

Mark Winsor home from hospital

Firefighter Mark Winsor, who was badly burned on New Year's Eve when the gas tank on a truck loaded with cotton bales exploded, was released from Northwest Texas Hospital on Tuesday morning, January 11. He will remain at home and will undergo several days of physical therapy at Clarendon College, under the supervision of local EMS personnel. It is not known when he will be able to resume his duties as manager of Lone Star Gas Co. but hopefully it will not be too

much longer. He is progressing in his recovery very well although a couple of areas which were burned more badly are slower to regenerate than the others. Chief Delbert Robertson has been daily outpatient at Northwest Texas Hospital since the accident and is due to be released from treatment this week. He too, is progressing very well. Firefighter Bobby Hogard, who received burns when the explosion occurred and burned his hands while trying to extinguish Winsor's

clothing, was an outpatient for a couple of days but has been released by the Doctors. He has been undergoing daily burn dressings since the accident and is healing quite well. Firefighter Ernie Johnston, also burned in the accident has recovered quite well. Debbie Davenport, RN who lives in Clarendon and works at Northwest Texas Hospital has been treating the injured firemen at home in order to save them several trips to the hospital in Amarillo. She is an experienced burn nurse, having worked for an extended period of time in the burn unit at Parkland Hospital in Dallas.

Contact Katie Dvorak, 874-3639 for further information. There will be more in the paper the first part of February, so watch for it!

Clarendon Youth Baseball Program

On December 14, 1982, a meeting of all interested persons in the Clarendon Youth Baseball Program (Little League) was held at Clarendon College Room 103 at 7:30 p.m. The meeting was conducted by Steve Smith, the new District President of High Plains East Baseball Association. The following officers were elect-

ed for the Clarendon Baseball Program: President, Barry Phillips; Vice President, Tom Harguess; Arbitration Board, Jerry May, Jerry Gage & Jim Sharrar; Umpire & Chief, Johnny Bill Hermesmeier; Concession Stand Chairman, Venita Sharrar; Girl's Softball Chairman, Paulette Kidd. Those present and voting were as follows: Mr. and Mrs. Jerry May, Mr. & Mrs. Pat Roberson, Mr. & Mrs. Barry Phillips, Mr. & Mrs. Tom Harguess, Jim Lampier, Bob Hayworth, George Howard, Johnny Bill Hermesmeier and Junior Putman.

Ashtola Volleyball Tournney

Ashtola Community Center will sponsor a volleyball tournament Feb. 10, 11 and 12 at the old college gym across the street from the Clarendon High School. Men, Women and mixed teams will have brackets. Contact Delene Graham at 874-2010 or Connie Havens at 2455 for further information. Get your teams together and have fun!

The Lions Tale

By GENE ALDERSON

The Clarendon Lions Club held its regular meeting at noon on Tuesday at the Lions Hall. There were 23 members, Lion Sweetheart Jessie Adams and 2 guests present. Following a delicious meal of steak and gravy and trimmings. Boss Lion Bivens called the meeting to order. Following singing led by Lion Billy Ray Johnston, the Pledge of Allegiance, and prayer by Dan Bentley, Lion Tamer Messer introduced Denny Fuston of Clarendon who is with the A.S.C.S. office here. He was the guest of Lion Homer Estlack. Following several announcements, Lion Sorelle introduced Jerry Hawkins who is with the Ag. Dept. at Clarendon College. Jerry brought us up to date on the Ag Program at the college. Following this enjoyable and informative program, the meeting was adjourned.

HOT TIPS ON HEATING

A Public Service From INTERTHERM Inc. Walk Around Warmth No matter the geographic locale, there are those dark wintry days when the house just seems chilly. Setting the thermostat at a higher temperature is wasteful, expensive and really does not

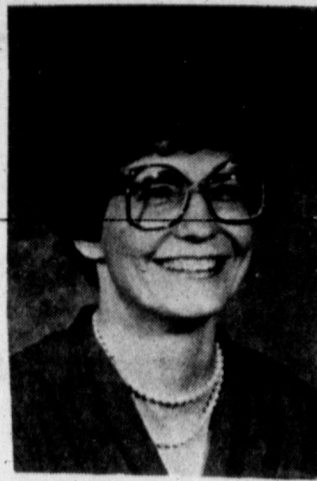

Burglary occurs every two minutes in Texas, leaving behind losses that cannot be replaced. In Texas, burglary rings account for 245 million dollars worth of stolen goods annually, an average loss of 966 dollars per home. Crime prevention is one answer to this growing problem. The simple act of locking one's home before leaving, reduces the chances of burglary by 20-percent. Asking your neighbor to pick up your newspaper when you are away from home and turning household lights on at intervals, can deter a prospective burglar. The Texas Crime Stoppers Advisory Council is doing its part to see that those criminals who make their living by stealing from others are put where they belong — behind bars.

I will treat selected cases of crooked teeth in children when I return to my office on January 17th.

Beth Walker passes Professional Legal Secretary examination

BETH WALKER

The National Association of Legal Secretaries (International) has recently notified Beth Walker, employed by Lowe & Courtney, attorneys, in Clarendon, Texas, that she has successfully passed the Professional Legal Secretary Examination which she took in October, 1982. Only 6 out of 50 Texans who sat for the examination in October passed--2 from San Antonio and 1 each from Dallas, Houston, Dalhart, and Clarendon. Some of the examinees were retakes. There are approximately ten percent of the applicants who pass the examination the first time it is taken.

Mrs. Walker is now entitled to use the designation of PLS following her name, indicating that she is a certified Professional Legal Secretary. There are only 169 certified Professional Legal Secretaries in the state of Texas and 1,362 in the United States and Canada. The Professional Legal Secretary Examination is a comprehensive two-day examination which determines whether a secretary is qualified to do work which

may be required in any size law office in the nation. The examination is composed of the following seven parts: written communication skills and knowledge; human relations and ethics; legal secretarial accounting; legal terminology, techniques and procedures; exercise of judgement; and legal secretarial skills. Only persons who have had five years' experience as a legal secretary and who meet the other requirements of the Board for the Professional Legal Secretary Program may take the examination. It is given twice a year at a designated testing centers, normally at colleges and universities,

and is prepared by a committee composed of educators from leading universities, practicing attorneys and experienced legal secretaries. Within three years of the initial examination, an applicant may retake the part or parts failed (provided at least two parts are passed initially). All failed parts must be retaken at one time, and if an applicant must retake the entire examination. Because

of the difficulty and comprehensiveness of the examination, some colleges and universities now give college credit for passing the examination.

Mrs. Walker is an active member of the Amarillo Legal Secretaries and National Association of Legal Secretaries (International). She has served in every office on the local level, and was president twice of the Amarillo association. On the state level, Mrs. Walker is presently recording secretary and has served previously as treasurer for two years. She also has been the state legal education chairman, bylaws chairman, and Texas Liaison with Legal Directories Publishing Company. She has recently revised and re-written a chapter in the Texas Law Office Handbook to be published by Bancroft-Whitney Publishing Company.

The Texas Association of Legal Secretaries has honored Mrs. Walker twice during her membership by selecting her to receive the only two awards presented by the state association. In 1976, she was honored as Texas Legal Secretary of the Year, and in 1981, she was selected as the TALS Officer of the Year.

Mrs. Walker is also a charter member of the newly created Legal Assistants Division of the State Bar of Texas. She is the membership chairman for District 7 of the Legal Assistants Division and has the responsibility of approving for membership those persons from the Panhandle area who apply for membership in the Division.

Besides her professional activities as a state officer, Mrs. Walker also participates in many legal education seminars over the state as a speaker. Her next seminar speaking engagement will be at Hereford, Texas, January 22, 1983. She is also a participant in area high school Career Clinics and will be speaking at Pampa High School in March.

Annual Hedley Volleyball Tournney To Begin

Once again, the Hedley LIONESS Club will host it's annual volley ball tournament at the Hedley High Gym. Plans are in the works to host the tournney in the latter part of February or the first weekend in March. Watch the paper for more news.

Get your sponsors lined up, organize your teams, practice a few rounds and get in shape to compete for one of the many trophies to be awarded. We have some good men and women teammates out there just looking for a team to play og, so get your net, your ball and

Final Tax payments due soon

Taxpayers who did not have enough 1982 federal tax withheld, or whose amended income estimates for 1982 changed substantially during the last quarter, are required to pay the final installment of estimated income tax by January 17, 1983, the Internal Revenue Service says. The IRS notes that there is an exception to this rule for the final installment for those taxpayers who file their returns and pay all taxes due by February 1, 1983. This exception applies whether

the declaration is an original or amended one. Generally, taxpayers must file estimated tax if their tax is expected to be \$200 or more and if they have more than \$500 in income not covered by withholding. For additional information, a free copy of IRS Publication 505, Tax Withholding and Estimated Tax, can be ordered by calling the IRS number listed in the local telephone directory under U.S. Government.

HEAT'S ON

BY KATIE DVORAK

Girl Scout Cookie Time!
Yes indeedie, where oh where does the time fly? That is a question the Girl Scout leaders are asking just now as they pull gobs of hair from their heads.

Well, let's help our girls out and buy lots of cookies so they can get the good things in store for them. And, to make it easier to buy lots of cookies, here are some cookie recipes!

**HEAVENLY DELIGHT
FRUIT CUP**

1 can fruit pie filling
1/4 tsp grated lemon rind
1/4 tsp cinnamon
1/4 stick oleo
1/4 C cool water
2 tsp cornstarch
1 recipe cookie crunch topping

Blend cornstarch and water until smooth. Set aside. Combine all other ingredients in top of double boiler, stirring well. After oleo is melted, add cornstarch. Stir until mix thickens, remove from heat. Place fruit mix into individual baking cups and top with cookie crunch topping. Bake 350 for 12-15 min.

**COOKIE CRUNCH
TOPPING**

10 little brownie vanilla sandwich cream cookies
1/2 stick oleo

Crush cookie on wax paper with rolling pin. Place crumbs into a bowl and cut oleo into them with fork or pastry blender until well mixed.

LIGHTER THAN AIR PIE

1 pkg (3 oz) cream cheese
1 TBS sugar
1/2 C milk
1-1/3 C coconut
8 oz Cool Whip
1/2 tsp almond extract
8 or 9" crumb crust made with Trefoil cookies crushed

Beat cream cheese until softened in mixer bowl of electric mixer; beat in sugar. Gradually add milk and beat until smooth. Fold in coconut, whipped topping and extract. Spoon into crust. Freeze till firm, garnish with toasted coconut and maraschino cherries. Let stand

room temp. 15 min. before cutting. Store leftover in freezer.

FUDGE MINT LOGS

1 1/2 C whipping cream
1/4 C powdered sugar
1/4 tsp vanilla extract
20 little brownie chocolate mint cookies

Beat together cream sugar and vanilla until stiff, spread about 1 TBS of whipped cream mix on each mint cookie, put together in stacks of 4 or 5. Chill 15 minutes.

Lay stacks on edge of plate or cookie sheet to make on long roll. Frost outside of roll with remaining whipped cream mix. Freeze three hours. Cut roll diagonally at 45 degree angle.

KOOKIE COOKIES

1 pkg milk chocolate drops.
1 box little brownie samoa cookies, coarsely chopped
1 C salted cashews or other nuts

1 C mini marshmallows
24 caramils cut in fourths
Melt chocolate in double boiler. Stir until smooth and creamy. Remove from heat. Gradually add remaining ingredients; mix well. Drop by spoonfuls on wax paper covered cookie sheet. Garnish with multi-colored decorated or coconut flakes. Chill until firm in freezer.

BANANA PUDDING

In deep dish, place layer of little brownie trefoil cookies. Do not crumble the cookies. Stand a layer on edge around the side of dish. On first layer of cookies, place a layer of sliced bananas and so on until you have the desired quantity. Pour over this banana pudding mix prepared on package or this custard:

Beat 3 eggs yolks slightly. Add 1/2 C sugar, 1/8 tsp salt, 1 tsp corn starch, 2 C scalded milk. Place in double boiler and cook until thick.

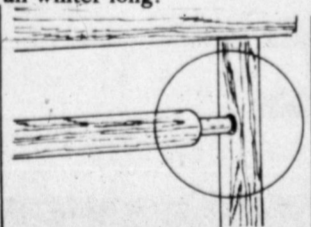

Top with meringue-beat 3 egg whites with 4 TBS sugar until stiff, spread over dish and bake in slow over 15-20 minutes.

**MICROWAVE TOFFEE
BARS**

22 trefoil cookies arranged in

work so well to cool you off in the summer time. When the dry air sucks the moisture out of you and cools you off, you turn up the thermostat to create more heat which, in turn, creates more dry air and the vicious cycle continues.

Most heated homes without a humidifier have an average relative humidity of about 13% compared with the recommended 30-35%. You may see the advantage of purchasing a humidifier rather than turning the thermostat up and up and paying higher bills and waging the war of the thermostat all winter long.

FURNISHINGS BECOME BRITTLE AND JOINTS SEPARATE

Before selecting a humidifier, check for capacity, control, operational efficiency, ease of maintenance and ease of installation. Some can be attached to your central heating and cooling system, some sit around the room looking like clothes hampers, but either way, they are a money saver and, possibly, a marriage saver.

Perhaps you've noticed other clues to low humidity in your home. Have your kitchen chairs begun to fall apart at the glued joints? Is the plaster falling off of your walls and ceilings in hunks? Do you give yourself a static electric shock everytime you touch anything? Does your throat feel like you've been sniffing cotton bales in a raging sandstorm? Do you have dandruff of the legs, arms, derrier? If you can answer yes to any of these, you can be assured that you have low humidity!

For your copy of an informative booklet on relative humidity in the home and how to choose a humidifier, call toll free: 1-800-356-9652.

bottom of 12X8X2 microwave safe dish
1/2 C oleo
1/2 C brown sugar packed on high 2 minutes in 1 qt dish. Stir well.

1/2 C powdered sugar
1 TBS cornstarch
1/4 tsp salt
1 C coconut
1/2 C chopped nuts
Blend into oleo and spread over cookies 1 C semisweet chocolate pieces.

Sprinkle chocolate pieces over top. Microwave at high 2 to 2 1/2 minutes. Let stand a few minutes then spread over bars. Cool before cutting.

LEMON SQUARES

1 can condensed milk
1/2 C lemon juice
1 tsp grated lemon rind

In small mixing bowl stir together until thick and smooth. Set aside. 1 1/2 C trefoil cookie crumbs

Mix together crumbs, sugar and butter, place in 8" square dish reserving 1/3 of mix. Add milk mix and spread evenly. Sprinkle remaining crumb mix on top and pat gently.

Microwave at high 8 to 10 minutes, rotating dish 1/4 turn after 4 minutes. Cut in small squares as cookies or in larger pieces as dessert.

CONGRESS WANTS A PIECE OF YOUR SAVINGS.

WHAT THEY NEED IS A PIECE OF YOUR MIND.

Recently, Congress quietly passed a withholding law that will cost American savers and investors the use of 10% of their interest and dividends.

In simple terms, effective July 1st, 1983, this new law requires banks and other financial institutions to deduct 10% of the interest or dividends you earn on your savings and investments. That money then goes to the Internal Revenue Service in much the same way as payroll deductions are now handled.

The sponsors of this law have told us it was designed to catch a small minority of Americans who evade taxes on their interest and dividends. But the truth is the law penalizes the great majority of America's savers and investors who pay their taxes faithfully. What's more, the federal government is now receiving all the necessary information to curtail tax cheating.

Though the law does include exemptions for some low income and elderly Americans, if they go through the red tape of filing an application, most savers and investors will forfeit some of the money they could earn in compounded interest.

We urge you to join our efforts by writing letters to your representative in Congress and to the two senators from this state. Tell them you want the 10% withholding tax repealed, because it would impose an unfair penalty on savers like yourself.

For assistance in contacting your representative and senators please ask any of our bankers. If we all act now, Congress will get a clear message from the voters back home, and they will work to repeal this needless law.

Humidity Warms Wintertime Homes

BY KATIE DVORAK

If you try to conserve energy this winter by lowering your thermostat, but everyone complains about being chilly, then maybe your home has a humidity problem. I think that it is an irrevocable law of nature that a man and woman wed to one another must have a different thermostat built into their system. Invariably, if I am hot, hubby is cold. In the winter time, our thermostat gets more use than a shower in a football locker room. He wears sweaters and bundles up in afghans while I wear a pained expression and a T-shirt.

The problem could be solved if the humidity in our home were adjusted to the temperature. A recommended room temperature of 68 degrees can be comfortable if the indoor relative humidity is maintained.

The "relative humidity" isn't someone who comes to live with you by marriage, but it means the amount of moisture actually present in the air, compared to the maximum amount it can hold at that temperature. Relative humidity of 50% means that the air is only half-saturated.

Dry air sucks the humidity out of your skin, making you feel cool. That's why fans

Farmers facing another poor year

Agriculture is at a crossroads due to large supplies and low prices, and farmers have few options to improve their situations in 1983. "Just how long farmers can hang on financially is the big question," says Dr. Carl Anderson, economist with the Texas Agricultural Extension Service, Texas A&M University System. "Right now many are scraping the bottom of the barrel as far as their financial resources are concerned—thanks to three consecutive years of poor prices. And they can't last much longer. Only those who are virtually debt-free will be able to make it." Returns to assets of debt-free farmers will average in the range of minus 3 to minus 7 percent in 1982, says Anderson, while returns to farmers with a heavy debt load will be a negative 14 to 18 percent. "With that kind

of figures, it's easy to see that farmers must depend less on debt financing," he adds. Farmers generally are victims of overproduction in recent years coupled with a major slowdown in farm exports and domestic demand. This has led to growing stockpiles of most crops. Present farm programs designed to reduce these stockpiles have been a flop, points out Anderson. So farmers and farm policymakers must soon decide whether or not to do something about the increasingly critical farm dilemma. "Among options are mandatory production control and possible marketing quotas to bring supplies in line with effective demand," notes the economist. "Strong supply management likely will improve current low farm income in a couple

of years. With voluntary programs, it will take much longer." Regarding the dilemma of farmers, Anderson offers a number of observations: 1. For 1982 net U.S. farm income is projected at \$19 billion, down from \$25 billion in 1981. Cash receipts will be about equal to farm expenditures this year, so virtually all net income will come from government payments and non-money income. Income could improve some in 1983 depending on what direction farm programs take: 2. Farmland markets are expected to remain sluggish. In some areas of the U.S. and Texas, land prices likely will decline. 3. Farm exports are facing major setbacks. No noticeable progress has been made in trade negotiations with major U.S. foreign market

countries such as the European Common Market, Japan, Mainland China or Russia. When economic conditions are bad, countries want to export more and import less. A big setback to Texas cotton growers is that China intends to grow more cotton and import less from the U.S. 4. Although credit is available, farmers have difficulty in qualifying unless they still have adequate collateral. Debt restructuring will continue. Loan delinquencies, foreclosures and bankruptcies will be up although lenders seldom benefit from liquidating a borrower.

Martin Quilting Club

December 16, 1982, the Martin Quilters met at the home of Priscilla Green for

Dixie Ward's quilting and for our Christmas party. Members present—besides the hostesses were: Mary Lee Noble, Flossie Reynolds, Ann Bunyan, Carmen Wright, Hazel Edens, Ruth Mandrofsky, Melba Risley, Eloise Ashcraft, and Jondel Moffett. Guests attending were: Lana Moffett, Ronnie Ward, Larry Green, and Fred Mandrofsky. One quilt was completed and a lovely lunch was enjoyed by all. The gift exchange was fun and all are looking forward to 1983 quilting. January 6, 1983, the Martin Quilters met at Melba Risley's home to start a quilt for her. Those members attending were: our hostess, Melba, Ruth Mandrofsky, Mary Lee Noble, Flossie Reynolds, Ann Bunyan, Dixie Ward, and Jondel Moffett. Guests who came were: Mary Jane Smith, and Lana and Brendan Moffett. Our next meeting will be on January 20th at Memphis at Patti Wolfcale's home. Let's all come if we can!

Save Energy and water in home laundry

Assure proper cleaning in shorter cycles by pre-treating or soaking heavily soiled

clothes. Use the correct amount of laundry detergent for the load size.

High energy and water prices can be cut considerably by some simple conservation practices in home laundry. The water heater should be set no higher than 140 degrees Fahrenheit. Normally soiled clothes will wash nicely in warm rather than hot water. A cold rinse is just as effective as a warm one, and can save energy. Conserve water by setting the water level to match the load size. Wash time can be shortened and energy saved by using soak cycles. Water and energy savings can be achieved by combining small loads. Do not overload the machine, however, because this can result in wrinkling, lint or cleaning problems, and can cause other damage to your clothing.

In honor of the Fiftieth Wedding Anniversary of Mr. and Mrs. Lonnie Taylor, their son, Tommy Taylor of Odessa, and daughter, Carolyn McKinzie of Brownfield and Linda Floyd of Iran, request the pleasure of their relatives and friends at a Reception, Saturday, the fifteenth of January, 1983, from 2:00-4:00 in the afternoon at the Clarendon Community Building.

Howardwick Fire Department reports recent fires

Howardwick has recently been plagued with a rash of fires caused, in most part, by the freezing of LP-gas regulators. Howardwick is not on natural gas and must depend on LP gas or all electric means to heat and cool their homes. When LP gas regulator freezes, problems occur.

Howardwick has a fire department which has reported two mobile homes destroyed recently and the cause of the fire reported to be related to the LP-gas.

Fire Chief Stoney Craft said that a home was miraculously saved from the November 27 fire and one mobile home was destroyed by fire just a month later. "In each case there was unprotected regulators on LP gas tanks and icy cold weather," he reports.

John Nazworth is the city fire marshal and the assistant fire chief is O.A. Sturdevant in Howardwick. If you have a fire to report, call 874-2222 or 874-2087 or 874-2634 or 874-3339 or 874-3417. These numbers are on the emergency page of the telephone book.

Howardwick has a very conscientious and increasingly efficient and well equipped volunteer fire department. "Our firemen give of their time and effort freely and gladly," Fire Chief Craft said. "We have two tank fire trucks, one 3/4 ton pickup with a 500 gallon tank and one 2 1/2 ton pickup with a 1000 gallon tank. We have purchased a pumper fire truck with a 750 gallon tank which will be in service very soon."

The following will help you make your LP gas regulator safe. Read it and follow the suggestions to help prevent fires to your own home and possibly the loss of your neighbors as well.

A combination of freezing weather and improperly positioned regulators on home propane and butane tanks has caused five building fires in the last month and prompted the Railroad Commission's Liquefied Petroleum Gas Division to issue a warning to both LP-gas users and dealers.

Regulators control the flow of the propane of butane from the storage tank to the appliances in a home, stepping down pressures of 200 pounds per square inch to a few ounces. Each regulator has a small vent opening which must be protected from dust, dirt, insects, rain, or snow.

If the regulator is not covered or protected, rain may collect in the vent opening and later freeze when the weather turns cold. Freezing rain, sleet or snow can also block the vent. When the moisture freezes, it can disable the regulator, allowing the full 200 pounds of pressure from the tank to shoot to appliances in the home.

A normal 3/4 inch blue flame can suddenly become a roaring two-to-three foot torch, igniting walls, ceiling, or anything nearby.

That's exactly what happened in the five building fires recently reported to the

Rewards, bonuses are taxable income

Taxpayers who were fortunate enough to earn awards or bonuses this year are being reminded by IRS that these amounts should be included as income on their 1982 federal income tax returns.

The IRS says rewards and bonuses include prizes such as a paid vacation trip awarded for attaining sales goals. If the prize or award is in the form of goods or services, its fair market value is the amount the taxpayer must include as income.

If the employer pays the bonus of award at a future time, it is not taxable until it is received by the employee, the IRS says.

If an employer distributes holiday remembrances such as turkeys, hams, or other items of nominal worth, the value of these gifts is not taxable. However, if cash, gift certificates or similar items that may be easily exchanged for cash are given, the value of the gifts is taxable.

Further information is detailed in Publication 525, "Taxable and Nontaxable Income". It can be obtained free by calling the IRS Tax Forms/Information number listed in the telephone directory under U.S. Government.

LP-Gas Division. Four occurred on the same day, Nov. 27, as an icy cold weather front moved through the Panhandle.

Two residences and a mobile home office building in the town of Wheeler went up in flames with one injury reported due to smoke inhalation. A residence also burned in Shamrock. On Dec. 8, a frozen regulator vent caused a fire which destroyed a mobile home in the Reeves County city of Toyah, injuring one person.

Investigators in each case found unprotected regulators in LP-gas tanks installed with the vent opening pointing making it easy for moisture to collect, freeze, and block the vent.

With more winter weather on the way, LP-Gas Division

Questionnaires mailed to cotton growers

The National Cotton Council will mail questionnaires to a sample of cotton growers to assess their 1983 planting intentions, President Edward Breihan said.

The Council initiated its own survey last year when the U.S. Department of agriculture consolidated its January and March surveys into one. This year's USDA survey will be carried out in February, and results will not be reported until late that month.

"The Council survey will provide planting intentions earlier," Breihan said. "Individual cotton growers need this information for

safety personnel urge everyone who uses propane or butane from tanks to have the regulator checked for proper positioning. Any certified LP-gas dealer can make the check. It's especially important to check older tanks and regulators. Any of the older regulator installations have exposed vents which can freeze easily.

Ideally, the regulator will be located under a protective dome cover on the top of the tank. Exposed regulators should be positioned with the vent facing down and should have a vent assembly or vent suppressor to protect against freeze-ups. Protecting regulators need not be expensive. A slotted can or modified plastic container can provide adequate protection.

planning purposes. In addition, Council delegates will need it for their policy deliberations at our annual meeting early in February.

"We want to encourage every grower who receives a questionnaire to complete and return it promptly," the Council president said. "Results will be made available to all cotton growers through announcements in the media."

The Council's 1982 survey indicated that cotton producers planned to plant 11.8 million acres. Actual planted acres turned out to be 11.5 million, according to USDA.

Major policy change of right of way for highways

A major policy change in the acquisition of right of way for US and State highways has been announced by the State Highway and Public Transportation Commission.

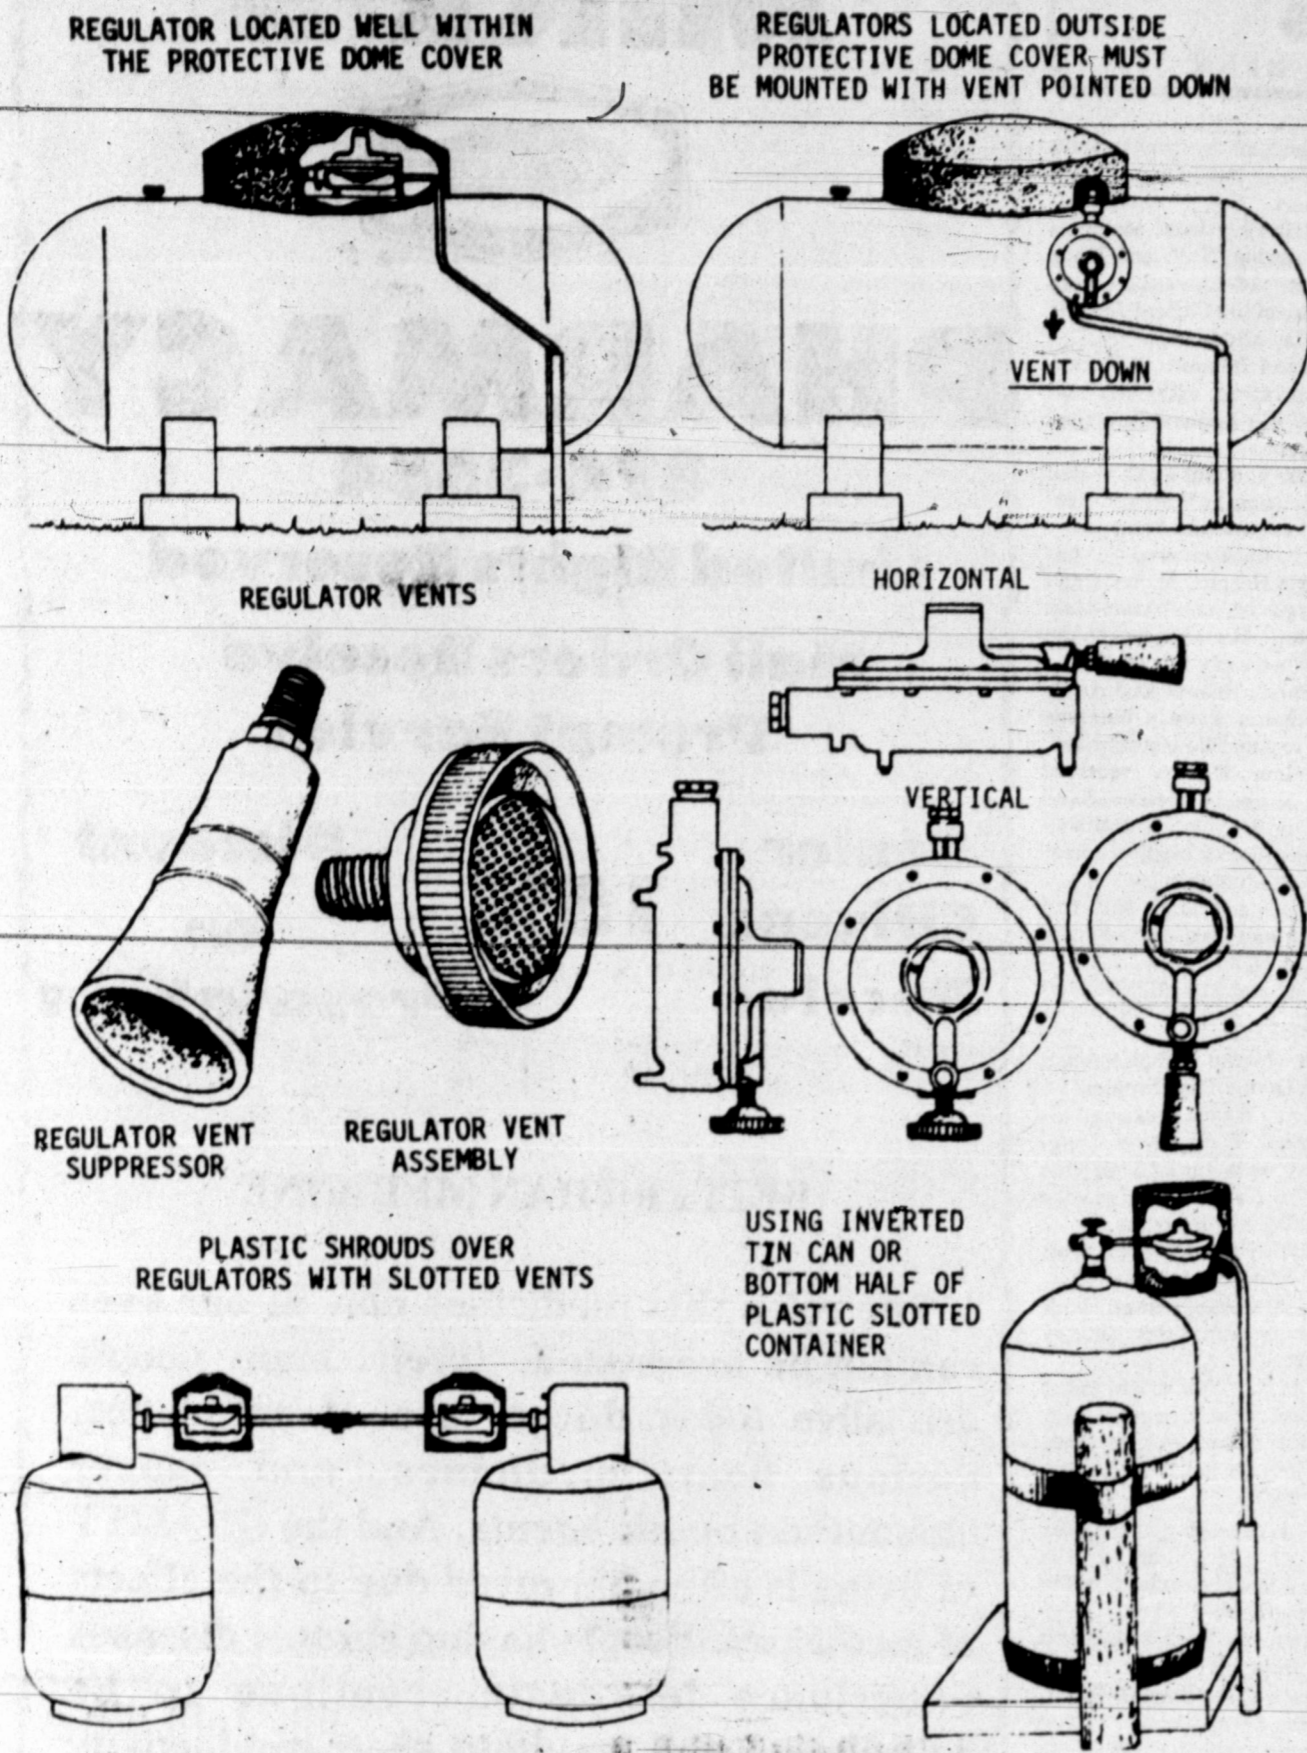

Local levels of government now may request the department to accept initially an amount equal to 10 percent of the cost of needed right of way. The department will accept the voluntary contribution and take responsibility for the acquisition of the land.

Previously, local governments were required to purchase the right of way and

were later reimbursed at least 90 percent by the department. Some counties and cities have had difficulty funding the purchase prior to reimbursement thus delaying needed projects.

Commission Chairman Robert Dedman said the new procedures will take financial pressure off local governments and should speed up projects by allowing a more orderly effort in acquiring needed right of way.

Dedman emphasized the commission action was offered as an optional alternative to present procedures of right of way acquisition.

GET YOUR Super Savings 1. Collect Gold Bond Stamps every time you shop our store. One "Golden Ten" stamp is issued for every dollar you spend (except on products excluded by law).

2. Save your Golden Ten stamps (no singles please) in handy "Super Savings" booklets, available free at the checkstands. Each booklet holds 30 Golden Tens.

3. Redeem your filled Super Savings booklets toward the Super Savings specials of your choice. There are six new specials every week. Watch our ads!

4. You can also redeem your stamps for beautiful gifts from the Gold Bond cat along. Save your stamps in handy Gift Savers Books, available free at our store.

Update your Wardrobe with Accessories

Accessories are an easy way to update a wardrobe, but can become expensive. They are also a creative way to express your personality, and add versatility to any wardrobe.

Becky Saunders explains that accessories can be used to emphasize your best features, camouflage an unfavorable one, or even just to add some flare to your everyday clothes.

"Today's clothing guidelines are more relaxed than those of the past. This provides us with a wider range of fashion options to fit any lifestyle," Saunders says. "This means we are no longer confined to matching accessories."

The overall fall 1983 fashion emphasis is toward the prairie, country-western, or menswear looks. Important colors will be wine, green, brown, navy or cinnamon. Take time to look through local stores for the current accessory trends. Consider structured hand bags, mid-calf flatter heel boots, plaid mufflers or

scarves as accessory choices. When choosing accessories, consider color, texture and shape that can add variety and interest. Work around a central focal point with closely related items to create a pleasing "together" look.

"Many accessories are sensitive to change in fashion, so for the sake of your budget, avoid accessories that are seasonal. Also keep a running total of your purchases so they don't overload your budget," Saunders says.

Many outdated accessories can be recycled. For instance, costume jewelry can be restrung, belts recovered, buckles changed, scarves re-sized or re-shaped, in order to create a newer look.

"Don't forget," says Saunders, "that cosmetics and hair styling are important accessories that can be easily changed." In creating your "total look," remember that fashion is a form or art, and accessories can be the tools of an artist.

tional and physical stresses should be handled daily. Outside interests and an exercise program help relieve stress.

2. Practice good nutrition—eat three balanced meals a day and try to reduce salt, saturated fat and sugar intake. The average adult consumes up to 100 pounds of sugar a year and high intakes can cause obesity, diabetes, heart disease and tooth decay. Normal weight should also be maintained.

3. Get regular exercise and proper rest. Consistently walk, jog or do other exercises suitable to your individual needs. Get plenty of sleep in the winter because the body's defenses need to be at their peak, particularly during this season.

4. Avoid substance abuse like smoking and drinking excessive amounts of alcohol—neither is a safe of healthy habit.

5. Be sure immunizations are up-to-date, including booster shots.

6. Use seat belts when traveling—auto accidents are among the leading causes of death in Texas.

"Develop a sense of health

Clarendon Press, Thurs., Jan. 13, 1983

awareness—learn basic first aid procedures and cardiopulmonary resuscitation. Practice good health habits every day for a happier and more fulfilled life for all family members," Shirer suggests.

Agriculture Census begins

The 1982 Census of Agriculture gets underway this week with the mailing of report forms to farmers and ranchers in the 50 states, the Commerce Department's Census Bureau announced today.

Farmers and ranchers are being asked to report on their agricultural operations during 1982 and to return the form by Feb. 15, 1983. The 1982 census is the nation's 22nd agriculture census in a series that started in 1840.

For the first time in a mail agriculture census report forms will reflect regional cropping patterns to make reporting easier.

Farm and ranch operators will be asked to report the acreage in their operations, form of ownership, type of

organization, location of the place, use made of the land, and when their operations began. Other questions will cover livestock and poultry inventories and sales, amount of government crop loans, crop acreage, amount harvested, and value of crops and livestock sold.

About 20 percent of farmers and ranchers will receive a form with an additional page which has inquiries on: selected production expenses, market value of land and buildings, machinery and equipment inventory and value, interest expenses and expenditures for petroleum and other energy sources.

Assistance in completing census forms is available locally from offices of the Cooperative Extension Service, Soil Conservation Service, Vocational Agriculture Stabilization and Conservation Service, Vocational Agriculture Teachers, Production Credit Associations, and Farmers Home Administration.

A file copy of the report form is provided which operators can complete and keep for their own records.

A time extension can be granted farmers who request it. Census results will be published for each state, and the nation. The first preliminary data will be released beginning in the fall of 1983.

The law which requires farmers and ranchers to report in the census also protects the privacy of their reports. Census report forms are confidential by law and they may be seen only by sworn Census employees and may be used only for statistical purposes. Even other government agencies cannot obtain or use the individual reports, and copies retained by the farmers are immune from the legal process.

Each report form will have a census file number (CFN) printed on the address label. If a report is not received for each file number, the Census Bureau will send out follow-up letters to all who have not responded.

Farmers and ranchers who have not received a form should request one from the Bureau of the Census, 1201 East 10th Street, Jeffersonville, Indiana 47133.

"Trifles make perfection, and perfection is no trifle." Michetangelo

Jimmy H. Davis Retires

Jimmy H. Davis, Memphis Area Operations Manager for General Telephone Company, officially retired after 45 years of dedicated service.

Retirement activities were held at the Branding Iron Restaurant in Memphis, December 18, 1982. Approximately 85 area telephone employees attended the dinner for Davis.

During the ceremony Lucien White, manager of the service department, presented Jimmy with a "money tree" from the service department personnel.

Davis was responsible for the supervision of 28 exchanges in the Memphis operation.

Davis began his career with GTE in Gonzales, Texas as a Storekeeper for the Southern Plant Division. Military service during World War II interrupted his career in 1942, but after service he returned to GTE as a Senior Plant Supervisor in Robstown. Davis' retirement marks the end of an era of excellent service.

Davis was an active mem-

ber of rotary. Jimmy and his wife, Dolores, plan to continue making their home in Memphis and remain active in civic affairs. Davis' initial plans are to travel, fish, hunt and spend time with his three children and five grandchildren.

Ralph McGarity completed Masters

Ralph McGarity, son of Rev. and Mrs. Owen McGarity, and graduate of Clarendon High School completed work on his master's degree on November 15, 1982 at Carnegie-Mellon University, Pittsburgh, PA. The title of his thesis was "Applications of a Circuit Compactor to Digital Design Synthesis." He will continue his work with computer design in order to complete his Ph.D.

Habits for a Healthier Life

With a new year at hand, this is a good time for families to "take stock" of health habits for all members.

Good health habits are easy to establish and should be practiced all year long, reminds Dr. Mary Ann Shirer.

"The most important reason for establishing healthy habits is to improve the quality of life, as well as its length," Shirer adds.

Health experts suggest the following practices as a way to stay healthy:

1. Learn to manage stress and enjoy life more. Emo-

Lioness Club meets in regular meeting

The Hedley LIONESS Club met for its regular monthly meeting on Thursday, Jan. 6 at 6:30 p.m. in the Lions Den. While the basketball game kept a few members away, we still had a healthy attendance. Those in attendance at our wonderful, fun and productive meeting were: Betty Gilchrest, Marty Tarver, Juanell Carson, Louise Stewart, Katie Dvorak, Helen Lamberson, Mahdeene DeBord, Sue Weatherly, Jessie Roland, Pauline Kaufman, Jean Taylor, Nina Riddlespurger, Dorothy Crawford, Alinda Word, Betty Williams, Eva Canada (not Kennedy) and Mary Ruth White.

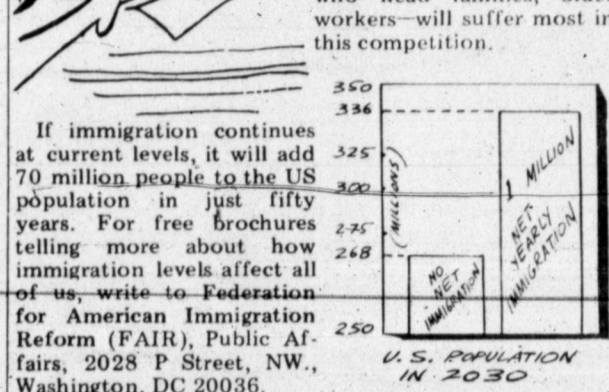

Betty W., Eva, Valinda, Mary Ruth and Alinda provided us with scrumptious food. While Valinda couldn't be there, she still brought two lovely pineapple upside down cakes, there was a delicious "something of everything" salad, spaghetti, cherry salad, potato salad, ham slices and tea. After we had eaten until the table was bare, we discussed beginning an exercise class. Marty brought some tapes on exercises and several agreed to come every Tuesday and Thursday at 4:00 at the Lions Den to exercise together. As soon as we can get carpet in the new LIONESS HALL, we shall exercise there.

Thank you notes were read from Evelyn Messer, Patty and Bill Gilbert (the LIONESS Club gave them a small financial help" after their holiday fire ruined their furniture), and the Donley County Jaws of Life Fund. Volleyball time is here again. Katie Dvorak is the chairman this year, so plan on doing a lot more work! We are hoping for the end of Feb. or the early part of March for the date. We will discuss what sort of food items we will sell this year at the next meeting, so unless you want to get on that committee, you had better show up at our next meeting in Feb.

WHAT'S IN IT FOR YOU?

In 1980, the United States accepted more than 800,000 refugees and legal immigrants. More than double the limit set by Congress in 1965. Every year, however, hundreds of thousands more enter this country illegally. A recent Roper poll revealed that 91% of all Americans favored an all-out campaign to end illegal immigration; 80% favored legal admissions cut below 400,000.

Aside from the additional demands that mass immigration places on our land, water and energy, this means a million more workers compete for jobs every year. That's with unemployment presently at about 9%; 30% in the case of minority youth. And, of course, the most vulnerable workers in our society—minority teenagers, women who head families, older workers—will suffer most in this competition.

CHERYL LEE GLOVER

KEVIN DAWYNE BRANUM

Hedley players of the week

By CLOVIS McQUARY
Cheryl Lee Glover is the player of the week. She is the daughter of Ronald and Joann Glover of Hedley, Texas. She has lived in Amarillo, Alaska, and Memphis. We are proud to have her in Hedley. She is in the seventh grade and does a great job on the court. Cheryl is very special to us because she spends some of her time in our home. We feel she belongs to us. On the basketball court she makes coaches look like they know what they're doing. Although she shoots the ball well, she really shines in defense. In a game when you

really need someone to give her best, Cheryl is ready and willing. We love and appreciate Cheryl very much. Kevin Dawyne Branum is the player of the week. Kevin is the son of Robert and Beverly Branum of Wellington. Kevin has gone to school in Quail, Mexia, Wellington, and now he goes to Hedley. We hope to keep him. I was Kevin's coach in Quail and now again in Hedley. He is in the seventh grade and does a super job as a team player. Kevin will be willing to set a team mate up to make a score. This is something coaches really need. Kevin, you are a real good ball player and you make us very proud that you play for us.

Because we are novel, it's difficult for members of our area to call us LIONESS and not Lions. But, "We Serve Too", we are a separate, organized, official organization called the LIONESS International. We do like to be properly recognized and we do like everyone to know that we are active members of the Lions' and LIONESS' organizations in the Hedley Community.

Ten inches of snow fell in parts of New England on June 6, 1816, beginning the year in which there was no summer.

Hedley News

By DARLENE BALL

Janice Cox from PeEll, Washington is visiting her daughter and son-in-law, Karla Hayworth and Brad Haworth and daughter Kim and Nikki Robinson. Art lessons are being held at the Country Store every Monday 9:30 a.m. til 4:30 p.m. and Tuesday nights 6:30 til nine, for those who are interested. Jiggs Land is still in the Veterans Hospital. Herbert Spears is still in the Veterans Hospital. We would like to welcome back our new neighbors Mr. and Mrs. Bob Roland. Also welcome to our town Mr. and Mrs. Billy King. We are so happy to hear that Master Dustin Monroe is home from the hospital. Mr. and Mrs. Bobby Wiggins spent a weekend along with their 2 sons in Las Vegas. The trip was good, except for a few delays in flight. The crocodile bird feeds itself by picking parasites from the teeth and skin of the crocodile.
