## Celebration and Rodeo Awards Listed

A number of special awards will be handed out during the three day celebration this year. The top prizes will be two beautiful saddles to go to the best all-around rider and the best all-around roper in the rodeo events. One saddle is being donated by the Donley County State Bank and The Farmers State Bank. The other is being donated by Chamberlain Insurance and Chamberlain Motors.

Belt buckles will be given to top contestants in each event. Donors of these buckles are Palmer Motor, Cornell Texaco, Noblitt Sales, Rob Hill, W. E. Clifford and sons, Porter and Lowe, and Alderson Chevrolet. Levis for hard luck cowboys, the first disqualification in each event, will be donated by Greene Dry Goods.

In the Queen Contest, Greene Dry Goods donated a \$50 bond to go to the first place winner and the Outdoor Entertainment Association awarded a \$25 bond to each in the second and third place ratings. The Association will also award prizes of \$25 and \$15 in the parades.

Beef for the barbecue was donated by ranchers and individuals and the local merchants provided the trimmings.

Homer Taylor donated his services for work on the signs and hundreds of others have donated their time and efforts.

## Local Parent Faculty Conference Set For July 14th

At the suggestion and invitation of Mrs. Fred Bourland, a group of parents and a number of teachers of the High School and College met to discuss the possibility of organizing to call together regularly a Parent-Faculty meeting. It seems that a number of parents and teachers have felt the need for such a meeting for open discussion on any subject pertaining to the betterment of our school program. It was agreed at this first meeting that such a project would be attempted.

The first thing was to appoint a committee to serve as a nominating committee and to make plans for the next meeting. The next meeting was set for the second Tuesday evening in July at 8:00 o'clock p. m.

NOW, we are ready for this meeting, and we are inviting and urging every parent of High School and College students, and teachers of these students, and any other citizen of this community who is interested, to attend this first meeting—July 14th at 8:00 o'clock p. m. in the High School Auditorium, stated one of the committeemen.

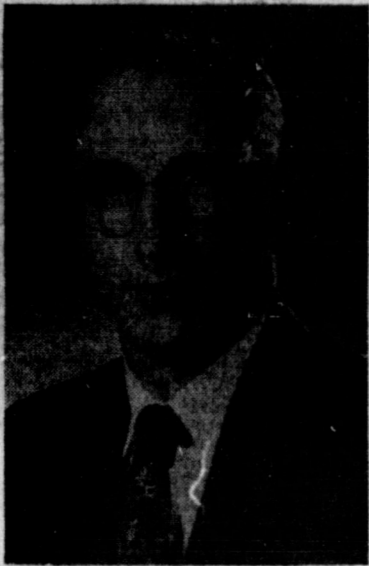

Officers will be nominated and elected. The purpose will be discussed, and definite goals set up.

If you are interested in helping your school administration and faculty develop a better school program next year, attend this conference and be ready to share your best thoughts with the group.

## LOCAL FIREMEN TO SERVE AS DEPUTIES

Members of the local volunteer fire department will serve as special police at the rodeo or whenever needed during the entire celebration and will help in general law enforcement. These men will have full authority of a regular deputy and will be properly identified with their uniforms.

## INSECT SPECIALIST

H. A. TURNEY

## Vo-Ag Department To Sponsor Insect Control Courses

Clarendon vocational agriculture department has scheduled an insect control short course for July 7-10. The short course is to be taught by H. A. Turney, Insect Control Specialist for vocational agriculture. The course is to be organized and conducted under the direction of the vocational agriculture teacher, Jerry Hawkins.

Turney who will provide the instruction in the courses has both a B. S. and M. S. degree in Entomology and has had four years of field experience in insect control work. During the past 11 months he has taught 36 insect control short courses all of which have been offered under the auspices of the public schools. Turney states that he expects the farmers participating in the various short courses to gain enough additional knowledge about identification of insects, about their habits, and about insecticides and method of application that they will be able to carry out more effective and economical prevention and control measures.

Meetings are to be held in the vocational agriculture building. At the first meeting, 8 p. m. Tuesday July 7, the time for subsequent meetings and field trips are to be worked out to fit the farmers' need. Both classroom instruction and practical work in the field are to be included in each course, it was pointed out.

Farmers interested in attending the short course should contact Jerry Hawkins. An entry fee of \$2.00 per person is to be charged. Entomology Certificates are to be presented to farmers who attend all the training sessions offered in the short course.

## NOTICE TO ALL LOCAL BAND MEMBERS

Willard Edgett, band director, has announced that there will be a band rehearsal Thursday morning at 10 a. m. in the Band Hall. All members who expect to be in the parades July 3rd and 4th must be present for this meeting.

On Friday morning, July 3rd, the band will meet at 10 a. m. on the Donley Hotel corner to be in readiness for the parade at 10:30. Saturday morning, July 4th, the band will meet on the Court-house lawn at 11 a. m. Arrangements have been made to feed this group early so that there will be time to line up for the parade at 1 p. m.

Herald Stogner of Canyon spent Saturday night with Jerry Behrens.

## Mayor & Sheriff Issue Annual Celebration Warning

Mayor H. T. Burton and Sheriff Bill Cornell issued their usual warning in regard to the celebration to be held here the last of the week and are urging the full cooperation of everyone present to make this an enjoyable occasion with no mishaps.

Streets will be congested and more time should be allowed to reach your destination. If you plan to drink, please use moderation and don't get on the streets or highways in your car, Cornell pointed out. The innocent might be injured due to your carelessness.

Both Burton and Cornell are again reminding parents and youngsters in regard to the shooting of fireworks within the city limits. If you want to shoot fireworks take them to the country and do not endanger others. The state law in regard to fireworks carries a very heavy fine and punishment for shooting fireworks from a car or near a vehicle of any sort.

We will be compelled to enforce these laws regarding fireworks so we are hoping to receive one hundred percent cooperation, added Sheriff Cornell.

We are looking forward to a comparative peaceful celebration again this year and hope, for the good of everyone concerned, that everything goes well, was the Sheriff's final comment.

## Old Fiddlers Contest To Be Held

An Old Fiddlers Contest will be held the afternoon of July 4th in the center block of main street. Several of the old time fiddlers plan to be here for the occasion, among them, Joe David of Waco, Jack Pritchard, Ray David, and Milt Mosley. There will be others from the Clarendon area.

Ernest "Tuny" Kent will be in charge of the contest this year so if you are interested in taking part in the contest he will be glad to hear from you.

## This Is Your Annual Celebration Edition

Clarendon business firms are extending a warm and hearty welcome to one and all to come to the Rimrock Roundup and celebration, as evidenced by the large number of ads in this issue of the Leader. Turn through your paper and read all the words of welcome from your local merchants and make plans to be present for each and every event during the three day gathering.

As always, it has been a pleasure to print this larger issue of the Leader. We especially want to thank the merchants for turning in their ad copy early. Without their cooperation, we would have been unable to bring you these extra pages. Too, we appreciate the help Herald Stogner gave us again this week in setting up type.

We hope this will be the biggest and best celebration ever held for each and every one of you.

## Powell Services Held Sunday, June 28

Funeral services were held Sunday afternoon June 28, at Murphy Memorial Chapel for Simmons Powell. The Rev. Conrad M. Ryan, pastor of First Methodist Church, officiated.

Mr. Powell died Saturday of a heart attack. He was 57 years old and had been a resident of Clarendon for the past 28 years serving this area as Gulf Oil and Gas Distributor. He was a member of the Methodist Church and of Khiva Temple of Amarillo.

Burial was at Whitewright, Texas. Surviving are his wife, Mrs. Emma Powell, of Clarendon, and a brother, C. N. Powell of Henrietta, Texas.

Pallbearers were Selden Bagby, Carl Allmond, Claude Moore, U. J. Boston, J. D. Swift, and Bill Ray. Arrangements were under the direction of Murphy Funeral Home.

Mr. and Mrs. Emmett Simmons and children vacationed in Galveston last week.

## New Column To Be Added This Week

Beginning with this issue of the Leader, there will be a new column added. The column will be headed "George's Wife" and will be signed with the pen name "Sarah." It will carry comments on every day living and the world around us with the purpose in mind to remind the readers that something has happened to George, the George that every one lets do things for them. It looks like he isn't what he used to be. We need to rely less on George and get busy and do something ourselves.

The column in no way expresses the feelings or thoughts of the paper or its staff; however, if you have any comments to make we will be glad to pass them on to "Sarah."

## Clarendon Merchants To Close July 4th

It is our understanding that all merchants will close all business houses in Clarendon July 4th. Excepted will be some of the cafes and service stations. Business men agreed to close four holidays out of the year and July 4th was one of the four. Plan to do your shopping on Friday instead of Saturday next week.

The weekly Trade at Clarendon drawing will be held on Friday afternoon, July 3rd, at 4:30 p. m. instead of the usual Saturday for the one week only.

## Dusters Defeated By Borger Sunday

The Clarendon Dusters lost their game to Borger Sunday by a score of 4-3 in twelve innings of play. Larry Jackson was the losing pitcher giving up a walk and two hits in the bottom of the twelfth inning.

The Dusters meet the first place Coors of Amarillo in a game here Sunday at 2:30 p. m. This is a crucial game and the Dusters will appreciate all the support of local fans.

Donley County Leader, 25 a year in county.

## Thousands of Visitors Expected To Attend Free Barbecue and Events

### Old Settlers To Meet Here July 4th

Ernest Kent stated yesterday that everything was in tip-top shape to show the Old Timers a good time here the morning of July 4th when this group gathers at the Mulkey Theatre. Registration is slated to begin at 9 a. m. the morning of July 4th. W. T. Link, Attorney here for a number of years, will address the group at 10 a. m. and there will be plenty of visiting and reminiscing. Prizes will be awarded to the oldest individual present, the one who has traveled the greatest distance, and the one having the largest family.

Arrangements have been made to feed those who register in a group. The northeast table on the courthouse lawn will be used for this purpose at the noon hour.

For those who want to register on Friday, July 3rd, Kent stated that he would be at the American Legion Hall the afternoon of the 3rd, but that the Old Settlers reunion would not be held until Saturday morning.

## Flood Control Project Approved By Donley And Hall County Voters

The Donley and Hall County Water Control and Improvement District No. 1, approved a \$75,000 bond issue Saturday, June 27, for engineering work on an extensive flood control project. Votes were cast only at Brice and Lakeview. At Lakeview the vote was 37 for and 52 against, while at Brice the issue carried by a vote of 41 for, compared to one opposed.

The proposed flood control project covers 150,000 acres of land in the northwest part of Hall County and the southwest portion of Donley County. Eventually a series of retention dams will be built on four creeks in the district.

## Good Moisture Helps Crop Outlook

Rain has arrived ahead of schedule this week. The showers usually come in time for the big celebration here through July 4th so perhaps this year the holiday will be nice as weather goes.

The official weather observer reports .07 inch of moisture for Friday, .03 inch for Saturday and 1.38 inches Monday of this week. This brings the total for the month of June to 3.41 inches.

Temperatures for the week have been somewhat cooler although they may not have seemed so due to the humidity. The high for the week was recorded on Sunday when the mercury reached 99 degrees.

## HOSPITAL NOTES

Patients as of Wednesday, July 1: Arthur M. Havens.

Dismissals: Mrs. John Hill, R. C. Johnson, James B. Guy, Don Taylor, Mrs. T. J. Talley, Mrs. Crockett Taylor, Carolyn Williams, Mrs. Bess Ozier, Ross Noles, Barbara Mair, George L. Green, Mrs. W. E. Grimsley, Mrs. J. C. Estlack, Margaret Blount, Mae Bennett, and Johnny Mays.

Mr. and Mrs. W. S. Montgomery celebrated their 25th wedding anniversary July 1.

Indications now point to the largest and best celebration ever to be held here as plans are completed for the Rimrock Roundup July 2-4. The largest pre-registration of contestants for rodeo events has been received with more being added to the list each day. Rodeo stock was moved in the latter part of last week and if appearance means anything, rodeo performances should provide plenty of excitement.

The first rodeo performance is set for Thursday night, July 2nd, at 8 p. m. with performances set for 8 p. m. the nights of Friday, July 3rd, and Saturday July 4th. An afternoon performance is scheduled for 2 p. m. July 4th. The first rodeo will be filmed for TV and the rodeo queen, Miss Darlene Russell of Amarillo, will be here for all shows and parades. At last report Ray Palmer had a few box seats left. Pete Borden is handling the reserve parking and space is becoming limited.

A parade will be held at 10:30 a. m. the morning of July 3rd. Entries will assemble north of the Donley Hotel and are asked to be on the lot by 10 a. m. To be eligible for prize money, entries must be in the parade both July 3rd and July 4th. First place award will be \$25 with \$15 going to the runner-up.

The Amarillo Air Force Band will present a concert at 2 p. m. the afternoon of July 3rd.

Old Timers will register at the Mulkey Theatre Saturday morning, July 4th, and will be fed in a group at the noon hour.

Homen Meat Co. has prepared 5,400 pounds of beef for barbecuing. All who are helping to serve the barbecue at the noon hour July 4th are asked to be in their stands by 11 a. m. Serving will NOT begin until 11:30 a. m. as it will take every bit of that thirty minutes to get the stands in readiness to take care of the crowd.

The Old Fiddlers Contest will be held the afternoon of July 4th and unless otherwise announced will be held in the center block of main street. Several have indicated that they will be here for the event, among them Joe David and Milt Mosley. Kent will be in charge of this event also.

For the small fry, Hershel Heath is sponsoring a Terrapin Race the morning of July 4th and there will be a Boot Scramble at each rodeo performance for youngsters 12 years of age and under.

The Business Men's Wild Cow Milking Contest will be a highlight of each performance of the rodeo. To date teams have been secured for the nights of July 2nd and 3rd. Thursday night it will be Hershel Heath and Bill Greene Jr. vs Junior Spier and Bob Clifford. Friday night Rev. Berkeley SoRelle and Rev. Paul Hancock will contest Carroll Knorpp and Harmon Goodman.

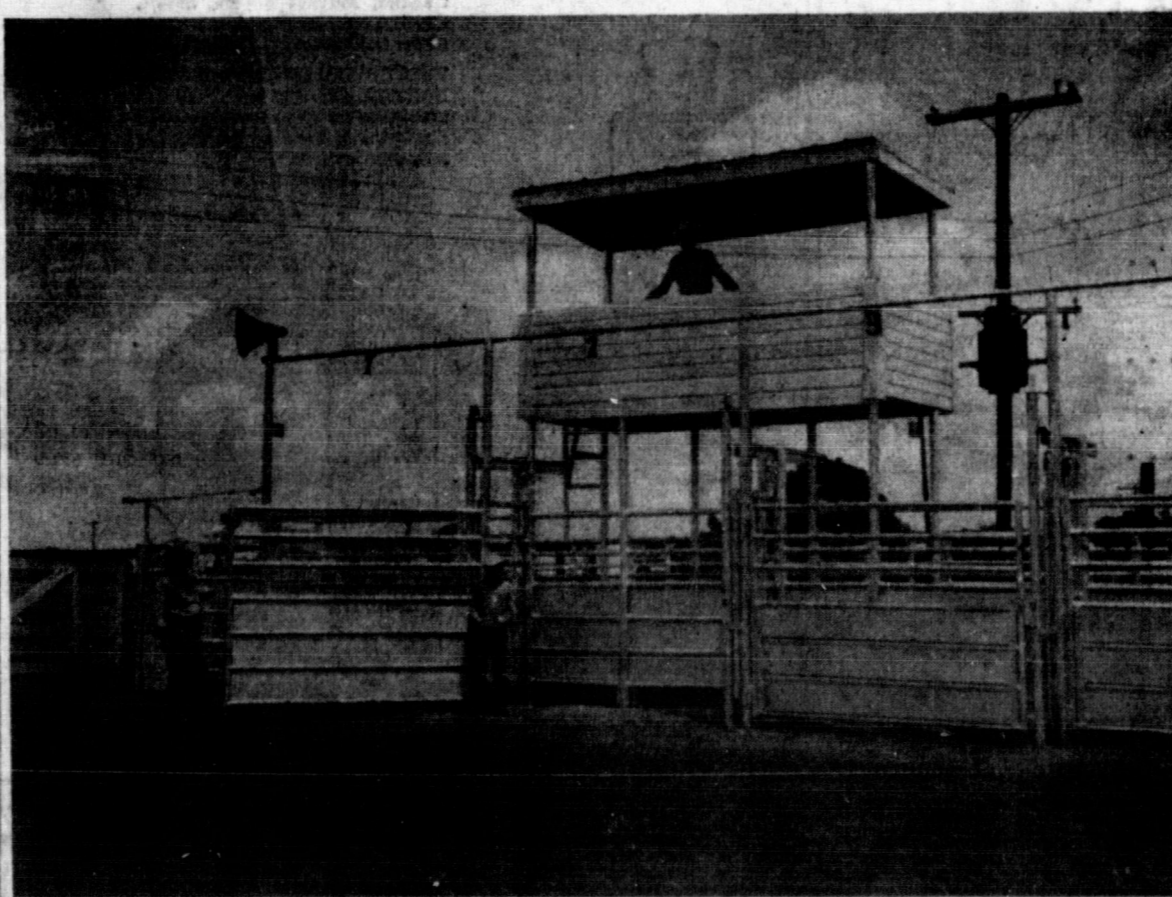

Dances will be sponsored nightly by the American Legion and will be held at the Legion Hall.

An invitation is extended to everyone in the Panhandle area and far and wide to come to Clarendon for the Rimrock Roundup. We will be looking for you!

## BAKE SALE FOR JULY 4TH

The ladies of the Ashtola Community Center will hold a Bake Sale, Saturday morning, July 4th, on the court house lawn. Food will be on sale all morning until the close of the barbecue. Cakes and pies will be sold either by the piece or whole.

## RODEO FANS TO SEE FIRST USE OF NEW IRON RODEO CHUTES

Here's where the action will unfold this week end during the four rodeo performances. You will note that the wooden chutes have been discarded and new iron chutes have taken their place to make this one of the most modern rodeo chutes in this area. In the picture at left is Pete Borden, a director of the Entertainment Association, Corky Leffew, stock wrangler for Morris Stevens in the No. 2 chute and W. J. (Bill) Greene, president of the Association up in the announcer's box.

## ASHTOLA NEWS

Mrs. Doyce Graham

Each lady in the Ashtola community is asked to bake a pie or cake for the bake sale July 4th. This is NOT a club affair, but for the whole community. The community center is being fixed up for the young people, tennis courts, volley ball and basketball courts, lights strung up; and much money is needed to do this. The funds from this sale will be used for these needed supplies, so everyone is asked to contribute. If you are not going to Clarendon leave your cakes and pies, wrapped in cellophane or saran wrap and labeled, as to kind, at Lovell's Garage Saturday morning early as possible. If you are going to the barbecue, take your things to the booth on the courthouse lawn that the ladies from Ashtola will have set up. Please, everyone, lets make this project a success, so we won't have to work so hard in the future.

Mr. and Mrs. Billy Porter are proud parents of a son, Billy Mike. Grandparents are Mr. and Mrs. L. M. Porter and Mr. and Mrs. Milton Dunn.

A daughter was born to Mr. and Mrs. Bob Wilson. Proud grandparents are Mr. and Mrs. W. H. Wilson and Mr. Pete Wiedman.

Marion Garland came for a 10 day visit with homefolks Friday. He has finished his basic training with the 35th armoured tank battalion at Ft. Hood and is enroute to his new station in Maryland. He will be in the Biological warfare school.

Mrs. Ruby Reid and children of Bula visited in the Lloyd Reid home Thursday.

Mrs. Nell White and children of Phillips spent last week in the Lloyd Reid home.

Mr. and Mrs. Nuford Dill visited relatives in Perryton Tuesday.

Mr. and Mrs. Harold Graham spent Sunday in Dodson with Mr. and Mrs. Haskell Talley.

Mr. and Mrs. Charles Catoe and children from El Paso are visiting relatives here. Mr. and Mrs. W. A. Poovey accompanied them on a trip to visit the relatives in Dumas, Stinnett, Berger and Meade.

Visiting Mrs. S. G. Evans this week were Mr. and Mrs. Earl Evans and boys from Hereford, Mrs. Myrtle Reid and Mrs. Dillard from Ft. Worth.

Mrs. Leroy Satterwhite was able to leave Groom hospital and come home Monday. We wish her a speedy recovery.

Mr. and Mrs. Ted Tomlinson and Vicki of Lubbock visited Joe Lovell Sunday evening.

Mr. and Mrs. Lon Jackson and boys visited in the Vance Gray home Saturday.

Lynnita and Johnny Lovell of Dumas are visiting Mr. and Mrs. Ben Lovell this week.

## GEORGE'S WIFE

By "Sarah"

I asked George this morning at breakfast if he knew the true meaning of July the 4th. He said Oh, it's freedom for us from something or somebody, I guess, but mostly it's picnics and fire works for the kids.

I said now that's just what I thought too, until I hunted up what some smart men had in mind when they fixed this date Commemorating The Adoption of

la Tucker visited relatives in Amarillo Sunday.

Mr. and Mrs. Ernest Beck and girls of McLean visited Mr. and Mrs. A. J. Garland, Marion and Jimmy Sunday.

The Declaration of Independence in 1776. They said that man has an inherent right to be free. Another man said, Man must accept the responsibility for his acts, or freedom ceases to be freedom and becomes anarchy, and that we are learning that no government can legislate Truth. He said well our citizens are pretty active and thoughtful now days. Yes, but the activity needed must be based on a sound understanding of the philosophies and ideas which served as the original frame work of the American concept of Government; these have their seats in the hearts of man, I told him.

George said why don't you get you a soap box, that is another way of celebrating the 4th of July. Who, Me? Sarah

**Top O' Texas Rodeo Set For August 3-8**

Rodeo grounds are now undergoing a complete remodeling in preparation for the annual Top o' Texas Rodeo in Pampa, scheduled for August 3-8. The grandstand is being rebuilt and 42 new box seats are being installed.

For the first time in the fifteen year history of the show rodeo performances will be held five nights, with the first performance on August 4th and running through Saturday, August 8th.

Cowboys and Cowgirls from a wide area will be competing in the two go-rounds for some \$5000.00 in prize money plus many special awards, including a beautiful hand stamped saddle for the top cowgirl, and special engraved silver buckles for the champion cowboy in all individual events as well as the all-round cowboy.

Morris Stephens of Ouitaque, Texas will furnish stock and direct the arena with Jack Johnson, prominent rodeo announcer calling the events. Stephens has been in the rodeo business for many years and has produced some of the outstanding rodeos in the country.

An official American Quarter Horse Show will be held this year on Thursday and Friday 6,7, beginning daily at 12:00 noon in the main arena at the rodeo grounds. Twelve Halter will be judged, as well as four Performance Classes, with appropriate awards in all divisions. The Miller Bros. Dance Band, now on tour in Europe, will provide music for dancing in the National Guard Armory building Wednesday through Saturday nights, and Ruby Nance and his world famous Rodeo Band will be on hand to furnish cue music for all rodeo performances.

The Kid Pony Show, which will be a curtain raiser to the big Top o' Texas Rodeo will be held on Monday afternoon and Monday night, August 3, with boys and girls between the ages of five and fifteen eligible to participate in their respective divisions.

The 4H and FFA Calf Scramble, which was such a sensation

### C. L. McCrary's Celebrate Golden Wedding Anniversary

Mr. and Mrs. C. L. McCrary, residents of Clarendon for the past forty years, celebrated their golden wedding anniversary

with open house at the family home Sunday afternoon, June 28. Hosts for the occasion were their children.

Four children were present: C. F. McCrary and Mrs. T. E. Steinbock of Amarillo; N. M. McCrary of Alamogordo, N. M.; and Mrs. Lewis E. Underdown of Fresno, Calif. Unable to attend were two sons, C. J. McCrary of El Monte, Calif., and O. W. McCrary of Silver City, N. M.

For the party, Mrs. McCrary wore a beige dress complimented by an orchid corsage. The children presented their parents with matching gold wedding bands.

Miss Lula Eliabeth Darnell and Charles Lon McCrary were married June 27, 1909 at DeKalb, Texas. After living there ten years, they moved to Donley County locating in Clarendon, January 6, 1919. They have lived in the same house to which they moved at that time, 40 years ago. Mr. McCrary has been engaged in the carpenter and contracting business. The couple have had seven children, six of whom are living.

Guests were received from 2:30 to 5:30 p. m. Mrs. Larry Gauthier a granddaughter, of Amarillo greeted the guests and presided at the registrar. Wynelle McCrary of Amarillo, also a granddaughter, invited guests to the dining room for refreshments.

The serving table was laid with a white linen cloth and centered with an arrangement of gold chrysanthemums and yellow daisies with gold wedding bells.

### OBSERVE 50TH WEDDING ANNIVERSARY

Mr. and Mrs. C. L. McCrary

Flanking the floral piece were gold candelabra with white twisted tapers. The three tiered wedding cake was decorated in white and gold and napkins were lettered "Lon and Lula" in gold. Crystal appointments completed the setting. Mrs. T. E. Steinbock of Amarillo dispensed punch while Mrs. Lewis Underdown of Fresno, Calif. served the cake. Assisting were Mrs. N. M. McCrary of Alamogordo, N. M. and Mrs. C. F. McCrary of Amarillo, Calif.

The McCrarys received many lovely gifts, flowers, numerous cards, a telegram from a grandson, Bobby McCrary and family of Sunnyvale, Calif., and a telephone call from a granddaughter, Mrs. M. E. Sullivan. Sixty-five guests called throughout the afternoon.

Attending from out of town were Mr. and Mrs. C. F. McCrary and Wynelle, Mr. and Mrs. T. E. Steinbock, Mr. and Mrs. Larry Gauthier, Mr. and Mrs. Don McCrary, Mrs. J. E. Vineyard, Mr. and Mrs. Leon Riley, Mr. and Mrs. R. H. Mosley, Mrs. Vaughn Johnson, Mr. and Mrs. John Allen and Jo Beth, all of Amarillo; Mr. and Mrs. N. M. McCrary and Craig of Alamogordo, N. M.; Mr. and Mrs. Lewis Underdown and Mike of Fresno, Calif.; Mr. and Mrs. Leonard Darnell and Wayne also Mrs. Mae Darnell of Tucuman, N. M. and Mrs. Mattie McAdams and Sue of Groom. Mr. and Mrs. J. B. Duckett of Plainview were unable to attend so sent flowers.

We wish Mr. and Mrs. McCrary many happy returns of the day.

### LOCAL VISITORS

Visitors last week in the home of Mrs. C. E. Underdown were Mr. and Mrs. Troy Wiley and boys of Amarillo, Mr. and Mrs. Alonzo Thomason and Mr. and Mrs. Leo Underdown and children of Abilene, Mr. and Mrs. Hollis Carroll and family of Lubbock, and Mr. and Mrs. Lewis Underdown and Mike of Fresno, Calif.

### Little League Ends First Half of Schedule In Second Place

Teams of the Little League baseball have completed the first half of their season schedule and at the present time, Hedley stands in the first place slot. Clarendon ranks second and Turkey holds the third place rating.

The youngsters still need more money to finance their equipment and are continuing their sale of tickets. Prizes will be given away at the Barbecue on July 4th. Every little bit helps and these young people will really appreciate any help they receive.

If you have time, drive by and watch any of our teams play on the diamond just north of Junior High school. They play with lots of enthusiasm and play some really good ball. After the first stop you will find you don't want to miss a game.

Following is a schedule of coming games and where they will be played.

**New Law To Curb  
 Tuberculosis Carriers**

An updating of laws pertaining to a disease almost as old as mankind was accomplished in Texas by the signing of the Texas Tuberculosis Code by Governor Price Daniel.

The bill (House Bill 421) makes plain the enforcement of compulsory isolation upon those who have contagious tuberculosis and who refuse to isolate themselves and protect others. Such enforcement has been had in various parts of Texas for two years, but it was felt procedure for enforcement needed to be clearly spelled out. This act does that.

Also contained in the code is provision for penalty of fine or imprisonment of anyone — physician or otherwise — for failure to report a case known to them as contagious tuberculosis.

Also provided is that premises

occupied by people with infectious tuberculosis shall be disinfected before the property is sold or rented to anyone else.

Draft of the act, sponsored in the House by Representatives Don Kennard and Don Gladden of Fort Worth, and Representative Robert H. Hughes of Dallas and Senator Crawford Martin of Hillsboro, was reviewed by various agencies concerned with TB control before its presentation in the House and Senate. Those agencies were the Texas Medical Association, the State Department of Health, the Board for Texas State Hospitals and Special Schools and the Public Welfare Department, the Vocational Rehabilitation Division and the Texas Tuberculosis Association, a voluntary agency. The latter, and the Texas Medical Association, cooperated to aid the senator and representatives in drafting the legislation, bringing together all laws having to do with tuberculosis—some dating to 1909—and making them up-to-date and adequate.

### Rough Fish Taking Over On Colorado

Although some very fine fishing can be found in the reservoirs along the upper Colorado, the upper river itself is not very productive as far as game fish are concerned. The director of in-

land fisheries, Texas Game and Fish Commission, reports that this part of the river depends entirely on run-off for its source of water and is thoroughly dominated by rough fish.

"Even though this part of the river has potential, it is not now a very ideal spot to fish," said Toole. "A vast network of

streams and creeks feed this part of the river and they are not reliable sources," he added. "The flow of the river in the upper regions is regulated by a series of reservoirs," he continued.

"However, those reservoirs are not operated with any consideration of the existing or potential fish populations."

### The Road Toll

by Jeffrey Marcus

8,860 lost their lives between midnight and six a.m.

River carsuckers, gizzard shad, and sunfish are the dominating species, according to a survey of the upper stretch. The sunfish, because of their abundance and very small size, are considered a fishery problem rather

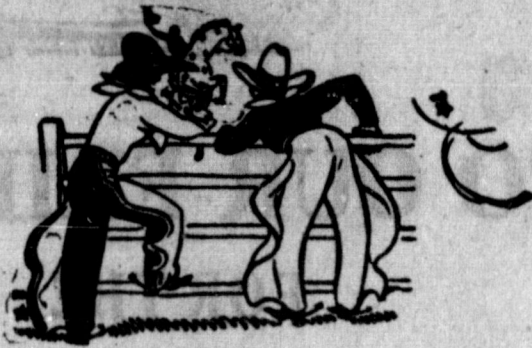

than a valuable resource. As a result of the survey, 43 species of 12 families were located and their relative abundance and distribution were determined.

It has been recommended that this upper portion of the river be studied further to learn if it can be made into an ideal fishing area. Most of the upper river cannot be reached by the fishing public. A study of this situation was included in the recommendations.

**MODERN ARTILLERY**—This revolutionary artillery carriage mounts a 175mm gun but can just as easily carry an 8-inch howitzer or 155mm gun over the roughest terrain. The new 175mm fires a heavier shell farther than the 155—famed "Long Tom" of World War II. It is now being tested at Yakima Firing Center, Wash., by the Army Artillery Board.

**BASS AND CAT FISH HAVE VARIED DIET**

Austin — Certain fish have varied appetites, and will eat nearly anything at one time or another, according to the Director of Inland Fisheries, Texas Game and Fish Commission.

This conclusion is based on

samples taken from the stomachs of several fish. Such samples have included everything from rat skulls to peanuts, sack and all.

A skull taken from the stomach of a channel cat caught in Little River in Leon County was recently sent in for identification.

It turned out to be that of a Sigmodon hispidus, or bristled cotton rat. This not only indicates that the rat spends some of his time swimming, but also that cats, even of the fish species, live up to tradition. The skull was compared with many others that had been found in

other fish in the State. It proved to be the same as the others.

A Wichita Falls biologist stated that he also had found skulls in bass and cats in that area, indicating that rats must constitute a part of the diets of these two fish. Samples from fish taken at Belton Reservoir, which covered pecan flats in certain areas, revealed that some of the fish were pecan-eaters.

In the case of the peanuts, one fish not only contained samples of nuts but a portion of the sack with the trade name still readable. Other items found in the stomachs of fish include grapes, red-winged blackbirds, chicken bones, ducklings and cliff swallows.

One reason that fish have added cotton rats to their diet is because the rats are so plentiful.

**HIGHWAY SAFETY**

Automotive accidents have been increasing through the years and the Puroator Automotive Research Bureau feels that there are definite causes for many of these fatalities that can easily be corrected with a resultant decrease in highway accidents.

John Bury, of the Bureau, claims that alcoholic beverages are one of the major causes. The reflexes of the driver are slowed down and without realizing it he becomes a reckless driver while he has a false feeling of complete safety. Speeding is another major cause of fatalities. Most driving speed restrictions are placed on the road for a reason and should be adhered to.

Another cause of highway collision is crossing the center line. Don't pass other cars where there is a double line and be sure when you do pass in a passing zone, that you have plenty of room.

Mr. Bury listed a number of other causes of accidents such as: poor physical condition of the driver, usually overtiredness; bad weather conditions; heavy traffic and poor roads where speed should be cut down.

If we take all the necessary precautions we can reach the point where the accident rate will begin a downward trend. Careful driving and close attention to local driving regulations coupled with keeping cars in good shape will help to cut down the rate. It is up to every driver to contribute to the best of his ability to cut down the highway death toll.

**VA OFFERS HELP TO DISABLED VETERANS**

The Veterans Administration

is extending its nationwide "foster home" program to include physically disabled veterans, the

agency said today. Established in 1951 to provide a normal home life for recovering mental patients, as a step in their return from the hospital to the community, the program has enabled thousands of VA mental patients to live with "adopted" families in private homes.

The veterans pay for their room, board, and care from their own funds.

The program for general medical and surgical patients will make use of boarding and nursing homes, as well as private residences.

It will give physically disabled and aged veteran-patients help of VA social workers in finding a suitable place to live when they have no relatives who can provide a suitable home.

VA said volunteers from the community are proving of in-

valuable aid in locating foster homes and in helping the disabled veterans adjust to community life again.

**ABOUT YOUR HEALTH**

Texas State Dept. of Health  
Henry A. Holle, M. D. Com.

You're 16, and just when you wanted to look your best you break out with a new crop of pimples. Discouraging? Yes, but not a permanent tragedy.

In nine of ten cases acne will disappear without treatment by your mid-20's. But why wait, when you can do something about it now?

The most important thing is to wash your face with soap and

warm water at least three times daily. Why? Because at your age oil glands are often over active and tend to clog pores. Result: Pimples and blackheads.

So it's just common sense to wash often to rid your skin of excess oil and dirt and to help remove the plugs. Cosmetic cleansing creams, incidentally, as not nearly as effective as soap and water. In fact, some of them make acne worse by plugging up already clogged pores.

Your trouble might be particular items of food. So unless you are sure they do not cause flare ups, your physician will probably suggest that you watch out for: Chocolate in any form such as candy, cookies, cake, ice cream sodas, sauces, cola drinks. Instead, stick to vanilla or fruit flavored soaps and soft drinks, white cakes and cookies.

Nuts, especially peanuts and peanut butter, are capable of causing skin eruptions. Sharp cheeses won't help your acne either, but cream or cottage cheeses are usually okay.

Shellfish or salt water fish, and melons can be aggravating to acne.

Woolen clothing next to bare skin might cause your neck or back to break out. If so, the solution is simple—don't wear wool except as an outer garment.

The bromides in cold pills, nerve medicines and sedatives cause skin difficulties for some people. So can iodine in cough syrups and table salt.

Following the rules of good health—getting plenty of exercise and sleep, eating nutritious meals, and drinking plenty of water—will help you get rid of unsightly acne.

Don't expect the blemishes to disappear overnight. If you follow these suggestions for three or four months and your acne hasn't improved, your family physician, or a specialist he will recommend, will probably prescribe internal and external medicines for your particular case.

So between you and your doctor, you have a much better than even chance of having a clean, clear complexion in time for the first big dance of the new school year next fall. It's well worth working for.

Time saved by speeding may be a lifetime lost.

Haste makes waste, especially in driving.

**RAISING DAIRY HERD REPLACEMENTS PROFITABLE**

College Station — "Would it pay me to raise and develop my own herd replacements?" "How much does it cost to raise a dairy herd replacement from birth to

her first lactation?" These questions are often asked by dairymen. As a result, two experimental tests were initiated at the Tyler experiment station in an attempt to answer them. The first study was started in

1950 and the second in 1955. Additional data on cost of herd replacements were collected from dairy farms in Northeast Texas through the East Texas Dairy Study during 1954-57.

The average cost of raising Jersey herd replacements at the Tyler station was \$157 per heifer from birth to first lactation. The average age of the 22 heifers at first calf was 2 years, 4 months, and 16 days and their average weight was 818 pounds. The estimated value of these replacements at first calf was \$250 each.

The East Texas study was conducted on 607 Jerseys on 32 farms and on 32 Holsteins on two farms. The average cost of raising replacements was \$148 per head for Jerseys and \$179 per head for Holsteins.

The average total cost of Jersey replacements for both the Tyler Station and the East Texas study was \$153 per head.

He was just dying to see how fast he could drive.

**ABOUT YOUR HEALTH**

Texas State Dept. of Health  
Henry A. Holle, M. D., Com.

AUSTIN—Don't assume that a child will outgrow crossed eyes, warns Dr. Henry A. Holle, Commissioner of Health. Crossed eyes are a serious defect. Vision in the crossed eye may fail to develop and the child will grow up without useful sight in that eye. In later years, the eye may straighten and appear normal, yet the person will be partially blind—often without knowing it.

Various factors may be responsible for crossed eyes: near or far-sightedness, faulty muscles and excessive nervous incoordination; a blow on the head; heredity or disease. Any one of these may affect the ability of the two eyes to work together, causing one of the eyes to turn in, out, or

upward. As a result, the two eyes are unable to focus on the same object at the same time. The youngster sees double, because his crossed eyes view an object from widely different angles. The child is disturbed, but often too young to explain his difficulty. He squints his eyes and tilts his head, unconsciously trying either to combine the two images into one, or simply to ignore one image altogether. But neither attempt succeeds. So he finally gives up trying to see with both eyes. He subconsciously eliminates the image in one eye, now sees only one image, and actually becomes accustomed to "one-eyed" sight.

The longer a child is cross-eyed, the more difficult it is to improve

his vision. If treated early—preferably before the age of four—crossed eyes can usually be corrected. Some forms of treatment can be started as early as the age of one year. And even cross-eyed children up to nine or later can occasionally regain normal sight if they receive competent medical treatment. The specialist may first recommend glasses if the youngster is near- or far-sighted; in some few cases that alone will do the job.

Exercises for the eye muscles may be used to teach the two eyes to work together again as a team. These do not take the place of surgery or glasses, but are valuable. Sometimes an operation is necessary to line up the crossed eye with the normal one. One

operation may be all that's needed, but it sometimes takes two or three before the eyes are exactly straight, since several eye muscles may be involved. Complete correction may take a year or more. One set of eyes can last a lifetime but it takes responsible care by parents during the years of childhood. Habits formed then will carry over into adulthood.

Start safety first, and make it last.

**Mr. Tax-payer:**

**Which of these pipes will your city use?**

Texas-made Lone Star cast iron pressure pipe will last over a hundred years!

The use of cheap substitutes, such as foreign made cement-asbestos pipe, is wasteful and means probable replacement in a very few years. (This pipe was taken from a Texas city's water system. Photo is unretouched.)

Officials of most Texas municipalities know that when they buy and install cast iron pipe they are helping to support the American economy and the high standard of living we all enjoy. They are buying products made in America for use by Americans. They are not fooled by the slightly lower initial cost of foreign goods because they realize that this "paper savings" will be more than offset by the cost of excessive maintenance.

Domestic cast iron pressure pipe is time-honored, centuries-proved, and is backed by strong, resourceful American companies that will be in business for years on end to guarantee their product.

Really, who backs foreign-made pipe? Who answers for it when it fails? To whom will the few all-advised pipe-buyers look for the answers to these questions when trouble develops? Were they penny wise and pound foolish?

Take a look at some of these important factors back of the initial price tag, then pick up the telephone and call the first city official you think of and tell him you appreciate his good judgment in buying American-made cast iron pipe with your tax dollars. If he has been buying Lone Star pipe, tell him that we, too, appreciate the business!

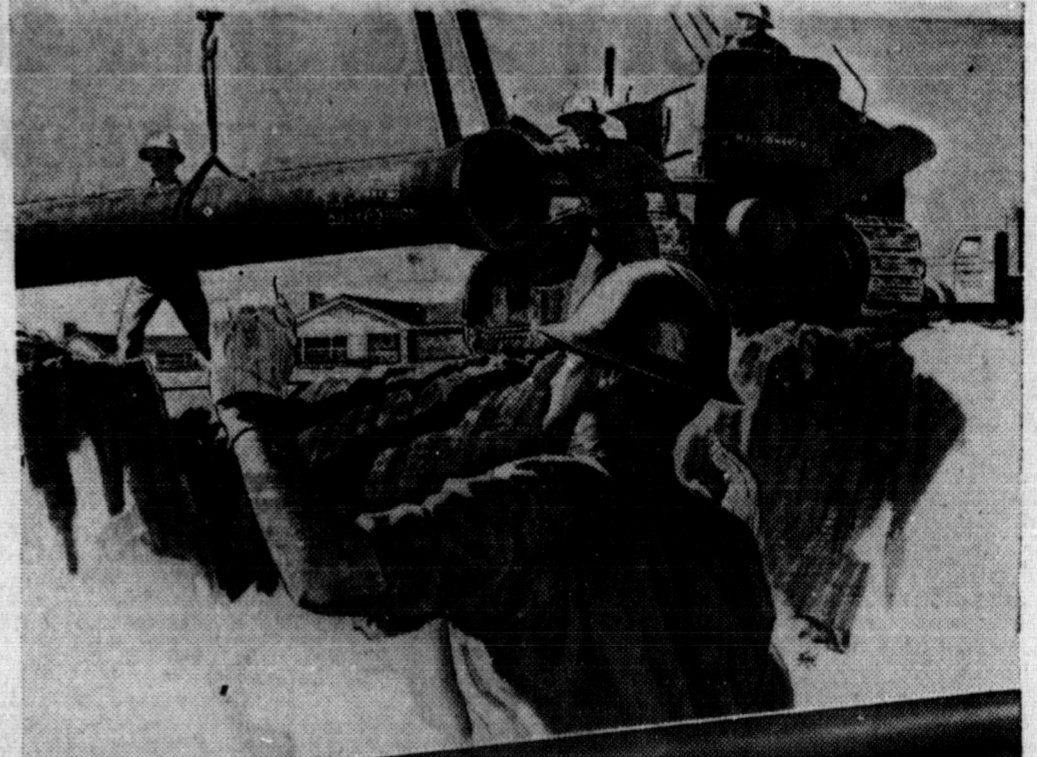

Foreign products used in America deprive Americans of work

Cast iron pipe, such as Lone Star's dependable pressure pipe, will last for over a hundred years. It saves millions in tax dollars by eliminating repeated repairs that are inherent in cheap, foreign-made substitutes. Lone Star pipe bears the "quality check" of the Cast Iron Pipe Research Association and the approval of Underwriters' Laboratories, Inc.

### Contact Lenses Have Many Uses

Another rather unusual use to which contact lenses have been put is in movie making. Many stars at times wear tinted contacts to change the color of their eyes to meet the requirements of the role they are playing. Others wear regular contacts so they can see "without glasses" before the cameras. The lenses have also been used combined with harmless vegetable dye called Fluorescein and Cobalt blue light to cause the eyes of the monsters in horror type movies to appear to be on fire! The glow emitted by the dye when the cobalt blue light is turned on it is very unusual. This combination of Fluorescein and Cobalt blue light is used routinely by most contact lens specialists in checking the fit of contacts on a new patient. If you're curious to see this in-

teresting effect ask your optometrist to show you next time you visit him.

Recently announced use of contacts is in stopping the progress of near sightedness (myopia) in children. Many parents of little myopes are highly disturbed when Junior's glasses have to be made stronger every year (sometimes more often) in order to make up for falling vision. Science has not yet learned all the whys and wherefores of progressive myopia. Many methods and theories have been tried without obtaining any consistent and encouraging results. However, it has been found by some that if contact lenses are fitted on a child with progressive myopia the condition becomes static and requires no further appreciable increase in lens power. These results are very consistent, according to the records of the researchers.

The newest development in contact lenses has just been an-

\* **INFANTRYMEN'S FRIEND**—The Army's pentomic infantry divisions will now have 30 of these 155mm howitzers supporting their five mobile battle groups. This World War II "Workhorse of the Western Front," as shown in Germany, hurls a 95-lb. shell 16,000 yards.

nounced by the Plastic Contact Lens Laboratory of Chicago—Bifocals! Something most of us never thought we'd see in contact lenses because of the technical problems involved, but now we got 'em! Altho they are still in an experimental stage Drs.

Wesley and Jessen of the Plastic Contact Lens Labs state they are getting satisfactory results in about 50% of the cases. Heretofore one of the problems of contact lens wearing was that when the wearer got past age 40 he had to have a pair of specs to go in front of his contacts if he was to do any reading or other close work. This was necessary because only one prescription power could be put in contacts and this usually was the distance Rx. Until the age of forty this is no problem because bifocal lenses are seldom needed anyway, but

after forty contact wearers were handicapped by the problem. The situation is evidently going to change rapidly with the developments bound to occur in the near future.

Next week will be the last of this series on contact lenses and, we think, one of the most interesting to the person considering having contacts for himself. The subject will be "How to get them and what to expect of them." (Presented in the public interest by the Texas Optometrist Association, Inc., Copyright, 1958)

1959

New Series—Volume 29 Number 22

CLARENDON, DONLEY COUNTY, TEXAS, JULY 2, 1959

A Common Paper for Common People

**Blowin' Out the Corners**  
by Uncle Zeb

Not long ago we met Tomie Potts of Memphis, Texas. For a long time we have heard about Mr. Potts, who is now president of the Texas Hereford Association, owns an automobile business, operates ranches in this area, and of all things writes a column called Prex's Paragraphs for the Texas Hereford publication.

Our paths have crossed many times but never at the same time until the other night in Clarendon at the organization meeting of the new group known as the Rolling Plains Registered Cattle Association. Already we are borrowing from the above column:

"Writing is like a tub of hot water; after you are in it awhile, it isn't so hot."

On comparing writing to taking a bath we would like to add our own comment:

Petty often we get our selves in hot water, and Too much of the time, we are "Ont of Soap."

Going back to another quote from the Sage of Memphis: "There are two things we should never be angry about, what we

can help and what we cannot help."

The following is supposed to be a freshly spanked child's prayer: "Don't give my daddy any more children. He don't know how to treat the one he's got."

This is the season or class reunions, old timer's picnics, and all other types of get-togethers including that of taking the family to the park or down on the creek. As usual thoughts along this line remind us of some experiences of our boyhood. Like for instance when we used to wear overalls made from the less worn ends of a cotton sack. Don't laugh for like as not this also happened to you.

We doubt if modern machinery can turn out a pair of overalls in less time than could my mother. When we would come in from play with our bareness showing she could without a pattern turn out a new pair before we could scrub off the dirt that was showing through the holes. She would take a piece of duck, fold it a certain way, whack across the top, clip out the fork in the pants, sew on one square pocket, and whip the scraps into shoulder straps, and the so-called finished product was ready for wear in nothing flat. Glorious days in spite of everything.

Heard of a little girl who re-

marked: "My dad is in the middle ages."

An Old Timer was asked when he came to the Panhandle: "Oh, I don't rightly know the exact date, but the sun wasn't any bigger than a saucer then, and there wasn't any moon a'tall."

If we make hay while the sun shines, then we don't have to eat horsemeat when it rains.

When my wife tries to prod me into doing something by making me ashamed of myself, she begins by asking me how come that I don't do such and such a thing like Mr. So And So. In making this comparison she never picks just a plain ordinary citizen, but always one of the most up-standing men in the whole community.

Now, if I were going to show off my best car, the natural thing to do would seem to drive it along-side of some old wreck. Maybe, we would show up with not so many short-comings if we were compared with some ordinary run of the mill old character. Guess we just don't understand women.

The reason why a lot of people never make the big splash which they intend to, is that they find the water a lot deeper than they expected.

Keeping the truth from your wife after you have lived to-

A 4-cent postage stamp saluting progress in soil conservation in the United States will be issued Aug. 26 by the Post Office Department, the U. S. Department of Agriculture announced today.

The Nation's first soil conservation stamp will be formally released at the annual meeting of the Soil Conservation Society of America at Rapid City, S. D., Aug. 26. It will go on sale the following day at post offices throughout the country.

The stamp, which was devel-

oped in cooperation with the U. S. Department of Agriculture, portrays a modern farmland setting signifying that conservation farming brings beauty as well as bounty to rural living. Soil conservation practices portrayed include contour strip-cropping, terracing, pasture improvement, tree planting, and a farm pond. In addition, the silhouette of a city in the background symbolizes that urban as well as rural people are highly dependent upon the care and wise use of land as a principal source of food, water, shelter and clothing. The stamp will be printed in three colors, yellow, green and blue.

A total of 120 million stamps has been ordered. The artist is Walter Hortens of New York, a native of Vienna.

Issuance of the stamp, officials of the Department of Agriculture said, is a tribute to farmers and ranchers, their local soil conservation districts and to the professional conservationists and other agricultural workers who have helped make the United States a world leader in soil conservation.

Observances are planned in most of the Nations 2,840 soil conservation districts in cooperation with various agricultural, industrial, civic and conservation groups.

First-day "covers" containing the stamps are available through the Postmaster at Rapid City, S. D. Upon request and receipt

together for many years, is about as hopeless as trying to smuggle daylight past a rooster.

"No man is perfect, which all women will agree, But all the time she keeps expecting him to be."

"Sometimes the cooing stops when the wedding is over, but the billing goes on forever."

Just because we happen to be in Who's Who, doesn't always mean that we know What's What.

## GABIE BETTS BURTON LIBRARY NOTES

EDITH BARNES

"Celia Garth" by Gwen Bristow has been given to the library in memory of Mrs. L. T. Alexander, mother of Mrs. Charlie Bairfield. A memorial fund has also been given dedicated to her.

"The Years With Ross" by James Thurber and "The Big X" by Hank Settrishave has been dedicated to the memory of Gordon Heatherly. Gordon loved to read which was a blessing as he had been sick for over fourteen years.

"The Coca-Cola Bottler" has been given to be put in Mr. Frank Phelan's memorial section. This is the Coca-Cola's 50th anniversary issue and is full of interesting articles.

of addressed envelopes and a remittance to cover the cost of the stamps, the post office at Rapid City will place the new stamp on the envelopes, cancel them with a special cancellation mark used only on that day and at that place, and mail the envelopes on the first day of issue.

Nice folks gave us the following last week: "The Lady From Savannah," by Gladys Shultz and Daisy Lawrence, "The Kenny Concept Of Infantile Paralysis And Its Treatment," by John F. Pohl M. D., "The Great Chicago Fire," by Payl M. Angle, and a new book of Emerson's Essays. Thank you all.

About a year ago I bought a pocket edition of Vance Packard's "Hidden Persuaders." This little book made the rounds and all who read it seemed to like it. Come to think of it some one must have liked the book real well. I never got it back. Mr. Packard's "The Status Seekers" should be as well received. He can back up most of his claims with proof.

Many readers are learning that god non-fiction can be as interesting and exciting as fiction. You can't blame anyone if they refuse to plow through dull books but there are many good non-fiction books in the library: autobiography, biography, books about Texas and the Southwest etc. Naturally the book depends on your writer. Whether it is fiction or non-fiction there are those who can take the most fascinating subject in the world and manage to make it boring. The Tom Goodner memorial books have already come and the boys have them checked out.

**Steelworkers' Job Titles Are Colorful**

Although the hanger, the dresser, the knockout man and the middle pulpit operator sound like names from stories by the late Damon Runyon, the odds are he never heard of them. For these are not trademarks of Runyon's rogues but job titles of men who help man the nation's steel mills, American Iron and Steel Institute said today.

The middle pulpit operator is sharp, but his professional operations pertain to manipulating levers in a bar mill, directing hot rolled steel through various

phases of the manufacturing process. And the knockout man is no dealer in unconscious states. He pries metal castings out of molds. Likewise, sartorial splendor is not a requirement for the dresser's job. The title comes from his duties of dressing or reshaping worn and damaged tools. The hanger also gets his name from a literal job description, the Institute said. He hangs ready-to-paint steel fence posts on an overhead rack.

Other titles which may be puzzling to the layman include the titles cool control inspector and swing grinder. Although the titles might suggest it, the former does not keep check on the "real gone" antics of the latter. When

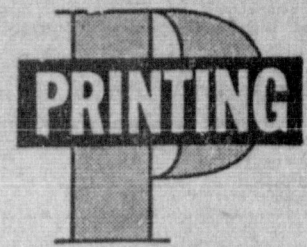

**SPACE PROBE**—Pioneer IV which soared smoothly into space at 12:11 a.m. EST March 3 got its biggest boost from the Army's "Old Reliable" Jupiter intermediate range ballistic missile which started the 13,400-pound payload of instruments on its journey to orbit the sun. The artist's conception here shows the various sequences of the launching of the space probe.

available for supplemental irrigation.

They are usually planted in 36 to 42-inch rows at a rate to give 10 to 12 plants per foot of row. Date of seeding is important because of the sensitivity of the plants to day length and temperature. Optimum planting dates occur when the minimum soil temperature is above 65 degrees and the day length reaches 14½ hours—May 15 to June 15 in about all areas of the state.

The Texas Agriculture Experiment Station has released a bulletin entitled Soybean Production in Texas. It discusses all phases of production including adaptation, production methods, fertilization, harvesting and storing. The bulletin is available free of charge from the Agricultural Information Office, College Station, Texas. Ask for Bulletin 919.

the cool control inspector is "with it" he's placing newly rolled railroad rails in "cool control boxes" and keeping careful check on them for the prescribed cooling time. The swing grinder removes surface defects from steel blooms and billets with a grinder that swing on a movable pivot.

Similarly, the gag straightener doesn't spend his days working over the jokes of the end man, the Institute explained. The gag straightener operates a power-driven press that straightens bent or warped steel products, while the end man, without so much as

a snicker, ties wire bands around bundles of galvanized wire.

**Soybeans Are Good For Crop Rotation**

Soybeans have been grown in Texas for more than 40 years, but have not yet become an important crop although their potential value is recognized.

Soybeans can be grown in most irrigated sections of Texas. In areas of higher rainfall, such as East Texas, yields are inconsistent under dryland conditions and the crop is not recommended unless irrigation facilities are available.

Average yields under irrigation are approximately 25 bushels per acre, but some relatively large plantings have produced 30 to 40 bushels per acre. At this level of production, soybeans do not give as much cash return as grain sorghums. Soybeans, however, are valuable in a soil-improving rotation, and weed control following soybeans is not as serious a problem as following grain sorghum.

Soybeans are adapted to about the same soil and climatic conditions as corn or cotton. They do best on well-drained, mellow, fertile and sandy loams, but good results can be obtained on most properly-drained soils if water is

FOR a Nik ment lifting with mistle

HIGH TIM Some tir

**FORKLIFT-CRANE-TRUCK**—Utilizing its crane attachment, the Army's "Ranger" moves a Nike-Hercules missile to its launching rack for union with the booster section. The experimental multi-purpose vehicle was developed originally as a rough-terrain fork-lift with a lifting capacity of 10,000 lbs. It can pull 19,000 lbs. as a tractor and can handle 10,000 lbs. with its slewing crane boom. The "Ranger" was designed to simplify handling of Army missiles at launching sites.

**HIGH TIME** Some time ago Postmaster General Summerfield asked per- mission of the Interstate Com- merce Commission to increase parcel post rates, by about 17

per cent. A business service, in forecast- ing coming events here and abroad, says: "Parcel post rate will be increased." About the best comment that can be made on that is: "It's high time!"

Parcel post was authorized by Congress, back in 1913, as a supplementary service to the private package carriers. It was specifically stipulated that it was not to supplant these carriers, or to unfairly compete with them.

It was also stipulated that parcel post charges were to fully and fairly reflect the costs to the Post Office Department of providing the service.

These stipulations have constantly been violated.

Direct losses attributable to parcel post—losses which can only be made up by the general taxpayers—have run far past the billion point. Indirect losses have added heavily to the taxpayer-borne deficit. And it would be hard to find a better example of unfair competition with private enterprise, which must pay taxes, and meet every cost of operation, direct and indirect, out of pocket.

Let parcel post users pay for what they get—just as they pay for what they get when they patronize any private business. What could be fairer?

**AERIAL DELIVERY**—Army troops fighting under conditions of modern warfare may be cut off from normal supply services. So the Quartermaster Corps delivers the goods by parachute. U.S. soldiers of a supply unit wrestle in Germany with the shroud lines of a cargo pack.

spinning wheels, 30 pounds mutton tallow, 1 large loom made by Jerry Wilson, 100 split hoops, 100 empty barrels, 1 32-gallon barrell Johnson-Miller whisky seven years old, 20 gallons apple brandy, 1 40-gallon copper still, 4 sides of oak-tanned leather, 1 dozen wooden pitchforks, a one-half interest in the tan yard, 1 .32 caliber rifle, bullet molds and powder horn, a rifle made by Ben Miller, 50 gallons of soft soap, hams, bacon and lard, 40 gallons of sorghum molasses, 6 head of fox hounds, all soft-mouthed but one.

"At the same time I will sell my negro slaves—two men, 35 and 50 years old, two boys, 12 and 18 years old, two mulatto wenches, 40 and 30 years old. Will sell all together to same party as I will not separate them. "Terms of sale—cash in hand or note to draw 4 per cent interest, with Bob McConnel security. My home is two miles south of Versailles, Kentucky, on McConnel Ferry pike. Sale will begin at 8 o'clock sharp, a.m. Plenty to eat and drink."

Nineteen officers have acted as Commandant of the Marine Corps since 1775.

Diseases of small grains in Texas is the title of a recently released Texas Agricultural Experiment Station publication.

Copies are available from the Agricultural Information Office, College Station, Texas. Ask for Leader—Local rate, \$3.00 a year B-921.

**ALDERSON CHEVROLET**  
CLARENDON, TEXAS

## Farm Auction, 1849 Variety

Country auction sales, 1959 style, usually draw fairly good-sized crowds—but if a sale advertised in an old newspaper clipping bearing the dateline Versailles, Ky., 1849, were to be repeated today, it would doubtless be a record-breaker.

"Having sold my farm and am leaving by ox team for Oregon Territory on March 1, 1849, I will sell all my personal property except two ox teams, Buck and Ben, and Lon and Jerry. The property consists of the following: Two milk cows, 1 grey mare and colt, 1 pair of oxen, 1 yoke, 1 baby yoke, 2 ox carts, 1 iron plow with wood mole board, 800 feet of poplar weather boards, 1,000 feet three-foot clapboards, 1,500 ten-foot fence rails, 1 60gallon soap kettle, 85 sugar troughs made of white ash timber, 10 gallons maple syrup, 2

**KILLER**—The Department of the Army has announced that the SS-10 anti-tank missile, shown above, will be procured for use by the U. S. Army. The SS-10 was developed and is manufactured by Nord Aviation of Paris, France.

**Women Can Still Outdo Men Talking**  
The expected Senate battle to restrict the filibuster may leave women the undisputed champs

of the art of talking the opposition to death. The little woman has long been notorious for her back-fence oratory. But she had had strong competition from senators who have recited from the Bible, read

old newspapers and even disclosed their favorite recipes in an attempt to kill or amend legislation they opposed.

Research experts with the World Book Encyclopedia report that many believe Sen. Strom Thurmond holds the record for a one-man filibuster. The South Carolina Democrat spoke for 24 hours, 18 minutes, in 1957. He began the filibuster by reading the texts of the election laws of the 48 states.

Thurmond got a breather, however, when another senator asked for the floor to make an insertion in the Congressional Record.

Some prisms argue that Sen. Wayne Morse held the floor longer than any other member of the Senate. In 1953, the Oregon Independent talked for 22 hours, 26 minutes, without any interruptions, in an effort to prevent the passage of the tidelands oil bill.

Republicans, too, have had their share in trying to stifle legislation by wearing down the opposition with talk. In 1908, Wisconsin's Sen. Robert LaFollette, Sr. held the floor for 18 hours, 23 minutes, in a filibuster against the Aldrich-Vreeland currency bill, although he did not talk continuously.

Senators have filibustered against targets ranging from the Atomic Energy Act to a migratory-bird bill. But despite these formidable male threats, the record for an unbroken monologue

still belongs to a woman. Last summer, a housewife from Tulsa, Oklahoma, won a contest for the world's champion talker by jabbering away for 94 hours, 32 minutes, 5 seconds.

**SMALL GRAIN DISEASES**  
**TITLE OF PUBLICATION**

Small grain losses due to diseases in the excessively wet seasons of 1957 and 1958 were estimated to be more than 20 million bushels. Damage to the crop may result in reduced stands, reduction in amount or quality of forage or in reduced yields and quality of the grain produced.

Diseases which caused these losses are discussed in a bulletin released by the Texas Agricultural Station titled, "Diseases of Small Grains in Texas."

The control or reduction of losses from many small grain diseases in Texas is not only of local importance, but has national and international significance. The fall infection, winter survival and spring increase in South Texas of airborne pathogens, such as cereal rusts, may endanger the small grain crops throughout Texas and other states.

Diseases of wheat, which consistently cause losses or are po-

tentially dangerous to the crop, include leaf rust, stem rust, speckled leaf blotch and loose and covered smut or bunt. These and diseases less frequently found are discussed and control measures are suggested where known.

The two most serious diseases of oats in Texas are crown rust and the Helminthosporium blights. These are described along with stem rust, smuts, Septoria diseases, powdery mildew and yellow dwarf. The control measures for reducing losses are given.

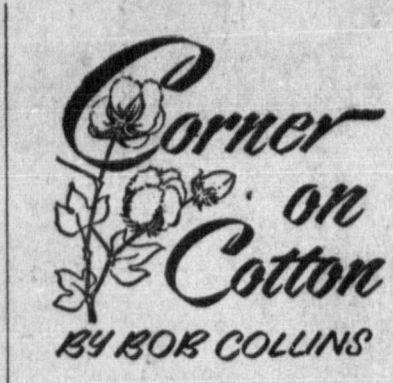

Net blotch, leaf rust, mildew and the smuts which cause some damage to barley nearly every year are discussed. Bacterial blight, false stripe, scald and yellow dwarf which are less frequent in Texas are also discussed. The suggested means for controlling or reducing these losses are given.

For a copy of the bulletin write the Agricultural Information Office, College Station. Ask for B-921.

Don't be eternally hurrying or you may be eternally dead.

The morgue is always the nearest point to a speeder.

Donley County Leader, \$3 a year in country.

Think you won't be affected by crop support limitations recently voted by both houses of Congress because you are a "small" cotton farmer?? ... we'll bet you are wrong ... first, limitations on loans can seriously disrupt orderly marketing processes and depress prices, forcing many small farmers to use the loan when they would not otherwise (and this could mean more cotton will go into the CCC rather than less) ... it would work like this: Loan limits could force the sale of much of the crop as it comes from the fields since it would be entirely unsupported and the producer would need his money immediately ... of course storage charges and interest are paid ... this selling the unsupported crop as it comes from the field could drive down the prices and all cotton farmers could get hurt ... of

course, the ideal thing is to have a cotton crop that stands on its own feet without having or needing supports, but it can't be done this way ... in the past not so disturbing disruptions of established commercial procedures have started tragic chain reactions in our overall economy ... the politicians are playing with fire.

**Added Strength**  
Research is underway to add strength to cotton linters ... those are the short fibers that stick to seed after ginning ... when this is done the linters will have a greater use in papermaking ... right now they have a limited use because they are weaker than the long cotton fibers ... USDA research division is at work on the project.

**New Weed Killer**  
Experiments with diuron during the past two years give some promise of eliminating cost of a couple of cultivations ... this weed killer was applied early in the season when cotton was six to eight inches high.

**The Cost**  
Diseases, weeds, and, of course, insects are the biggest headaches for cotton farmers ... cost of these is about 12¢ per pound of cotton ... no estimate is available on what politicians are costing farmers.
