THE MASS OF HUMANITY comprises two classes, -those whose individual characteristics enable them to command situations and those whom situations govern. The weaker element covets constantly the attributes of Preferment. Frequently the Insufficient appear to triumph. Title

and Regalia, however, never yet made a king. Half a dozen Conventions occur within a few months, at Los Angles, San-Francisco, Portland and Salt Lake City.

By reason of Advantages, natural as well as acquired, "THE DENVER ROAD" is Master of the Situation as to Pacific Coast points and the North west. It simply has the Best of it any way you care to figure. Ohe important consideration is distance. Distance means time, which is money. Just for example would you deliberately choose to ride 856 miles

to a point but 588 miles distant from Ft. Worth via "THE DENVER ROAD." which reaches the place where the interesting part of the Los Angeles trip begins, with 268 miles Less travel, taking Less time, therefore Less money, with neither changes nor waiting, too? Why, of course it makes a Difference! It is so with all other possible combinations of lines-'twas so in old Euclid's time, 'tis so now, always will be, -two sides of a triangle must exceed the third Sudy the Map.

Further than this, persons of Discrimination recognize and appreciate the fact that certain Modern Conveniences are of the Necessities of really good passenger service and that many of these "THE DENVER ROAD" alone

SUPPLIES FOR STATE.

Austin, Tex., April 5.-The state

purchasing agent has commenced the preparation of his schedule of supplies for the state eleemosynary institutions for the year beginning Sept. 1. The heads of the different institutions in state furnish requisition, same to be transmitted not later than May 1. From these requisitions the purchasing agent compiles his schedule of wants, showing the quantities in the aggregate, and for each institution, together with an explanation permitting carload deliveries, where it is possible. In supplying the institutions in this city it is easy to make carload deliveries and save money, because supplies for all the institutions here amount to a heavy tonnage, and are shipped to one consignment, and parceled to each institution

Mr. Dodge will ask for bids by publication, commencing the middle of next month, and will open the proposals about July 15, so as to give ample time to make the numerous awards with a reasonable interval before Sept. 1, in order that the successful bidders may make necessary arrangements to cover on their contracts. It is estimated that the aggregate

of the combined contracts will be not

less than \$600,000, as all of the present

contracts expire with this appropria-

tion year, Aug. 31, and supplies for the

next appropriation year must be paid for out of the appropriations available during that period. The list includes dry goods, grocer ies, drugs, drug sundries, hardware agricultural implements, plumbers' tools, electrical supplies, fuel oil and the thousand of other smaller articles used at the institutions. As before

stated, bids will be opened July 15. Laredo, Tex., April 5 .- Judge Mc-Lane and District Attorney Hamilton have returned from Carrizo, where they went to hold a term of the district court for Zapata county, and both are agreed that the people of that

Senator Mason of Illinois when last in New York, was asked if he thought that Senator Morgan's reputation of being the longest winded speaker in the senate was so. Said he: "I am not certain that senatorial courtesy will permit me to answer that question; and, being a candidate for re-election I will dodge. But this I will say: I once asked Senator Morgan how long he could talk on a subject he didn't know anything about, and he replided: 'If I didn't know anything at all about it I don't think I could talk more than three days!'" is so great.

The Territorial Government Reports Show Results Beyond Belief. Regina, Assiniboia, Canada, January 10th .- At the Agricultural Statistics Branch of the Department of Agriculture for the Territories, reports are now being received from grain threshers throughout the Territories, for statistical purposes. The reports are somewhat delayed this year, owing to the extensive crop and the delay in getting it threshed. The Department of Agriculture is leading the way in a new departure, with regard to the collection of crop statistics. In the older provinces, crop estimates are based entirely on the opinion of persons interested in the grain business who ought to be, and no doubt are, well posted upon the probable yields. Stili the reports are simply a matter Relic seekers cut off the negro's tingers and such parts of the body as summer normal ever held in the south partment, however, has adopted the reports.
