### Lake Side Biology Lab For CC

Mr. Bill Elerbrook, chairman of the Science Division at Clarendon College, stated today the Biology Department of Clarendon College has secured a site ance met Thursday, Sept. 8 at located on the Greenbelt Lake north of Clarendon. This site will serve several purposes. First, it will be a study site for biology research, dealing with marine life, where the student will collect specimen study them, and preserve them for future reference. This will give the student a more realistic view of marine

> and artifac area with the site undisturbed compared to the changes in the surrounding area. Thirdly, this site will serve as a research area giving the student practical experience with the, methods and tools of biological research.

Greenbelt Lake is a relatively new lake and the research will serve as on-going biology history. This lab site will be used extensively by the Biology Department to stress the study of our environment and man's relationship to it.

the president's freeze order Commissioner Edgar concluded that raises were in order also in local school districts which pay salaries above the state minimum where agreements were reached before August 15.

Texas Public Employees Association filed a petition for exceptions from the freeze since the Legislature last June passed an appropriations bill calling for state worker pay raises.

AG OPINIONS - Appropriations bill limitations on extended state pay to aliens do not prohibit the Texas Industrial Commission from hiring a Mexican National to work in Mexico fulltime in a Texas Industrial Commission branch office there, Atty. tin concluded: A justice of the peace who is not an attorney must have served a minimum of two terms of four years each to be exempt from attending a 40-hour course of instruction for non-lawyers.

Texas Rehabilitation Commis sion is authorized to deposit funds received from local agencies under a federal establishment grant in a local depository.

Martin said a governor's veto of funds for payment of court costs will handicap his office in prosecution and defense of state

WATER PLAN ALIVE - Master \$10 billion water plan to move surplus Mississippi River waters to Texas High Plains farms is still alive, according to Harry Burleigh, executive director of the Texas Water Development Board.

Burleigh urged campaigning to win congressional support of plan in 1973, when federal agency water conservation report is due. Although Texans rejected \$3.5 billion bond issue to finance state's share of giant project, it is believed much of the money can now be obtained from the federal government, Burleigh incated. ## Army Worms Hurting Grasses, Pastures

Recent rains over much of the state have revived ranges and pastures and brought on lush growth. These green grasses appeal not only to livestock but to army worms as well. The pests have come on the scene in several areas of the state in recent weeks.

"Army worms generally appear in late summer and early fall where lush growth appears in grasses and forage crops,' explains Dr. John Thomas, entomologist with the Texas Agricultural Extension Service. 'Small grains planted for fall and winter grazing are especially susceptible to damage. Plants can be stripped of their foliage in short order.'

Army worms reach a length of about 11/2 inches when mature. Young worms are less than onehalf inch long. Their color ranges from pale green to almost black. Thomas explains that the worms have two characteristic markings. Three parallel yellow lines extend along the back. A prominent white inverted "Y" also appears on the front of the worm's head.

According to the entomologist, army worms can be effectively controlled if measures are taken as soon as infestations appear. Applying 11/4 pounds of Sevin (80 percent wettable powder) per acre usually gives adequate control. Toxaphene at 3 lbs. of actual material per acre is also effective but there can be no grazing by dairy animals or animals that Parathion and methyl parathion can also be used but have a 15remely hazardous to applica- long parade.

tors and are subject to drift. Thomas cautions producers to follow the manufacturer's directions on the label of any of these materials.

"Army worms are mainly night-feeders but are also active on cloudy days," adds Thomas. "Grasses should be inspected frequently and carefully to detect army worm activity, especially during cool, wet weather."

### Tri-State Fair Set For September 20 - 25

Headline attractions at the 48th annual Tri-State Fair, Sept. 20-25, in Amarillo are the Wayne Newton and Charley Pride Shows, a display of Moon Rocks supplied by NASA at Houston, the Bill Hames Carnival, and a special show for Senior Citizens of the Golden Spread.

The Wayne Newton Show will be staged the opening three days. Charley Pride, who had several sell-out performances at last year's fair, returns for the last three days. Each show will present two performances daily.

All Senior Citizens with Medicare Cards will be admitted free to the Fairgrounds on Thursday, Sept. 23. A free show is set for the Senior Citizens at 1 o'clock that afternoon in Fairpark Col-

daily through the week of the fair. A Shetland Pony show will be held Sunday, Sept. 19, and an open horse show is slated for Sunday, Sept. 21.

Twenty high school bands from across the Panhandle-Plains will join with 14 Amarillo bands to will be slaughtered in 56 days. provide music for the fair's opening day parade at 10 a.m., Monday, Sept. 20.
