the pace of the game. Shamrock was only behind by six and had the momentum. But Clarendon forced 4 turnovers in the fourth period, including pass interception by Weatherton and Drew Thornberry.

The defense stopped the Shamrock offense when it had to in the second half, which was fortunate. For the Bronco offense, which generated 231 yards and 14 first downs in the first half, managed only 41 yards and two first downs in the second half. The Irish ended up with 270 yards and 17 first downs. Their leading rusher was Bennett, who gained 92 yards.

Weatherton added 67 yards on 16 carries for the Broncs. The Broncs hit only one other pass besides White's touchdown catch. That was a fake punt conversion from Brad Thompson to Steve Nance, good for 21 yards.

The other statistics were almost all even, also. Shamrock turned the ball over 5 times to Clarendon 3, and the Irish were penalized 7 times for 75 yards while the Broncs were flagged 8 times for 58 yards.

This week the Broncs play Wheeler. The Mustangs have a very balanced attack with good execution. They also have a winning tradition, having been in the Class B state championship game each of the last three years, coming away with two titles. This game could decide who is in the playoffs at the end of the season, and will be played tomorrow at 7:30 at Bronco Stadium.

In the Malay archipelago, the animals on the western islands resemble species from Asia and on the eastern islands, from Australia.

The ancient Greeks tried to make rain by dipping oak branches in water.

TEXAS CONGRESSMAN Jack Hightower is shown receiving the Guardian of Small Business Award from Wilson S. Johnson, President of National Federation of Independent Business.

Eye Emergencies
You could become a victim of a potentially blinding eye injury.

If an accident occurs, says the National Society to Prevent Blindness, you should know what to do.

For a free first aid for eye emergencies sticker, send a stamped, self-addressed envelope to your state Society to Prevent Blindness or the National Society to Prevent Blindness, 79 Madison Avenue, New York, NY 10016.

open. Then seek medical attention without delay. Should specks get into the eye, lift the upper eyelid outward and down over the lower lid and let tears wash out the foreign particles. If they do not wash out, keep the eye closed, bandaged lightly and see a doctor. Never rub the eye.

"Don't you marry for money, but go where the money is." Alfred Lord Tennyson

Congressman receives small business award

The National Federation of Independent Business (NFIB), the largest small business group in the nation announced today that by voting in support of key small business issues 73 percent of the time during the 96th

Frm p 1

problem in the vicinity of the tank during periods of high usage. However, since some houses are on high ground, there will still be some 20 or 25 homes having static pressure of less than 40 per square inch.

B. NEW STANDPIPE IN WEST PART OF TOWN

It is proposed to erect a standpipe 120 feet tall near the existing elevated tank in the west part of town with a capacity of about 120,000 gallons. As at present, the water system in the vicinity will be isolated from the rest of the system, creating an area of high pressure. The advantages include:

1. All the present and future homes in that part of town will have adequate pressure and adequate water supply at all times.

2. There will be an additional supply of water in storage to meet emergencies.

3. There will be sufficient water at high pressures to fight a major fire in that vicinity.

C. NEW PUMP STATION IN WEST PART OF TOWN

To supply sufficient water to the new standpipe, it will be necessary to have larger pumps to pump from the low pressure system to the high pressure system. Pumps with a total capacity of 750 GPM should be installed so there will be an adequate supply to fight a major fire.

D. MAJOR LOOP LINES IN SYSTEM

8-inch line connections from the 14-inch supply line to the elevated storage tanks and also an 8-inch line between the two tanks are proposed. Connections will be made between these new lines and all major existing lines. This will help maintain adequate pressure and adequate water supply to the system during periods of heavy usage and particularly at times when large amounts of water are needed for fire-fighting.

E. REPLACING 1/2-INCH GALVANIZED STEEL LINES

There are a number of very old steel lines in the system which are badly corroded. These lines have lost much of their original capacity and so the supply to many meters is severely restricted.

These old lines are a major source of trouble and expense due to leaks which develop in them. If these lines are replaced, there should be a considerable savings in maintenance costs.

COST ESTIMATE-PROPOSED IMPROVEMENTS - CLARENDON WATER SYSTEM

A. Moving and Raising 80,000 Gal. Elevated Tank (including Foundations, Connections, Altitude valve, Painting, etc.) \$58,000.

B. New standpipe West Side of Town (13 ft. diameter by 120 ft. high) \$72,000.

C. New Pump Station West Side of Town \$40,000.

D. Major Loop Lines in System \$195,000.

E. Replacing 2-inch Galvanized Steel Lines \$55,000. Sub-total \$420,000. Contingencies \$47,000. Engineering and Testing \$33,000.

TOTAL ESTIMATED PROJECT COST \$500,000.

Notes: In the west part of town, a pneumatic pressure tank could be substituted for the standpipe at a savings of about \$45,000, but the system would not be as trouble-free or would not furnish as much fire protection.

A small pneumatic pressure system to serve domestic needs in the high area near the 80,000 gallon elevated tank could be installed for an estimated cost of \$55,000.

The residents attendance and opinion of the proposed improvement plan for city water will determine the course of action which the Clarendon Board of Aldermen will take in this matter.

Congress, U.S. Rep. Jack Hightower of Texas had earned its "Guardian of Small Business Award" and had been endorsed by NFIB's political action committee (NFIB PAC).

In announcing the award, Wilson S. Johnson, president of the 620,000-member group -- with 55,145 of those members in Texas -- explained that the "Guardian Award gives recognition to legislators who support small business, and at the same

Nebraska is the nation's leading grain producer.

time assures our members of how their legislator is representing them in Congress. "Quite often," says Johnson, "some legislators will claim support for small business by voting for such things as a Small Business Administration appropriations bill. We feel, however, that NFIB members should know how their legislator voted on each of those issues which we consider of key importance to small business."

NFIB PAC Chairman Dick Fisher noted that the endorsement of Representative Hightower comes after close scrutiny of his overall legislative record which clearly shows a concern for the 12 million or so small business operations in the country today. "Congressman Hightower has served his constituency well on a broad-based spectrum of legislation and has been an effective member of Congress in his work on the House floor and in committee," says Fisher. "He should be returned to Washington so that he can continue to fulfill the specific

needs and wants of his congressional district and the nation as a whole."

NFIB, which is nonprofit and nonpartisan, presents its "Guardian Awards" at the end of each Congress to those members who vote in favor of small business on selected issues at least 70 percent of the time. A total of 195 Representatives and 30 Senators qualified for the award this year.

My commission expires May 5, 1981

Emergency loans available from Farmers Home Admin.

Emergency loans for farmers, ranchers, or aquaculture operators are available through county offices of the Farmers Home Administration (FmHA), Harold Sherrill, FmHA county supervisor said today.

Mr. Sherrill asked that those who need farm credit as a result of adverse weather conditions make their needs known at the Farmers Home Administration office at Clarendon.

Applications for assistance in the disaster stricken county will be accepted by Farmers Home until July 20, 1981, for physical and production losses.

FmHA loans covering actual physical and production losses may be used to replace installations, equipment, or buildings lost through this disaster. Funds may be used to buy feed, seed, fertilizer, livestock, or to meet interest and depreciation payments on current real estate and chattel debts. Other loans, beyond actual losses, can be made for

annual operating expenses or to make major adjustments in a farming (or ranching or aquaculture) operation.

"Funds can be used for essential operating and living costs," Mr. Sherrill said.

Loans covering actual losses are made at an interest rate of five percent and are scheduled for repayment as rapidly as feasible consistent with the applicant's reasonable ability to pay. Loans beyond actual losses have various maturities, depending upon the purpose of the loan.

To be eligible for an emergency loan, an applicant must have suffered losses from the disaster and be unable to get credit from other sources.

Emergency loans can be used to help the farmer restore damaged farm operations and additional loans based upon the emergency designation can be used to reorganize the farm for greater efficiency and better production.

1926 Book Club Guest Day

On October 7, the 1926 Book Club met at the Patching Clubhouse for regular session. This was Guest Day. A special guest from Canyon, Mrs. Evelyn Frieze was guest speaker.

more, Mary Lee Longan, and Ann Edwards. Next meeting will be October 21.

The Social Committee, Katherine Green, Rachael Butler and Joy Martin, provided delicious refreshments, pumpkin roll, spiced tea, coffee, nuts and mints for the 40 persons present.

Mrs. Evelyn Frieze presented a very pleasant talk on the peculiarities and quirks of our English language. It was enjoyed by all present.

Members present: Inez Blankenship, Gladys Blackburn, Viola Bones, Evelyn Mann, Carolyn Hamilton, Verdine Herrington, Mary Thornberry, Dorothy White, Pauline Heath, Oressa Delaney, Pauline Morris, Norma Jones, Susie Shields, Frieda Tucker, Katherine Green, Rachael Butler, Joy Martin, Dessa Day, Mary Van Zandt, and Betty Veach.

DECADES OF GAS SUPPLY FROM TWO OF NATURE'S BEST-PROTECTED SOURCES.

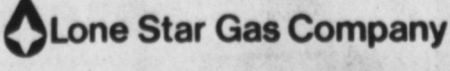

Did your mother ever hide some of her spare cash in a cookie jar, out of easy reach until she needed it?

Well, that's what Mother Nature did when she placed enormous deposits of natural gas in hard-to-reach places.

Enormous gas reserves are being developed in the deep basins and tight-formation basins.

explore five-mile depths and speed up the flow of gas through dense rock. And high-production gas wells are being completed in the deep and the tight basins.

Many industry experts believe that each of these sources can double the nation's current proven reserves. Exciting news, because Lone Star is well situated to buy your share of this new gas for the 1980's, the 1990's and beyond.

GAS. IT'S PLENTIFUL, EFFICIENT AND RIGHT FOR THE TIMES.

Chamberlain news

By MRS. H. HARRISON
Chamberlain Community Center held their regular meeting Friday night October 17th. There was a fair crowd in attendance. Lots of good food visiting and games.

We were so happy to learn that Miss Kim Taylor, daughter of Mr. and Mrs. Jim Taylor of Hedley was crowned 80-81 Queen of Hedley Cotton Festival Saturday night.

We were so sorry to learn Mrs. Carmen Wright had to enter the hospital. She is in St. Anthony's Hospital for treatment. We hope she's able to be home soon.

Mr. and Mrs. W.R. Chaney returned home Saturday from a camping trip to David Crockett National Park, Lufkin, Texas. They also attended the Chaney Family Reunion in Granbury before coming home.

Near, But Outside

By REV. WAYNE NAYLOR

A boy wandered out to help his dad milk in North Dakota and died within shouting distance of the house because of an intense blizzard blowing outside. He was near the house and the barn but died outside of both because he could not find his way in the storm. The Bible guides us to experiences with God through Jesus Christ, but we can still die without hope near, but outside. After a scribe had given Jesus some good answers about the commandments in Mark 12, Jesus told him, "Thou art not far from the kingdom of God." Mark 12:34. There are circumstances and associations in life that still bring some men closer to the Gospel than others. There are dispositions of mind and attitudes in certain persons towards it which make us very anxious that they should take but one decided step; which cause us to wonder why, when they are so near, they go no farther. They speak so discreetly about

religious things and have so amiable and reverent a spirit, that we feel as if Christ wold still single them out, as He did this scribe, and say tenderly, regretfully, may we not add hopefully? - "Thou art not far from the kingdom of God."

The biographer of Horace Bushnell tells us that the young student for seven years failed to find the power of Christ. There was nothing positively or distinctively Christian about him, and there was in him a growing spirit of doubt and difficulty as to religious doctrine; yet during all this time of grave perplexity and distress he was marked by scrupulous conscientiousness, stern integrity, purity, and honour, and in the end he became the confessor of Christ with the power of Christ.

The statement of Jesus to the scribe, "Thou art not far from the kingdom of God" indicates a nearness, but not at the conclusion about it; not FAR - no, but not IN.

Hardwick Partyline

By NORMA CORGILL

The Germania Insurance Company had their annual feed, Tuesday night at the city hall. There were 40 present. The meal was cooked and served by the ladies of the Lakers Homemakers Club.

The Friendship Club met Friday night with 26 present. Our attendance was off quite a bit, guess everyone was watching the ball games. But we had fun with lots of good eats and palyed domino's and 88.

Ruth Mills has been on our sick list this week with a cold

or virus. She has not been able to go to the center. Hope she feels better real soon.

Lena Howard, Norma Corgill visited with Mr. and Mrs. L.C. Keith Sunday afternoon.

Jim and Thelma Corgill were in Amarillo, a few days tending to business and Jim went for his check up. He was doing real good. The Dr. dismissed him and told him to go fishing.

Jay and Lena Mitchell have already gone south with the birds. They left for Zapata last Thursday.

Mrs. Susie Lucille Hopper graveside services held in Amarillo

Funeral services for Mrs. Susie Lucille Hopper, age 59, were held at 3:00 p.m. on Tuesday, October 21, 1980 in Memorial Park Cemetery in Amarillo with Don Stone, Pastor of the Hedley Church of Christ and Tom Harguess, Pastor of the Clarendon Church of Christ, officiating. Interment was in Memorial Park Cemetery in Amarillo with the arrangements under the direction of Robertson Funeral Directors.

Mrs. Hopper died at 12:40 p.m. on Sunday, October 19, 1980 in Hall County Hospital in Memphis after a lengthy illness. She was born January 17, 1921 in the Leslie Community in Hall County, and married Kermit Hughes Hopper on June 27, 1937 in Clarendon. She had been a resident of Lelia Lake for the past 10 years moving there from Tullia where she had lived for 17 years. She was employed as charge nurse at Medical Center Nursing Home in Clarendon at the time of her death. She was a member of the Greenbelt Chapter L.V.N. Association and was chosen as the 1980 L.V.N. of the Year by her chapter. She was a member of the Church of Christ.

Survivors include her husband, Kermit Hopper of Lelia Lake; three daughters, Mrs. Ramona Elliott of Canyon, Mrs. Lawana Selvidge of Happy, Mrs. Judy Nusz of Amarillo; her mother, Mrs. Kitty Walls of Memphis, one sister, Mrs. Luella Spurill of Amarillo; one brother, Ed Walls of Lakeview; and three grandchildren.

What did he yet need? He seemed to need a sense of the need of pardon or to recognise his own sin. He also did not recognise in Christ the divine Teacher or simply to come to express faith in that Savior or King. He could have been among the honest doubters who hesitate to take the step necessary to get them from outside to inside the kingdom of God. But Honest doubters usually are real seachers and hopefully will find the faith to step across before opportunity has ceased for them.

Whatever the "in the soul" fears and turmoils are for the individual who is near but outside be assured that He is only a prayer away and "It shall come to pass that whosoever shall call upon the name of the Lord shall be saved." Acts 2:21 Yours is a precarious position if you are near but outside. Our prayers is that you want to stay there.

Ruth Nichols Newton graveside services held

Ruth Nichols Newton, died Thursday, October 16, 1980 in Denton.

Services were held Saturday, October 18, 1980 at 9 a.m. in the Cindy Nichols Chapel of the First Baptist Church of Denton with the Rev. Larry Reynolds and Dr. L.L. Armstrong officiating.

Graveside services and interment were held in Citizen's Cemetery, Clarendon with Rev. Roy Sullivan, of the Calvary Baptist Church, officiating.

Mrs. Newton was the daughter of S.T. and Maude Nichols, former residents of Clarendon.

She attended Clarendon public schools and Nursing School at Jefferson Hospital in Houston. She was a registered nurse working in her profession for 40 years.

Survivors include a daughter, Elizabeth Newton Jones, of Bellarie; two sons, Bill Newton and Turner N. Newton, both of Houston; two brothers, Ruel Nichols, of Amarillo and Bob Nichols, of Denton and five grandchildren.

Mrs. Newton was a member of the First Baptist Church of Denton and the Order of the Eastern Star.

The family has suggested memorials be made to the American Cancer Society.

"A good neighbor doubles the value of a house." German Proverb

PUBLIC NOTICE

In compliance with Sec. 43(a) of Art. 1446c, V.A.C.S., West Texas Utilities Company hereby publishes NOTICE that it has filed, on September 30, 1980, its statement of Intent to make changes in its rates charged for electricity and services sold and rendered inside and outside municipal jurisdictions, such proposed changes to be effective November 4, 1980. Such Statement of Intent includes the proposed revisions of tariffs and schedules and a statement specifying in detail each proposed change, the effect the proposed change is expected to have on the revenues of the Company and the classes and numbers of utility customers affected. Gross revenues are expected to be increased 8.27 per cent by the new rates. Statements of intent were filed with the Public Utility Commission of Texas and with the following municipalities:

Ablene	Haskell	Quitaque
Albany	Hawley	Rankin
Alpine	Hedley	Rising Star
Anson	Impact	Roaring Springs
Aspermont	Iraan	Robert Lee
Baird	Jayton	Roby
Balmorhea	Juncton	Rochester

Dr. & Mrs. Smith attend meeting in New Orleans

Dr. George Smith, accompanied by his wife LeVerne, attended the Annual Scientific Assembly of the American Academy of Family Physicians (ASFP) in New Orleans.

opportunity to attend clinical seminars on 30 different topics and visit some 70 scientific and 380 technical exhibits.

Subjects covered in this four-day scientific session are of immediate interest to family doctors both in their everyday practices and in

their continual endeavors to keep abreast of the latest advances in medicine. This year, topics included hypertension, aging, diabetes, drug interactions, contraceptive counseling, and child-nutrition.

The American Academy of Family Physicians, head-

quartered in Kansas City, is the nation's second largest medical organization. It was the pioneer among medical organizations in requiring its members to take continuing medical education, its 48,000 members must complete 150 hours of mandatory continuing study every three years.

FACTS for YOU

TEXAS FARM BUREAU * RESEARCH

Foreign U.S. Investment

"The Wall Street Journal" of August 27, 1980 reported that foreign direct investments in the United States climbed 23% in 1979, reaching \$52.26 billion, which is still below U.S. direct investments in foreign countries.

The 1979 foreign direct investment increase in the United States was a record, exceeding the 22.8% rise in 1978 to \$42.47 billion. The 14.8% spurt in U.S. investment abroad, to \$192.65 billion, was the largest since the 16% rise in 1956, and it followed a 12% increase in 1978 to \$167.8 billion.

World Population

The Environmental Fund has published a table revealing the 1980 world population estimates. These estimates were prepared by Dawn Hill, under the direction of Robert C. Cooke, former president, Population Reference Bureau, Washington, D.C.

The chart reveals that the mid-1980 world population was 4,471.0 million, compared to a North American

population of 252.4 million. The U.S. population on the same basis is recorded at 228.4 million. The 1980 population figures are derived from "Population and Vital Statistics Report", Series A, Volume XXII, No. 1, January 1980, United Nations, New York.

The world birth rate per 1,000 is 30, compared to a death rate of 12 per 1,000. The North American birth rate is 15 per 1,000 compared to a death rate of 8 per 1,000. The U.S. birth rate is 15.4 per 1,000 and the death rate is 8.5 per 1,000.

4-H Dog Project meets

The Donley County 4-H Dog Project met Saturday, October 15, at 2 p.m. at the old high school gym.

Instructors Bob and Vera Lee Andis took each person and their dog through the heeling and sitting routines and gave orders on how to make the dogs perform better.

Those attending were

Christy Knorpp and Mitsy; Teresa Percival and Michelle; Brett Harbert and Mr. C. Jennifer McAnear and T.J.; Glenn Harbert and Mufkins; Christi McAnear and Meagan; Lynn Alderson and J.W. Shields who were handling two of the Andis' Australian Cattle dogs, Rea and Munya.

Next meeting will be at 2 p.m. Saturday, October 25, at the old high school gym.

All 4-H youths are invited to come and participate in the dog program and any area youths are invited to join the 4-H organization. For information contact Gary Harbert at 874-3910.

DO-IT-YOURSELF!

Considering the uncertain state of the economy, the fact that modern employment schedules provide more free time, and the difficulty of getting a repair or improvement contractor when most needed, it's no wonder homeowners and apartment dwellers, too are becoming skilled amateur repairers and improvers in ever-increasing numbers.

While expense-saving is doubtless the main attraction, pride of personal accomplishment in expanding one's capabilities comes a close second.

If you think you're "all thumbs" and have therefore shunned the do-it-yourself trend, why not try with a very easy but highly rewarding project requiring only basic and minimal investment tools?

Surveys show that more storage is a major need of most families—shelves are a quick answer, with only a measuring tape, saw and hands.

screwdriver to complete the job.

Dripping faucets are a nuisance, energy-wasteful, and really inexcusable when a few washers, a Crescent adjustable wrench and that same screwdriver will solve the problem.

Is the lawn mower's rotary blade just chomping, not cleanly cutting the grass? All it takes is a "Home and Garden" file to restore a once-sharp edge.

If lack of experience makes you hesitate, talk to your neighborhood "know-how" hardware dealer. He's been a do-it-yourselfer for years, and he knows lifetime quality tools. Tell him Cooper the Toolmaker sent you—you'll be in good hands.

FTA workshop held

This joint conference, first meeting of its kind ever to be held in the United States was October 6-9 at the Rivergate Exhibition Center in New Orleans. More than 7,000 family physicians from around the world were expected to attend this continuing medical education meeting.

Dr. Smith, who is a member of the Academy, heard internationally renowned speakers discuss up-to-the-minute health care topics. He also had an

Tuesday morning, October 14 Miss Betty Veach advisor accompanied the Clarendon F.T.A. officers to a District XVI FTA officers workshop at WTSU Activities Center in Canyon. The purpose of this workshop was to get the officers of the local Chapters in District XVI on the road to organizing and planning their programs for local chapters; the district convention coming up in November was planned by the District

XVI officers.

District officers for 1980-81 are pres.-Jerry Elizardo, Amarillo-Palo Duro; vice pres.-Ty Mayfield, Panhandle H.S.; Corresponding sec.-Debbie Chitwood-Palo Duro, Amarillo; recording sec.-Puff Piehl, Canyon; financial sec.-Dan Brown, Claude, H.S.; parliamentarian-Rick Hayes, Clarendon H.S.; historian-Joe Carranza, Dalhart H.S.

The District officers and their advisors attended a luncheon meeting at the Railroad Crossing Rest. in Canyon.

Also at the meeting, candidates running for a district office were to be turned into the district president. There will be 2 candidates from Clarendon. Stella Robinson wants to be enclosed by the district as a candidate for state recording secretary to State Convention in February at San Antonio, and Dianne Havens is running as a candidate for District historian.

would like to be, call the county agents office 874-2141. We have room for you!!

The annual 4-H bean supper is to be held November 7 in the High School Cafeteria from 5-7 p.m. preceding the Wellington game, all proceeds go to the Donley County 4-H to cover expenses for those wishing to attend electric camp, help those going to state in projects, Adult leader training, and to purchase supplies needed to use in several projects. Your attendance and help is needed and deeply appreciated.

See you there!

A CHILD'S EYES

Every child should have an eye exam before age six. That's the critical time to catch the eye condition amblyopia (lazy eye) -- later may be too late.

To help identify children with eye problems, the National Society to Prevent Blindness sponsors preschool vision screenings in many areas. A free do-it-yourself Home Eye Test for Preschoolers is also available.

For a copy of the test or other information, write to your state Society to Prevent Blindness or the National Society to Prevent Blindness, 79 Madison Avenue, New York, N.Y. 10016.

Birthdate of Texas Patriot marked by release of book

Among those active in the struggle for Texas independence was Mexican-born Lorenzo de Zavala, a signer of the Texas Declaration of Independence and provisional vice-president of the Republic of Texas from March to October 1836.

Born October 3, 1788, in Yucatan, Zavala was a liberal and staunch advocate of democracy. He served in the National Congress of Mexico and as governor of the State of Mexico during the 1820s but was forced to flee his native land in 1830 because of the unfriendly political situation. Zavala recorded his experiences during the next year or so, when he traveled through much of the eastern United States, in "Journey to the United States of North America," which he wrote in Spanish to inform his fellow Mexicans about the customs, development, and political philosophy of the United States.

The first published English translation of Zavala's "Journey" has recently been released by Shoal Creek Publishers of Austin. The translation by Dr. Wallace Woolsey, former chairman of the Department of Foreign Languages at Texas Woman's University, gives a fascinating glimpse of the United States and its people in the early 19th century.

In "Journey," Zavala described and commented on a wide range of topics—commerce, politics, religious activities, public education, factory life, and slavery, which he considered abhorrent and an anomaly in a country professing democratic principles. In true travelogue fashion, Zavala also described the places he visited, the quality of the inns where he stayed, and the habits and character of the people he met.

After returning to Mexico in 1832, Zavala served briefly as minister to France. Soon realizing that Santa Anna was a dictator, Zavala re-

4-H News

By KIM FORMWAY
The Donley County Greenbelt 4-H Club held their regular monthly meeting Monday, October 20, at 7:30 p.m. in the college cafeteria.

Our Pres. Jack Craft called the meeting to order. The minutes from the last meeting were read by Sec. Karen Alderson and then approved as read.

Lynn Alderson led the Pledge to both the American and 4-H Flags, also the 4-H prayer and moto.

Pres. Jack Craft then called for progress reports from the following projects: Horse-Virginia Clifford, Dog-Lynn Alderson, Rifle-Jay Gage, Beef-Jack Craft, Poultry-Alan Estlack, Swine-Susan Mann, Foods and Nutrition-Jeannie Formway. If you are not already enrolled in a project and

Anderson Clayton buy Igloo Corp

Anderson, Clayton & Co. of Houston, Texas and the Coca-Cola Bottling Company of New York, Inc. today announced the completion of the previously disclosed purchase by Anderson Clayton of the Igloo Corporation from Coke of New York for approximately \$50 million cash.
Igloo, with combined sales in 1979 equalling nearly \$70 million, manufactures and sells nationally a broad line of plastic ice chests and coolers under the Igloo and Playmate brand names and in addition owns two subsidiaries involved in other plastic manufacturing operations, Impact Extrusions, Inc. and Thermoplastics, Inc.
Anderson Clayton is a Houston-based food company whose major operations are in the United States, Mexico and Brazil. It processes and markets consumer and institutional foods, oil-seed products, and animal and poultry feeds. The Company's non-food activities include Ranger Insurance Company, American Rounders Life Insurance Company, Long Reach Manufacturing and Gulf Atlantic Distribution Services. Anderson Clayton is listed on the New York Stock Exchange under the symbol AYL.

Waterfowl hunting seasons set

The Texas Parks and Wildlife Commission has approved season dates and bag limits for the state's 1980-81 waterfowl hunting seasons.
Hunters will notice very few changes in the regulations from the previous year. No changes were made in the point values assigned to the various duck species in the 100-point system of daily bag limits except for a removal of the fulvous (whistling) duck from legal status. No changes were made in bag limits for sandhill cranes, snipe or woodcock.

The High Plains Mallard Management Unit duck season is October 28, through January 18, from 1/2 hour before sunrise to sunset. The unit is roughly the western one third of the state.

The duck daily bag limit is one to 10 in the aggregate, the specific daily limit depending on the sexes and species taken as determined by the following 100 point system.

Texas Parks & Wildlife assumes interim operation of USS Texas Battleship

The Battleship TEXAS, anchored as a memorial museum in the Houston Ship Channel, will come under operation of the TP & WD for the 1980-81 fiscal year. Interim responsibility is being transferred from the State Purchasing and General Services Commission.
Both the battleship and adjoining San Jacinto Battleground State Historical Park are highly popular visitor attractions.
No changes are planned in the current fees and tours. Admission to the battleship for ages 12 and over is \$1.50;

carry on his person a valid Migratory Bird Hunting and Conservation Stamp, commonly called a "duck stamp", in addition to a valid resident or non-resident Texas hunting license.
As was the case last year, sandhill crane hunters are required to obtain a free sandhill crane hunting permit. There is no limitation on the number of crane permits to be issued and they may be obtained by writing the Texas Parks and Wildlife Department, 4200 Smith School Rd., Austin, TX 78744. Sandhill crane hunting is lawful only in the two zones established by the department. Consult your Migratory Game Birds hunting regulations brochure to be sure of the exact boundaries.

The daily bag limit on coots is 15, and possession limit is 30.
The goose season west of U.S. Highway 81 will be October 28 through January 18.
Each waterfowl hunter 16 years of age and older must

ages 6-11, 50 cents, under 6 is free. It is open every day of the year. From September 1 through April 30, 10 a.m. to 5 p.m.
The U.S.S. TEXAS, only survivor of the dreadnought class, is a veteran of two world wars and many campaigns. It has been moored at the battleground since San Jacinto Day, 1948 as the flagship of the Texas Navy. The State of Texas was the first to save its namesake battleship from the scrap heap, with N. Carolina, Alabama and Massachusetts since following suit.

PUBLIC NOTICE

BRIEF EXPLANATORY STATEMENTS OF PROPOSED CONSTITUTIONAL AMENDMENTS GENERAL ELECTION NOVEMBER 4, 1980

PROPOSITION NO. 7 ON THE BALLOT
House Joint Resolution 121 proposes a constitutional amendment that would authorize counties with a population of 5000 or less to construct and maintain private roads if they impose a reasonable charge for the work. The Legislature by general law may limit this authority. Revenue received from private road work may be used only for the construction, including right-of-way acquisition, or maintenance of public roads.
The proposed amendment will appear on the ballot as follows:
"The constitutional amendment authorizing counties with a population of 5000 or less to perform private road work."

PROPOSITION NO. 8 ON THE BALLOT
Senate Joint Resolution 36 proposes a constitutional amendment that would change the jurisdiction and authority of the State's appellate courts. The amendment would change the name of the Courts of Civil Appeals to Courts of Appeal and provide that these courts have intermediate appellate jurisdiction over both criminal and civil cases. The amendment would change titles for the Associate Justices of the Supreme Court to Justices and would require members of the Supreme Court to be attorneys licensed in this state while holding office.
The proposed amendment will appear on the ballot as follows:
"The constitutional amendment to change the name of the Courts of Civil Appeals and the names and qualifications of the Justices of the Supreme Court to be attorneys licensed in this state while holding office."

PROPOSITION NO. 9 ON THE BALLOT
House Joint Resolution 54 proposes a constitutional amendment which defines separate property owned by either spouse as all property, both real and personal, of a spouse owned or claimed before marriage, and that acquired afterward by gift, devise or descent. Persons about to marry and spouses, without the intent to defraud pre-existing creditors, may by written instrument from time to time partition between themselves all or part of their property. Spouses may exchange a community interest in property owned or to be acquired for a community interest in other community property. The amendment would allow spouses to agree in writing that income or property arising from any separate property is to be separate property rather than as community property as it would be in the absence of an agreement. The amendment proposes that a gift from one spouse to another is presumed to include all income or property deriving from such gift.
The proposed amendment will appear on the ballot as follows:
"The constitutional amendment allowing spouses to agree that income or property arising from separate property is to be separate property."

D.C. Appropriations bill passed
Congress passed the D.C. Appropriations bill by a vote of 215-158. "The city leans on a Liberal Congress for the Federal government to furnish 43% of their budget," remarked Congressman Collins.

IT'S A FACT!

According to the U.S. Geological Survey, federal lands contain about 40 percent of America's undiscovered oil, 47 percent of its undiscovered natural gas, and 40 percent of the total known U.S. coal reserve base.

SARPALIUS FOR SENATE

An Effective Conservative

Humanitarian:
Bill Sarpalius and his two brothers were raised at Cal Farley's Boys Ranch. After college graduation, Bill returned to Boys Ranch with his wife, Donna, and his son, David, to work for five years as a staff member and teacher.

Agriculture:
A former State President of the Future Farmers of America, Bill Sarpalius has earned both Bachelor and Masters degrees in Agriculture from Texas Tech University and West Texas State University. He understands the importance Agriculture plays in our economy.

Educator:
As a school teacher Bill Sarpalius understands the value of a good education. As a parent, he is concerned with the role quality education plays in the future of our state.

Businessman:
As a businessman, Bill Sarpalius can relate to the problems facing businesses in the 1980's. A longtime District resident, Bill is sensitive to the needs of business in the area.

Experience:
Bill Sarpalius understands the Texas Legislative process. He believes that to be an effective State Senator you must make yourself available to the people. Bill intends to do this through the use of a mobile office.

"I believe we must go back to having an effective voice in the State Senate... someone who will listen to the people and work for their concerns."

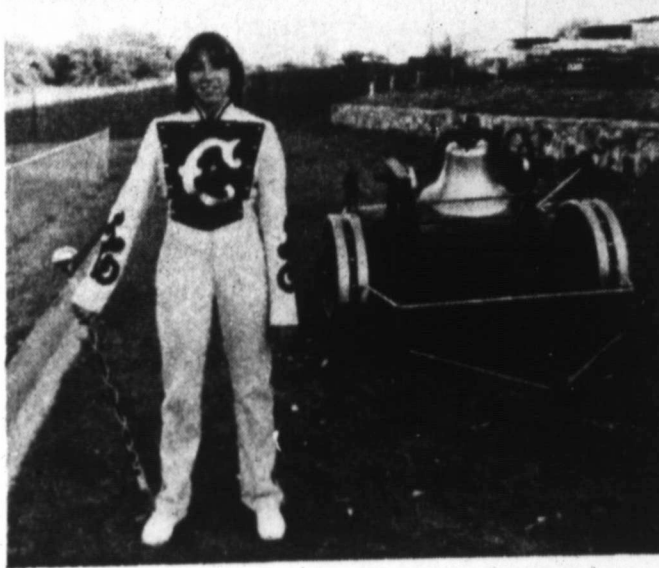

It's Time For A Change

Bill Sarpalius for 31st Senatorial District

DOROTHY BRADDOCK,
Drum Major

Smoking is the major cause of emphysema

For years, researchers have known that smoking is the major cause of emphysema. Now they are beginning to find out why.

According to the American Lung Association of Texas, the lungs function normally if there is a vital balance between two substances—two enzymes.

One enzyme called elastase actually digests the rubbery fibers that make the tiny air sacs in the lungs elastic. The other enzyme exhibits the first so that it doesn't get out of control and severely damage the fibers.

Among emphysema victims, a very small fraction inherit the disease and develop emphysema even if they do not smoke. Most emphysema patients, however, have smoked heavily for many years. But those who inherit the disease have a deficiency of the second enzyme. As a result the uninhibited elastase enzyme devours the tissues of the air sacs. The air sacs cannot exchange oxygen and carbon dioxide properly. The emphysema patient must struggle to breathe 20 to 25 times a minute instead of the normal 15. In its advanced stages the disease is agonizing.

In "smoker's" emphysema, the problem is more complicated, according to new research from the National Institutes of Health. By comparing lung fluid from heavy smokers with fluid from nonsmokers, investigators found that the second-inhibiting enzyme was present; but it was not doing its job. A chemical in smoke called an oxidant apparently turns off the second enzyme.

"Every individual who smokes shows some signs of emphysema," says Oscar Auerbach, M.D., who recently was awarded the Trudeau Medal from the American Lung Association for his years of study that documented the correlation between the amount of lung damage and the amount of smoking.

To find out more about quitting smoking and preventing such diseases as emphysema, contact the American Lung Association of Texas—the Christmas Seal people. Write ALAT: 7701 N. Lamar, Suite 104, Austin, Texas 78752 or phone 512/458-2206. Tax-deductible contributions to the lung association help in the fight against lung disease. It's a matter of life and breath.

Mrs. D. T. Smallwood celebrated her 90th birthday

Mrs. D.T. Smallwood celebrated her 90th birthday, Sunday, October 19, 1980 in the home of Bill and Claudine Todd, with a big birthday dinner and party.

A big 3-tiered birthday cake baked and decorated by Frankie McAnear and daughter, Jeanie Echols, was the center of attention. Mrs. Smallwood wore a beautiful corsage, made by a gifted granddaughter, Kathy Cross of Pecos.

All 3 of Mrs. Smallwood's daughters and their husbands were present: Caludine and Bill Todd and Frankie and Granville McAnear of Clarendon and Mamie and Marion Cross of Denton, Texas. Grandchildren and great-grandchildren attending were: Jeanie Echols of Albany and Jan Matthews of Lubbock, Mr. and Mrs. Ronnie McAnear and children, Todd, Jennifer, and Elizabeth of Clarendon; Mr. and Mrs. Billy Cross and sons, William and Josh, of Pecos, Texas; Mr. and Mrs. Jack Robinson and daughters, Heather and Meagan of Amarillo.

Two of Mrs. Smallwood's nieces were also present. They were Mildred Hendrix and Mary K. and her husband H.L. Riley all of Clarendon.

Friends attending were Lessie Salmon, T.W. McAnear, Mark McAnear,

and Gary Lewis all of Clarendon.

Mark McAnear entertained the whole group with guitar music, but more especially Mrs. Smallwood. Mark pleased Mrs. Smallwood very much by playing "The Spanish Fandango," one of Mrs. Smallwood's favorite compositions because she used to play it herself. Mrs. Smallwood was quite a guitarist when a girl and young woman. She played with a group when entertaining families and friends, as well as playing on special occasions. But her domestic duties and the rearing of three daughters caused her to postpone her guitar music, and then finally giving it up altogether. Mark's playing "The Spanish Fandango" brought back many pleasant memories to Mrs. Smallwood which she shared with the group.

Little great-granddaughters and great-grandson helped Mrs. Smallwood to blow out the candles on her beautiful birthday cake after the group had sung "Happy Birthday" to her.

Mrs. Smallwood received a bunch of nice gifts, many, many cards from other relatives and friends, plus telephone calls from grandchildren, great-grandchildren, other relatives, and friends who remembered her.

CANCER ANSWER LINE American Cancer Society
M. D. Anderson Hospital and Tumor Institute

Question: "Are all tumors found in the prostate cancerous?"

ANSWERline: No. The most common tumors found in the prostate gland are benign. For example, more than 50 percent of men in the U.S. over the age of 50 years have some degree of benign prostatic hypertrophy which causes enlargement, and can cause obstructions which can interfere with urination. This condition is not cancerous.

Question: "Do non-smokers get lung cancer and if so, why?"

ANSWERline: Although approximately 80 percent of the 112,000 cases of lung cancer that will be diagnosed this year will be related to cigarette-smoking, nonsmokers will develop this disease as well. Lung cancer cause has been associated with occupational hazards. For examples, miners exposed to radioactivity, and workers exposed to hot gases from tar, dust, and gas generators, and those exposed to asbestos, chromates and nickle, are at higher than normal risk of developing lung cancer. Also, if a person who faces this kind of occupational hazard is a cigarette smoker, the lung cancer risk increases above the lung cancer risk of a co-worker who does not smoke.

Question: "Can wearing dentures cause cancer?"

ANSWERline: Although scientists do not yet know what causes oral cancer, they have identified many factors that contribute to its development. Among them are poor oral hygiene and chronic irritation such as that caused by jagged teeth, projecting fillings and ill-fitting dentures. If you experience discomfort in wearing dentures, you should ask your dentist to determine the cause and to do a thorough examination of your mouth.

Question: "If a woman has breasts of different sizes — one larger than the other or differently shaped — is she likely to get breast cancer?"

ANSWERline: It is not unusual or dangerous for breasts to be of different sizes. If, however, something seems changed about the size or shape of one or both breasts, it is important to check with a physician because of the possibility of breast cancer. This is why a careful monthly look and personal examination of one's breast is so important: to detect something that may not have been present a short while earlier. Free information about breast self-examination is available from the local American Cancer Society Unit. Breast self-examination only requires a few minutes each month and can do a great deal towards safeguarding a woman's health.

Do you have further questions? Call your local unit of the American Cancer Society or call M. D. Anderson Hospital & Tumor Institute's Cancer Information Service, 1-800-392-2040 toll-free in Texas, 792-3245 in the Houston area.

NEWS OF CARS

We Americans buy nearly eight million new cars every year. Now, some of these cars have been redesigned to make driving them a lot easier.

This year, our car, for example, has a new Master Control Position that provides improved driving position, increased glass area and convenient steering column-mounted controls.

In addition, this latest LTD from Ford has been redesigned to offer you an improved instrument cluster. It could help make driving more of a pleasure than ever.

FLAG BEARERS l to r Tish Robinson, Wendy McCombs, Diane Havens, Susan Mosley and Kay Bell.

111 Ways To Control Your Electric Bill

If you have been faced with rising home energy costs, you are probably well aware of the need to conserve fuel and use it wisely. Conservation is of itself a good thing, a common-sense habit that should be adopted for all of our natural resources, but most especially energy.

Now, the Edison Electric Institute has made available to your local electric utility company a booklet entitled 111 Ways to Control Your Electric Bill. Residential applications of electricity offer great opportunities for using energy wisely. 111 Ways to Control Your Electric Bill shows you how to use these opportunities in the major areas of home heating and cooling, lighting, cooking, water heating, laundering and refrigeration.

Though many of the tips in the booklet may be familiar, many are new. For example, in the heating season, the water vapors emanating from bathing and cooking are beneficial because they help to humidify the home. So use kitchen and bath exhaust fans sparingly.

During the summer don't position heat-producing devices like lamps or television sets beneath a wall-mounted thermostat for a central cooling system. Heat rising from the thermostat to read a temperature higher than the true room temperature and lead to overcooling.

When cooking, develop the habit of keeping lids on. Tightly fitted lids help keep heat within the utensils, permitting the use of lower temperature setting and shorter cooking times.

One of the biggest energy users in your home is your hot water system. Once or twice a year, drain a bucket

of water out of the bottom of the heater tank — sometimes it is full of sediment. The sediment insulates the water in the tank from the heating element; that wastes energy.

These are just four examples of how to become energy efficient. There are 107 more ideas in the booklet, which you can obtain from your local utility company by writing or calling.

Inspect The Roof For Signs Of Age

If one or more of your neighbors is having a new roof installed, it may be a signal to check your roof for signs of age, especially if the roof is over 15 years old.

A roof of standard shingles, 15 years old or older, is a good candidate for reroofing. Other signs of age are:

- Leaks, or signs of leaks found during an inspection.
- Cracked, curled or missing shingles.

QUICK QUIZ

To find out how flexible your mind is about exercise, try this little quiz:

1. In what sport can you run, catch, throw and stretch your way to a better-looking body? (a) baseball (b) Ultimate (c) both of these?

2. How many companies make the Frisbee disc? (a) one (b) ten (c) 25?

ANSWERS: 1. (c) Baseball offers good exercise, but Ultimate, a new game played with a "Frisbee" disc, can be even more fun and requires teams of only seven players each. 2. (a) There are other companies that make a flying disc, but only Wham-O Mfg. Co. produces the Frisbee disc.

Who goes out of this world for you?

We do... General Telephone. This is one of our earth stations. It beams 18,000 phone calls at a clip to a satellite hovering more than 20,000 miles above the equator. It gathers in the same number of calls, and sends them out over our regular telephone network. It's part of the incredibly complex system that's just about the world's most efficient communications system. And it has reliability built in, whether

it's an earth station talking to outer space, or a cute little phone built like Mickey Mouse. Because we realize how important it is to keep you in touch with your world.

We spend hundreds of millions of dollars every year, making sure that when you pick up your phone... It works.

We keep you talking.

Nancy Bozeman D.V.M.

Nancy Bozeman, D.V.M. associated with Deyhle Veterinary Services Inc., fits the classic image of the All-American girl who comes from a wholesome family and goes out to seek her fortune. Nancy is one of eight children in her family, is a native of the panhandle, helped work her way through college and likes small towns and feels it is a privilege to work with Dr. Charles E. Deyhle Sr., his son Dr.

Charles E. Deyhle Jr. and be associated with professionals who contribute so much to their field.

In addition to the D.V.M., degree, Dr. Bozeman has a B.S. and M.S. in Animal Science and a B.S. in Veterinary Science. These degrees were earned by the same young woman who began her college education at Texas Tech as an art major.

Coming from a farming background and an active school life including 4-H and horses and other pets, Nancy made the decision to do something she loved dearly, work with animals. She transferred to Texas A&M and in the spring months of 1980 did her externship in Clarendon at Deyhle Veterinary Services Inc. Upon graduation in August of this year she began her veterinary practice with the Clarendon firm.

Attending public schools in Tullia and Perryton, Dr. Bozeman helped pay her advanced educational expenses by working too. She gave riding lessons, waited on tables and trained horses. Nancy comes from a family of achievers. Her oldest brother builds pipe organs, plays the organ, has studied in Europe and lives in Boston. Her youngest brother is in the oil well business, another is a spray pilot and yet another is engaged in farming. They are into a variety of businesses. Her sister is married to a now retired Air Force career man and resides in Ft. Worth.

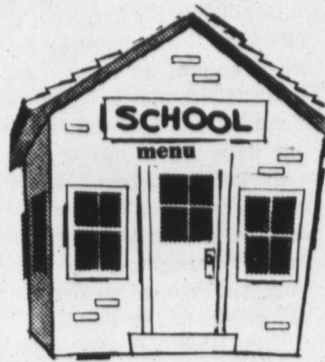

Clarendon Press, Thur., Oct. 23, 1980

Nancy Bozeman D.V.M. has an almost limitless number of things she is interested in. She is captivated by Clarendon and its history, she likes history of the area, or any given area and region and like a growing number of persons is busy at tracing family history.

She has pets, a cat named Kenneth, who, she candidly admits rules her life. Kenneth is seven years old and she has known him from the moment of his birth, when he arrived twice as large as any kitten in the litter. She says his pedigree is not impressive, but he is. Murt is her Blue Heeler who is not in residence at present but will come when Nancy gets settled in.

She also has horses and rides but has not done so recently because of knee surgery. She has trained and shown English style riding.

Justifiably proud of her D.V.M., energetic and full of enthusiasm, Dr. Nancy Bozeman feels that the chance to work at the veterinary clinic with Dr. Dr. Charles E. Deyhle Jr. is an exceptional opportunity for her. To see the research they do and its results is a once in a lifetime exposure to a very specialized area of her profession.

Clarendon

October 27-31

Monday Baked Fish with ketchup, blackeyed peas, buttered potatoes, corn bread, peach halves and milk.

Tuesday Tacos with cheese, buttered corn, tossed salad, chocolate cake and milk.

Thursday Corn dogs, mustard, macaroni and cheese, cabbage slaw, brownie and milk.

Friday Hamburger, French fries, ketchup, slice onions, and tomatoes, fruit jello and milk.

Texas smokers may get burned

State Comptroller Bob Bullock warned that Texas smokers who try to stretch their tobacco dollars by purchasing mail order cigarettes may end up getting burned.

Bullock said advertisements have appeared in Texas recently offering mail order cigarettes and that the tobacco products do not carry the state's tax stamp.

"Cigarette bargains can go up in smoke quicker than a cheap cigar in a hurricane if the tobacco taxes aren't paid," Bullock said.

He said purchasers are required to pay his office \$1.85 a carton on cigarettes they order from out-of-state and may be liable for a \$1.85 a carton penalty if the tax is not immediately reported.

Two firms have been advertising cigarettes for \$4.75 a carton, but that price does not include the \$1.85a carton tax, he said.

Federal law requires out-of-state firms to provide the Comptroller's office with a list of Texas residents who purchase cigarettes outside the state.

State law makes possession of more than 10,000 untaxed cigarettes--50 cartons--a felony.

Early college football in the Texas Panhandle

Although the dean of the West Texas State University College of Education has discovered the difficulty of comparing today's game of football to early attempts, he has found interesting facts about early college football in the Texas Panhandle.

In a study titled, "College Football in the Panhandle During the Early 1900s," Dr. Fred Stoker found that at least six colleges established before the opening of WTSU in 1910 organized football teams.

The colleges, which actually provided instruction beginning at kindergarten through junior college levels, were located at Clarendon, Goodnight, Canadian, Hereford and Plainview.

Stoker has studied the history of defunct colleges in Northwest Texas for the past several years and uncovered the facts about early college athletics.

Football was played by students at Hereford College, Clarendon College and Seth Ward and Wayland College at Plainview, Stoker said.

Football teams in the early years were composed of amateur players and no school money was received by the teams. Students played in uniforms, which were often overalls, they could provide for themselves.

Style of play was quite different, also.

"The forward pass was seldom used in this era. The most typical plays were the drop-kicked field goal and the quarterback run with everyone else pushing," wrote Stoker. "A more dangerous, and soon outlawed, strategy was for three or four hefty players to hurl the quarterback over the opposing line. As can be imagined, this play was somewhat hard on quarterbacks."

College teams often played high school teams and team travel was "by any means available". Coaches were volunteer faculty members who enjoyed the game.

Stoker ended his history of early Panhandle college football with, "Perhaps the early football programs were not as pure as they seem from this perspective, but many educators wish there could be a return to the amateur program when students who attended the college for scholastic reasons played, coaches were few, and college money was not apent to entertain spectators."

FTA has meeting

By STELLA ROBINSON

On September 16, 1980, the Clarendon Chapter of F.T.A. met in the high school room 104 with Rick Hayes presiding.

The meeting time for Clarendon Chapter of F.T.A. will be every other Tuesday of the month.

Money making projects were discussed. It was decided upon to sell M&M's this year. Also a carwash was discussed.

Teacher of the month of September was elected. Miss Veach was nominated by secret vote.

With all business concluded, the meeting adjourned.

On September 30, 1980, the Clarendon Chapter of F.T.A. met again in the high school room 104 with Rick

Hayes presiding. Members present were Rick Hayes, Steve Nance, Eddie Bright, Kim Gay, Randy White, Pat Ritchie, Stella Robinson, Deanne Havens, and our sponsor Miss Veach.

The money making project of a car wash was discussed. Deadline for dues was October 1.

October 14, the F.T.A. officers went to Canyon for an officers workshop.

Begin filling out point sheets for the State Convention.

A new money making project was begun of selling family photographs to be taken November 1.

With all business concluded the meeting adjourned.

AN INTERESTING COMBINATION

Antacids are used to relieve indigestion, help reduce pain and, hopefully, promote healing of gastrointestinal ulcers.

Many antacids contain the basic salts of metals that are not absorbed well into the blood stream. When these basic salts combine with stomach acid, the acid is neutralized.

Two of the more common metal salts found in liquid and tablet antacids are **aluminum hydroxide** and **magnesium hydroxide**. When either of these materials are used **alone** as an antacid, problems may occur.

Aluminum salts (in this case aluminum hydroxide) tend to be constipating. This may be due to the effect of aluminum as an astringent on the lining of the intestine.

Magnesium salts, on the other hand, tend to have laxative effect. Magnesium hydroxide in suspension by itself is known as **milk of magnesia**. When an appropriate amount of this suspension is taken, a laxative effect occurs.

By combining aluminum hydroxide and magnesium hydroxide in one preparation, the constipating effect of the aluminum is cancelled by the magnesium hydroxide present. The laxative effect of the magnesium hydroxide is altered by the aluminum salt that is present.

The result? An interesting combination is produced that, **hopefully**, will produce neither constipation or loose stools.

Delta Kappa Gamma holds area XI workshop

Area XI workshop of Delta Kappa Gamma Society was held in Pampa on October 18, 1980 at First Christian Church.

The meeting was called to order by Lugenia Carter, area coordinator. The welcome was given by Emmarie Lehnick of Theta Delta chapter.

Greetings from Mary Rowlette, Alpha State President, were read after which was the presentation of chapter Presidents and Chapters.

Reports were given of the Alpha State Convention in Lubbock and also International Convention in Detroit. The second session of the morning was the dividing of the group into eleven workshops of the different fields.

Following the conclusion of the workshops lunch was served in fellowship hall.

Those attending from Gamma Kappa chapter were: Hazel Brandon, Zola Donald, Inez Blankenship, Mabel Mongole and Edgar Mae Mongole.

Education workshop attended

The College of Education and Programs for Women, West Texas State University presented "Where Education is going in the 80's" a workshop, Saturday, October

18, 1980 from 9:00 a.m. to 3:00 p.m. in the Activities Center Bldg. on the campus of WTSU.

The workshop focused on educational issues the Texas Legislature will consider in 1981, current needs, goals, problems and interests in education at the public, higher and private levels. Honorable Wilkelmina Delco was the keynote speaker. She

is in her third term as a state representative of Texas. During her legislative career, she has served as chairperson of several committees and sub-committees ranging in subject from education to drug abuse. Since 1968, she has served more than 25 civic organizations as a volunteer. Her numerous awards include "Outstanding Woman" in 1969 awarded by the Austin American-Statesman newspaper and inclusion in "Who's Who in American Politics."

Conducting the various workshop sessions were Dr. Enid Bates, Mrs. Maxine Roy, Dr. Louise Murphy, Mrs. Ruth Bryant, Mr. Claud Levely, Miss Elizabeth Davidson, Mrs. Patsy Sommers, Mrs. Connie Wooten and Dr. Mary Gill.

The workshop served a buffet luncheon in the East Dining Hall. Mr. Claud Levely was the luncheon speaker.

The workshop earned the participants credits in Continuing Education.

Attending from Clarendon were Betty Veach, Georgia Guinn, Helen Land and Elizabeth Bromley.

Fish tails

By KATIE DVORAK

October is the time of year to gather your minnow buckets and fishing gear and bundle up for great fishing. There won't be ski boats to ripple the pond, there won't be swimmers near the shore, and there sure won't be any hidden bushes that you might over look as good fishing spots since you can see them now.....

Three WTU men qualify as accredited technicians

Three Clarendon servicemen have qualified as accredited technicians for the West Texas Utilities Company, an authorized Frigidaire dealer.

The announcement has been made by Manuel Gomez, Southwest Regional Service Manager for the Frigidaire Parts & Service Company, a division of White Consolidated Industries, Inc., based in Arlington, Texas.

Qualifying technicians include: Leon Ward, Earl Ford and Bobby Hoggard.

Frigidaire rates the technicians on strict standards, such as appearance and good work habits. To qualify, a technician must have a minimum of two years experience and good work Frigidaire dealer servicing major appliances. He must also complete a Frigidaire designated service training program, including customer relations training. "Service technicians must demonstrate the highest standards of service excellence," Gomez said, "if they are to hold an accredited rating from Frigidaire."

October is the best month for sand bass fishing, but what month isn't? It's the CATCHING that is better in October. B.J. and Bill Mooring have been out trying, with some success. Rollie Adams caught a 7 lb channel cat and a young man from Amarillo caught a big 8 lb Northern Pike, so the fish are still rising to the bait!

This time of the year, when the mornings are crisp, the afternoons are warm and the evenings are chilly, is a terrific time to go after those delicious crappies. They are striking hungry at minnows and minnows are still plentiful at the bait shops.

Joe Kraai, from the Parks and Wildlife Inland Fisheries, has been by the Black Bass Nursery Pond and reported several 8-9" bass in the pond already. Joe and the Nursery feeders are concerned that these big fish might be dining on the littler fish. The pond has received 100 pounds of minnows, so hopefully, if there is any cannibalism, it isn't heavy.

Stop the press! Rex Brown just caught a 9 1/2 lb channel cat at 4 p.m. on Friday the 17th! Now, if that doesn't speak well for the lake and the skills of the fisherman, what would? Go ask directions for the best fishing place and bring your unwanted catch to 117 E 6th and I'll take care of it for you.

Halloween ghost stories from Mrs. Jones third grade class

Tully Leffew 9 years old

"Tonight is the night when ghost wail and scare and woo and boo and run through the night. But Halloween is very scary. I love it. It's fun and weird. This is what a witch is. A witch is ugly and mean and scary. The witch is an old lady with a long nose, a pointed hat, long teeth and green hair, blue eyes and green teeth, long nails. A superstitious is like walking under a ladder and let a black cat cross your path that's bad luck."

Shawn age 8

"What is a witch? A mean and grouchy old lady. She wears black clothes and a black pointed hat. You better watch out because she comes out in the middle of the night. You better watch in the middle of the night because she'll go 'Boo!' in the middle of the night."

Kari Shields age 8

"Boo and his Halloween party. Boo was a friendly ghost and loved parties. On October first his witch invited him to a Halloween party. At seven o'clock he went to the witch house and had a good time."

Athena Bell age 9

"It was a spooky, stormy night. It was raining outside the old castle. It was a spooky sight to see. Bats were flying outside. Inside witches were cackling and mixing up brew. 'Let's go riding when it stops raining' said Hazel the craftiest witch of the witches. 'When the round moon comes up, we will go and scare people. We will have a good time.' Said all the witches. 'Yes,' said the witches. So the rain stopped and the witches got on their brooms and one witch said, 'Let's leave our cats here.'"

Karen Hill age 9

"What do witches do on the night called halloween? They ride on their brooms. With their big black cats. And they are very ugly and mean. They ride through the sky on the night called Halloween. Some are green some are white but they are very mean and ugly! Halloween is fun but sometimes it's very scary."

Kasey Allen age 8

"The Flintstones at Halloween. Once there lived a old lady in a little cottage. She had a dress made of silk and a apron made of tiger skin. So one day Fred and Barney went bowling one night. Fred said, 'Let's go to the creepy forest.' So they went to the forest. While they were going to the bowling alley, they saw a cottage. And as they were passing the cottage they ran over a rock. Well, as you know, their wheels were made of wood. So they got out of the car

BELINDA MORROW receives Allsup's diploma from Ray Stewart

HEAT'S ON

By KATIE DVORAK

From Mrs. Gooch's 4th grade class and Mrs. Mooring's 4th grade

Spider Salad

Sherry

You need spider legs. Mush them up. Get eyes out of a dad long leg and get spider eggs and then eat it.

Mashed Bat Toes

First you catch a bat and tear off the bats legs. And get whale blubber and mix it.

Mousetail Soup

Lorita

You put salt in the water and then a mouse tail and then put pepper and salt.

Mashed Bat Toes

Roger

Make your oven 500 degrees. 5 mashed bat toes, 50 snakes guts 6 dogs tails (baked in mud) and 2 cats eyes.

Witches Brew

Lindy

First I buy 720 black cats and get some pliers and pull out their eye balls and then cut them up. 3 C cat eardrums, 1 C flour, 4 spider webs, 2 C sugar, 3/4 C chalk, 5 ribs off a cow.

Witch Stew

Lori Roberson 4th grade

5 rotten cats eyes

10 witches nails

68 frog guts

1 rotten tooth

6 tsp. of ear wax

10 gallons of black paint

4 C full of mud

1 snake eye

Witches Brew

by Matt E.

You take two frog eyes.

One gut of a fish and nine fish eggs and one spider and two or three flies and a least one bat or chicken head.

Then you add sand and some crab pinchers. Then you set the oven on 900 degrees and let it cook all day.

Witches Finger Nails

by Stacy Graham

1 C of witches finger nails

2 cat eyes

1 cat ear, chopped up

4 cat paws all cut up

And then stir all that up, put it in a pan and put oven on 400 degrees and cook for an hour and then you can say yum yum.

Witches Brew and others too

by Jenifer Davis

First get a pan and then a ugly man, then eyes to make the pies. When you've done that get a bat and a hat. And

"Once there were a mean old witch and lived in a big old house, and all she had to eat is some bones and had a old cat named Black Eye and the old witch wanted a desk and the desk had some gold on it and the witch was the only one that knew."

Brandy Vargas age 8

"What is a witch. Witches wear black clothes and they have black cats. They fly on brooms. They have ugly nose, they scare you. They make brew in their pot. They have spells in their hands. They have magic. How they laugh, he he he he he he.

Besides his \$200,000 taxable salary, the U.S. President gets \$100,000 in nontaxable travel and entertainment expenses, plus a \$50,000 a year taxable expense allowance.

VACANCY

The office of the U.S. Vice-President has been vacant 18 times for a total of 37 years.

to produce a more professional employee who can better serve the customer and community." Belinda will return to her store at 2nd and Koogle in Clarendon to assume the duties of assistant manager.

- 8 funny bones
 - 2 brains
 - 100 C of boiling water
 - 30 toe nails
 - 19 fingers (boneless)
 - 5 C of cavities
 - 3 tongues
 - 20 finger nails
- Stir until well mixed. Put on a large fire for 5 hours. Let cool for 30 minutes then gobble up.
- Witches Brew
Glenda Day
- Use two snake eyes and one bat wing. Add two C of salt and one C of sugar. Add three cat tails. Put in the snake eyes and add the salt and sugar. Add the wing and tails. For three hours. And take out.

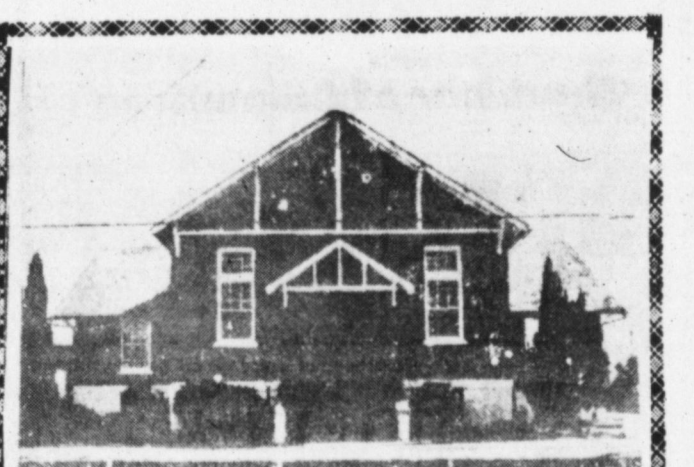

Allsup's graduates assistant manager

Belinda Morrow receives her diploma from Ray Stewart, instructor, for successfully completing the Allsup's Assistant Store Manager Training Course. Held at the company's home offices in Clovis, New Mexico, the class is a requirement for all Allsup's assistant managers. According to Stewart, "The training prepares individuals for future advancement by teaching them proper food handling, cooked food procedures, store cleanliness and maintenance as well as public relations. It's design-

some gum to chew and garlic sauce too. Then mix that up to make the brew. Then think for a minute, have you put in brains and great dunes? Aren't you going to cook it, but don't over look it or it may burn. Oh darn, it did burn next time I'll use a churn.

Cooperatives Focus On The Future

October Is Co-op Month.

That's the theme for this year's observance of Cooperative Month celebrated every October by America's 40,000 cooperatives. And we at your home-owned electric cooperative happily endorse this special nationwide program.

As one of America's 1,000 rural electric systems we point with pride to the accomplishments of the rural electrification program, for we believe that the cooperative way of doing business is one of the most efficient and economical ways possible.

Cooperatives always look to the future to see how they can best serve their consumer-members. Keeping up with a rapidly changing world, working to help solve energy problems, promoting energy conservation, and exploring new energy alternatives—these are just some of the ways we do our share for our communities and rural America.

In fact, cooperatives have always focused on the future—not only for the benefit of rural Americans but also for all Americans!

Letter to the Editor

To Citizens of Donley County
On November 4 America goes to the polls once again in the wake of a campaign that will probably go down in history as one of the most brutal and negative ever. The important issues and positions of the candidates are taking a back seat in this media campaign. Because of this voters are going to have to dig to find out how the candidates stand. Another alarming fact is that 76 million of 160 million Americans who are of voting age are not expected to vote for anyone on Election Day. This is a letter in support of President Carter and in strong opposition to the candidacy of Ronald Reagan.

believes big oil would use their massive profits to explore for oil more than they are now instead of buying department stores as did Mobil who owns Montgomery Wards, instead of buying up mineral and coal reserves now over 70% of domestic reserves owned by big oil companies, instead of buying up resort areas and hotels as Exxon has, and many other examples of horizontal investments.

First, in support of President Carter, the past four years have presented unprecedented situations at home and abroad. OPEC increases and the doubling of gas prices at the pump in the past couple of years has been a major factor in fueling inflation and the recession. This becomes obvious when one recognizes our highly mobile economy with most industries passing on costs having a multiplier effect nationwide. Some options of a President in this situation include 1) price controls on oil creating shortages because of resulting supply cutbacks 2) military action against OPEC or 3) development of conservation measures along with deregulation of the oil industry and the windfall profits tax from which funding is provided to develop synthetic fuels, mass transit, and help the elderly heat their homes. I guess Ronald Reagan, who opposes the windfall profits tax,

President Carter has fought to save and improve our Social Security System, which in the past Reagan has criticized but today will not take a definite stand for fear of losing elderly votes in key states such as Florida. We now have stable financing for Social Security under President Carter.

Before Carter took office there were no peace accords in the Middle East. Now the wheels are turning with positive negotiations toward peace in the area taking place. The Camp David accords will go down in history as a major breakthrough to peace in the Middle East. Also President Carter has done more for education in the country than any other president. Ronald Reagan wants to abolish the Department of Education. President Carter is a stable, honest, and hardworking president and in these difficult times, especially worldwide that is what we need. Now let's turn to Ronald Reagan.

In 4 months Reagan will turn 70 and hopefully will be back making Geritol Commercials and second rate movies where he can be most useful. A graduate of Eureka College in Illinois likely

majoring in drama he enters the acting world probably to prepare himself to campaign for the Presidency. Once a Democrat he sees the light of conservatism along with the accumulation of his wealth. Today Reagan is running neck and neck in a race for the Presidency but what exactly are his issue positions?

Reagan will not as of yet comment on what he would do to Social Security. A man who uses the word "vacillation" in campaign speeches has become somewhat hypocritical. For example his flip-flops on his China-Taiwan position, his vowing of no change in the present farm policy with price support, his endorsing of the federal bailout of Chrysler and of New York City all of which he strongly criticized earlier this year. Reagan wants to cut taxes but how? ...By \$13 a month for those making around \$15,000 and by \$1,200 a month for those making around \$200,000.

What would Reagan have done to counter the Soviet invasion of Afghanistan? Instead of economic sanctions, boycotts, etc. he would have put a naval blockade around a country (Cuba) 10,000 miles away from Afghanistan. To counter the wheat boycott the administration worked out agreements with China, Mexico, Japan, and other countries to increase domestic wheat exports. Also latest economic figures show farm prices rising faster than inflation. In his efforts to support the agricultural sector of our economy the President among other things worked for changes in federal estate tax law to recognize the contribution a farm wife makes to the running of a farm or ranch. Farm women may now exclude up to half the value of the farm from the estate of a deceased spouse. Let me highlight more of the "Reagan Doctrine."

Reagan believes "Air Pollution is under control". Tell that to a resident of urban Los Angeles or New York City. He wants to abolish OSHA which sets safety standards and working conditions in industry. Reagan feels that industry will voluntarily comply with safety regulations. Maybe he should look into the history of voluntary compliance of industry. Reagan wants a constitutional amendment banning abortion yet he says he wants government out

of people's lives. I believe this is a decision for a woman to take up with her pastor, family, or decide herself not a decision imposed on her by the Constitution. The Constitution was written and amended to protect freedoms such as religion, speech, individual choice, equality, etc. Yet on an important amendment, ratified in Texas, of equal rights for women Reagan opposes. Women who want equality deserve it and deserve Constitutional protection. President Carter strongly supports ERA.

Worldwide there is much instability especially in the developing countries. Reagan wants military superiority and abandons Salt II which translates to an escalated arms race with the Soviet Union achieving only a costly rough parity with increased nuclear threat. Reagan promises simple, attractive but unrealistic solutions to economic problems all without sacrifice and with a balanced budget.

With the times and Reagan's lack of foreign policy experience, his "Big stick tough-kid-on-the-block theory" could very well have disastrous results. If Reagan did not want the label of a militant why over the years has he consistently advocated U.S. military involvement on behalf of many causes, often quite trivial ones. Reagan says his "Big Stick" policies will stabilize the world and bring assurance of peace. So that is why our military superiority prevented a Korean or Vietnam War! Reagan's rationale historically just does not hold water. This issue particularly interests me because I recently registered for the draft and I will only fight for a true cause and not for a reactionary man, I want a steady and reliable man in the oval office. One who understands the complex issues of the times, rather than one who so passionately longs for 1950.

Things to look for if Reagan should win: Because of the slow and awkward transition phase when shifting Presidents many experts fear the Soviet Union would move into Poland to put down the trade union movement. Reagans first foreign policy and military decision and with his inexperience I gag at the thought!

Sincerely,
Ken Slavin

Clarendon, Texas

Doghouse Review

By MARK NIXON
Time seems to be flying by. I can't believe that we have already had a scrimmage and are just about ready to start the regular season.

Our scrimmage with Eastern New Mexico University on Monday went almost exactly like I expected. Our freshmen played like freshmen. They were extremely tight and played scared most of the scrimmage. We did get a lot out of the scrimmage as we had to deal with stage fright and also with a team that played very good pressure defense. There were flashes of good performances and probably more flashes of freshmen mistakes.

Our next scrimmage is set for Lawton, Oklahoma against the defending NAIA National Champions, Cameron University on Monday, October 27.

The final scrimmage of the preseason is set for Bulldog Gym at 2:00 p.m. Thursday, October 30. It will be the first opportunity for the home folks to see this year's version of the Clarendon College Bulldogs as they face the Lubbock Christian College varsity outfit. There is no charge for this scrimmage and everyone is invited.

We have spent a good amount of time this fall preparing our halftime entertainment for the entire season. We believe that our games will be enjoyable and that you will really enjoy the halftime activities. One of those halftime activities is the "Hot Shot" program. This is a shooting contest that fifth and sixth graders from Clarendon, Claude, Hedley, Memphis, Groom and McLean will be competing in. The best way to understand what "Hot Shot" is, is to see it live and in action.

The other halftime activity is also great, but we will keep you in suspense and tell you about it later. By the way you can pick up a Clarendon College basketball schedule at many of the local businesses. The first game is November 6. Start making plans to be there and see what's going on.

Bookworm

The library in the old court house is the source of many Halloween books and stories. If you would like to have a good party, look up those Goodhousekeeping books, the party planner books or the books with recipes and check the current magazines for decoration ideas.

Keep in mind using the library for a source of costumes for your little goblins. There are costume books and make up books available. If you want to keep the kids excited and scared, read one of the ghost stories or a good mystery.

There are books on how to do just about anything you would ever want to know how to do, such as sew costumes, make a spook house, repair a leaky drippy faucet, bake a pumpkin cake, decorate a cake, design a Christmas card or make candles. The library is the source of house plants, house plans, it is the location of music, paintings, good times. Take a warm blanket, a cup of hot chocolate and a terrific novel and spend a delightful fall day exploring another world, a new life, a mystery that only the author can solve or just read for the pleasure the

words can bring. With school projects beginning to come in, use the library as a resource place. Contact the librarian and explain your project, he or she will be delighted to show you ideas for getting materials, either from the Gabe Bettes Burton Library itself, or from the other libraries that are also members of the Inter Library Loan program. You never know what you can have unless you ask for it.

Beware Of Glaucoma

Don't let glaucoma rob you blind. That's the warning from the National Society to Prevent Blindness.

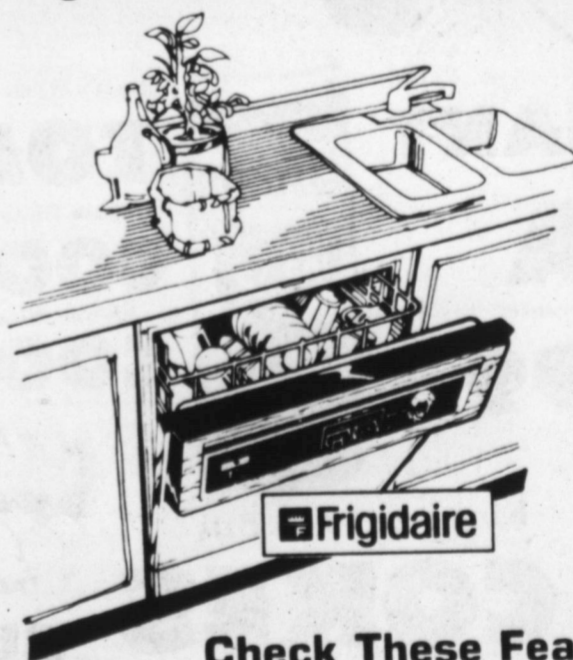

The Society advises everyone over 35 to have a thorough eye exam at least every two years. That's the best defense against glaucoma.

Damage caused by glaucoma can be successfully treated if found in its early stages.

One in every eight blind persons in the U.S.—62,000—is a victim of glaucoma, the major cause of blindness in this country. Nearly 300,000 new cases occur each year, and about 95,000 lose some degree of sight, another 5,400 become totally blind.

For information about glaucoma, write to your state Society to Prevent Blindness or the National Society to Prevent Blindness, 79 Madison Ave., New York, N.Y. 10016.

You'll save time and energy while enjoying sparkling clean dishes with this Frigidaire Electri-Saver Dishwasher.

Check These Features

To resist staining, fading and the absorption of food acids and odors, you can't beat the durability of a Porcelain Enamel On Steel tub

Doesn't make a lot of noise thanks to thick, Sound Absorbing insulation on the back and all around the top and sides of the tub as well

Cleans pots, pans and crusty casseroles as easy as pie thanks to a triple wash Pots & Pans Cycle

For easy loading of silverware and utensils, this Frigidaire Dishwasher offers a removable Open Mesh Basket

You can change the color anytime with this Frigidaire Dishwasher. Interchangeable door panels offer a choice of Almond, Avocado, Harvest Wheat or White

No more embarrassing water spotted glasses and silverware. A Spots Away Rinse Injector dispenses a liquid rinse additive in the final rinse cycle

Colts Corral

By KIM FORMWAY
Hello, Colts! The news in Colt action for last week is that Thursday, October 17, about 2:15 both Colt teams went to Shamrock to play the Irish for the second time. The 7th grade played a great game, holding the Irish to only be able to score 1 touchdown in the last minute leaving the score Colts 0, Irish 8.

The 8th grade added another big victory to their record. The score was Colts 28, Irish 6. Thanks to great playing from the whole team, Rodney Smith made two touchdowns, Lynn Alderson 1 and Bret White 1. Way to go, Colts! Your going is great!!!

A big thank you for the support from the fans in the stands!

The sixth grade is studying civilization in Coach Bromley's room.

Here's the gossip!
Toni M.: M.H.???
Vicky H.: You got what???
Muzzy H.: Kaplunk!
Cutest couple- Chris D and Shana C.
Jerry Morris: Happy Birthday!
Monte H.: How's the paper cigar?
Gina S.: Twinkie?
Trisha C.: Oops! Fall down?

Eighth grade Colts win 28-6 over Shamrock

By LYNN ALDERSON
The Clarendon Eighth grade Colts went to Shamrock last Thursday to start the second half of their 1980 football season. In the second quarter Rodney Smith broke loose for a 60 yd. touchdown run. Darrell McCowen ran in for the two point conversion. The Colts went in at half time, leading 8 to 6.

The Colts started out the second half with Rodney Smith taking it in from Clarendon's forty-five yard line for a touchdown. On the extra point conversion, Lynn Alderson hit Brett White in the endzone for two points. For the second score of the third quarter, Lynn Alderson took it in from the one yard line. The two point conversion attempt was unsuccessful.

In the fourth quarter, Lynn Alderson hit Brett White, streaking behind the secondary for a forty yard touchdown. The two point conversion attempt was unsuccessful. The Colts recovered two fumbles, and the game ended with a 28 to 6 victory for the Colts.

Women's Aglow met

Women's Aglow met Monday, October 6, 1980. Virginia Furgerson of Pampa gave

an excellent talk. She talked about her heart trouble and that she was going to have to have surgery but that the Lord Jesus intervened and healed her of all traces of heart trouble. She also talked about losing her husband recently, less than a year ago, in death and about what a comfort it was in knowing he was with Jesus, for he was a dedicated Christian also. This made a vast difference in her attitude about losing her loved one for she had the comfort and knowledge he wasn't lost that she would see and meet him again someday. Her talk was a blessing to everyone present.

Karen Trivett led Praise and Worship. We really appreciate her so much. Rebecca Lockeby was also installed as membership Chairman. We will meet again next first Monday of next month. All women are invited. God Bless everyone.

Quail bag limits reduced in most counties

Quail hunters in Texas will have lower daily bag limits this fall than the previous year in most counties.

The TP & WD Commissioners meeting in Austin in September responded to quail census data which showed reduced populations by setting somewhat lower bag and possession limits. Drought conditions during the nesting season severely hampered quail reproduction over most of the state, reducing populations from the high levels of 1979.

Most of the state will have a 12-quail-per-day limit, with a possession limit of 36. Last year, high populations allowed the commission to set a daily limit of 20 in some counties. This fall, no county will have such a liberal limit.

Force Reserve Officer's Training Corps Four-Year College Scholarships should apply this fall according to Col. Hugh D. McCracken, Jr., Air Force ROTC Registrar.

Applications for four-year scholarships starting in the 1981-82 academic year must be submitted to Air Force ROTC headquarters at Maxwell Air Force Base, Ala. by January 15, 1981.

About 1,560 college freshmen will start their college classes tuition-free this fall as members of Air Force ROTC. A four-year scholarship provides for payment of full tuition, books and most fees, plus a \$100 monthly stipend during the academic year.

According to Colonel McCracken, students interested in Air Force ROTC scholarships should contact their high school guidance counselors or the Professor of Aerospace Studies at a local college or university hosting Air Force ROTC, or they can write to the Office of

Public Affairs, Air Force ROTC, Maxwell AFB, Ala., 36112.
