### WTCC PRESIDENT

E. K. FAWCETT

### PIONEER DEL RIO RESIDENT NAMED W.T.C.C. HEAD

E. K. Fawcett of Del Rio, new president of the West Texas Chamber of Commerce, is a typical pioneer of West Texas.

For many years he has been one of the largest sheep ranch operators in Texas.

Mr. Fawcett has represented Del Rio and Val Verde county on the board of directors of the West Texas Chamber of Commerce for more than a decade. He was elected second vice-president of the regional organization in 1937 and was named first vice-president in 1938. He was elevated to the presidency at this year's WTCC convention which closed in Abilene, Wednesday, May 17.

### TWO ELECTED FOR SCS DELEGATES HERE MONDAY

DRAB ELECTION RECORDS ONLY EIGHT VOTES OVER COUNTY

Local farmers failed to storm the polls Monday and the county-wide election of four delegates to represent Donley in the State District Conservation Convention in Plainview next week was rather drab.

Commissioners G. G. Reeves and John Hermesmeier finding Clarendon centrally located, held their election here and one man put in his appearance. He, however, failed to vote so precinct one and two are not represented.

In precinct 3 (Hedley) three votes were cast giving J. B. Masterson a place on the board. Precinct four had the largest vote when five men were present, all casting their ballot for Web Fowler.

Representatives for this district will meet in Plainview Monday to select a member to meet with other delegates in Temple, May 29, for the purpose of organization and transaction of business of the State Soil Conservation board.

### CONNALLY ATTENDS GRAIN DEALERS CONVENTION

Mayor T. F. Connally was in Amarillo Monday and Tuesday attending the Panhandle Grain and Feed Dealers' Association convention.

### Broncho Boosters Slow in Signing

The club this year is a continuation of the booster plan in 1938. Local fans are asked to subscribe a monthly amount with the money going to pay for the upkeep of the field and other incidentals. The field upkeep includes caretaker's salary, water etc.

### NYA Home Issue Still In Doubt As Court Withholds Vote Until June

Whether or not the Donley County NYA Home Residence project will remain in Clarendon or be discontinued will not be decided until the next regular meeting of the Commissioner's Court, June 12, it was announced following an open discussion by local business men and court members Monday afternoon.

As sponsors of the project, Donley County has spent \$456.30 for rent, lights and gas, in the eight months the home has been in operation. Salaries paid into the county by the federal government during that time has amounted to \$5,750, it was revealed.

Asked by the court for specific monetary figures, Miss Joyce Burleson, home supervisor, said that over the eight months, approximately 30 girls living in the home have received \$4,690. An additional \$1,016 has been paid the local supervisor with approximately \$250 going for materials. Almost the entire amount of federal payments remain in Donley County, she said.

To the question raised by the commissioners as to how Donley County, as a whole, was benefiting by the project, H. T. Burton, Clarendon Schools, superintendent said it was his opinion that Clarendon Junior College would alone largely answer.

Girls, he said, no matter from what county, are in this way offered an opportunity to receive an education which might otherwise be denied. The majority of them are high ranking students, and of course, become a booster for the entire county.

As an example Burton pointed out the result of Hedley residents reaction to the project. Two girls were offered an opportunity to attend the local college, they were so highly pleased that now eleven are enrolled.

County Judge R. Y. King told the group that he instigated the meeting so the citizens could decide whether or not the home should be maintained along with other charitable causes which drain the county's finances. In the first four months of the current year, over \$27,000 of the approximate \$52,000 income had been spent, he said. Much of the expense, however, is payments on back debts, he added.

"For the past several years Donley has been on a cash basis," the judge asserted, "but unless a drastic cut is forthcoming, the treasury will be far in the red or taxes must be raised."

Asked by the group if \$456 would materially aid such a deficit, commissioner John Hermesmeier declared, "We don't want you people to think we have any special reason for considering cutting off the NYA home, and the reduction in spending is not intended to stop there. There must be a beginning to the doctoring of a financial ailment as well as to that of man. In prescribing a cure for illness, a doctor would most surely give his medicine over a period of days rather than the entire remedy at one time."

Judge King stated that "as more relief is issued, the demand grows and all are heavy expense to the county. Before adjourning the gallery voted unanimously to keep the home and let the commissioners curtail expenses in some other way."

### DONLEY HOPPER WAR TO BEGIN NEXT WEEK

TWO MIXING STATIONS TO BE OPENED IN COUNTY NEXT WEEK

Donley County will begin war against the annual grasshopper invasion next week when poison mixing stations at Clarendon and Hedley will be opened.

Although most farmers in this section report only minor infestations, several small plots over the county are said to be covered with hundreds of the pests.

Anxious to open the warfare while the poison will be the most effective, County Agent urges all farmers report infestation as soon as the hoppers are noticed hatching. Poison and bran may be obtained upon application, he said, and the mixture is doubly potent before the insects are large enough to migrate.

HEAVY HAIL REPORTED IN SOME LOCALITIES BUT DAMAGE SLIGHT

Scattered showers over the Panhandle since last Friday gave Donley County approximately one-half inch of moisture but hail falling in some localities did minor damage.

The Ashtola and Martin communities suffered most when the hail battered fruit trees and gardens Friday. Only miniature stones fell in Clarendon.

The moisture recorded for Friday, Monday and Tuesday reached .46 of an inch with .08, .33 and .05 received in the respective days.

The precipitation brought May's total to 1.49 to make the year's figure 5.79, still 2.80 inches below the first four months in 1938 when 8.59 inches had fallen by June 1.

Heathington was riding on the porch of the moving house. The porch gave way and he fell to the ground in the path of the structure. One of the huge wheels passed over his head and chest.

### One Upset Marked Up As Favorites Advance In City Golf Tourney

Sprinkling birdies along with a double handful of pars, Neel Thompson swept M. P. Gentry into the discard to mark the only upset as all other favorites entered the second round of the current city golf championship.

Thompson jumped into an early lead and was never headed by the former two-times champion who withered before a blazing outgoing 34 and finally fell 4 and 3.

In the other championship flight matches, Ira Merchant, defending champion and medalist, blasted Alex Cooke 6 and 5. Dude Gentry fought off a last minute rally to down T. F. Connally 2 and 1 while Billie Cooke ousted Tom Murphy with subpar golf.

Thompson and Merchant meet in the next bouts while Gentry and Cooke tangled in the lower bracket.

Merchant's 74 captured medalist honors Sunday after a shaky front nine of 40 left him back.

**MERCHANT-COOKE WIN**

Ira Merchant and Billie Cooke advanced to the finals in the Clarendon City Golf championship this afternoon with respective wins over Neel Thompson and Dude Gentry.

Merchant was steady all the way and coasted to an easy 8 to 7 victory while Cooke won four of the last five holes to finish 4 and 3 up.

of the field. His card, however

## RECOGNIZING OUR GREATEST POTENTIALITY

Clarendon has a great many young men allied with the various businesses of the town, who are not yet active in the worthy community enterprises.

It may be the fault of the older business men of Clarendon that these young men are not engaging their energies and latent talents for the good of the community, but, anyway, they ought to be integrated into the channels of community activities, and since they are not likely to push their way into circles of leadership, it is up to the older group of Clarendon's business men to invite them in, as they make a place for them.

There is lots of work to do in Clarendon. There is more work coming up in the future, and community activities under modern conditions call for more vision, more energy and more stamina than many of the oldsters possess. This adds up to the present, vital need of utilizing our young men. Maybe we need a junior chamber of commerce—maybe a young men's business league—anyway we need the young men on an organized basis.

Let us recognize our greatest potentiality—our young men, and let us do it quickly. It means much to the future progress of Clarendon and Donley County.

## A SERIOUS PROBLEM OF TODAY

Among the many complex problems that beset the retail merchant and small business men of the Southwest, is a product of better transportation facilities and presents one of the most serious that he is called upon to combat. We refer to the growing menace of the traveling vender of all sorts of merchandise loaded in trucks and bringing a tax-free competition to the very doors of the public and at prices as low as they can be when no overhead and taxation enter in.

It is manifestly unfair for the home merchant to be undersold by a competition that does not contribute to the upkeep of the federal, state, county, city or school governments, even if he does pay a motor license fee. If business, generally, is to be demoralized by this practice, it is only a matter of time until all our governmental agencies will be on a deficiency basis, bereft of the support that worthy small businesses contribute the country over.

True, "there ought to be a law", as we Americans so often say when faced with this sort of a difficulty, but an adequate law would be complex and hard to enforce. Anyway, we have enough laws—maybe too many.

About the only solution open is an active public spirit that would refuse to buy from transients who do not assist in community upkeep or worthy activity. Like so many of our troubles, the solution must remain with ourselves.

Let's support our home institutions. They make our home government, protection, and education possible.

"The habit of using ardent spirits by men in office has occasioned more injury to the public and more trouble to me than all other sources. And were I to commence my administration again, the first question I would ask respecting a candidate for office would be, "Does he use ardent spirits?" —Thomas Jefferson.

## REALIZATION

Hold on to your dreams. Keep your hopes high. On the cold, rainy Monday morning of February 27 the homes of several hundred students of Highland Park Junior High were called to advise there would be no school that day because of the breakdown of the heating system.

To Caps, who had waited a lifetime to hear that the school house had burned down, the call gave belated evidence that miracles do happen. The trouble with most of us is that we do not recognize modern miracles when we see them. How many of us used to hit a half mile or more stretch of good road with the old Chalmers-Detroit or the early Overland and sigh for a 30-mile stretch of pavement. We complain now of the narrow shoulder or lack of distance markers, never taking into account that in our wildest dreams of 1915 we never really expected to see a ribbon of concrete from Texarkana to El Paso. A tire that would go ten thousand miles was another dream that came true—twofold. Hold on to your dreams. They may yet come true. —Caps and Lower Case.

## CONSISTENT, AT LEAST

Elliott Roosevelt's protest against the proposed law prohibiting the advertising of liquors over the radio, is a time-honored example of the consistency of the Roosevelt family. All members are now on record in behalf of the liquor business.

"There is no minimal, insignificant or irrelevant degree of consumption of alcohol for the safe handling of a motor vehicle. Alcohol is a factor in about 40 per cent of all accidents involving injury or death." —From "Die Wissenschaftlichen Grundlagen der Beurteilung von Blutalkoholbefunden."

"If temperance prevails, then education can prevail; if temperance fails, then education must fail." —Horace Mann.

## NOBODY'S BUSINESS

By JULIAN CAPERS JR.

AUSTIN.—They took the \$40,000,000 sales tax constitutional amendment "program" out and "laid it on the table" last week—technically—but actually, they laid it on a slab in the morgue, from which it has only the remotest chance of ever being resurrected. Somebody misinformed Gov. W. Lee O'Daniel about the strength of an "program", and when he confidentially predicted over the radio that it would pass the House with a bang, he didn't know there were 60 votes in the House that would withstand all of the terrific pressure that could be put upon them by those members of the House who honestly believe in writing a tax rate and a sales tax into the organic law, backed by all the strength of an organized special interest lobby, plus the personal pressure of the governor himself. So the House test sent the "program" which was originated by a special interest lobby, and for which that lobby and the Governor have worked day and night for four months, into the boneyard for good.

Legislators Take the Ball As a result, the lobbyists who with amazing audacity seized the ball at the opening of the regular session and have kept it throughout the first 120 days of the session, have at last relinquished it. It is now an "every man for himself" scramble, with each individual lobbyist struggling madly to get the special interest he represents exempted, or kindly treated, in the omnibus tax bill which now appears to be the only tax measure that can possibly be enacted—and the devil take the "program".

There is still no certainty that any tax measure will be enacted, although the legislators, serving since May 9 at \$5 a day, are earnestly striving to bring out a bill increasing natural resource taxes, and imposing a sales tax on certain luxuries. Unless the lobbyists, working individually, turn out to be as strong as they were collectively, some such bill will probably be enacted. But it will raise nearer \$20,000,000 a year than the \$40,000,000 proposed in the lobby "program". That will be ample to finance a reasonable social security program including a somewhat liberalized pension list, aid for the blind, dependent children, and teachers' pensions. But the plan of taxing poverty for twice as much as is needed for social security, through a sales tax, and writing it into the Constitution, and turning the \$20,000,000 surplus into the pot for the relief of special interests taxpayers, is definitely consigned to the limbo of the fantastic dreams of a lobbyist who, drunk with a delusion of power, lost all sense of balance. The regular

session will last at least another two weeks, possibly longer. House members are definitely desirous of enacting tax legislation to finance the social security program, and, with the legislative power back into the hands of the folks the people elected to do the job, there is a fair prospect they may succeed.

## Brady Gentry Named

Last November, four East Texas Senators, including Will Pace, John Redditt, Joe Hill and Harold Beck, visited the then Gov.-Elect W. Lee O'Daniel at Port Worth. They discussed with him the appointment of a man to succeed John Wood as Highway Commissioner. They told him where East Texas is located, and pointed out the geographical allocation of the Commissioners which has always been observed. Though they have never discussed this particular angle, it is quite likely the names of some likely men were brought up, and if so, it is also quite likely the name of Brady P. Gentry, of Tyler, was mentioned. At any rate, O'Daniel, the Senators reported, agreed heartily with their views, and gave them assurance these views would be respected.

Last January, O'Daniel nominated Cary P. Collins, Dallas insurance man, and his No. 1 campaign director, Dallas is not in East Texas, according to the view of the Senators. So Collins was rejected. Then O'Daniel, went far afield and named J. C. Hunter, of Abilene. Hunter, facing rejection, withdrew. Then O'Daniel sent up Jim West, Houston oil multimillionaire, and West, too was rejected, but not on geographical grounds.

Last week, O'Daniel nominated Brady Gentry, Gentry, three times Smith County Judge, has had plenty of political experience. He knows a lot about highways, and enjoys the confidence of those interested in state highway development. A quick canvass of the potent East Texas senatorial group indicated he will be promptly confirmed. So, in six months, the Governor learned where East Texas is, and the kind of man the Senate wants for Highway commissioner. If he had listened to the four Senators, he might have saved six months of embarrassment, and avoided learning at least one lesson the hard way. That's how its done in politics. Maverick in Saddle Taking advantage of a San

Antonio political machine which was on its last legs and divided against itself, Maury Maverick, the fiery ex-Congressman from the Alamo City, led three of his ticket of four commissioners to a resounding victory over Mayor Quinn, the ultra-liberal mayor. Notwithstanding loud shouts from Washington who don't know San Antonio politics, hailing it as a "comeback" for the New Deal, Maverick's victory reflected less strength for the New Deal than did his close race for re-election to Congress last year, when he got almost half of 49,000 votes and was beaten by Paul Kilday. This time Maverick got 18,000 votes out of 45,000—which gave him the election, under San Antonio's "no-runoff" rule. Always colorful, Maverick is sure to give San Antonio plenty of fireworks and underground rumor has it that a fight on the local power company will be his opening gesture when he takes office June 1.

## HOW TO PREPARE SWEET BUTTER IS EXPLAINED

TWO-THIRDS OF TEXAS' BUTTER IS OF VERY POOR QUALITY

COLLEGE STATION.—Texas' annual output of 56,000,000 pounds of farm butter is 11 per cent of the nation's total and gives the state first rank in production.

"The tragedy is that two-thirds of this butter is of poor quality and serves to curb the consumption of the product on these farms and at the market," W. V. Maddox, dairy manufacturing specialist of the Texas A. and M. College Extension Service, has commented. "Yet good sweet cream butter can be produced on Texas farms if milk and cream are handled correctly."

Correct handling begins with the production of milk, which should be clean and free from objectionable flavors, he says. Clean, sterilized utensils are essential.

Cream whether mechanically separated or hand skimmed, must be cooled immediately after separation and held at 50 degrees until churning time. Freshly separated cream must be cooled before adding to cold cream.

Maddox recommends that the different lots of cream be mixed from two to four hours before churning so that the temperature and ripening will be uniform. Use of a thermometer will help insure butter after 30 to 40 minutes of churning, and firm not hard butter granules. The best temperature is between 50 and 60 degrees in summer and 55 to 68 degrees in winter, and the churning should be stopped when the granules are the size of grains of wheat.

The granular butter should be washed twice with water of about the same temperature as the buttermilk. The buttermilk, which produces off-flavors very rapidly can be washed out, but not worked out. An ounce of butter salt is added for each pound of butter, and if this is amended, it will be more evenly distributed.

**CLARENDON METHODIST CIRCUIT J. G. Walker, Pastor**

A reasonably good crowd at McKnight Sunday 11:00 a.m. and a real good service. Large attendance at Bray in the evening. Had a short Mother's Day program preceding the preaching. All seemed to enjoy it. Many expressed themselves as enjoying the preaching. Received one member by certificate. We like to go to Bray because they give us a hearing.

Mrs. Braswell reports a good service at Lelia Lake 11 a. m. and Sunday School; sermon interesting. Some one has said that it will not last but two or three Sundays. We don't believe it. We know that the ones in charge are competent and we believe they are determined to make a go of it. The Lord is not dependent upon large numbers. His added blessing gives for more prestige than large added numbers. In fact if He is lifted up in the efforts and lives of a few earnest workers we will draw numbers to His cause. Watch Lelia Lake come back to herself. We are very thankful to Mrs.

**Three Lemon Pie Tricks**

By BETTY BARCLAY

"Come for dessert." Lemon pie speaks its message without words. The hostess however, who serves it, writes this invitation on her calling cards, together with date and hour for an afternoon of bridge, gathering a dozen friends to finish luncheons begun at their own homes with a closing dessert at hers. With dessert, she offers a beverage—here a cup of tea, served with lemon. The game over and prizes awarded, guests go home in time to prepare dinner for tired husbands, their own appetites unimpaired.

The same suggestion may be used for a dinner dessert, where a hostess does not have facilities to serve a large dinner party. Men come for these desserts, necessitating a careful choice. Lemon pie is "tops" with masculine America and always welcome.

Three simple tricks in cooking make this lemon pie a reputation builder for the hostess that serves it. Trick one—add lemon juice and egg to pastry mix—result, flaky crust of a superior tenderness. Trick two—cook filling first, then add freshly squeezed lemon juice after the cooking flame is out—result, a filling fragrantly fresh in flavor. Trick three—add a little lemon juice to the meringue—result, a more tender, easy-to-cut meringue. Full recipe directions are as follows:

**Sunkist Lemon Meringue Pie**  
Bring to a boil in saucepan on direct heat:  
1 cup water or milk  
½ cup sugar—  
¼ teaspoon salt  
1 teaspoon grated lemon peel

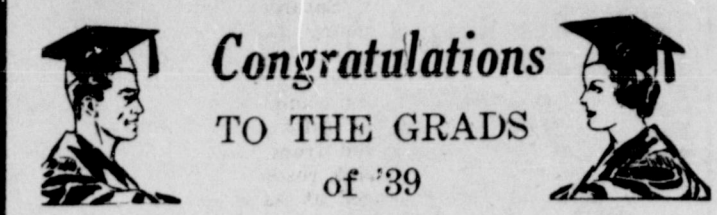

**Add:**  
5 tablespoons cornstarch, blended with  
½ cup cold water  
Cook over low heat until thickened (about 5 minutes), stirring constantly. Remove from heat. Add separately, mixing well each time:  
2 well beaten egg yolks  
1 tablespoon butter  
6 tablespoons lemon juice  
Pour filling into an 8-inch Sunkist Pastry shell Top with Sunkist Meringue. Brown in moderate oven (325° F.) for 15 minutes.

**Sunkist Pastry**  
Sift together:  
3 cups sifted flour  
1 teaspoon salt  
Cut in:  
1 cup shortening  
**Add:**  
1 slightly beaten egg, combined with  
3 tablespoons lemon juice  
**Add gradually:**  
Ice water—just enough to bind dough together  
Roll pastry out thin and line pie plates. Bake in hot oven (475° F.) for 15 minutes. (Makes three 8-inch single pie shells. Keep unbaked dough in refrigerator until needed.)

**Sunkist Meringue**  
Beat until frothy:  
2 egg whites  
**Add gradually:**  
4 tablespoons sugar  
Continue beating but only until egg holds its shape in peaks. Fold in:  
1 teaspoon lemon juice  
Cover pie.

## Garden Glances

Presented weekly by the Garden Club

"America the beautiful lies in the hands of the gardeners." There is such a profusion of flowers in bloom now, that it is difficult to determine the most attractive lawns.

The Paul Scarlet and Blaze roses are quite in evidence. Perhaps the most gorgeous rose blossoms are seen at the Ralph Grady's, Mrs. John Potts, Shavers and Mrs. Wiedman's. There are several hedges of the Poulson roses. The Rundel home has a rose garden in the back yard that displays some rare blooms, and also some cleverly arranged trellises for her Blaze and Dawn climbers. While seeing the roses notice the immense weeping willows at the back. The low rock wall at the Joe Goldston home is over run with beautiful roses. The most prolific bloomers and hedge bushes are at the McCreary home.

There are honey suckles of various species displaying their various flowers in abundance. This is undoubtedly the best season this shrub has had in years. A lawn of exceptional beauty is that of Fred Chamberlain. The landscaping, rose trellis, rose and privet hedges, magnificent trees and rock wall enclosure with clinging English Ivy are entrancing to all who view them.

Make your weekly pilgrimage, and you will return in a happier mood from viewing these beautiful spots.

## New Calliopsis Gayer Still

One of the gayest garden flowers and hardy enough for almost any climate, is the calliopsis. An annual form of the coreopsis, the true name for the perennial strain, it has recently been developed to new beauty, and is known for its waxy stemmed blooms brilliantly colored in yellow and maroon and crimson. For table bouquets it is unsurpassed.

The rich red types are most effective for garden decorative purposes, but they need the lightening touch of a yellow edging to set them off properly. Most of the varieties have this trimming, differing in width and intensity, with a maroon, scarlet or crimson center. An effective arrangement is to have the tall varieties in the center of a bed, with the dwarf types as an edging.

Calliopsis may be planted early or late, and because of their rapidity of growth, they are particularly suitable for a late planting where some other flower has failed. Soil conditions do not matter so much—they will grow anywhere—but they demand plenty of sun. Plant them where they are to grow, as transplanting is not always satisfactory, and when they have made a fair growth, thin them out to 12 inches apart for the tall varieties, and from 6 to 8 inches for the dwarfs. When midsummer comes, the blooms will form a solid mass, covering the foliage almost completely.

Calliopsis one of best annuals for cutting.

Silence all ye underclassmen, all ye unsophisticated infants, all ye tagends of a misspent life. We, the qualified members of the class of '39, do here vow, in the presence of these assembled witnesses, generously give and bequeath to the dear ones left behind—all that we are unable to take. Being the most generous, kindhearted, friendly, obedient, trustworthy, intellectual and most handsome class that ever passed through the portals of C.H.S. ### CLASS PHOPHECY

Eugene Putman, superintendent of the Clarendon High School has sent out notice of the Clarendon High School Homecoming of 1950. He extended special invitations to the ex-senior class of 1939, this event being of interest to that group since it was an old favorite of theirs. I might mention that I gained his position when superintendent H. T. Boswell was an old favorite of mine.

### CLUB ON PICNIC

### CLASS HISTORY

When we look back over the past eleven years in school, we find that we have had many happy experiences along with a few disappointments. The present senior class is made up of 39 members, 18 boys and 21 girls, but only 9 of these started in the first grade together. These were: Billy Patman, Ruth McDonald, Billy Headrick, Fred Chamberlain, Lois Marie Taylor, June McMurtry, Thelma Hardin, John Jay, and Rue Zell Ryan.

While in the second grade Pauline Riley, Glenna Deal, Raymond Hay, Billy Latson, and Billie Lou Gilbert joined our class and have been our classmates since that time.

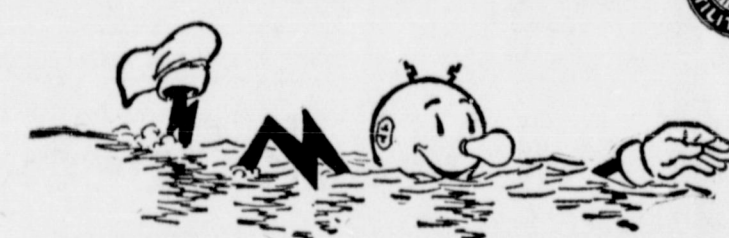

During the first five years of our school life, the social gatherings consisted mainly of birthday parties and the annual easter egg hunt. Also some well remembered gatherings were the "Hickory Tea parties" given after school in the afternoon with our teacher Miss Clark as hostess.

We were now in Junior High School, and for the next three years our school work became more difficult. During our stay at Junior High, our class was increased by Neel Thompson, Lela Ruth Buchanan and Eugene Putman. In the eighth grade we had our first class picnic which was at Troublesome Canyon. Upon graduating from the eighth grade we received our diplomas and had completed the second lap of our education.

Then came our soph. year and the first year in high school. During this year our class was increased to still a larger number as the pupils from the rural schools joined us. Those who have transferred from the rural schools are: Johnnie Leathers, Frances Hott, Rex Shannon, Helena Poovey, Wilda Faye Gibbs, Margaret Hill, O'dell Davis, Jack Simmons, Joe Williams, Jessie J. Tomlinson, Ray Isham and J. B. Martin, also some transfers from other towns were Mary K. Condon and Billie Horton.

During our Junior year we began to feel at home in the High school, and a little important, although still ahead of us were the sophisticated Seniors.

In the fall of 1938 our goal had been reached, we were now Seniors. We have had a very busy time this year with our school and social activities. Our class president Neel Thompson has done much to make these activities a success. The new members in our senior class are Ollan Anderson, LaVerne Good-

## The Bank Check

—is one of the most efficient of modern business devices.

Over ninety per cent of all the business of the nation is carried on by means of bank credit. It is in the form of deposits which are transferred by checks in settlement of business transactions, ranging from a few dollars to several million dollars.

For large amounts and small, for short errands within the community, and long ones to distant points, the bank check performs its work, swiftly surely, safely and economically. In addition, bank checks help in the book-keeping of those who use them and establish a legal record of payments.

These business services are available to you through a checking account at this bank.

**MEN LOVE GIRLS WITH PEP**  
If you are peppy and full of fun, men will invite you to dances and parties. BUT if you are cross, listless and tired, men won't be interested. Men don't like "quiet" girls. When they go to parties they want girls along who are full of pep. So in case you need a good general system tonic, remember for 3 generations one woman has told another how to go "smiling thru" with Lydia E. Pinkham's Vegetable Compound. It helps build up more physical resistance and thus aids in giving you more pep and lessens distress from female functional disorders. You'll find Pinkham's Compound WELL WORTH TRYING!

JOHN NANCE GARNER

Vice-President of the United States, and leading in the poll of Democratic candidates to succeed Roosevelt.

## Garner Man of the People, Sound, Rugged and Honest

The time has definitely arrived in America when positions of trust and responsibility should be placed exclusively in the hands of the elders, declared Roy Miller, oldtime editor of Texas, in speaking recently at a gathering of old friends and neighbors of John Nance Garner, vice president, in the little village of Detroit, Texas, where the distinguished Texan was born nearly sixty-nine years ago.

"There is no substitute, either in public or private life, for experience, and experience, of course, comes only with years. As a matter of fact, the only thing that is old about John Nance Garner is some of his political philosophy. He still believes in the old-fashioned virtues of economy, thrift, and self reliance. In other words, he believes in the old-fashioned, fundamental principles of democracy, and no man in America, in both his public and private life, exemplifies those principles to such a degree as does this great man.

"While achieving high place politically, he has made substantial success of his private life, and it is his proud boast that he owes no human being a dime. He believes in the pay-as-you-go system, and what a blessing it would be if that system could be applied to America today.

The date of the play to be presented at the Goldston school house this week has been changed from Friday, May 19 to Tuesday May 23 in order to avoid a conflict in dates with the graduating exercises in Clarendon.

The play is a hilarious comedy, "Aaron Slick from Punkin Crick" with an experienced and well trained cast.

#### CUCKOO TAXES!

The diversion of road funds to non-highway purposes has been called a "cuckoo" policy of taxation. The cuckoo bird lays its eggs in another bird's nest to hatch, taking unfair advantage of the unsuspecting bird. Diversion of road funds unfairly forces motorists to hatch out tax revenue for non-highway purposes that properly should be distributed among the general taxpayers.

The industrial revolution is aptly illustrated by the contrast shown here between a 17th century charcoal burning iron and a modern type. Instead of charcoal this modern iron holds water and when heated electrically produces steam which may be released through perforations in the iron's top. Aside from making clothes sprinkling unnecessary it reduces the possibility of scorching to nil.
