Five Aldermen Chosen In Special City Election Here Tues., May 12

A good turnout of city voters was evident here Tuesday when a total of 522 votes were cast in the election to choose five Aldermen to set up the new type of city government and guide city affairs. The five Aldermen elected were Basil Smith, J. G. McAnear, Gene White, Clyde Price, Jr., and Chauncey Hommel. Three from the five will be selected to serve a two year term and two will serve out the remainder of a one year term and will come up for re-election along with the Mayor in April 1965. The new Aldermen will take oath of office at 2 p. m. Monday, May 18th according to a statement released by Mayor C. J. Lohoefer. Total votes for each of the candidates were as follows: Basil Smith, 350; Tack Moreland, 113; Adam Riskey, 33; Otis Naylor, 163; Pete Borden, 128; Gene White, 269; Pete Kunz, 26; Jerry Hawkins, 98; Jim Lumpkin, 62; J. G. McAnear, 330; Clyde Price, Jr., 247; A. R. Henson, 211; Chauncey Hommel, 216. Write-in votes as follows: L. L. Wallace, 1; Joe Goldston, 1; Joe Lovell, 1; Albert Boyd, 1; Richard Tunnell, 2; and C. A. Johnson, 2; which gave a total vote of 522.

Allen Estlack, employee of West Texas Utilities Co., received serious injuries Sunday morning when he fell from a 30 foot utility pole one block north of the Methodist Church. He was attempting to restore power to the area following the downpour of rain a few minutes earlier. He apparently lost his grip on the slick pole while attempting to fasten his safety belt. He struck the ground with his head near the base of the pole missing a concrete curb by only inches and then plummeted onto the brick pavement. He received a severe scalp wound and injury to several discs in his back along with numerous cuts and bruises. He is reported improving as well as could be expected at this time in Adair Hospital here.

Rain Total Beginning To Climb... Some With .20 Saturday and .50 inch Sunday morning added to the .26 on May 1st, the total rainfall for May is beginning to climb here in town with heavier amounts reported from outlying areas. The Hedley area received .90 inch Sunday which gives them a total for the month of 3.35 inches. The Lelia Lake area received from close to an inch to an inch and a half Sunday and the Ashtola and Country Club area better than half an inch.

Charles Reynolds Is Named District Judge

Charles Reynolds has been appointed Judge of the 100th Judicial District by Gov. John Connally. He replaces the late Luther Gribble of Wellington and assumed his duties when sworn in Monday of this week. C. A. Williams, who is the oldest attorney in years of service in the 100th Judicial District swore in the new judge. On January 1, 1965, Reynolds will start the four-year term to which he was elected recently. Upon the death of Judge Gribble, Connally announced that he would appoint the man who was the winner for the office in the Democratic Primary. Reynolds was the winner and he has no Republican opponent.

Mrs. Barney Brown Dies In France

Mrs. Lena Brown, age 72 years, of 410 North Boudry, Weatherford, Texas, passed away in France Friday, May 1, 1964 while visiting her daughter, whose husband is with the armed forces there. Mrs. Brown, wife of the late Barney Brown of Lelia Lake, moved to Weatherford after Mr. Brown's death in 1954. She was a member of the Lelia Lake Baptist Church. JAYCEE FOR MONTH OF APRIL NAMED

Bright Newhouse, employee of the U.S. Soil Conservation Service and who lives on South Bugbee with his wife, Clo Ann, and three lovely children, has been chosen Jaycee of the Month for April. Bright has been a Jaycee for over a year and has proven himself as a leader in many different ways.

Newhouse is now serving as a director of the organization. He was chosen as Jaycee of the Month for his work as chairman of programs presented at weekly meetings. This consisted of having all of the men running for various county offices come and speak to the membership. He also conducted a tour of local ministers over the county to see types of soil conservation. Jaycees were happy to furnish these men their lunch while making the tour. The tour was the conclusion of Soil Stewardship Week sponsored by the U.S. Soil Conservation Service.

AN END OF SCHOOL THOUGHT

The school term 1963-1964 is coming to a close. It is a time when teachers and pupils get

anxious for a change. An old philosopher has very wisely said, "The dull period of life of an event is when it ceases to be history." So on May 22, everyone will be looking forward to this date.

JUNIOR-SENIOR BANQUET AND PROM

Saturday, May 9, at 7:30 p.m., the Junior-Senior Banquet and Prom was held in the school cafeteria. The theme, "Somewhere Over the Rainbow," was artistically carried out. The decorations were done by the Junior Class, their mothers, and the class sponsors.

The menu of filet mignon, baked potato, lima beans, tossed salad, French Bread, cherry tarts, iced tea and coffee was deliciously prepared by the lunchroom staff. Some of the teachers remarked that "the food couldn't have been better."

Our Sophomore Class did a wonderful job serving the tables. The invocation was given by Jack Robinson, and a Welcome Address was presented by Freddie McAnear. A Senior Response was given by Timmy Ray. After this a song was sung by Johnne Clearly called "Ebb Tide." Mrs. Bill Todd gave a word of encouragement to every one. In her speech she called our wonderful Seniors "our gold nuggets at the end of the rainbow."

After this Ella Beth Just sang the theme song and the banquet was over. The banquet tables were cleared away and every one enjoyed the Prom. The music was perfect for this occasion as played by the Swing Kings. Everyone believes this whole affair will never be forgotten, and will especially be remembered by the graduating Seniors of '64.

WHY DO I TEACH

Mr. Barry Clayton The teaching profession is one of the greatest honors that a person can have. One may wonder why I would say "honor." I would say "honor" because it is truly an honor to be entrusted a young life of a student and try to guide and teach that life. It is really thrilling to watch a student grow as one would watch a tender young plant grow. All of the teachers can surely see themselves in the same situations that students are now going through.

Some Seniors tell their fondest remembered moments in Clarendon High School.

Carol McCallum - The Senior Class party out at the Country Club.

Becky Spivey - Becoming a member of the High School Band. Johnnie Shields - The association of all my pals in high school.

Gayla Thompson - Moving to Clarendon and meeting such nice kids.

Melissa Patterson - When I received my State Homemakers Degree of Achievement in Austin.

Theta Jones - Senior skating party at Memphis.

Larry Gray - When I made the All-District team in football. Darlene Shields - The first night the drill team performed. Jeannie Gibbs - The Junior-Senior prom of 1963.

Jerry Taylor - Will be graduation night. Bobby Lewis - My entire Senior year.

Deanna McAnear - When I was salutatorian in the eighth grade.

Clydean Gilbreth - When I received my State Degree in Homemaking and getting to go to the F.H.A. State meeting in Austin.

Pat Green - When I was chosen runner-up as the Area I outstanding F.H.A. girl for 1963.

David McBrayer - When I got All-District player in football in 1963.

T.Rose Stepp - My most remembered moment was when I got installed in the National Honor Society.

Rod Stone - When I won district in the 880 yd. run at the McLean track meet this year.

Maudena Self - The Junior-Senior prom, 1963.

Connie Martin - When I was elected freshman cheerleader.

Wiring of too small a size may be the reason for trouble with farm equipment and home appliances. Low voltage can cause a loss in light output, a loss in heating efficiency, an increase in the energy required by electric motors and an increase in the heating of motor windings.

Trade what you're driving for one of these, and you won't want to trade seats with anybody else on the road.
Spirit—Next, Chevelle. The beautifully in-between size car that combines small car handling oomph with big car comfort. Eleven different models that you can equip with just about any extra-cost option you can imagine. No place to go this summer? Get a new Chevelle—you'll think of something.
Economy—Chevy II—the car that takes to inexpensive vacations naturally. It just goes and goes, and where it stops nobody knows. Eight models to pick from, including wagons with enough room to swallow up an eight-foot Christmas tree. (Plan ahead, we always say.)
Fun—Then there's Corvair. The fun one with the engine in the rear for unbelievable traction. Spring mud, summer sand, winter snow—nothing stops it.
Corvette. The enthusiast's car. Sting Ray Sport Coupe and Convertible. Still America's only true sports cars. They do for your driving what holidays do for kids.
Performance—And with any new Chevrolet you choose, you can pick from a wide range of standard or extra-cost high performance engines.
 Either way, whether you've got some place special to go this summer or not, when you trade for one of Chevrolet's five great highway performers—you'll travel!

story that was supposed to have really happened back in the 30's in his home state of Arkansas. A young fellow stayed all winter with a family helping with the work. Spring came and he was taking off for the grain harvest. The man told him: "You have been lots of help and I want to pay you." The young fellow hadn't expected any pay, but the man insisted. From underneath the bed he rolled out his biggest pumpkin and presented it to him as pay. When he hesitated the farmer urged him to take it along to the store and use it for money. So he wagged it to the country

We drove 3,243 miles to make a point about our Super Turbine transmission

You can do it on the way to the grocery store

Would we drive a Buick with a Super Turbine transmission* all the way from Pasadena to New York City just to win Class C in the Mobil Economy Run? Of course. And just in case anyone failed to get the message, we did it twice again. And won Class D and Class G. In all, Buick entered 4 classes, and won 3—more than any other make of car. (Remember when people used to think Buicks used a lot of gas?) Did we make our point about the Super **Buick Motor Division**

Turbine transmission? You bet. Obviously you aren't planning to drive 3,243 miles to prove your new Buick is economical. And you can't expect to get as many miles per gallon as the experts in the Economy Run. Still, it is nice to know you can win the economy run around town. And the good looks prize at the same time. See your Buick dealer about it. No doubt he'll think of a number of other reasons to drive a Buick. *Optional at extra cost.

PATHFINDER CLUB HAS FINAL MEETING OF YEAR

Pathfinder Club met Friday, May 8, for a buffet luncheon. This was the final meeting of the current club year. Members and guests were seated at seven quartet tables. Each table was covered in linen and centered with rosebuds. The buffet table was marked by a lovely arrangement of pink and white peonies.

Miss Mable Mongole gave the invocation. Mrs. R. S. Brumley, accompanied by Mrs. Frank Phelan, Jr., pianist, sang two solos: "Out Where The West Begins," and "Bless You." Theme of the program was "When Good Friends Get Together." Mrs. John Bass, president, told of the new air conditioning installed and the contributions by the club members to help defray expenses. She also reported on the amount needed to complete payment.

Attending were two guests: Mrs. Marshall of Canyon and Mrs. Harry Brumley; also members: Misses Ruth Richerson and Mabel Mongole; Mesdames Heckle Stark, Joe Goldston, H. T. Burton, L. N. Cox, C. G. Stricklin, S. W. Lowe, W. H. Cooke, III, T. M. Caldwell, Jr., Frank Phelan, Jr., Bill Lowe, Wm. S. Greene, Morris Ledger, Glenn White, R. S. Brumley, George Benson, C. T. McMurtry, Stina Cain, S. W. Lowe, K. H. Adams, John Bass, C. E. Bairfield, Fred Buntin, J. H. Howze, A. T. Cole, and Walter Lowe.

Hostesses were Mrs. Heckle Stark, Mrs. Joe Goldston, Mrs. H. T. Burton, and Miss Ruth Richerson. —Rep.

Advise Careful Use Of Herbicides

Herbicides can be useful tools for controlling weeds if they are properly applied. But Donley County Agent Flip Breedlove warns that improper application can cause crop damage and lawsuits from neighbors.

To get satisfactory results from herbicides, Breedlove says to follow the directions on the label as approved by the U.S. Department of Agriculture.

"These directions should be followed exactly," he said.

To avoid chemical drift onto susceptible broadleaf plants, Breedlove says to make application only when wind velocity is below 10 m.p.h. He urges all herbicide users to have some type of wind gauge in the field so they can know when conditions become dangerous.

Low volatile or amine salt formulations are safest, Breedlove said. They do not vaporize and drift as much as the high volatile formulations.

The county agent gave these three rules for applying herbicides:

1. Use chemicals only on crops for which they are recommended.
2. Use only the quantity called for on the label.
3. Apply the chemicals only at level recommended on the label.

In Donley County, farmers must obtain an application permit from the State Department of Agriculture, Austin, Texas,

for applying any herbicide on plots of 10 acres or more. On smaller plots, the operator must notify the same office of his intent to spray before making application.

Texas A&M University specialists report that the greatest problems with herbicides are occurring where inexperienced operators are making application. They suggest that even on extremely small plots, great care be taken when applying chemicals.

Plant Grain Sorghum Early To Beat Midge

Plant grain sorghum early and beat the midge. This tiny insect has greatly reduced grain sorghum yields on many Plains farms for the past four years. Estimates of yield reduction in late-planted grain sorghum in 1963 ranged from 0 to 100%, reports County Agent Flip Breedlove.

Greatest yield losses consistently occur in sorghum which blooms after the first week in August. Getting the seed in the ground early is the best insurance against midge damage.

The sorghum midge did not cut yields of grain sorghum hybrids planted on or before May 15, according to research data from Shelby Newman, Agronomist, South Plains Research and Extension Center, Lubbock. But when planting dates were delayed past June 1, significant and usually severe yield reductions

resulted.

Bloom dates for the three year test period revealed grain sorghum blooming after the first week in August was subject to midge populations large enough to cut yields. Grain sorghum hybrids planted after June 1 bloom after the first week in August. Newman also emphasized that should periods of extended cold, wet weather prevail, growth of grain sorghum planted as late as June 1 could be slowed and might bloom after the second week in August. In short, getting the seed in the ground by May 15 is considered best. If not possible, don't delay planting past June 1.

Peace Officers Convene At Boys Ranch Thurs.

Hundreds of Peace Officers from the Tri-State area attended the Annual Convention of the United Peace Officers of America at Cal Farley's Boys Ranch, 36 miles northwest of Amarillo on Thursday, May 7th.

Organized in 1954, this Organization has helped the boys in many ways, first by their untiring efforts in the construction of a 12 grade accredited school, then a dormitory. Now their project is to help provide for additional school facilities in memory of the fine man who was responsible for the Peace Officers Organization inception, the late Sheriff Gene Collins of Chaning.

Over 300 boys from four to 18 are living at the Ranch today. They enjoyed the barbecue provided by the Peace Officers and their friends and also enjoyed the fine program of entertainment including singing groups, a comedian, and a shooting exhibition.

Sheriff Lowell Sharp of Hereford is the present President of the association.

Mrs. Ruth Wheat of McKinney and Mrs. Fred Adkins of Tucumcari, N.M., are visiting this week with their sister, Mrs. Roy Beverly.

Mr. and Mrs. Jerry Allen of Tulla spent the week end with home folks.

BEEF STANDS AT TOP OF MAY PLENTIFUL FOODS

COLLEGE STATION—"Flow-ers that bloom in the spring, tra-la" are being joined by an abundance of beef for tasty menu attractions.

Beef heads the list of May plentiful foods, reports the Texas Agricultural Extension Service. The five-item list also points to huge supplies of turkeys, canned ripe olives, salad oils, milk and all dairy foods.

All cuts and grades of beef will be plentiful all month, as the cattle inventory on farms stands at the peak of a six-year buildup. Beef output the first two months of this year was nine percent higher than a year earlier.

So watch for special values in beef as retailers provide attractive displays and prices. May will be an excellent time to serve beef often and generously. The Service suggests starting the outdoor barbecue season with beef.

Spring salads will be enhanced by generous use of salad oils, dressings and canned ripe olives. Supplies are huge.

Count on turkeys, too, to provide the light touch to spring days. Marketings in May will run about one-fourth greater than a year ago. March storage holdings were up 12 million pounds.

Milk and all the delicious dairy foods will be abundant as production reaches toward its early-summer peak. In January and February, milk output ran slightly higher than a year earlier.

USDA's Agricultural Marketing Service compiles the list of monthly plentiful foods as a guide for consumer buying. Items listed usually are available in a wide choice of quality at attractive prices.

Mr. and Mrs. Chuck Cosper and family of Canadian visited the week end with her parents, Mr. and Mrs. F. O. Hodge.

Mr. and Mrs. F. O. Hodge went to Canadian Friday night and Mrs. Hodge attended a mother-daughter tea with her daughter, Mrs. Chuck Cosper.

SPECIAL GRADUATION GIFT WRAPPING

AUSTIN — Official date for casting your vote for president of the United States is November 3. But the only way to be certain you had some say in who is elected president next fall was to be one of the 10 percent in each political party to participate in a precinct convention.

These conventions in the state's 6,000 voting precincts were held on Saturday (May 2). They are usually held at 2 p.m. in rural areas and 8 p.m. in cities.

To take part in a precinct convention, you must first become a "qualified member" of a party by voting in the primary Saturday. The election judge will stamp "Republican" or "Democrat" on your poll tax receipt. This qualifies you to attend the precinct convention.

There, a delegate for each 25 votes cast in the precinct for your party's 1962 candidate for governor will be elected to the May 9 county convention.

At that convention, county delegates to state conventions to be held on June 16 and September 15 will be elected. Meeting in June will select and instruct delegates to the national conventions. Also, at that time, candidates for presidential elector will be selected.

September meeting will write a party platform and select state executive committee which runs your party's affairs between conventions.

To put it briefly: When you go to a precinct convention you elect the county delegate, who elects the state delegate, who elects the presidential elector, who then elects the president.

SOUTH TEXAS SCHOOL SLATED — Raymond W. Vowell, executive director of the Board for State Hospitals and Special Schools, predicts that the Corpus Christi State School for the mentally retarded will open late in 1967.

Board accepted the gift of a deed to a 200-acre school site in Corpus Christi this week. Vowell said the Legislature will be asked for construction funds when it meets next January.

ANIMAL HEALTH — Members of the Texas Animal Health Commission will tour border inspection stations at El Paso, Del Rio, Laredo and Brownsville and visit the sterile screwworm fly factory at Mission this week end.

The flying tour was originated by the commission's executive director, Dr. R. G. Garrett, who felt that anyone representing animal health interests for the state should become well-acquainted with the fever tick problem at the border, and understand the screwworm eradication program by seeing its operation first hand.

SOIL CONSERVATION DISTRICT NEWS

Deferred Grazing
Deferred grazing consists of postponement of grazing in order to allow newly planted grasses to become established or to allow old stands to recuperate from overuse.

The physiology of a plant requires a maximum of green material to develop a deep, durable root system. The first year after seeding there should be absolutely no grazing, even if the top growth appears to be robust enough to graze.

Grazing the first growing season before the roots have adequately developed, will almost always insure winter-killing.

Most of the smaller grasses will be more tolerant to grazing than the larger ones, but it seems apparent that more actual forage

can be obtained from larger species under most conditions when handled properly.

Our S.C.S. standards require deferment one growing season following reseeding. This should, under normal conditions, allow the needed time for root establishment. Deferment following brush spraying should be practiced to allow the rangeland to regain its potential production.

You can usually determine natural seeding potential by observing adjacent fields that have been sprayed and determining the percent of species of plants present after one or two years deferment.

Also, in areas of sparse brush large clumps of bluestems or other native species may be seen. This would indicate that a natural seed source would be present and spraying the brush would release the grass and in one or two growing seasons the grass would be thick and well established.

Deferment may also be practiced through a rotation system. Rotation may be arranged so that each pasture will be deferred completely one out of every three or four years. This will help insure more production from your cattle and a more stable grass cover.

Your Donley County S.C.D. advocates the use of deferred grazing as a part of your overall management. Your local S.C.S. office may be helpful in any information concerning deferment and its application.

Conservation Cropping System
Good cropping systems are grown in a combination with needed cultural and management measures. They include the use of rotations that contain grasses and legumes, as well as sequences in which the desired benefits are achieved without the use of such crops.

The purpose of a good cropping system should meet the needs of the soil during critical periods when erosion usually occurs. It should aid in the control of weeds, insects and diseases, and fulfill the needs of the farmer for an economic return.

A good cropping system requires the minimum amount of soil improving crops in rotation,

the minimum amount of high residue crops in the rotation period, and the minimum amount of cover crops in the rotation period.

The management of crops, tillage, residues, cover, and their fertility assure the crops in the system doing a good conservation job.

The Donley County Soil Conservation Service will furnish the farmer any needed information on a good conservation cropping system.

VISITS JERICHO FRIENDS

Gordon Minkler, lawyer from Detroit, Michigan, visited friend in Jericho Community Thursday May 30th. Mr. Minkler, son of the late Mr. and Mrs. William Minkler, lived in Jericho 5 years ago and enjoyed visiting the community for the first time since.

Largest known land animal is a 12-ton, 13-foot-2-inch tall elephant bagged in Africa by J. J. Fenykovi.

Also, in areas of sparse brush large clumps of bluestems or other native species may be seen. This would indicate that a natural seed source would be present and spraying the brush would release the grass and in one or two growing seasons the grass would be thick and well established.

Deferment may also be practiced through a rotation system. Rotation may be arranged so that each pasture will be deferred completely one out of every three or four years. This will help insure more production from your cattle and a more stable grass cover.

Your Donley County S.C.D. advocates the use of deferred grazing as a part of your overall management. Your local S.C.S. office may be helpful in any information concerning deferment and its application.

Conservation Cropping System
Good cropping systems are grown in a combination with needed cultural and management measures. They include the use of rotations that contain grasses and legumes, as well as sequences in which the desired benefits are achieved without the use of such crops.

The purpose of a good cropping system should meet the needs of the soil during critical periods when erosion usually occurs. It should aid in the control of weeds, insects and diseases, and fulfill the needs of the farmer for an economic return.

A good cropping system requires the minimum amount of soil improving crops in rotation,

can be obtained from larger species under most conditions when handled properly.

Our S.C.S. standards require deferment one growing season following reseeding. This should, under normal conditions, allow the needed time for root establishment. Deferment following brush spraying should be practiced to allow the rangeland to regain its potential production.

You can usually determine natural seeding potential by observing adjacent fields that have been sprayed and determining the percent of species of plants present after one or two years deferment.

YOUR PLYMOUTH DEALER IS HAVING A RED HOT SUCCESS SALE NOW

ON THE TEST TRACK CHAMP

Recently a showroom Plymouth, equipped with a standard V-8, beat Ford and Chevrolet in ten out of ten tests at Sebring, Florida. Tests of performance, handling, braking and gas economy. Tests of the "things you buy a car for."

Now your Plymouth Dealer is having a "success sale" on the same model Plymouth (and other models, of course). He's dealing like it was midsummer. And right now trade-ins are worth more too. Get up and go see your Plymouth Dealer.

At Plymouth's request, Nationwide Consumer Testing Institute bought the comparably equipped V-8s directly from dealer showrooms, made the runs and supervised the entire competition. See your Plymouth Dealer for details of "Test Track, U.S.A."

THANKS VOTERS

I wish to extend my appreciation to the voters and friends of Donley County who supported me in the Democratic Primary election May 2 for the office of County School Superintendent. Ruth M. Richerson County School Supt.

MCCORD THANKS VOTERS

I wish to thank all the voters who supported me in the city election. Your vote of consideration was appreciated. Lloyd McCord

Those who had Mothers' Day dinner with the Paul McCarty's were Mr. Overt King and daughter, Carol, from Amarillo; also son, Richard McCarty, bookkeeper and truck foreman for the Producers Grain Corporation of Amarillo.

have an interest in the wheat.

The voluntary wheat program offers diversion payments, price support loans for the entire production, and marketing certificates based on the normal production of wheat. The value of the certificates will be issued at the county office.

All the wheat produced on your farm is eligible for loan if it is within the 1964 allotment. You do not have to participate in the program to be eligible for price support.

Cotton Export Program

The new cotton law permits cotton producers to plant a limited acreage of cotton for export in addition to the effective farm allotments. For 1964, the export acreage has been set at 5 percent of the effective farm allotment.

Growers who want to grow export acreage will have to do the following:

1. Apply at the ASCS County Office for the export acreage not later than June 1, 1964.
2. Provide a bond within 15 days guaranteeing that the amount of cotton represented by the 1964 farm average yield times the farm export acreage will be exported without the aid of any Federal programs. The export bond of the producer will be released by the ASC County Committee upon presentation of evidence by the grower that the cotton has been exported.

BORDEN THANKS VOTERS

I wish to thank all those who voted for me and gave their support in the city election. Your consideration was sincerely appreciated. Pete Borden
