Cattle Feeding In Panhandle Continues To Be Conducted Its Growth

Service in the same report said vember 14-15. that nationally the increase was

handle with declines now develop-Coast areas of the state. More feed October 1 in High Plains feedlots, he said.

Uvacek noted that Texas reported 264 feedlots with capacities of 1,000 head or more on October 1 and that they held 1.4 million head of cattle. These large feedlots have a total capacity of 2.4 million head at one time; thus, only 59 percent of their available capacity was in use on October 1.

The October 1 report, pointed out the specialist, showed that 80 lots were empty. Utilization of the 184 active feedlots was at 66 percent of capacity, Uvacek said.

Texas feedlots placed 789,000 head on feed during the July-September quarters, down 3 percent from the same period a year ago. Operators reported tle during the last quarter of 1970, about 10 percent more than Simeon P. Dishman a year ago. Uvacek said that short-feds were excluded in both marketing figures.

tle and calves on feed in the 22 major feeding states, 3 percent above a year ago. Placehead or 7 percent more than for the same period in 1969. Cattle feeders in the 22 states Uvacek noted.

Veteran News

Q-I am married to a World War I veteran who receives 100 per cent service - connected compensation. Would I be entitled to benefits as the widow of a disabled veteran?

A-Possibly. You would qualify for a higher rate with no income limitations if the veteran died of a service - connected condition. However, if the condition which caused his death was not service - connected, you might qualify for a widow's pension, provided you are within the income and estate limitations. Q-My husband and I are both veterans, entitled to schooling benefits under the G.I. Bill. May we both claim our two children as dependents and be paid for them, and may we both claim each other as dependents?

Influence Per Capita

have paid \$545 in Cleveland and which influence the per capita consumption of meat in the United States but, explains Ed keting specialist, none is more important than meat production. How is the per capita consump-

Texas' burden is relatively low. tion of meat figured in the first place? Uvacek says it's simple; namely, meat production plus imports, minus meat exports, divided by the human population. Since imports are small and ex-Clarendon College wili host the ports insignificant, the really imthird Golf play-off in the Wes- portant factor then is meat protern Junior College Athletic duction. Larger productions of Conference Friday, November 13, beef, for example, tend to raise at the Clarendon Country Club the per capita consumption level as long as they are greater than the population growth. Beef con-Odessa College, Howard County sumption per capita is expected College, South Plains College, to reach 114 pounds this year compared with 110 pounds last

Income is another factor Uvacek relates as highly important to those after retirement. Usto meat consumption. As per cap- ually, 45 or more hours of work ita income after (taxes) rises, meat consumption usually increases, he says. This relationship is much more pronounced they battle for place wins. Final for certain cuts such as steaks and roasts and less evident for items like bacon and ham.

Price has a major influence on meat consumption levels and fice. the usual pattern - as prices rise - meat consumption moves lower. Consumption of specific meat cuts, however, varies considerably in their reaction to price changes, explains Uvacek. Research indicates that the consumer's occupation also affects consumption habits. Laborers, for example, tend to eat These crashes resulted in three more meat than white-collar

Where one lives also influence the types of meat and the amount consumed, notes Uvacek. City ten months of 1970 shows a total dwellers, in general eat more of 47 accidents resulting in three meat than rural people. Regionpersons killed, 28 persons in- al differences in meat consumpjured, and an estimated property tion habits are real. A person who grew up in the North East U. S. is likely to consume more Visitors in the home of Edith lamb and heavier beef than is

Longan Sunday afternoon were a native Texan, says Uvacek. Family size and its composition may also play a role in meat consumption. In general, explains the specialist, teenagers in a family usually eat more meat Helen Green and Alice Tyson while older people consume very d Mrs. F. N. Bentley little. As a rule, the per capita of Amarillo spent the week end consumption of meat decreases with Miss Green's mother, Mrs. as family size increases, says

Race, religion and nationality are cited as greatly affecting the meat consumption habits of people. The season of the year also comes in for consideration and is most important when spe cific cuts of meat are considered. The spring and summer "cook season brings much stronger demands for hamburgers, steaks and hot dogs while roasts and stews are winter-time fa-

And finally, says Uvacek, meat onsumption is a rather complicated process that yields a single simple figure but one that had best not be misinterpreted.

Social Security News

Q-I just turned 65. I was told if I do not perform substantial services in my business I could get social security benefits. What is meant by "substantial serv-

A-"Substantial services" refers to the amount of time you work in your business, the nature of your services, the type of business, and the relationship of your activities before retirement in a month is considered "substantial services." Less than 45 hours may be considered substantial if the service is managing a large business or working in a highly skilled occupation. You can get more detailed information at your social security of-
