Country Editors Will Be Heard Over Radio

Have you been listening to Lewis T. Nordyke's Panhandle newspaper comments each Sunday morning at 8:15? Then you will appreciate what is in store for next Sunday.

Three country editors will be on the Exchange Ed program over KGNC at 8:15 Sunday morning. These men are Dave Warren, president of the State Press, Honest Bill Miller, that Irish wit of Spearman, and Paul Zimmerman of Dimmitt.

This will be the first "round table" discussion on time topics by radio by any bunch of fellows in the Texas Panhandle. Don't miss it!

EAT FISH FROM CONCHAS DAM

Feasting on bass, some of which measured 18 inches in length, was a rare treat at the home of Mr. and Mrs. W. A. Land Tuesday evening. Marvin Land, their son, caught the fish at the Dam and, with his wife and sons, Billy and Tommy, came to Clarendon to show the 'old folks' just what a real fish fry could be with the proper materials.

Others enjoying the fish fry were Mr. and Mrs. Frank Whitlock, Mr. and Mrs. Clarence Whitlock, Mr. and Mrs. Reagan Bryan and daughter Donna Rea, Mr. and Mrs. Buel Sanford, Mr. and Mrs. Ernest Hunt and children, Luva and Loyd, and the Marvin Land family.

Army Boys On Visit Here

Gerald Noble visited his parents over the week end. Gerald is another 'home boy' who is making good in Uncle Sam's service. He has recently been promoted to staff sergeant.

With him came Staff Sergeant Lobpreis, Sergeant Solley and Corp. Jones. The four have been stationed at Randolph Field, but were being transferred to the new air field at Enid, Okla.

These young men had a great time out at the Nobles home. They had plenty to eat and above all, slept as late in the morning as they wished.

PHYSICIAN BUYS MORE COWS

Stocking his section farm near Lelia Lake with 103 head of breeding cattle is Dr. B. L. Jenkins. He bought 45 head of white face cows and two good bulls from Geo. Powell of Quanah Saturday.

"We have plenty of grass and feed this season, and will make the most of it," the physician stated.

Donley's Oldest Pioneer Dies

Funeral services were conducted at the First Methodist church Tuesday at 2 p. m. for P. A. Buntin who passed away almost suddenly at his home here about 10 a. m. Monday. The services were conducted by the pastor, Rev. J. O. Quattlebaum Jr.

The Masonic lodge conducted rites at the graveside. Attending the casket were J. T. Patman, W. W. Taylor, H. B. Kerbow, W. W. Crawford, Frank Whitlock, Jerome D. Stocking.

Mr. Buntin was a native of Kentucky where he was born March 7, 1849. He was 92 years, 8 months and 24 days old at his death, and the oldest citizen in Donley county.

He came to the Panhandle in 1885, locating at Mobetie. Two years later he moved his family to Clarendon when the Dejeu road was completed to this point.

He was a charter member of the Masonic lodge, and the last surviving charter member of the organization of a Methodist church here.

He conducted the first dairy here at a place on the Sawyer farm north of town. At one time he owned and operated the mail line equipment from here to Silvertown. The route was through Palo Duro to Schott Gap up the steep Cap Rock, and back teams were changed at the Gap and Palo Duro in making the trip over the 60 mile trip in one day.

He established the Buntin funeral home about fifty years ago. Since aged forced his retirement, the business has been conducted by his son, Fred Buntin and Mrs. Buntin.

He is survived by two children, Mrs. E. T. McConnell of Ft. Worth, and Fred Buntin of Clarendon.

Navy Recruiting Officers Here December 11

The phrase "Tell it to the Marines" has been handed down through generations and sprung from an unknown source, yet there has never been a phrase more widely accepted and used.

The young men of Donley County will have an opportunity to "Tell it to the Marines" on December 11th and 12th and at the same time give themselves a Christmas present—that of becoming a member of the United States Marine Corps.

Sergeants Warren E. Ray and John L. Simpson of the United States Marine Corps Recruiting Service will establish a temporary recruiting office in Clarendon on those dates for the purpose of interviewing and examining young white men between 17 and 30 years of age, who are single, physically sound and of good moral character who desire to learn more of this famous military unit, according to Captain T. E. Kendrick, district recruiting officer.

The Leader force misses the skill, energy, suggestions, advice and explanations of John Jay this week while he is laid up with pneumonia. His resume of the war news each morning is likewise missed, as well as his explanation of the mistakes in war maneuvers across the pond. We hope Corporal John Jay gets back on the job soon. We miss him a lot here on the Leader force.

PHYSICIAN LOSES \$63 FRIDAY

Having been paid rent money by one of his tenants, Dr. B. L. Jenkins placed six bills together, and placed the bills in his pants pocket. No more was thought of the matter until he was ready to take the money to the bank for deposit next morning. The bills were missing.

There were three \$20 bills and three \$1 bills in the lot. "A liberal reward will be paid the honest man who returns them to me," the loser stated.

WENT TO VERNON

P. A. BUNTIN

Will Vote On AAA Program For 1942

According to county agent H. M. Breedlove farmers in Donley county and all over the cotton growing states will go to the polls and vote on the thirteenth of December as to whether they wish the cotton marketing quota program to be in effect in 1942. Marketing quotas on cotton have been in effect for the past four years and each year farmers have had a loan on cotton. One of the big things to remember in this election Breedlove said is that if marketing quotas are not voted in effect in 1942 then there will be no loan on cotton in the coming year.

Marketing quotas merely place a restriction on the acreage of cotton to be planted by producers in 1942 and if they do not plant over their allotment of acres then regardless of how much lint they make per acre it can be ginned free of tax. Breedlove said that in the past four years that quotas have been in effect that no farmers in Donley county have ever had to pay the tax on cotton for planting over the acreage allotment.

Cotton growers are advised by the department of agriculture to give this matter very careful consideration and be sure to go vote on the thirteenth of December. This program is purely democratic and will only be in effect if the farmers of the cotton growing states vote it into effect. This election does not only decide on the marketing quota on cotton but it decides the fate of the loan on cotton for the coming year.

All farmers will be mailed letters in the next few days Breedlove said advising them of the places in Donley county where they can vote on the Thirteenth and it will also be published in all local papers so that every one will know where to go vote. Any person interested in the production of cotton in 1941 is eligible to vote in this election.

SANTA CLAUS WANTS MORE LETTERS

Yes, old Santa wants to hear from more of our little folks. One little boy came in with his letter to Santa and thanked me for taking it. That little fellow of three years will be looking for that letter. Likely the same auntie that wrote it for him will be glad to read it to him. Our little folks can't find words to express their appreciation, but they DO tell us in actions. Write and send or bring that little fellow's letter to your Donley County Leader. We want to befriend little boys and girls all over the surrounding territory. Watch for that sparkle in the eyes of your little one when you tell them that "your letter is in the paper!" Do it now—today.

"We are here to serve the people, and will be reached by telephone. Call us. We are on duty twenty-four hours a day," the pastor said.

Rev. Hutson received his pastoral training in Phillips University, Enid, Oklahoma, holding his first pastorate when a high school senior at Lafontaine, Kansas.

Applicants For P. O. Queried

A representative of the U. S. civil service commission spent the last four days of the week here making investigations relative to the postmastership, a position for which eleven men made application back in May of this year.

Each of the applicants were questioned further in filling out incomplete questionnaires sent in with the original applications. The Department wanted more information.

A great many individuals and business men as well as rural patrons of the office were consulted relative to the fitness of the individuals who have made application for the position as postmaster.

The official here was merely making reports on certain needed information, and knew nothing about when or whom would become postmaster, he said.

The good people of that section came to the rescue of their unfortunate friends. Money and goods were restored in the new home. "We certainly feel grateful to our neighbors and friends," Homer Higgins said, "for they have been swell to us, and without their help, we would have had hard sledding following the fire loss."

SEPT. TRAFFIC DEATH TOLL WAS 159, GARRISON SAYS

A total of 159 persons were killed in traffic accidents during the month of September, State Police Director Homer Garrison said last week.

This brought the 10 month traffic death toll to 1,542, Garrison said.

The increase over 1940, which had gotten as high as 13 per cent in September, was cut back to a 10 per cent increase at the end of the month, which was, Garrison said, "faintly encouraging."

Garrison had predicted, from past figures, 195 deaths during September.

Ed Butler Dies Here Friday

Mr. Butler died following a long illness. He was 86 at the time of his passing and had resided in this section over forty years.

Some thirty years ago he came to Clarendon and was employed as baker in the Caraway cafe for several years. He operated a cafe in Hedley for some fifteen years.

Some two years ago, he and Mrs. Butler returned to make their home in Clarendon on East First street, since which time he had, because of age and illness, retired from active work.

More than forty years ago he was a favorite cook with the cow wagons. Few men learned to prepare "chuck" as the cowboy wanted it, better than did Ed Butler.

Plunk is in partnership with two fellows at Ft. Worth in conducting a general auto repair and garage business of some little magnitude.

While here, Plunk took up a number of friends, then visited relatives at Hedley while White, a son of Mr. and Mrs. F. A. White, endeavored to see as many friends as possible in their short stay of one day.

A PRAYER TO FRIENDSHIP

By Mabel Wilton
She was of different nationality than I. She was dark of skin while I was fair and blonde. Her religion was not mine, but she stood by my bedside and brushed the damp hair from my forehead and held my hand close in hers while I went through the "valley of shadows."

She was there like the rock of Gibraltar to lean on when I opened my tired eyes to the light, and reason came slowly back to my fogged mind—for she was my friend.

So, God, I thank Thee for friendship. It is such a beautiful word—Friendship.

Who is there in this life who hasn't known true friendship at some time or other and in one form or another? It is one of God's greatest blessings to humanity.

There is a heap of comfort and happiness in knowing you have just one true friend to stand by when the going is rough. When you are discouraged, weary and blue and everything seems to appear all wrong there is the precious solace of a dear friend to help carry on.

Friendship burns like a steady flame upon life's hearth radiating warmth into the coldest heart. It gives back in full, rich return for any losses or troubles we have to bear.

Like sunshine floods your rooms through the day, just so the sunshine of true friendship will flood your whole life if you will but open the portals of your heart.

There is no need to hide grief or care from a true friend, and once it is shared with someone your whole heart will seem lighter.

A little seed of friendship planted years before will grow into a flower of Heavenly fragrance.

Wisdom From Great Writers:

Youth is a blunder, manhood a struggle; old age a regret. • Nothing great was ever achieved without enthusiasm.

The only way to have a friend is to be one. • Genius is an infinite capacity for taking pains.

Love the offender yet detest the offense. • 'Tis not the whole of life to live, nor all of death to die.

Mr. and Mrs. D. E. Holt and babe, David, of Lefors, and Rachel Melton of Amarillo spent the week end here with their mother, Mrs. Karl Adams and husband.

STARLING'S JOB

One of the millions of laws on our statute books specifically charges the U. S. Secret Service with seeing that no harm comes to the President of the United States. To carry out the very letter of that law, the Secret Service maintains a special White House Secret Service detail (in addition to the many doormen, guards and the White House police), headed by genial Col. Edmund W. Starling. As chief of this important detail, it is Col. Starling's job to see that all necessary precautions are taken against any disturbance of the President's privacy or any injury to his person.

This is no easy assignment, even in peacetime when the routine precautions make the President virtually a prisoner of the Secret Service. Indeed, most Presidents, and especially Mr. Roosevelt who likes to come and go as he pleases, dislikes being such a prisoner. But they all have to bow to the law.

In times of emergency or wartime, of course, the Secret Service must redouble its efforts to make any attack on the President's person impossible. That is why the Secret Service has tightened its net of protection around President Roosevelt as the international situation becomes more critical.

Although no one really fears an attack might be made on the President, some of these new precautions are unusually thorough.

For instance, whenever the President drives across town these days, or goes to Hyde Park for rest and relaxation, the route is carefully investigated before hand. Even more exacting investigations are made before Mr. Roosevelt speaks or dines in public.

Thoroughness of these new precautions was revealed when the President attended the Navy Day banquet at a well-known Washington hotel. A week before the banquet, Col. Starling and his

staff fingerprinted and questioned all employees of the hotel, including the regulars and the extras to be called in for the big feast. A week later, when the Chief Executive accepted an invitation to the National Press Club President's dinner, the Secret Service moved in to make "arrangements," including questioning and fingerprinting of employees. This wholesale fingerprinting is said to have uncovered several persons with records, some of whom are still under suspicion as possible "subversive characters."

What'll They Think Up Next?

First plastics came out a substitute for wood and now they're treating wood with plastics. It's called "plasticized" wood, if you're interested, and if you don't like that one they'll offer you "compregnated."

The U. S. Department of Agriculture reports 10,420,000 persons employed in agriculture in the United States on November 1, nearly a half million below the total for November 1, 1940. This represented a decline of 1,112,000 workers from the number on October 1.

THE TEMPLE OF TRUTH
By the Apostle
FORTY YEARS AGO.
The old Apostle has that famed McGuffey reader poem, "Some Forty Years Ago." It will appear in your Donley County Leader

during the next three weeks. It is quite a lengthy poem. The name of the author has long been forgotten, but the deep sentiment of that homely old poem lives in the lives of millions of old people. As a compliment to our fine old friends, the poem will be given them to bring back those grand, old childhood memories.

INHERITANCE.
Every young man cannot in-

herit a lot of money from his parents. More of them inherit parental instincts—his mother's marvelous capacity for spending money, and his father's positive genius for not earning any.

GOING TO HELL.
Amused in talking with a young man recently bound for Burma to join up with the Chinese air corps to fight the Japs. He was asked what would happen

when those expert American flyers opened up over there. He summed it all up by saying, "when we get through with the Japs, the language of hell will be Japanese for millions of years!"

RUSHING SEASON.
Do your Christmas shopping early. Have a heart for the tired folks that must wait on you in the places where you are to make your purchases. Then mail your

packages early. A lot of folks do. Just look at the packages already coming in at the postoffice! A great big pile of them every day. That saves tired postal workers a lot and then, too, it insures safe delivery of packages. It is a calamity to be looking for something Christmas, then not get it because it was lost in the mad rush in the mail handling.

DONLEY'S OLDEST.
With the passing of that fine old character Monday, Mr. P. A. Buntin, the county lost its oldest citizen. "Dad" Buntin, as he was best known to his host of friends through the long years that he had lived here, was past 92. The oldest citizen now is Mr. C. R. Skinner who passed his 90th milestone Sunday, and another very fine old character and pioneer resident.

HEALTH CRAZES.
About ever so often we have an epidemic of life-savers. Now it is vitamins. There is a vitamin for about everything even to stopping ingrowing toenails. It recalls the big day of the "electric" belts. They were a cheap cotton affair with a flat piece of zinc attached that was to be placed over the central point of the pain. The user was cautioned to soak that "buzzer button" which never buzzed, in vinegar at times to renew it. Some folks actually recovered from the use of the belt and thought it a great idea until the sale of the fakes was stopped. A tin lid affair on a strip of cotton sacking material made at home would have been just as good and saved \$2.

The Thanksgiving turkey did not dwindle down to hash. He went modern by going through a food grinder and winding up in sandwiches. Great is modern ideas!

What'll They Think Up Next?
Ordinary water may prove a satisfactory answer to the cheese producers' most baffling problem, the packaging of natural cheese. Experiments conducted by the Wisconsin College of Agriculture show that natural cheese will keep in good condition if sealed in small, water-tight packages and stored under water at temperature of 40 to 60 degrees.

A reduction in freight rates on nursery stock will become effective December 1. This applies to Texas and all or part of 5 other states.

OH, SAY, CAN YOU SING?

Oh, say, can you sing from the start to the end.
What so proudly you stand for when orchestras play it;
When the whole congregation, in voices that blend,
Strike up the grand tune and then torture and slay it?
How valiant they shout when they're first starting out;
But "the dawn's early light" finds them floundering about.
'Tis "The Star-Spangled Banner" they're trying to sing.
But they don't know the words of the blessed old thing.
Hark, "The twilight's last gleaming" has some of them stopped.
But the valiant survivors press forward serenely
To "the ramparts we watched," when some others are dropped.
And the loss of the leaders is manifest keenly.
Then "the rocket's red glare" gives the bravest a scare,
And there're few left to face the "bombs bursting in air";
'Tis a thin line of heroes that manage to save
The last of the verse and "the home of the brave."
—Pathfinder.

Safety Assured for Tiny Tourists

Tiny tourists sometimes grow restless on long motor trips and their limitless energy and curiosity require double checking to insure that every safety precaution is being taken by their parents. With the entire rear compartment of the family Chevrolet as his personal playground, this youngster assumes a favorite perch that ordinarily would be dangerous. However, a simple adjustment, easily made by Chevrolet mechanics, converted the rear door handle to a safety-action handle, which "free wheels" and does not open the door. After the lock is adjusted to safety position, as indicated in the inset, the lock button is depressed and the inside handle then will not open the door, rendering it "child-proof." Release of the lock button enables the driver to open the door as usual.

THE CIGARETTE SPEAKS

(To a young girl over a period of years)
By Elizabeth Hassell
I'm just a friendly cig rette—
Don't be afraid of me!
Why all the advertisers say
I'm harmless as can be!
They tell you that I'm your "best friend."
(I like that cunning lie!)
And say you'll "walk a mile" for me,
Because I "satisfy."
So come on, girlie, be a sport!
Why longer hesitate?
With me between your pretty lips
You'll be quite up to date!
You may not like me right at first
But very soon I'll bet,
You'll find you just can't get along
Without a cigarette!

You've smoked one package, so I know
I've nothing now to fear;
When once I get a grip on girls,
They're mine for life, my dear!
Your freedom you began to lose,
The very day we met,
When I convinced you it was smart!
To smoke a cigarette!

The color's fading from your cheeks;
Your finger-tips are stained;
And now you'd like to give me up
But, sister, you are chained!
You even took a drink last night!
I thought you would ere long,
For those whom I enslave soon lose
Their sense of right and wrong.
Year after year I've fettered you,
And led you blindly on
Till now you're just a bunch of nerves,
With looks and health both gone.
You're pale and thin, and have a cough—
The doctor says "T. B."
He says you can't expect to live
Much longer, thanks to me!

But it's late to worry now;
When you became my slave,
You should have known the chances were
You'd fill an early grave.
And now that I have done my best
To send your soul to hell,
I'll leave you with my partner,
DEATH—
He's come for you! **FAH-E-WELL!**

Terracing To Much Bigger Factor

COLLEGE STATION—A terracing program of 25,518 miles of standard terraces is the goal of Texas farmers under the 1942 AAA farm program, according to Fred Rennels, assistant administrative officer in charge of the Texas AAA.

The extensive terracing program will be made possible by the conservation services or purchase order plan of the AAA program, he explained. The cost of terracing, established at a basic fair price for farms in a county, may be deducted from future AAA payments.

In arriving at a basic fair price for each county, the AAA official said that written offers will be made to county AAA committees by persons equipped to construct terraces. The farms used as a basic guide for establishing the fair price will be farms selected at random throughout the county and are not necessarily included in the 1942 terracing program.

Factors entering into fair and reasonable prices include the customary price normally paid in the county, the price at which farmers can obtain terracing service through other channels, and the value of terracing to farmers in conserving and improving soil fertility.

In determining fair and reasonable prices to persons constructing terraces, Rennels pointed out that consideration should be given to cost of constructing terraces, kinds of machinery and scope of area to be served, and a reasonable margin for construction work.

After establishing a basic fair price for a county, terracing will vary by farms, Rennels said in explaining that the cost could vary as much as 25 cents per 100 feet. Any increase over 25 cents per 100 feet would be sent to the state AAA committee for further consideration.

J. C. Butler of Borger spent the week end with home folks.

AAA Committee Election

COLLEGE STATION — The State AAA Committee has set Friday, December 19, as the date for election of community committeemen and delegates to the county convention.

The same procedure will be followed in the committee elections this year as in previous years, George Slaughter, state committee chairman, said. Farmers in each community will elect three committeemen who will serve during the coming year. At the same time, they will elect a delegate and alternate delegate to a county convention which will be held the following day. The convention will elect the county committee of three members and two alternates.

"Selection of the right men to serve as committeemen is more important this year than ever before," Slaughter, a Wharton county farmer, declared. "The Food-Freedom campaign has resulted in more work for committeemen, and it is expected that the follow-up on the campaign will require that committeemen spend more time working with the program than in previous years."

The AAA official emphasized the added importance of selecting the right man as county committee chairman, especially since he serves also as chairman of the county USDA defense board which administers the Farm Defense Program.

"County chairmen should be good organizers and leaders, capable of obtaining the fullest cooperation from all board members and farmers," Slaughter said.

The oil industry buys each year directly from agriculture lard oil, stearine made from cattle and horses, castor oil from the castor plant, neatfoot oil from horns and hooves, milk, fibreboard, hairfelt, leather, cotton fabrics, wood products and many other supplies.

Mr. and Mrs. A. J. Morris of Amarillo visited his mother, Mrs. R. M. Morris here Tuesday.

Earliest Silk Worm Venture

COLLEGE STATION—The current shortage of silk brings to mind the fact that Cortez imported silkworms and mulberry seed into Mexico back in 1522. Nothing much came of that.

Attempts have been made to start a silk industry in the United States since the days of the first settlers. The U. S. Department of Agriculture carried on experiments in silk production for some years but discontinued them in 1908 when the venture failed to show promise.

Brazil has had some success in producing silk but even there the production is far below domestic needs.

The main barriers to silk production in the United States are the large amount of hand labor required in caring for silkworms and the expense of the reeling process by which the cocoons are unwound and the strands blended to form threads.

Increased use of cotton and of the silk substitutes, such as rayon and nylon, are expected to take the place of silk in the domestic field. So far no substitutes has been satisfactory for parachutes and powder bags for large calibre guns.

GAME VIOLATIONS DON'T PAY

Back in December, 1940, a Missouri business executive and two friends came to Texas for a deer hunt. They didn't buy non-resident hunting licenses, which cost \$25 each, but instead bought the regular \$2 resident hunting licenses required of those who hunt outside of the County of residence.

But the Missourians couldn't beat the game laws of Texas. It took a year to do it, but the business executive from Missouri the other day paid fines totaling \$411 for himself and his friends, according to the Dallas Journal. The charges were pressed in justice court by the Game Supervisor for the Dallas area, who handled all details of the case.

The non-resident licenses would have cost the party only \$75.

There's quite a little difference between \$75 and \$411.

Barber—How is it you never seem to wear a clean shirt, Sambo?

Porter—Well, yo' see, mah wife's awful busy.

Barber—what does she do?

Porter—She takes in washing!

Hayton (at football game)—Look, our captain is going to kick a goal!

Hughberta—What did the goal do?

Leamon L. Wallace had business in Shamrock Monday.

More than 400 companies, all over America, are helping General Electric speed defense work by supplying parts that G.E. would make itself in normal times.

1. Two of these subcontracting firms ordinarily manufacture fishing tackle. Another normally makes watches, and still another makes carpets.

2. For making searchlights alone, subcontractors from five states prepare parts. About 75 companies contribute to building a steam turbine.

3. More than 150 different firms supply parts in a steady, scheduled stream for radio transmitting and receiving equipment for the armed forces.

4. Thus dozens of cities and small towns throughout America are becoming partners with G.E. in helping speed the national defense program.

WEDDING RING — What woman wouldn't thrill to receive that badge of happiness from Charles Boyer? But, alas, the one he gives alluring Olivia de Havilland in Paramount's "Hold Back the Dawn," opening Wednesday at the Pastime Theatre, is borrowed and is as false as his love until near tragedy kindles romance.

BOYER CLINCHES HIS TITLE AS FILMS' GREATEST LOVER

Something new in love-making, even for Charles Boyer, will come to the Pastime Theatre screen on Wednesday and Thursday when Paramount's "Hold Back the Dawn" opens with Boyer, Olivia de Havilland and Paulette Goddard in the starring roles.

According to the unanimous opinion of preview critics, the dark-eyed Gallic actor has the most exciting part of his career in this Arthur Hornblow, Jr., production.

In "Hold Back the Dawn," the handsome Boyer is a suave European scoundrel whose interest in women is in direct proportion to the size of their bank accounts. With the once gay sports of the Continent gone, perhaps forever, he turns to new lush fields in America but finds the United States closed to him by a small matter of the quota.

Marrying an unsuspecting American girl just to get across the border, and then planning to toss her aside in favor of a former dancing partner, doesn't worry the Boyer conscience any in this fast-moving romance drama. Miss de Havilland plays opposite Boyer as the little school teacher, his victim, and Paulette Goddard is the glamorous and worldly wise dancer.

Others in the top-flight cast are Walter Abel, as a U. S. immigration inspector, Victor Francen, the famous French screen and stage star who is making his Hollywood debut; Curt Bois, Rosemary DeCamp, Eric Feldary, Nestor Paiva, Eva Puig, Micheline Chierel, Madeleine LeBeau, Billy Lee and Mikhail Rasmun.

AIR-BORNE 'FLU'

The influenza virus can float through the air with the greatest of ease; it does not need personal contact or the forceful aid of a sneeze to spread. Such are the conclusions of two British scientists, which were recently published in the Journal of the American Medical Association.

The scientists, Drs. C. H. Andrews and R. E. Glover, experimented with ferrets. The ferrets were placed in rooms six feet square and nine feet high. At one side infected ferrets lived in floor-level, open-mesh rabbit cages; healthy ferrets were placed in cages on the other side of the room, three feet above the floor. Before the experiments, the rooms were thoroughly washed with creosol. In some cases, plywood screens were placed between infected and healthy ferrets, so that no droplets from the noses of sick ferrets could possibly fly across the rooms. Yet in various experiments with exposure periods of from four to seven days, 13 of 21 healthy ferrets contracted 'flu.

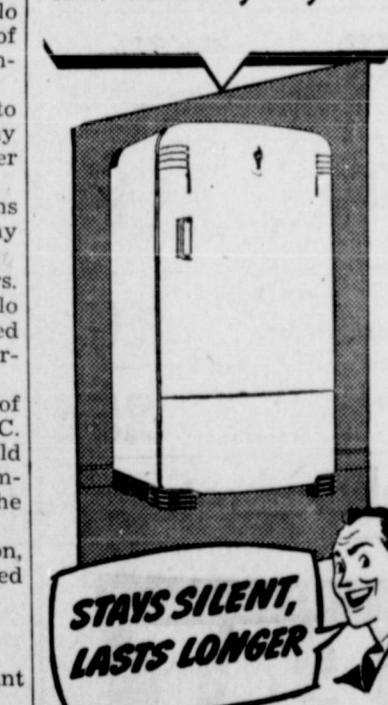

Influenza in itself is not a major illness. Doctors worry about it because it is frequently followed by pneumonia, whose germs find a fertile field in 'flu victims. Fresh air addicts will be glad to know
