Xi Lambda Xi has surprise breakfast

Saturday, May 6, 1978, was a cold and foggy morning, but that didn't keep the Xi Lambda Xi members from kidnapping their Mu Gamma sisters at 6:30 in the morn. And were they ever a good-looking, sleepy-eyed bunch of girls. But, to show our sisters we really care, we served a

delicious meal of mixed fresh fruit, with rum sauce, pigs in the blanket, and spanish style eggs, with orange juice and coffee.

Hostesses for the kidnap breakfast were Peggy Anderson, President of Xi Lambda Xi, and Susan Henson, Vice-President of Xi Lambda Xi.

Postal Service's new packaging guidelines

Postmaster R.G. McCombs today issued a reminder to postal customers in Clarendon that if the Postal Service's new packaging guidelines are followed they can virtually eliminate damage to their parcels.

Postmaster McCombs said that checks at bulk mail plants show that more than 80 per cent of all articles damaged in the mails were improperly packaged.

While the regulations and guidelines adopted recently by the Postal Service are detailed, they boil down to several basic steps that can help assure safe delivery.

First, select a strong carton. Use a fiberboard box with the "burst-test" number printed on it.

If the box says, for instance, 125 lbs., it can be used for mailing many types of merchandise weighing up to 20 lbs.

When a person is shipping dense or heavy materials, such as books, stronger boxes are required. For 10 lbs. of books the Postal Service recommends a box with a 175-lb. burst test.

The Postal Service suggests that wrapping paper not be used on cartons. If a wrapper is torn or lost in transit, the mailing address can disappear. Further, the paper adds nothing to the package's strength.

The use of masking and cellophane tapes for closing or sealing is prohibited. In transit they tend to peel off, and they have little strength. String is not recommended. If twine loosens, it can readily catch on processing machinery.

Instead, parcel post customers are urged to use the pressure-sensitive, reinforced tapes. They are almost unbreakable.

When marking a package "Do Not Bend," it is required that the container have stiffeners which will protect it from being bent.

In using a second-hand box, it is important to mark out addresses that may have been printed on it along with extraneous numbers that could be confused with the ZIP Codes.

A final suggestion: Enclose a return address card in the package so that it can be returned if the mailing label is damaged or lost.

Postmaster McCombs said customers should contact the Clarendon Post Office for more information.

Mr. and Mrs. Floyd Naylor of Wichita Falls and Mr. and Mrs. Dean Simon enjoyed a high noon fish dinner Sunday with their aunt, Miss Ava Naylor and Mr. and Mrs. Floyd Naylor, hosts.

Mr. and Mrs. Douglas Newby and girls, Marti and Rhonda from Nope, New Mexico, visited this week with their grandparents and great grandparents, Mr. and Mrs. Jack Edens.

COLT'S CORRAL

Hi everyone! Welcome once again to Colt Country. Just think, barely a week of school left!

Lots of things have been happening around C.J.H. lately. Sorry we didn't get the Corral in last week to tell about them.

First of all, the Jr. High Tennis Meet was Monday, May 1st, I believe, and it was all a lot of fun. Kelli H. played 8th girls singles and received a blue ribbon after a hard fight with a split set. Others participated, but they didn't place. Dyanne J. played 7th girls singles, and Kim W. and Melody M. played 7th girls doubles. Brett B. and Keith D. played 7th boys doubles, and Kelly H. played 7th boys singles. Karen K. and Lacreacia P. teamed up for 8th girls doubles. Spencer H. played 8th boys singles and Tommy L. and Scott N. played 8th boys doubles.

Second of all, our valedictorian for 1978 is Kelli Hardin and salutatorian is Lacreacia Petty. Congratulations, girls, and good luck with your Awards Day speeches!

Speaking of Awards Day, it happens to fall on Friday, May 19th at 9:00 in the college auditorium. Ya'll come!

The High School Cheerleader tryouts were last Tuesday, and two of our freshman-to-be girls got the honor of J.V. Cheerleader. They are Lacreacia P. and SuLynn A. Congratulations.

The Jr. High Spring Band Festival was last Saturday and the Jr. High Band (6th, 7th & 8th) received a Division II. Congratulations to these people! Also, there were some instrument solos and twirling solos, and if you got a Division I, you got a medal, and if you got a Division II, you got a red ribbon. I couldn't get all the results from all the solos, but I'll tell you the ones I did get. Connie G., Kristen W. and Tammy W. played a trombone trio and received a Div. II. Dalyn C. played a trumpet solo and received a Div. II. Rosie A. played a flute solo and received a Div. I. Tana G. played a flute solo and received Div. II. Karen K. played a saxophone solo and received a Div. I. I'm sure there is more, but that's all I know of. In the twirling competition, Tana G. got a Div. II, Tracy W. got a Div. I, Karen K. got a Div. I, and Cara C. got a Div. I. It was a pretty good day for most! Congratulations to the kids who won!

Jr. High Cheerleader tryouts were Monday the 8th. The three new 8th grade cheerleaders for 78-79 are: Kim Wilson, Melody Moreman and Pam Jack, the 7th grade cheerleaders are Gina Spier and Kristen Walker, and the 6th grader is Amy Hancock. Congratulations to

Pressure Canner check up
A pressure canner "scrub up" for home canning operations means cleaning and checking all the parts—to help insure safety and high-quality food. Home pressure canners destroy botulism spores in low-acid vegetables, and proper cleaning is one key to their success.

CLEAN CANNER ITSELF
In washing the canner, remove any stains from aluminum canners with a paste of whiting and vinegar. For porcelain-enameled steel canners, use water instead of vinegar.

Be sure to clean the edges of kettle and cover thoroughly.

If necessary, scrub them with whiting and water, since dried food, dirt or scale from

hard water on either edge may prevent a tight seal and allow steam to leak out.

Special cleaning also solves problems with odor or metallic taste.

For example, an aluminum or tinned-steel canner may have an odor after storage and a new metal canner used also for cooking may give food a metallic or rusty taste.

To get rid of problem odor or taste, put one inch of water in the canner, add a handful of potato peels and any racks and pans with similar problems. Heat for 15 minutes at 15 pounds pressure. Cool. Wash kettle, pans and racks in hot soapy water. Rinse and dry.

CLEAN PETCOCK, SAFETY VALVE, GAUGE
Be sure to clean the petcock so that during

canning all the air can be driven out of the canner in 10 minutes. Clean the gauge to prevent incorrect pressure readings due to clogging. Clean the safety valve so it can work if pressure becomes too high.

Before canning—and throughout the canning season—clean the petcock and safety valve openings by drawing a string or narrow string of cloth through them.

Never use sharp tools that might nick and damage openings.

Occasionally remove the petcock and safety valve and soak them in vinegar for a short time.

Unscrew the ball-and-socket type of safety valve and clean them after each use. Occasionally clean the ball and its socket with silver polish.

TEST DIAL-TYPE GAUGE FOR ACCURACY

Correct canning pressure for a certain time span will destroy harmful bacteria, so pressure gauges must be accurate. Check accuracy of a dial-type gauge either with a steam-gauge thermometer or an electric testing device.
