and that the common good is best served when violators of these statutes are punished for their crimes.

The people of Texas are represented in the prosecution of the more serious offenders by a District Attorney, whose duties must be performed with skill, diligence and complete integrity. He must be able to wholly disregard the

political significance of his acts, and must be guided by an enlightened conscience. His prosecutions must be thoroughly and well presented but must never become persecutions.

I was born in Childress and lived there until I was five years old, when my parents moved to Wellington. My education came from the Wellington public schools, from Southern Methodist University, and from the South-

ern Methodist University School of Law, which granted to me the Bachelor of Laws Degree in January of 1950. The greater portion of my college and law school work was made possible by the benefits under the GI Bill of Rights, following my service in the U. S. Navy during World War II.

For six years I have practiced law in Childress in the law firm of Williams, Broughton & Forbis,

and live in Childress with my wife, Jeanne, and my fifteen month old daughter, Nancy. For five and one-half years I have served Childress as City Attorney.

Fully realizing the responsibilities and requirements of the office of District Attorney, and being confident that my training and experience qualify me to seek and to perform the duties of that office, I ask the people of the

100th Judicial District for the privilege of serving them in that capacity. If chosen to serve in that office, I pledge my very best effort and an equal consideration of every case presented to me.

Among the nation's 10,000 heart sufferers are 500,000 children of school age. The Heart Fund supports the fight against the heart diseases. Help Your Heart Fund—Help Your Heart.

Heard the following someplace: The relatives were all gathered to hear the will of a supposedly rich kinsman read. It began: "Being of sound mind I spent all my money before I passed away." Maybe he wasn't too far from right. We wonder sometimes when we see the trouble that money can cause in the world. Either money, or the scarcity of it seems to be at the bottom of most of our problems. Anyway, Uncle Zeb has had enough trouble with the lack of it; seems like it would be nice to be bothered with a lot of it for awhile. Oh me, anyhow.

All during the recent snow we have been hungry for some snow cream. Mama told me several times if we would bring in the snow she would do the rest, but somehow my energy and my appetite never got in the same notion at the same time. Won't someone remember how we like it and invite me over next time it snows. Are there any special ways of making it better? To us, we always liked every batch we ever had the opportunity to sample. Right now we would pass up a dish of store-boughten anytime for a half gallon of snow cream.

Speaking of the snow makes us think of the snow storm. It was pretty bad at that. But to look at some of the news items that went out on TV to the other parts of the country it is pretty easy to see why even the Alaskians feel sorry for us here in the panhandle. Picking out just some of the worst cases and making them look like the commonplace condition made us shake in our boots. But it was bad enough; specially on folks with outside chores and work to do.

Still thinking about the snow storm of 1956. I guess if there is anything that brings out the best or the worst in folks it would be a stress and strain like being stranded along the highways and away from home we would see all kinds of frayed disposition. Then, on the other hand we would see so much of the good showing through on other folks.

Some were mad at everybody from the highway department to the weather bureau. From the man in front of them that caused their getting stuck-up to the filling station attendants that gave them a bum steer along the road. Occasionally some one actually blamed themselves for not staying at home. Some folks were on their way to see grandma, others had stayed out their vacation and were returning. Some thought the highway department should never allow any snow to stay on the road and others thought that the department of public safety should see that they were safely towed to their destination free of charge; even if they were on their way to get married. But others were thankful for a place to stop out of the weather; thankful for a bed or a hot cup of coffee. Some went on their way next day praising the townspeople for their hospitality; others left swearing to never set foot in the panhandle again.

Someone remarked that under this kind of strain our real self breaks through and folks can see what we really are deep down inside. Anyway, we know this that the smiles and the good deeds; the friendly helps stand out like bright beacons of light. And there's always enough good scattered along the way to make us glad we're a'livin' in this old world. Then, when a crisis is past we all take stock and promise ourselves to do more and more next time to help others and to think and worry less and less about our own troubles, and our own selfish self.

**DONLEY COUNTY SOIL CONSERVATION DISTRICT NEWS**

Following are some observations and checks made during the recent snow by Tony Welker, Soil Scientist for the Soil Conservation Service. Although these checks were made near Pampa, the principles involved will apply to the Donley Soil Conservation District.

**EFFECT OF STUBBLE ON DEPTH OF SNOW OR (GETTING MORE PRECIPITATION ON YOUR CROPS)**

About two inches of snow fell in Pampa and surrounding area on February 1st, accompanied by a 30-40 mph wind. Field observations on 8" sorghum stubble showed a measured average snow depth of three inches on the ground with a soil temperature of 34°; and on clean tilled land the cover was only a trace with a soil temperature of 26°.

About thirteen more inches fell February 4th, and 5th in a 25 mph wind. Measured observations again made, showed a fifteen inch snow depth on the stubble land with a soil temperature of 38° and a five inch snow depth on clean ground with a soil temperature of 33°. Some snow was lost to drifts in protected places when the stubble became covered.

These are measurements made of conditions that anyone can observe when driving through the country after a snowfall. The pattern is clear; the more of a wind-break we have on the ground surface, the more moisture we receive when it falls in the form of a wind-borne snow, and the more moisture we receive, the better crops we make including more stubble to catch the next years snow. The increase in soil temperature with the insulating snow cover serves several purposes; less damage is done to roots by freezing, more plant growth on winter wheat takes place when above freezing, microorganisms in the soil are more active in releasing plant food to the roots and the thawing that takes place from below brings more of the snow moisture into the soil, thus allowing less to be evaporated from the snow surface.

This practice of allowing as much stubble as possible on the ground is one of the most important conservation practices of the Soil Conservation District in this area; it is called stubble mulching. It provides many other benefits such as lowering soil temperature in the summer, in-

creasing water penetration in the soil, decreasing evaporation, and reducing both wind and water erosion. These have all been observed by tests run at the experiment stations.

Although the amount of snow collected by stubble may seem small in some years, records at the Amarillo Weather Bureau show that our average seasonal snowfall is more than 20 inches and the moisture received is about 2 inches. According to data received from the Amarillo Experiment Station, only about one-fifth of the annual precipitation in an average year becomes soil moisture. Snow could contribute a good part of this quantity besides having the qualities of containing more nitrogen, sulfur and other plant foods.

This is only one more reason to become a Conservation farmer by farming the practical way.

LIBRARY NOTES**  
By May L. Prewitt

We have several books given in memory of Mrs. Wesley Knorpp that are ready for you to read. "After You, Marco Polo" by our Amarillo Jean Bowie Shor has been desired by several. It is fascinating history—quote "From Venice to Pieping across high Asia, an adventurous couple follows a dangerous trail seven centuries old." Alice Marriott's "Valley Below" is a "warmly sympathetic account" of the Spanish-American and Indian neighborhood in New Mexico near Santa Fe. It is seen by Alice Marriott and her friend "Martha" or Margaret Le franc the artist. This book was given by Miss Nettie Sims in memory of Mrs. Knorpp. Another fascinating book written by Alice Marriott the famous ethnologist is "Maria: The Potter of San Ildefonso." This book has often been recommended for the Library and some have pieces of

Maria's pottery. Miss Mantie Graves gave this in Mrs. Knorpp's memory. "Cow Country" by Edward Everett Dale was reported out of print, but the Oklahoma University Press found us a copy that was obscured in the stock room. We were very happy to have a report from them stating they had this for me. It was given by the Havard Warner's in memory of Mrs. Knorpp. There are some others ordered that have been selected for memorials.

John and David Wright gave "The Story of Christopher Columbus" written by Nina Brown Baker in memory of Richard Boudens. Several books are to be placed here dedicated to Richard. We have an elegant copy of "The Story of Jade" by Whitlock & Ehsmon. We regret it was not here when one of the Clubs studied the subject. It was purchased at a discount as it is a \$12.50 book.

Reading has been very much in vogue during the cold weather. I issued 100 books and magazines one day.

**Help For YOUR Heart**

The Texas Heart Fund, now being conducted in hundreds of communities throughout the state under the able chairmanship of Senator Lyndon Johnson himself a heart disease sufferer will continue through February 29.

Prime purpose of the 1956 Texas Heart Fund is summed up in the Fund's campaign slogan: "Help Your Heart—Help Your Heart."

Money contributed to the Texas Heart Fund (an affiliate of the American Heart Association) supports a continuous three-part program that helps heart disease victims in every sector of the nation.

Since 1948, the annual Heart Funds have invested more than \$13,000,000 in heart research alone. They have put additional millions into public and professional education programs to provide wider distribution of information about heart disease and what can be done to prevent or cure it. Still more millions of dollars have gone into community

Heart projects to help cardiac victims live productively with their ailments.

Cold, hard statistics show that one person out of each 16 in the United States—including 500,000 children—now suffers from some sort of heart disease, and that the death toll from heart diseases each year is greater than the combined total of the nation's deaths from cancer, accidents and suicides, pneumonia, diabetes, kidney disease and tuberculosis.

Here in Texas, the commissioner of health has termed heart disease "the state's number one killer."

Your contributions to the 1956 Texas Heart Fund—made throughout February—can help fight this crippling, killing disease. Contribute generously to your community Heart Association—or send your contribution to "Heart—care of postmaster."

There's something to do!

### A Message From Your Chamber Of Commerce

Dear Citizen:

The impact of your leadership on the community has made itself felt in many ways and in all probability quietly and without recognition. We know the great value of the influence you exert in your community. Therefore, we are seeking your aid in a very important program for your community—one that will give you great personal satisfaction in helping your neighbors and your community to keep pace with the rapid progress of our cities, states, nation and the world.

Naturally, we must have an efficient organization to carry out any good, sound, progressive program of work. The oldest and

most efficient organization used to carry out such programs is "Your Chamber of Commerce." You might ask, what is a Chamber of Commerce, when was it organized, and what is its purpose?

The medieval fairs of the twelfth century and the merchants guilds which were developed during feudal times, were the first organizations designed to protect and foster the interests of their members. In 1599 the town council of Marseilles, France, formed the first organization to be known by the name "Chamber of Commerce."

Other French cities set up similar organizations and their success in dealing with the problems of trade, commercial duties and civic affairs prompted Louis XIV, in 1700, to order that every French trading center establish a chamber of commerce. Through the years, cities in other European Countries also established chambers of commerce. The first chamber of commerce to be organized in the United States, was established in New York in 1768 and by 1870 there were chambers of commerce in 40 major American Cities. Today there are chambers of commerce in virtually every city in the United States.

A Chamber of Commerce is you, your neighbors, working together to make your community a better place in which to live and make a living.

1. You and your neighbors: Merchants, bankers, doctors,

dentists, lawyers, teachers, preachers, salesmen, ranchers, farmers, and each of you that might be working for someone—people who have a common interest and pride in their homes, farms, ranches, business and their community, in what it is, and especially in what it is to be.

2. Working together: Holding meetings, presenting ideas, appointing committees, finding facts, discussing our common problems, voting, agreeing on plans of action, selecting men and women to tackle specific jobs, even making mistakes sometimes, but constantly striving to build for a better future.

3. PURPOSE: To make your community a better place in which to live and make a living. Conducting agricultural clinics to determine the needs of the farmer and rancher, holding fairs and stock shows to show our livestock and products to the public, providing facts for new industrial prospects, arranging conferences of businessmen and farmers, good-will tours of neighboring cities, and stimulating efforts to provide such things as adequate hospital facilities, adequate school and college facilities, continued paving of streets, street signs, house signs, street lights, city swimming pool, continued promotion of Salt Fork Dam and scores of other things that add up to better living in a better community.

In short, the chamber of commerce is YOU! To have a successful chamber of commerce, you must support the chamber of commerce with YOUR TIME and DOLLARS!

You may give until you are rich and keep until you are poor. Support Your Chamber of Commerce

You can't hold a community down without staying down with it. Support Your Chamber of Commerce

### FEB. 22 IS U. S. ARMY RESERVE DAY IN TEXAS!

STRENGTH IN RESERVE

## YOUNG MEN WANTED

UNCLE SAM needs young men for his peacetime Army of Reservists. YOUNG MEN need what Uncle Sam has to offer.

Strong nations seldom are attacked. It is only when a nation becomes weak, when its military strength is at a low ebb... when its men are untrained for battle... that an enemy strikes. To keep peace — keep strong. For a nation to maintain military might it must have a large, well-trained Ready Reserve — well versed in the latest in military know how and equipment.

It is up to the young men of America to provide this manpower. Under the Reserve Forces Act of 1955 American youth may continue in school with a minimum of interruption, while serving in the U.S. Army Reserve.

Investigate. Contact your nearest U.S. Army Reserve Unit.
