THE CLARENDON NEWS

A City Auditorium for Clarendon

SCHOOL COMPLETED LAST FRIDAY EVE

WORK OF YEAR CONCLUDED FOR MANY STUDENTS BY GRADUATION EXERCISES

The final program of the year 1927-28 was completed by the presentation of diplomas to the graduates of Clarendon Municipal College, Clarendon High School and the Clarendon Junior High School. A large graduation class took part in both the High School and Junior High School while the graduation class of the Municipal College was greater than was at first considered it would be. Nine students were graduated the first year of life of the school and this is expected to be much greater as the years pass.

S. H. Condon of the History Department of West Texas State Teachers College delivered the address of the evening, speaking on the subject "Education for Freedom". He was well received and his hearers expressed their desire to hear him speak at another time. Mr. Condon is one of the most popular teachers ever in Clarendon, his popularity extending past the town and to many other of the Panhandle towns.

One of the most pleasing numbers on the program of the evening was the vocal number of Miss Dennison, head of the voice department in the College and High School. Miss Dennison was very well received, this being her final appearance at any event in Clarendon. She will not return to Clarendon for the next term of school.

Presentation of the diplomas was made by O. C. Watson as Vice President of the Clarendon Independent District.

Announcement was also made of the Lucky Boy and Lucky Girl graduate whose pictures had been glued to a large watch front in the Goldston Brothers window for the past ten days. William Greene was the lucky boy and Miss Cleo Brown was the lucky girl. The clock threatened to run past the time limit set and the pendulum was removed to allow it to run down in as short a time as possible. It stopped in the afternoon of Friday of last week.

One of the largest crowds ever seen at a graduation exercise was present in the auditorium of the Methodist Church, where the program was presented.

Mr. and Mrs. W. M. Headrick and two daughters of Dallas left Monday for their home after a visit of some length with Mr. and Mrs. M. W. Headrick and other relatives. Mr. Headrick motored to Amarillo Saturday afternoon and returned with Miss Orville for a gathering of the family here Sunday.

DISTRICT LEAGUE HERE FOR MEETING

DELEGATES FROM ALL CLARENDON DISTRICT HERE TUESDAY FOR EVENT

One of the most successful District Conferences of the Clarendon District Epworth Leagues was held here Tuesday in the Methodist Church with Joe Strother in charge. Mr. Strother is Assistant Pastor of the Methodist Church at Pampa and is making a distinct hit with the younger people of the Panhandle section of the state.

The session opened at 10:30 Tuesday morning with some forty out of town visitors and delegates present from almost all churches in the district. Mr. Strother was in charge of the program. Miss Nellie Hardin of Pampa rendered a vocal solo; Rev. Crow of Shamrock was leader of the devotional hour; Miss Fray Stallings was called to the front and gave two organ solos.

The opening program being concluded, a short business session was entered at which time Memphis extended their invitation for the Leaguers to meet with them for the next Annual meeting. The luncheon brought from their homes by the various Leaguers was spread in the basement of the church with the drinks for the occasion being furnished by the local organization.

Following the noon hour, the League was again called into session at which time the matter of the Assembly was brought up and plans were made for a large attendance from the Clarendon District. Each League was urged to send as many delegates as possible that the various churches might receive as much good as possible from the work of the body.

GREEN BELT EVENT PROGRAMS ARE OUT

SPLENDID LINE UP OF ENTERTAINMENT TO GREET MEMPHIS VISITORS

Programs have been received in Clarendon for the third Annual Amateur Golf Tournament of the Green Belt Golf Association. This event will be held in Memphis and that city is making great plans for the entertainment and care of the visiting players. The new Memphis Country Club will be the scene of all festivities and entertainments and the links of the club will be used for the play.

Representatives of the Hillcroft Golf Club have not been selected as the team from Clarendon, but will probably be named before the latter part of this week and their entries made into the tourney. Individual entries are made from Clarendon by members who wish to be included in the tournament, but not as a member of the team. At last report, more than two hundred registrations had been received by the Memphis Club and a hot time is expected when the play starts on the qualifying rounds Monday.

Monday, May 28th will see the start of the qualification rounds. Tuesday morning will see the finish of these rounds. In the afternoon of Tuesday, all flights will play their first round of match play. The ladies will be entertained by a bridge tournament in the club house during the afternoon. In the evening there will be an open house and a dance for those who care to participate.

Wednesday will see the second round match play in all flights and the first round match play in consolation flights. The afternoon will be given to semi-finals in all flights and the consolation events. Finals in all flights will be played Thursday with thirty-six holes as the goal in all flights. Consolation flights will play eighteen holes.

New officers will be elected on Monday evening at the Club house. Eleven Clubs of the Green Belt districts of Texas and Oklahoma are members of the association. These are located at Vernon, Ellettsville, Wellington, Altus, Oklahoma, Estelline, Quanah, Shamrock, Paducah, Chillicothe, Clarendon and Memphis.

PANHANDLE IS DAIRY COUNTRY

LOCAL CONDITIONS MAKE SPOT IDEAL FOR DAIRYING INDUSTRY

One often hears the question asked: Is this section adapted to dairying? Why isn't it? The northern states are the leaders in the dairy industry. They are handicapped in many respects. They do not have winter wheat to pasture but have to keep the cows up in a lot during the long winter months and pour high priced feed to them. They feed linseed meal which is higher priced than cottonseed meal and has not the protein content.

Furthermore the northern states are not adapted to the growing of feed crops as the southern states are. Therefore the farmers must feed a high priced feed to their dairy cattle—feed that has to be bought. The southern farmer raises his maize and sudan grass and pastures his winter wheat. In addition he grows his cotton crop and trades his cottonseed at the oil mill or the local gin for meal and hulls, without any cash outlay for these feeds.

Therefore, the southern states and especially the Texas Panhandle, is peculiarly adapted to dairying. There is no other section that is better fitted for it and certainly the next few years are going to see wonderful strides made in this field of farm endeavor.

Miss Ola Mae Watts is visiting in Quanah as the guest of Mrs. Bryan Bybee.

Dr. and Mrs. A. D. Lokey left Sunday morning for Wichita Falls, where they expect to make their home.

TEEL CAR TOP DAMAGED BY HAIL STORM IN LAST WEEK

Mr. and Mrs. G. J. Teel were making the return trip from Hedley to Clarendon last Wednesday afternoon and were caught by a hailstorm just this side of Hedley. They drove up to a house near the road and stopped, thinking to escape a part of the damage. While they were stopped, the hail beat the top of their car. One of them was measured after the storm was stopped and was found to be seven inches in diameter. Other than damaging the top, the car was undamaged and they resumed their trip, to find that they would have escaped the damage had they driven a little further down the road.

The hood of the car was also damaged due to the magnitude and weight of the hailstones.

MANY LIONS AT WICHITA FALLS

TWENTY-TWO LIONS AND FOUR LADIES REPRESENT CLARENDON AT MEET

Scoring one of the heaviest attendances of any clubs in the State of Texas for the number of miles traveled, the Clarendon Lions Club considers themselves to be very fortunate in having the large representation at Wichita Falls Monday and Tuesday of this week. Only a few other organizations who made their homes nearer the convention city had more in attendance on the convention than did the Clarendon delegation.

The larger portion of the Clarendon delegation left Clarendon early Sunday morning and made the trip through the country in automobiles. Those leaving before noon made the trip without incident, even escaping a great amount of heavy roads on the trip. One carload left afternoon Sunday and were forced to return to Clarendon where they were caught in one of the heaviest rains of the season. The last cars into Wichita Falls outran the rain from Vernon in to the convention city and had barely become settled when rain began to fall in Wichita Falls. Late arriving in connection with the train, arriving in the convention city for luncheon Monday, returning with the remainder of the delegation Tuesday afternoon.

The Model Luncheon of the Clarendon club was staged in the basement of the First Christian Church and the local Lions felt themselves much at home in their location since they had been served here by the Ladies of the Christian Church. Only a fair attendance was present for this event with the following towns represented: Pampa, Childress, Borger, Forney, Wichita Falls, Archer City, Cooper, Dalhart, Hillsboro, San Angelo, Wills Point and Pollett.

A splendid program was presented with Lion Mulkey in charge. Chas Keffer of Amarillo was the main speaker of the day, stressing the work of the Amarillo club in connection with other clubs of the Panhandle in assisting crippled children to normalcy under the care of noted physicians. Further emphasis on this work was later given by Lion McBride of the city of Borger. C. H. Walker of Dalhart was also called to the floor for a short address.

Mrs. Lester Boykin gave a very excellent violin solo with Mrs. Slaughter at the piano. In the presentation of the prize in the band contest, one of the visitors was awarded the prize on the audacity of his hat band. This was one of the features of the meal. The other stunt, the presentation of the Ladies prize, was attended by Lion Watson. In the explanation of the method of procedure, the alarm clock he held in his hand started ringing and he was forced to make the presentation himself. One requirement of the presentation was that the person doing the presenting should make no grammatical errors. Lion Watson presented the flowers and was not fined.

The Lions from Clarendon are as follows: Earl Alderson, J. R. Bartlett, R. H. Beville, G. Lester Boykin, Sam M. Braswell, H. C. Brumley, Odos Caraway, A. L. Chase, Clyde J. Douglas, O. L. Fink, Homer Mulkey, J. T. Patman, J. R. Porter, Dr. G. Sherman, O. C. Watson, W. A. Wilson, G. A. Anderson, Ira Merchant, D. O. Stallings, F. L. Stallings, Frank Whitlock and Mc Henry Lane.

BOYKIN IN FORT WORTH FOR BAND ARRANGEMENTS

G. Lester Boykin, Secretary Manager of the Chamber of Commerce drove to Fort Worth from Wichita Falls Wednesday of this week. While in Fort Worth, Mr. Boykin will make arrangements for the accommodation of the band while they are in the convention city and will also see into the details pursuant to a successful convention in that town. Delegates from Clarendon also empowered him to make reservations for them against their trip to the convention city.

GILES IS VICTIM OF SMALL CYCLONE

LITTLE DAMAGE DONE TO GILES OR COUNTRY AS TORNADO HITS

Giles, on the eastern edge of Donley County, was hit with one of the worst windstorms and heavy rains that was reported over the entire state. The storm hit Giles about 2 o'clock last Wednesday afternoon with a terrific wind and rainstorm. The wind gained great force and almost reached the proportions of a gale before it finally subsided. In the immediate vicinity of Giles, little damage was done outside of a few sheds blown down and damage from the hail and washing of the water.

The main force of the storm seemed to have been centered in Wellington, where telephone service was discontinued due to the wetting of the switchboard and the consequent disabling of the system temporarily. The first messages from the town were received from a lieman who cut in on a pole at the outside of the city and called to Amarillo with the first news of the disaster. Plate glass windows and the roofs of houses seemed to suffer more than any other items.

The storm expanded itself near Sayre, Oklahoma where a number of houses were torn down and consequent damage to the surrounding country. A number of deaths and injured are reported in that state. No lives were lost or other damage done in the country adjacent to Wellington or Giles.

John Hunt is in Dallas for State Convention. John Hunt left Saturday of last week for Dallas, where he will represent the Republican voters of Donley County in the State convention in that city. The county has only one representative in the State convention and Mr. Hunt was elected to take the count for Donley County. A letter was received from John the fore part of this week and he stated that he could sit in his hotel window and see the headquarters for both the Smith and Hoover delegations in Dallas.

CLARENDON MAN WINS IN NATIONAL CONTEST

L. A. Hatley was one of the many winners in a National Sales Contest staged by the J. R. Watkins Company among their many salesmen of the nation. The charm is in the form of a vanilla bottle and is nicely turned in a gold plated finish. Mr. Hatley is quite proud of his record in the contest and his many friends are wishing him well in the furtherance of the sale of these products.

COMMUNITY MEETS FINE FOR BUSINESS

BUSINESS MEN URGED TO ATTEND MORE COMMUNITY GATHERINGS

The business men of Clarendon are over-looking a bait if they are not taking advantage of one form of local advertising—that of attending all rural community gatherings. If the merchants would go out and spend money at box suppers, pie socials and other forms of rural meetings, this money would come back to them with interest. This has been proven by experience.

Gus Jones, manager of the Quanah Gin at Quanah, went out to Robinson school, 20 miles from Quanah, and bought three boxes at a total cost of about \$15.00. The next day he got two customers at his gin from Robinson school district that spent more than the \$15 back with him. He got his money back the next day.

Roy Gilliland, one of the officials of the Quanah Cotton Oil Company, went out to Whittle's Chapel, north of Chillicothe, and spent a lot of money at a box supper one night with the writer. He forced up the bids on the boxes to where the school made more than \$100. The next week he got a letter from Mr. Whittle, manager of the Simmons Gin (Cotton Oil Co. Gin) at Chillicothe, stating that the gin had had three customers from Whittle's Chapel school district, they coming directly as a result of the visit of Mr. Gilliland to the box supper.

So, these two instances conclusively prove that the money will come back to the business man. Furthermore, the closer contact between the business man and the farmer tends to break down any existing barrier between town and country. In other words the people of the city and country get to know and like each other better; or, in the words of a Brazos County farmer: "It is better for people to get out and talk with one another than it is for them to stay home and talk about one another."

IMMIGRATION BODY TO MEET IN AMARILLO JUNE 10

The people of the Panhandle who are interested in the immigration of people from the northern states to this section of the country are asked to meet in Amarillo on the immediate future. The meeting has been set for the Amarillo Hotel on Thursday, June 10th. The meeting at this time will determine the final action to be taken in connection with this matter. They are asking for a good representation from all Counties of the Panhandle who are interested in the movement that as general an idea as possible may be secured. All newspapers and chamber of commerce organizations are asked to have representatives on the floor for a general discussion and final settlement of the plans for the work in hand.

LIONS PROGRAM IS DIFFERENT

SHORT ATTENDANCE CAUSED BY LIONS BEING IN WICHITA FALLS TUESDAY

Twenty-one of the Clarendon Lions were in attendance on the District Convention in Wichita Falls Tuesday of this week and the attendance was made up of those who could not make the trip and who stayed at home to keep the home fire alive and burning. Thirteen Lions and three visitors made the smallest attendance that has been recorded for the Lions in this city for a number of months.

Lion G. K. Gump presided in the absence of Boss Lion Mulkey, bringing a number of items to the attention of the Lions that had probably been overlooked in the past. The major activities problem of the club was attacked and a list of the proposed work of the club was attacked and a list of the proposed work of the club was read for the approval of those present. It was learned that a part of the work had been done and that there was still a plenty left for all Lions to do.

The discussion of the Major Activities proposition was started by Lion Rathjen, who brought up the question of curbs and gutters for the city. The need for this work was brought forcefully to the attention of the people of Clarendon last week when the heavy rains caused damage that will take months to replace by the combined efforts of the entire city working force in this department.

A time of reprieve was then entered into, led by Lion Murrell, in which he attempted to bring back some of the good name with which he entered Clarendon and which he said had been besmirched by constant attacks by the Lions of the city and visitors who came into the town.

On completing his talk in his own favor, Lion Wilder took exception to his remarks and at this luncheon that he had been without when the most handsome man was chosen last Tuesday at noon. The article in question was socked.

Lion Patrick called to the minds of those present the fact that Lion Murrell was certainly imbued with some sort of power in that he was asked to call for a rain some weeks past. The results of the calling were felt all over this county and Lion Patrick stated that he considered the work overdue in some sections of nearby territory.

Other talks of a nature similar to these were made before the close of the hour and the time was spent in getting better acquainted in the absence of the other members of the club. Professor J. P. Cooper, instructor in the college; Tom F. Connally and Rev. Jno. H. Crow of the Shamrock Lions Club were the guests of the day.

EDITOR AND MRS. BRASWELL ATTEND PRESS ASSOCIATION

Mr. and Mrs. Sam M. Braswell are in Texarkana for the joint sessions of the Texas and Arkansas Press Associations that will be in full force there the latter part of this week. From there they will probably attend a celebration in Hot Springs, Arkansas and will return from there to Dallas, Fort Worth and Denton. They will return here the latter part of next week following the close of C. I. A. Miss Claire Marie will accompany them on the return trip.

Miss Cecelia Atteberry, popular young lady of Pampa surprised her many friends in this city with a short visit with them Wednesday night and Thursday. Miss Cecelia has a host of friends here who are always glad to her visit them.

Miss Edna Mae Blanks of this city is in Amarillo for a visit with her brother and sister, Mr. and Mrs. D. W. Hudgins and Mr. and Mrs. Dee Blanks.

Mr. and Mrs. Charles Goodnight, who are now located in the John Beverly home, 514 Kearney St., motored to Goodnight Wednesday.

LEGION AUXILIARY TO SELL POPPIES

SATURDAY, MAY 26TH SET AS DAY FOR SALE OF MEMORIALS IN CITY

The Woman's Auxiliary of the American Legion will take an active part in the sale of poppies this year in Clarendon. For the past number of years the poppy sale in Clarendon has been carried on in a sort of half hearted manner with little or no objective in view. This year the sale will be different and the ladies have set as their goal every man, woman and child in Clarendon and surrounding territory wearing a poppy on Memorial Day.

Mr. James Trent and Mrs. C. G. Stricklin have been named as a committee to supervise the sale of the little red paper flowers, and they will be on the streets of Clarendon all day Saturday of this week with a plentiful supply of the flowers. Others will be pressed into the work to make the affair most complete and it is hoped that the sale of flowers here will far exceed the fondest expectations of the Auxiliary.

Funds derived from the sale of the flowers will go to assisting those disabled ones who have been unfitted for life's tasks by the great war. Most of the flowers are made in the hospitals of the nation and the proceeds go toward making the lives of the workers a little brighter. Many of the men working have families and the sale of the flowers is their only means of support.

Watch for the poppies and outfit your entire family.

BEVILLE TO REPRESENT DONLEY AT CONVENTION

A. M. Beville left Friday evening of this week for Beaumont where he will represent Clarendon and Donley County at the State Democratic Convention. Mr. Beville is leaving a little early in order to attend the convention and give Donley County the representation she has in the state. Following the meeting at Beaumont, Mr. Beville will go to San Antonio where he will meet Miss D'Laurel and they two will drive back to Clarendon.

J A RANCH HISTORY IS GOOD VOLUME

CLARENDON MAN LEAVES EXCELLENT REFERENCE ON HISTORIC PLACE

A History of the J. A. Ranch, by H. T. Burton, has just come from the press in book form, to the gratification of old-time cowboys, pioneers of the section, and indeed, all of those who are interested in having the history of the Panhandle accurately recorded and preserved for posterity. Written as it was, before the last of those who took part in the early development of the country and who, in fact, made the early history of the Panhandle have passed from the scenes, it has an authority which other histories to be written in future could not have, except for this collection of first-hand information.

As the writer points out in the preface to this book, the history of Texas, and more particularly the history of the Panhandle, falls naturally into four stages: namely the Indian Stage, the Hunter Stage, the Cowman Stage and the Farmer Stage. Much of the history of the Panhandle, as he says, is to be found in the histories of the great ranches of this section. To quote from the History, itself: "The history of these ranches and the men who established and worked on them is the heroic story of the progress of the Panhandle". And again quoting the author, "Of all of these early ranches, the J. A. Ranch is the most interesting because it is the oldest and largest privately-owned ranch in this section of the state and has an unbroken history to this day."

While the history is concerned chiefly with the third historical period, the Cowman Stage, it covers also the latter part of the Hunter Stage and carries the story of the Ranch down to the present day, when it seems to be on the verge of passing into the fourth, or Farmer Stage. In tracing the development of the great ranch, Mr. Burton records the last great expedition against the Indians; the coming of Colonel Goodnight and the Adairs, and the formation of their partnership; the establishment of the J. A. Ranch, and the expansion of its holdings and the growth of its herds; the famous "Indian Scare" of 1890; the coming of the "Nesters" and wire fences; and the organization of the Panhandle Cattle Raisers' Association. In recording these stops and events, the writer shows clearly the effect of each upon

TWO PRECINCTS GRANTED HEARING

PRECINCTS THREE AND FOUR TO HAVE PRELIMINARY ON JUNE 11TH

Preparatory to calling an election to vote bonds in the amount of \$250,000 for the purpose of improving the lateral roads in Precincts three and four of this County, a petition was presented before the Commissioners Court Saturday of last week with a great list of signatures asking for a hearing.

The hearing was granted since this move has nothing to do with hard surfacing the roads of the Highway through the county and since all of the money so secured will be applied on lateral roads in that portion of the county. The Court set the date of June 11th as the date on which the first hearing will be had. At this time, the proponents of this new plan will present their pleas and the election to vote the bonds will probably be authorized by the Commissioners Court and the notice printed.

The funds so received from the sale of the bonds voted will be used in the improvement of roads in the two aforementioned precincts, the total being the neighborhood of the sum of \$250,000. The amount will probably not be equally divided between the two precincts, but the major part will likely be used in the preparation of a road from Hedley to McLean, one of the bones of contention that has held off a county wide election for the paving of Highway 5 and the Northern half of 88 and that part of 66 that is in Donley County.

The hearing will be held in the Courthouse and the public will be invited to attend and take any part they desire in the event.

MEMORIAL DAY MESSAGE

Dear Members: It is now eleven years since the United States entered the World War and for many those dark and trying days are forgotten, but there are thousands who were left physically unfit and thousands more who are mental patients in our hospitals for whom the war will never be over until "Divine Taps" sounds.

Surely every one can spare one day of the year to honor and respect our living soldier boys as well as pay solemn and heartfelt tribute to those who made the supreme sacrifice. Every man, woman and child should wear a red paper poppy on Memorial Day as a tribute to our country's defenders.

Mr. and Mrs. Edgar Betts of Claude were guests of Mr. and Mrs. C. A. Burton Sunday.

SUMMER SCHOOL ENROLLMENT GOOD

SIXTY STUDENTS ENROLLED FOR SUMMER WORK IN COLLEGE

The enrollment of students in the Clarendon Municipal College Summer School has been fully up to the standards set by Mr. Cooper at the beginning of the plans for this work. Conditions existant in the Panhandle to a short time before the opening of the school had a great deal to do with the small enrollment of the year, but the faculty is well pleased with the net results and are planning to put over one of the most successful terms of work that has ever been attempted.

One of the features of the school is to be the excursion to points of interest in the Panhandle that are near to Clarendon. The first of these will be held Saturday of this week and one is to be had on Saturday of each week of the term. These tours will add materially to the interest in the school work and it is thought that they will be used at a later date to further interest in the work of the summer sessions held here.

The full faculty as outlined some weeks past is here and all of them are working at their best. The school is to be a short term with all the work crowded into a shorter space of time than has been the custom in the past. The six weeks term has been condensed and the final work of the school will be had by the latter part of June to allow for a two months vacation for the teachers and pupils.

RATHJEN IMPROVES FRONT OF BUILDING WITH PAINT

Workmen have been busily engaged since the receipt of the last rains in the city placing a new coat of paint on the awning of the Rathjen Building next to the Donley County State Bank on Kearney Street. This improvement, together with the placing of new windows makes this one of the most attractive buildings in the city.

NATIONAL EDITORIAL ASSOCIATION — PANHANDLE PRESS ASSOCIATION

LOYALTY

Do we really appreciate its true meaning—its fullest sense—its proper application?

Our personal definitions vary—our personal applications even more.

Many of us feel that we are sufficiently loyal; a greater number think we are perfect examples of the word; and then there are those of us who think it only of casual importance. But, how many of us would stand a fair examination—how many would make the grade in the fullest sense of this word?

Ask yourself this very personal question: Am I loyal?

Does your loyalty to the company you represent embrace the words Fidelity, Faithfulness, Constancy, Devotion? If it does—the Company is fortunate to have your service and you are even more fortunate for having in your possession one of the greatest requisites of success—one of the pass keys to progress. Consider yourself extremely lucky.

If your analysis proves that there is a shortage—that you have neglected the cultivation of this finer quality, begin at once to do the things that will instill loyalty—associate with those of your acquaintances who you know are loyal. Believe in the things that you do. Believe in your work—your Company.

Guard and uphold your Company's policies—do this because you know it to be right.

And—never stop being loyal—never let anything dampen your enthusiasm.

Let's cultivate a deeper sense of Loyalty—it's one of the best things anyone can do.—Miss Alma Hilm.

Leadership in the future will not come by chance. Scientific precision will replace guesswork. Exact knowledge must prevail in high places. Something may be done to improve scholarship in our secondary schools on the part of those who can use it, but the American secondary school has other duties besides the making of scholars. Granting the necessity of scholarship, the heaviest load must be carried by our colleges and university schools. They have no need to encourage initiative in thought or action in their students; young Americans exhibit independence enough when left to themselves. But what our students do need is to learn how to study, how to do straightforward logical thinking, how to round out an intellectual task in scholarly fashion; in a word, they need discipline in learning. The only way to attain this result is by straightforward instruction under a master. Desultory teaching with the assignment of tasks to be done at home will not do it. Threats and browbeating will not do it. University teachers might well learn a lesson from business, where the responsible heads train their subordinates in all kindness, but tolerate no mistakes and permit no guesswork.—James E. Russell.

LINDBERGH FLIES ALONE!

Alone

Is he alone at whose right side rides Courage, with Skill within the cockpit and Faith upon the left? Does solitude surround the brave when Adventure leads the way and Ambition reads the dials? Is there no company with him for whom the air is cleft by Daring and the darkness is made light by Enterprise?

True, the fragile bodies of his fellows do not weigh down his plane; true, the fretful minds of weaker men are lacking from his crowded cabin; but as his airship keeps her course he holds communion with those rarer spirits that inspire to intrepidity and by their sustaining potency give strength to arm, resource to mind, content to soul.

Alone? With what other companions would that man fly to whom the choice were given?—H. M. Anderson, Editorial staff, New York Sun.

—oOo—

STILL RECKONING THE COST

Perhaps the most comprehensive study of the cost of the World War has been made by the League of Nations and announcement of the results of this study has just been published. We take the following summary of this impressive report from the editorial columns of the Los Angeles Times:

For all the nations involved a gross total loss of life is placed at 37,000,000. However, this appalling figure is obtained by including the decrease in normal births as a direct result of the war to the number of 21,000,000. Ten million deaths in the field and hospital are listed, and 6,000,000 civilian deaths brought on by privations.

Russia's war dead in her civil conflict at the end of 1924 are estimated by the Carnegie Endowment for International Peace at 2,762,000.

The British labor delegation to soviet Russia reports the cost of the revolution to be 6,500,000 from fighting, disease and infant mortality. In addition, the famine of 1921-22 is charged with carrying off 5,000,000 men, women and children. Thus the total recorded losses of that unhappy country for the decade approximate 15,000,000. Of this number, one-fifth was due to the World War and four-fifths to the bolshevist revolution. Communism has proved a costly experiment.

Before the war, Russia claimed a population of 182,000,000. One state broke away, carrying with it something like 30,000,000. Thus the census of Russia in 1920 should have accounted for 152,000,000. However, the actual soviet estimate in 1924 placed the number of its people at 134,000,000. Thus 18,000,000 souls disappeared from the soil of Russia into the vast unknown. Of this number, the war dead and refugees could account possibly for 5,000,000. The remainder may be credited to the horrors of the regime.

Germany lost nearly 2,000,000 men killed and 6,475,000 were ceded away in territory lost. Yet in 1925 she had recouped her losses and was but 2,000,000 short of her 65,000,000 inhabitants of 1911.

Great Britain had 1,800,000 more people in 1921 than she had in 1911. France has failed to recover her war losses. In 1926, with the 1,800,000 people she obtained in Alsace and Lorraine, she is yet short more than a half million of the population she had in 1911.—Grand Junction. (Col.) Daily Sentinel.

CROP REPORT SHOWS TEXAS TO BE FAIR

The following report of the crops for the state of Texas was issued by the Rock Island Railroad and is accepted as authentic. The general condition of the state is first in the list, while the second paragraph deals with the Panhandle section of the state. The report follows:

It is not unusual in Texas for soil-moisture conditions to approach the critical stage and to have the situation change for the better almost overnight. Prior to the good precipitation of early May a large area in western sections had become very dry but since then more rain has brought at least temporary relief although additional good general rains are needed to correct the accumulated deficiency of moisture. Dry weather prior to May coupled with high winds and freezing temperatures, caused a rather large abandonment of winter wheat particularly in the northwest—for the state as a whole it is estimated at 24 per cent which leaves 1,950,000 acres to be harvested—the rather low 55 per cent condition as of May 1st indicates a probable production of 18,232,000 bushels compared with 17,945,000 bushels harvested last year and the ten year average of 19,783,000 bushels. Cotton is now getting off to a fair start but cool weather and drying winds are still interfering with normal progress of this crop. Corn has been held back by unseasonal weather and much replanting was necessary as a result of low temperatures, moisture conditions and insect damage. Most of the rice acreage has been sown and is up to a good stand. Tame hay and spring pastures are doing fairly well, condition of the form-

High Cost of Living or Increased Carelessness in Spending

Every day you hear some one make mention of the idea that the continued high cost of living is about to ruin the country. (And it is generally agreed that it costs more to live than it did some years ago.)

But there is another question of much greater importance than that of the "High Cost of Living," and yet one that you never hear mentioned, and that is—"The increased carelessness in spending."

Statistics Show That We Spend Only 14 Per Cent Of Our Salaries For The Necessities Of Life.

What goes with the other 86 per cent?

Over-heated Homes, Scanty Dress, Cause of Colds Among Women

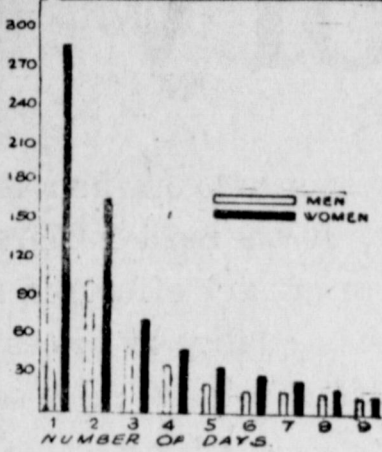

WOMEN catch cold twice as readily as men. According to reports from the United States Public Health Department, an average of 2.1 working days out of every year are lost by women on account of colds for every 1.4 day lost by men. This represents a loss of industry of between \$60,000,000 and \$100,000,000 annually, it is estimated.

Four out of every ten men and seven out of ten women are incapacitated by colds each year. Health organizations blame this largely on the abbreviated styles of women, who come from over-heated homes into severe weather inadequately dressed. Over 50 per cent of colds and other respiratory diseases are preventable modern medical writers say. Most homes are over-heated and the body is coddled and rendered more susceptible to drafts and the chances of germs invading the body. Better control of furnaces and better heat regulation is recommended in preventing colds. The temperature of the living room should be kept at an even temperature of around 68 degrees, and sharp changes in temperature should be avoided.

DONLEY COUNTY WOMAN ENTERS ROOM CONTEST

The following story will be of interest to members of the Home Demonstration Clubs of the county in that one of their members is the one most vitally connected with the story. Mrs. Henry Dozier was entered in the Living Room Contest of the county without her knowledge and was given the county prize for the reason that no other entries were had from Donley. The District judges will visit the place Saturday of this week, later passing on to the State should Mrs. Dozier be fortunate enough to win in the District. The story follows: One afternoon while I was visiting my neighbor, Mrs. Holly, she surprised me by asking me why I did not enter the Living Room Contest. No such thought had ever occurred to me and I told her as much, adding that even had I thought of doing so, it would be out of the question because I could not afford to spend the necessary sum that would be required. Mrs. Holly only smiled. This conversation, which I promptly dismissed from my mind,

Above—Nurse gives health rules to flappers. Below—Chart showing lost working days.

Thermostatic control of furnaces is recommended as the best way to maintain healthful temperatures in the home. By means of the thermostat even temperatures are maintained during the day, while a clock control attends to opening and closing furnace drafts at night so that lower temperatures may be maintained during hours of sleep and the furnace automatically opened an hour before rising time in the morning. Thus temperatures are maintained both day and night.

occurred some time last fall, but it was brought back to my mind rather forcibly last January when the Club members informed me that they had entered my name in the contest.

This information was quite upsetting as Henry and I were newly married and our marriage has been based solely upon our devotion for each other and a willingness to work; besides our living room was quite comfortable as it was. I had planned to make some changes but the changes I had in mind would not be as expensive as I imagined they must be if I entered the contest. I refused to enter the contest, but Mrs. Holly and Miss Key insisted so persistently that I gave at last a hesitating, half-hearted consent. But I had completely backed out by the time my husband came home from work. Of course the first thing I did was to tell him all about it and you cannot imagine my surprise and pleasure when he assured me that it would be fun and that he would help me in every way possible.

As it was necessary to have some definite plans, I went to Miss Key's office and she helped

me outline some plans from which to work. She and the judges came out, scored and made pictures of the room before I could do anything to it.

The place had been rented out the year before and the whole house was badly in need of repair. Being short of room it was necessary that I combine the living room and dining room.

The paper was soiled and ragged. The blue brocaded satin finished with a small gold edge added to the interest of the end tables, while the console table had a simple white linen cover, in the center of which was placed a little flower basket of natural color reed, and candle sticks with blue and gold candles on the ends. The dining table was made very attractive by a simple white linen cover, with a little reed fruit basket filled with fruit to give it the desired touch.

Aside from the mirror as a gift from the Ashtola Demonstration Club and one of the end tables secured by my taking orders for subscriptions to the Holland's Magazine, the total cost of my living room improvement was \$123.50.

We are so happy over the improvements of the living room and the pleasure we have already

derived from it, that we have decided to experiment on the rest of the house. With the County prize of \$5.00 cash from the Clarendon Chamber of Commerce, I am going to put it into the improvement of the other part of the house, which I hope to receive as much or more pleasure from as I have from the improvements already accomplished.

Signed,
Mrs. Henry Dozier.

POULTRY SUGGESTIONS

By F. W. Kazmeier, Bryan, Texas

A good many people are always looking for an easy way of doing things, rather than the best way. These have resorted to round about ways of killing such vermin as lice, mites and blue bugs. Thousands of bottles of "some dope" to kill lice and mites, by adding it to drinking water or feed has been sold in Texas. To say that a million bottles of this "stuff" has been sold in Texas alone, is no exaggeration. Let us see what the U. S. Dept. of Agriculture has to say about it. The following is a quotation from Technical Bulletin No. 60, U. S. Department of Agriculture, Washington, D. C.

"There is a general impression among farmers, poultrymen and stockmen that certain chemicals,

administered internally, will protect animals from external parasites. The prevailing idea is that the material is taken up by the blood and excreted on the surface of the body or on the body coverings. It is commonly believed that when parasites come in contact with such portions they are poisoned or repelled by the chemical.

As this impression has been commercialized to the extent of several million dollars during the last few years, and as several of the proprietary remedies have been tested for fowls and found ineffective, it was deemed advisable to make controlled tests of some of the chemicals most generally used."

Quoting further from this Bulletin: "The experiments given shows that none of the preparations tested was of any value against the insects used. Not one of the preparations here considered, when given in food or drinking water, showed any indications of value against the parasites used in these experiments. Tests conducted with nux vomica, to kill lice, also was proven to be worthless."

Accordingly millions of dollars have been wasted on patent remedies for internal use to kill the poultry vermin, which have been found utterly worthless. Once and for all let us remember that in-

ternal remedies to be given in food or drinking water to kill lice, mites, blue bugs, fleas and other similar parasites, are made to sell but won't do the work and have been officially branded as worthless.

Often have I heard people claim feeding nux vomica will run the lice and mites off or kill them. Carefully conducted tests prove that mites and lice will grow fat on hens fed nux vomica. One after the other, these old time ideas, founded upon imagination are knocked into a cocked hat. We will bet however thousands of people will still keep on wasting money on these easy sure cures for many years to come. These same people would hesitate to spend money for good feed or housing, but they like the idea of allowing the hens to roost in the trees, to pick up their living around the barn lot and other places, and when it is about the right time to kill lice and mites, they invest one dollar in a bottle of colored water, place a few drops in the drinking water, and lo and behold the lice and mites, leave or die. Beautiful idea, but it won't work.

Miss Reuelia Dubbs, who is attending Amarillo Business College, spent last week with her parents, Mr. and Mrs. S. S. Dubbs.

ITEMS OF INTEREST IN DONLEY

HUDGINS

This community was visited by one of the worst rains and hail storm ever seen here. Lots of hailstones larger than a hen egg are still drifted up in large piles. Lots of damage was done to the house tops, window lights, gardens and crops which will have to be replanted.

We are glad to report the sick all improving.
Rev. Laney failed to preach Sunday evening on account of sickness. Brother Swinburn of Lelia Lake was present and made a splendid talk which was enjoyed by all present.

Mr. and Mrs. B. F. Fletcher called in the O. L. Jacobs' home Tuesday night until a late hour. Mr. Millsap and Mr. Rampy of Chamberlain attended Sunday School at Hudgins Sunday evening.

Mr. and Mrs. I. M. Noble and daughter, Miss Gladys, visited in the O. L. Jacobs home Saturday afternoon.

The wedding bells were ringing in this community today for Mr. Kay Smith and Miss Lillie Christie, who were married in the home of W. E. Christie by Rev. Owens. We all wish for them a long and happy life together.

Mrs. Bryant and daughter of Clarendon is visiting in the J. L. Talley home this week end.

Mr. Sam Lowe, Mrs. Lowe and Mrs. Dosier of Clarendon visited their farm south of town and called on T. R. Gray Sunday afternoon.

NAYLOR

Naylor is still on the map regardless of the heavy rains. Our part of Lake Creek is now a river.

Our farmers will have all their crops to replant, yet we are happy to have the season, so are smiling and busy.

Our school closed Friday. The play was given Thursday night before a crowded house. We have had a most successful term of school, both teachers and pupils have given time, interest and hard work to the school. Our teachers were Mrs. Fulghum and Miss Stocking.

Miss Lucille Pickering is now at home after being in school at Clarendon for the past year. We are proud to know that Miss Lucille made a fine record.

Miss Rachel Tidrow spent the week end with home folks, returning to Memphis to attend summer school. Miss Rachel finished Memphis High School this year.

Mr. and Mrs. A. E. Tidrow attended the graduation exercises at Memphis Friday night.

Waldon Downing had for weekend guest, Glen Wood. Mumps are still with Naylor, only a few cases.

Rev. Williams filled his appointment Sunday giving us his good sermon.

Sunday School was well attended Sunday afternoon.

Mr. and Mrs. A. E. Tidrow spent Sunday in the home of Mr. and Mrs. Rich Bowlin.

MARTIN

Rev. McClung brought Miss Bray of Memphis out Sunday afternoon and she had charge of part of the services. She and Brother McClung both gave us some splendid talks.

Miss June Collier of Goodnight spent the week end with Miss Kate Talley.

Miss Kate Talley has returned home from Pampa, her school having closed there last Friday.

Miss Mildred Pittman is at home after having been in the Clarendon school the past term.

Mr. and Mrs. Sam Tankersly

entertained the young folks with a social last Saturday night.

Miss Selma Barker of Ashtola spent the week end with Miss Lois LaFon.

Miss Ina Fay Pittman spent Saturday night and Sunday with Mrs. Talley's parents, Mr. and Mrs. Oscar Parsons of Claude.

Mr. and Mrs. Lue Wood of Shamrock visited their parents, Mr. and Mrs. Alvin Pittman and Mr. and Mrs. P. O. Wood, Sunday and Monday.

Mr. J. E. Blankenship of Hedley visited in the J. B. Turnbow home Monday.

Mr. and Mrs. Spurgeon and family of Clarendon spent Sunday in the O. D. Hearne home.

Mr. and Mrs. J. B. Turnbow and son spent Sunday in the J. D. Acord home.

Miss Sybil Smallwood of Amarillo spent Sunday with her sister, Mrs. L. D. Pittman.

Miss Mabel Sibley has returned to her home after being away since the first of the year teaching near Colorado, Texas.

Mr. Clifford and Miss Meacham of Clarendon visited in the L. D. Pittman home Sunday afternoon.

ASHTOLA

Sunday School was at the regular hour with good attendance.

Kieth Swinburn spent Saturday night with his brother, Vance, of Lelia Lake.

Death visited our community last Monday and claimed the mother of Mr. Dunning.

Mr. and Mrs. Ben Lovell, Mr. and Mrs. W. T. Eldridge of Lelia Lake, Mr. and Mrs. Elmer Hunsuckle, and Mr. and Mrs. Henry Dozier spent the day in the home of W. A. Poovey.

Mr. and Mrs. D. F. Randel and daughter, Beatrice, are spending a few days in Chillicothe.

Mr. and Mrs. Christal and family of Lelia Lake spent Sunday with Mr. and Mrs. J. F. Parker.

Misses Grace Slater and Syble Wade spent Sunday with Virgie Wallace.

Miss DeEtte Reed is home from attending school in Canyon.

Mr. and Mrs. R. H. Robert and son spent Sunday with Mr. and Mrs. Pal Johnson.

Messrs John and Lawrence Hayter spent Mother's Day with their mother, Mrs. J. S. Hayter.

Mr. and Mrs. Oscar Kempson spent Sunday with her mother

and Father, Mr. and Mrs. S. A. Eddings.

Miss Selma Barker spent Saturday night with Lois LaFon of Martin.

Mrs. J. H. Burror spent Sunday in the home of H. W. Lovell.

Miss Mary Lois Hayter is visiting in Dallas for a few weeks.

Miss Ina Poovey spent Sunday with Margaret Swinburn.

Mr. and Mrs. N. R. Swinburn and Onata Hayter visited Vera Johnson Sunday.

Miss Jessie Swinburn is visiting friends and relatives in Vernon.

Mrs. W. H. Hastings of Hereford is visiting her daughter, Mrs. Gid Williams.

Miss Virgie Wallace spent Saturday night with Grace Slater.

Mr. R. L. Mason and family visited in the home of S. A. Eddings Sunday.

Mr. Dee Jordan spent Sunday in Okla Union.

Mr. and Mrs. W. H. Grounds of Clarendon spent Sunday with her daughter, Mrs. J. S. Hayter.

Mr. Buster Ressel of Fort Worth is visiting his relatives, Mr. and Mrs. A. L. Allen.

Mr. Robert Holly and Miss Gladys Holly have returned home from school in Olton.

A 42 party was given by Jerry Hayter Saturday night.

Mr. Johnie Rex McClelland spent Saturday with home folks.

Quite a few people of Ashtola attended church at Martin Sunday afternoon.

Everybody will be busy replanting since the heavy rains the past week.

GOLDSTON

Every one is rejoicing over the fine rains of last week. The farmers are very busy planting. The grass is coming fine.

Sunday School was attended by a large crowd Sunday evening.

Mr. and Mrs. Gleazener of Jericho and Mr. and Mrs. Parker visited with Mr. and Mrs. Henry Wilson Sunday evening.

Miss Pansy Dawson started to Summer School at Clarendon Monday of this week.

The Merry Maids Club was entertained at the Walker home on the Plains Wednesday of last week and on account of the heavy rains were forced to remain over night returning Thursday morning. All report a very nice time.

Mr. and Mrs. Tom Goldston of Clarendon visited in the J. J. Goldston home last Sunday.

There was singing at the schoolhouse Sunday night.

A bunch of youngsters went skating Sunday after Sunday School.

The Misses Walker of Boydston

Concrete Roads Are An Investment — Not a Speculation

Concrete Roads do not wear out at the end of eight, ten or twenty years.

Concrete Roads can be built to carry any kind of traffic, indefinitely — practically without repairs. They save the high cost of maintenance so common with less durable types of construction because they have the maintenance built into them.

Why Not Double Your Working Capacity?

In these days of labor shortage and the consequent high wages demanded by the available farm help, every mechanical device that saves time and labor and money appeals to the progressive farmer.

When one man can operate a **P.O. Two-Row Lister Cultivator** and double his own working capacity, saving the time of one man, there is no answer against the argument that he should possess one of these machines.

One of the appealing features on the **P.O.** is the wide range of adjustments for first and second cultivation, and the ease and facility with which they can be made.

Works as Easily as a Single-Row Cultivator

With new style small Disc and Four Shovels. **WHILE THEY LAST.**

STATE UNIVERSITY ESTABLISHES SCHOOL OF RELIGION

A school of religion in the state University of Iowa was inaugurated in 1927. It is a regular department in the college of liberal arts. Control is vested in a board of trustees on which Catholics, Jews, Protestants, and the university are represented. Registration in the new school was slightly less than 100 students. Courses are elective. Undergraduate studies include the Old and New Testament, ethics, and edu-

cational use of the Bible. In the graduate field courses are given in comparative religion and the history of religion.—School Life.

Hamilton—A new \$45,000 high school auditorium is to be built here at once.

Presbyterian Auxiliary Celebrates Thirteenth Anniversary

The ladies of the Presbyterian Auxiliary celebrated the thirteenth anniversary of the Auxiliary with a program on and special offering for the establishment of a training school for colored nurses at Tusculum, Alabama, when they met in the home of Mrs. J. O. Potts, Wednesday afternoon.

A social hour was enjoyed later with dainty refreshments being served.

Mrs. Patrick Charming Hostess

Mrs. W. H. Patrick was hostess to the members of the Episcopal Auxiliary when they met in their weekly study, Wednesday afternoon.

The lesson "General Convention in Washington in October" was led by Mrs. J. B. McClelland. This interesting study gave the members a clearer insight into the workings of their body as each phase and purpose of the convention was fully discussed.

Mrs. Patrick served delicious refreshments during the social hour.

Old Maid's Society Has Dinner With Florence Fink

The Old Maid's Society of the city of Clarendon enjoyed a splendid dinner Sunday in the home of Miss Florence Fink. Dinner was served at one o'clock and much merriment was had during the meal and in the afternoon that followed. The Country Club saw the group the remainder of the afternoon where the first swim of the season was enjoyed. Those present for the day and its fun were: Davilla Kelly, Gwyn Youngblood, Nadine Hailo, Betty Walker, Lois Alexander, Wylfa Lee Alexander, Julia Mae Caraway, Latrice Benson, Elrin Patrick and the hostess, Miss Florence Fink.

Friday Bridge Club Entertained

The Friday Afternoon Bridge Club members were delightfully entertained at the home of Mrs. Meredith Gentry Friday afternoon, in rooms fragrant with beautiful roses of varied hues and honeysuckle.

At the conclusion of the games of bridge Mrs. Dorr Ellis was awarded high score favor and Mrs. Philip Gentry drew consolation.

A most appetizing two-course plate luncheon was served to the following: Mesdames Nat Perrine, Charles Trent, Dorr Ellis, Forest Taylor, Philip Gentry, Selden Bagby, Holman Kennedy, James H. Morris, Park Chamberlain, John Ryan, F. C. Baldwin and Miss Mary Cooke.

Mrs. George Ryan Hostess to Mother's Club

On Friday afternoon, May 18th, Mrs. George Ryan was hostess to the members of the Mother's Club at her home on College Heights when they discussed "Nature's Provision for the Protection of Animals by Special Mental Gifts and by Special Physical Characteristics Suited to their Needs", with Mrs. H. T. Burton, Mrs. Jim Headrick and Mrs. T. H. Ellis gave interesting facts on the above subject which proved to be a far reaching and scientific study.

The last meeting for the club year will be with Mrs. J. G. Sherman, June 1st.

Needle Club Entertained By Mrs. Charles Trent

On Tuesday afternoon Mrs. Chas. Trent was the genial hostess to the members and a few invited guests of the needle club at her home.

Pleasant conversation and fancy needle work made the hours pass very pleasantly and swiftly with dainty refreshments being served late in the afternoon.

The following were present: Miss Ineva Headrick, Miss Ross, Mrs. L. L. Swan, Mrs. J. R. Porter, Mrs. B. L. Jenkins, Jr., Mrs. Manley Ozier, Mrs. E. Wilkerson, Mrs. Selden Bagby, Mrs. James Trent, Mrs. F. C. Baldwin, Mrs. Meredith Gentry, Mrs. Philip Gentry, Mrs. Richard Bell, Mrs. Homer Ellis, Mrs. Nat Perrine, and Mrs. Holman Kennedy.

Mr. and Mrs. Jimmy Miller are Hosts to Kongenial Kard Klub

The interior of the beautiful new home of Mr. and Mrs. Jimmy Miller was fragrant with roses Tuesday evening when they were host and hostess to the members of the Kongenial Kard Klub with a dinner-bridge.

Dinner was served at the small tables with covers being removed later for bridge in which Mrs. Chas. Trent, Mr. Park Chamberlain and Mr. Ira Merchant were so fortunate as to draw the lovely favors for the evening.

Those enjoying this lovely party were: Mr. and Mrs. C. E. Miller, Mr. and Mrs. Ira Merchant, Mr. and Mrs. Chas. Trent, Mr. and Mrs. Charlie Bell, Mr. and Mrs. Lenode Goldston, Mr. and Mrs. Dorr Ellis, Mr. and Mrs. Park Chamberlain, Mr. and Mrs. Clyde Price, and Mrs. Leonard Parker.

Mrs. John Beverly is Honored

The Beverly home was the scene of a merry surprise party given in honor of Mrs. John Beverly's birthday the 17th of May by a group of her friends who arrived about 8:00.

The guests came laden with beautiful flowers and exquisite gifts and it was the most complete surprise of Mrs. Beverly's

lifetime, she being unable to comprehend the meaning of the gathering until a large white frosted cake, with small birthday candles on top was revealed to her. The party lasted until late in the evening when the merry makers took their homeward way after many felicitations for Mrs. Beverly in the years to come.

Those bringing this happiness to Mrs. Beverly were: Mr. and Mrs. W. L. Butler, Mr. and Mrs. L. Taylor, Col and Mrs. C. Goodright, Mr. and Mrs. W. T. Hayter, Mr. and Mrs. Will Lott, Mrs. Frank White, Mrs. F. C. Whipple, Mrs. Humphreys and Mrs. Ed Carlson.

Mrs. Patrick Is Charming Hostess on Saturday

Among the enjoyable social events of the last week-end was the bridge-party given Saturday afternoon by Mrs. W. H. Patrick at her home, which was attractively decorated with cut flowers and potted plants, honoring the members of her bridge-club.

Following the games of bridge, in which Mrs. McMurtry was awarded club prize, Mrs. Glascoe guest favor and Mrs. T. H. Ellis consolation, the guests gathered for a tempting luncheon in the dining-room where a pink and green decorative motif had been most effectively used. A beautiful bouquet of pink carnations served as the centerpiece with light pink tapers in green holders on either side. Dainty nut cups and place cards in pink and green added much to the general attractiveness of the table.

Those present were: Mesdames Odos Caraway, T. H. Ellis, Chas. Bugbee, J. L. McMurtry, A. R. Letts, George Ryan, Homer Glascoe, J. B. McClelland, Dorr Ellis, Kate B. Carroll, A. T. Jefferies, and Mrs. F. C. Baldwin.

Mrs. Charles Trent Hostess

A successful party of last week-end was that given by Mrs. Chas. Trent Thursday afternoon, at her home.

Lovely roses were tastefully arranged in the rooms. Games of auction bridge began at three o'clock and eight tables were in readiness when the guests arrived. Mrs. C. W. Bennett, Jr., received the high score favor and Mrs. Holman Kennedy low.

Later cards were removed. Luncheon covers and a tasty two-course plate luncheon was served to the following guests: Mesdames Nat Perrine, Homer Ellis, Selden Bagby, O. L. Jenkins, Sam Dyer, Forest Taylor, Meredith Gentry, Philip Gentry, Holman Kennedy, Earl Alexander, Richard Bell, Ira Merchant, Jimmy Miller, Clarence Miller, Lenode Goldston, Dorr Ellis, F. C. Baldwin, James H. Morris, C. G. Stricklin, John Ryan, Clyde Price, C. W. Bennett, Jr., Floyd Lumpkin, Ralph Kerbow, Charlie Bell, Misses Beulah Baird, Anna Moores, Catherine Cole, Willette Cole, Fannie Florence Sims, Mary Cooke and Nettie Sims.

Dr. and Mrs. Rhoades are Delightful Hosts Saturday

Dr. and Mrs. H. H. Rhoades gave the members of their bridge club a real treat Saturday evening when they entertained at their delightful country home with a dinner-bridge party.

Roses served at the centerpieces for the small tables on which a sumptuous three course dinner was prepared. Later covers were removed and auction bridge was enjoyed with Mrs. Carroll and John Sherman Bugbee winning high score favors.

Those present were: Mr. and Mrs. A. T. Jefferies, Mr. and Mrs. J. L. McMurtry, Mr. and Mrs. W. C. McDonald, Dr. and Mrs. T. H. Ellis, Mr. and Mrs. W. H. Patrick, Mrs. Kate Carroll, Mrs. Anna Bourland, Mr. Fred Chamberlain, Mr. Wesley Knorrp, Mr. Louis Holloway and Mr. John Sherman Bugbee.

T. E. L.S. ENTERTAIN

One of the most enjoyable class parties of this week at the home of Mrs. W. A. Land, Mesdames W. A. Land, Marvin Land, and Eva Draffen being hostess.

The rooms were beautifully decorated with cut flowers and ferns. Games and contests were the diversion of the afternoon and laughter filled the house the entire time.

A delicious ice-course was served.

Miserable With Backache?

Too Often This Warns of Sluggish Kidney Action.

EVERY day find you lame and achy—suffering nagging backache, headache and dizzy spells? Are the kidney excretions too frequent, scanty or burning in passage? These are often signs of sluggish kidneys and shouldn't be neglected.

Use **Doan's Pills**. Doan's, a stimulant diuretic, increase the secretion of the kidneys and thus aid in the elimination of waste impurities. Are endorsed by users everywhere. Ask your neighbor!

Finish 22,000,000th Telephone— And Still They Turn Them Out!

Out in Chicago not long ago the Western Electric Company's Hawthorne Works produced its 22,000,000th telephone instrument. A little more than half a century ago Alexander Graham Bell made the first one, over which he transmitted the first complete spoken sentence on March 10, 1876.

The difference between the Bell model and that in use today, as far as appearance goes, is apparent from the picture above. A glance at the two instruments will also serve to give some idea of their respective merits as transmitters of speech.

Many models of instruments have been made in the intervening fifty years of telephone history. Some of the earlier ones, like styles of other days, seem strange today. The telephone pictured on the right below shows the double-barreled set made in 1877 and 1878. The two receivers were of wood and were used interchangeably for talking and listening. The best method was to put one to the ear and the other to the lips, although, with the dual telephone instrument, if the hearing was bad, the user would often listen with both.

The instrument on the left shows what was in 1892 the "most improved model" made by Western Electric. In the manufacture of each succeeding model, the aim has not only been to

Above: The old and the new—fashions in telephones are in contrast when the first talking instrument and the latest are brought together. Below: Views of two early types made by the Western Electric Company within the past half century.

obtain a higher degree of efficiency, but to secure greater beauty of design as well. In both of these respects, the 22,000,000th instrument marks a distinct advance in the art of telephone manufacture.

BASE BALL TOURNAMENT ENDS AT COLLEGE AND HIGH SCHOOL

Some four weeks ago there was a Base Ball League organized in the College and High School. There were five teams in the league the Sophomores, Juniors and Seniors of the High School and two teams from the College the Phi Beta Mu and The Delta Psi Literary societies.

COLLEGE LITERARY SOCIETY LAYS PLANS FOR SUMMER

Monday evening, May 14th The Alpha Delta Psi Literary Society of Clarendon Junior College, held its last meeting. After a splendid program was rendered, consisting of songs, readings piano solos, and talks from different members of the society, the members and visitors enjoyed a social hour with refreshments of lemonade and sandwiches that were prepared by the members. This society will continue its work during the summer months, they plan to have socials and picnics during the hot days of the summer.

This society was composed of some of the most active students in college the past term. During the next school term this society will be heard from in many ways and each member has agreed to do his part to put our Junior College on the map.

The following officers were elected for the summer months: Robert Dillard, President; Hazel Bourland, Secretary and Treasurer; and Loran Naylor, Vice President. Visitors are always welcome to our meetings.

Hoyt Jones and the Juniors piloted by Billy Dillard, locked horns in the final battle last Saturday morning, after a seven inning struggle the Juniors came out with the pennant by taking the large end of a 10 to 3 score.

NOTICE TO BOYS

Notice is hereby given that a strict enforcement is to be made of the ordinance in Clarendon concerning the carrying and use of "Nigger Shooters" and air rifles in the city limits. Report has been received that these are being used to shoot the street lights of the city in the place of game of a more lively nature. The hitting of these lights is punishable by a large fine and this will be collected if the use of the guns is not stopped at once.

H. W. TAYLOR, Mayor City of Clarendon.

PIONEER'S PATH TRACED BY ROAD

UNITED STATES ROUTE 40 LINKS FOURTEEN STATES EAST AND WEST

Before many years motorists will be driving from Atlantic City to San Francisco over smooth durable pavement. Gaps of earth and gravel roads together with highways of semi-permanent type will be filled in with pavement capable of handling high speed traffic. Such is the prediction for United States Route 40.

Following the path of pioneers toward the west, this highway furnishes the transcontinental motorist a comprehensive picture of the country's development. From its eastern terminus at Atlantic City, it follows for 205 miles across fourteen states the course of the earliest settlers of the Ohio, Mississippi and Missouri valleys. It weaves through the gold fields of Colorado, through the country of Brigham Young, founder of the Mormon settlement in Utah, and brings the tourist to the land of the setting sun—the Golden Gate.

From Wilmington, Del., to St. Mary's, Kan., the highway is paved for the full distance of 1,234 miles. From Salt Lake City to San Francisco, 890 miles, it is surfaced. Eighty-six per cent of the length is improved. Ultimate plans for the highway include the paving of all portions of the road with permanent construction.

A condition survey over the entire length of the highway, according to information furnished by the Bureau of Public Roads, United States Department of Agriculture, shows 1,550 miles of paving, 539 miles of gravel, 672 miles of earth, graded and drained and 444 miles unimproved.

Of the 1,550 miles of paved roads over 900 miles have been constructed of concrete—or about 30 per cent of the entire length of the highway is paved with this durable type.

An interesting section of the route is the 24-mile stretch between Zanesville and Hebron, Ohio. Here the Office of Public Roads, now the Bureau of Public Roads of the Department of Agriculture, built an experimental section of concrete in 1915. At that time concrete road construction was in its infancy but the thoroughfare Federal Aid has played a large part in the improvement of United States route 40—over \$18,000,000 has been contributed by the government for this transcontinental thoroughfare. Federal aid projects on the route include 700 miles of pavement, 725 miles of surfaced road and more than four miles of bridges.

That valuable gift that costs nothing—Sunshine. Give it to your babies in generous quantity. It has long been a tradition that babies are delicate and must be carefully guarded and protected from direct sunlight. When they are put outdoors they are bundled up in many clothes and wraps, the hoods of the baby carriages are pulled up so as to effectively keep out every ray of sunlight. The carriages are frequently placed in the sun, but the ultra-violet rays cannot penetrate the hood and the clothes to reach the baby. This caution has been thought necessary because of the rigor of northern winters and the frequent high winds of spring and fall. It has not been appreciated that the heat rays of the sun can be utilized to help keep the baby warm, provided that he is sheltered from the wind. It has also been believed that infants' eyes are weak and sensitive to light. Inflammation, however, does not occur when the eyes are closed or when the head is turned so that the eyes are not in the direct line of the rays. Traditions such as these are hard to break, and new ideas and new customs must be introduced to take their places.

The beneficial effect of sunlight is to be obtained unless the rays reach the child's skin directly. The interposition of much clothing or window glass keeps out the ultra-violet rays. It is only when the skin begins to be tanned that any benefit may be expected. Sun baths in the direct sunlight are the simplest method of giving the baby enough ultra-violet light. Older children who have learned to walk naturally seek the sunny part of the playground. Babies are dependent on others to put them in the sun. In the North Temperate Zone it is usually possible for normal babies to begin to have outdoor sun baths by the middle of March or the first of April, provided that the place selected for the sun bath is protected from the wind. Sun baths should be begun when the baby is about 3 or 4 weeks old. Babies born in the spring and summer, therefore, can have outdoor sun baths earlier than winter babies. The exact date when sun baths may be started will vary with the latitude and season.

It has been estimated by physicians interested in the longevity of man, that the span of human life (according to the American Mortality Table, which has been in use for about 50 years) in the last century has increased from 37 to 57 years, due to the triumphs of medical science over such diseases as smallpox, scarlet fever, diphtheria, and tuberculosis, deaths from which have decreased 50 percent in the last 25 years. It is noted, however, that deaths

from diseases of the heart, kidneys and blood vessels have increased to an alarming degree. If man would limit his diet and take proper exercise, heart disease would show a decrease. Our fatigue and the irrational speed at which man is now living contribute their share to the grave danger—heart disease. Every person after reaching the age of 40 should have an annual physical examination by a competent physician, as the probabilities of heart trouble materially increase after this age.

Heart disease should have just as thoroughly organized effort for its study and prevention as tuberculosis, cancer or other ills that sweep away the human race in great numbers.

SHORT COURSE TO DRAW MANY FOLKS

DONLEY COUNTY WILL BE REPRESENTED AT COLLEGE STATION

Farmers and their families, boys and girls of 4-H Clubs, members of various organizations allied with agricultural pursuits are expected to gather in record breaking numbers at the A. & M. College of Texas for the nineteenth annual Farmer's Short Course this summer. H. H. Williamson, vice-director and state agent of the extension service, declared following a survey of plans and preparations for the forthcoming meeting. The Short Course will be held this year the week of July 30-August 4. Most of the details for the meeting have been worked out and complete program is to be announced soon.

The scope of the short course program will be as extensive as ever this year, with talks and demonstrations on virtually all branches of farming, livestock and poultry raising and home-making, scheduled. In order to facilitate matters and to prevent as many conflicts in the various meetings as possible, the program for men has been divided into three main sections, livestock, poultry and crops. The livestock section will deal with beef cattle, sheep, goats, hogs and dairying, while the crop section will be devoted to the main field crops, farm engineering, fruit, truck, and pecan culture.

The program for women and girls will include courses in food preparation and preservation, relation of food to health, appropriate clothing for the family, interior home decoration, home and yard beautification, gardening, poultry raising, and dairying. Among the many state contests to be held during the short course will be the 4-H Club girls' appropriate dress contest, women's judging of butter, 4-H Club boys contests in judging livestock and grain and in terracing and state poultry judging contest for both boys and girls.

Meetings of numerous special groups and associations interested in various phases of agricultural development have been scheduled for the short course period. Among these are the Texas Beekeepers Association, Texas Agricultural Writers, service group of the Texas Farm Bureau, Extension Service and Experiment Station workers, county school superintendents, county judges and commissioners, and others.

The same method of handling the lodging and feeding employed last year in caring for the 4,000

Magnetic Probe Developed in Factory Is Boon to Physicians

Dr. E. M. Kelly of the Western Electric Company's medical staff demonstrating the new magnetic pencil. Insert shows a close-up of the tool.

A magnetic probe no longer than an ordinary lead pencil is one of the most recent achievements of the scientists at the Hawthorne Works of the Western Electric Company in Chicago. The new instrument, which promises to be especially valuable in the field of optical surgery, draws out iron or steel particles embedded in a person's flesh. The probe is small enough so that it can be carried by a physician in his instrument case.

Members of the hospital staff at the Hawthorne Works, in co-operation with representatives of the engineering manufacture branch at the factory, some time ago realized the feasibility of a small permanent magnet to replace the comparatively bulky electromagnetic type of probe, the only instrument of this nature the medical profession has heretofore possessed.

By using cobalt steel, Dr. R. C. Hartsough, of the Western Electric Physical Laboratory, finally produced a magnet two and one-half times as powerful as one made of tungsten steel, which is the material commonly used. Acting on the suggestions of members of the Hawthorne medical staff, Dr. Hartsough then designed the pencil, fashioning it with one end flattened for use in connection with cuts, and the other end pointed like a sharpened lead pencil for particular application to eye cases.

According to the medical men who have experimented with the pencil, it is the only instrument now available for effectively removing floating iron or steel particles from the eye, and can be used even when the object has become embedded in the eyeball itself.

May 27, Sunday morning, Baccalaureate Services.

May 28, Monday evening, Pageant, Department of Physical Education for Women.

May 29, Tuesday, Senior Day.

May 30, Wednesday, Commencement and Alumni Banquet, Commencement Day, Graduation Exercises

AMARILLO FURNITURE HAS BIG OPENING DAYS HERE

Last week's issue of the Clarendon News carried the announcement of the three opening days of the new furniture store in the city. The company opening here has recently spread out over a great part of the Panhandle, taking in towns on the South Plains and extending to Memphis and Childress on the East. Mr. Griggs of Amarillo was here on Saturday and Monday to assist in placing the merchandise and in the opening days of the store. The local management of the place of business is to be in the hands of Mr. J. Heath, who has moved with his family to make his home. The building they are using is located on the corner of third and Kearney Streets and was formerly occupied by the Quality Grocery. A complete new front was installed and the interior of the building was retinted in a light shade. A partition will be added to the rear of the building to hide the furniture that has not been uncrated, but which will be stored in the back part of the place of business. Their specials advertised for the latter part of last week drew a goodly trade for their opening days and showed the people of the city just what their plan of operations will be in the future.

MEMORIAL DAY

MAKING GOOD FARMERS BETTER

The community is full of good farmers, men who are conscientiously striving to get ahead.

Through systematic study of "better farming" we hope to be useful in helping those who will work with us to produce more and market to better advantage.

Better farming means merely more study—and we are here to help.

Farmers State Bank

"There is no Substitute for Safety"

PRESBYTERIAN CHURCH

All regular services may be expected on next Sabbath at the Presbyterian Church.

Children's Day exercises will occupy the Sabbath School hour, beginning at ten o'clock. At this service an offering will be made for the purpose of helping to win the children of the world for Christ. Let's make it a libera one.

Visitors are always welcomed; and we hope for a good attendance on the part of members of the church.

Mr. and Mrs. Charles Dean attended to business in Hedley Tuesday.

STYLE SHOW

The Chamberlain Home Demonstration Club will present a style show and a short negro play with appropriate music at the Chamberlain school Saturday evening

at 8:30, June 2nd, 1928. A small admission charge will be made. Funds derived from this source will be adapted to the needs of the Chamberlain Home Demonstration Club. A cordial invitation is extended to everyone.

WOMAN KNOCKED DOWN BY CAR IS UNINJURED FRIDAY

Mrs. J. H. Mitchell of Snyder, one of the entrants in the postal examination held here Saturday of last week, was slightly injured Friday when she was knocked down by a car in the driveway of the City Garage. Mrs. Mitchell was standing on the sidewalk when the car, driven at a fair rate of speed, was turned into the drive without further warning. She was knocked down and received some bruises about the body and her knees. She was unhurt otherwise and was able to take her place in the class of entrants for the examination. The car was evidently from Colorado but the name of the driver was not taken or other information secured as to the man who was driving.

Mr. and Mrs. W. V. Thomason of Lakeview spent last week-end in the home of Mr. and Mrs. C. M. Lane.

WHAT'S DOING IN WEST TEXAS

By West Texas Chamber of Commerce

Coleman—Coleman territory is being advised as to WTCC convention rates in a letter from Slim O'Neal, Coleman Secretary.

Gustine—Several structures are being erected here in the reconstruction program following fire in the business section.

Floydada—Floydada's municipal band will enter the annual band contest in connection with the Fort Worth convention of the WTCC.

Seymour—Seymour will be 1929 host to the largest District of the West Texas Chamber of Commerce, the 1928 Quannah session voted.

Clyde—Grape growers of this section have perfected an organization to develop their industry.

Hale Center—A poultry anti-thief association has been formed here.

Sweetwater—C. S. Boyles is the first man in this city to register for the WTCC convention; it will be his eighth time to attend.

Quitauque—Membership in the newly organized Quitauque Business Men's Luncheon Club is now over 30.

Alpine—Alpine will be host to the 1929 meeting of the Texas Woman's Press Association.

Spearman—Spring Park, Spearman's new recreation center, will be opened June 5 and 6.

Colorado—After being featured on a WTCC district meet banquet menu capons in this section have been sold out at a record price.

Hamilton—A new \$45,000 high school auditorium is to be built here at once.

Goree—The local grain elevator will soon be housed in a new building of enlarged capacity.

Canadian—Secretary W. A. Miller is seeing fruition of many months work in letting of a contract for the Washita Bridge on Highway 4 near here.

Clifton—Clifton's new and modern sewerage system is now in successful operation.

Snyder—Two heaves are already donated for the 1929 celebration to be held on the Cap Rock scenic highway.

Fredericksburg—After 60 years, Fredericksburg has become an incorporated city.

Albany—Albany's water improvement program has been completed.

De Leon—The De Leon icplant is now operated by the Texas Water Utilities Company.

FIRST METHODIST CHURCH

Sam E. Allison, Pastor.

Sunday, May the 27th.

Sunday School meets in all its departments 9:30 a. m., Judge J. R. Porter, General Superintendent.

Preaching services conducted by the pastor at 10:45 a. m. and 7:30 p. m. Sermon subject, Morning, "The Art of Worship. Evening, "David, The Hero."

Charles Dean is our musical director and Miss Fray Stallings is our Organist.

Helpful interesting services. You are most cordially invited and will be made to feel welcome.

READ THE ADVERTISEMENTS

R. F. MORRIS RETURNS FROM CAROLINA TRIP

R. F. Morris returned a short time past from his annual trip to the cotton markets of the Eastern United States, and a visit to his old home in the Carolinas. On the request of the News, Mr. Morris has given us a short review of conditions as he found them on the trip. He remarks especially on the change from one crop county to a land diversifying and learning not to depend on cotton as their only means of livelihood. The letter of Mr. Morris follows:

Editor News:

In compliance with your request that I write you a short article giving an outline of things along the line as I saw them, I will do so, thinking that it might be interesting to some at least.

I left Clarendon April 10th, stopped off at McKinney for a couple of days to attend the Dallas Presbytery, thence to Atlanta, Ga., on to North Carolina, thence to Willington, S. C. When I left Clarendon we were needing rain badly. I ran into the wet country east of Fort Worth, no cotton had been planted west of Fort Worth at this time, but quite a bit had been planted in the McKinney section. I understand all this cotton rotted in the ground and had to be replanted. I never saw a single stalk of cotton up all the way to S. C., which was the 17th of April. It was cold and raining most of the time.

Saw it sleeting in North Carolina on the 14th of April, and the tops of mountains gray with snow. I went up to Asheville one day. Al Smith was there, but that was not what I went for. However, I will say he was very popular with the crowds. Looks like he will be the party nominee. I left S. C. about the middle of May and on account of too much continued rains they had not finished planting cotton, and this condition existed all the way to Texas, which makes this cotton crop all along the line of the 34th degree, which is a fairly average one the latest crop I ever remember to have seen, and makes it exceedingly vulnerable to attack from the weevil. There is no forward crop from here to S. C. along the line of the 34th degree, but with rare exception all cotton from here to S. C. is about one age or size, which was in no instance higher than your finger or just coming to a stand, which showed the bad weather extended to the Atlantic Ocean and operated alike every where. My conclusion of the matter is we will have no early crops of cotton this year except in extreme low latitudes possibly. With the weevil menace and sorry planting looks like a poor crop for 1928 generally. If the weevil attacks it, to the extent of last year, would seem like we are on way to have high prices. We have a great opportunity here to make a killing this year with abundant moisture to start with and no weevil, my advice to the farmer is to take advantage of these things. I reached Clarendon Thursday night after some hours delay about Memphis on account of washouts on railroad and am glad to get back to my friends.

Respectfully,
R. F. MORRIS

Messrs Jim and Charlie Trent returned Tuesday afternoon from an eight day outing spent at Lake Kemp.

"The Recollection of Quality remains long after Price is forgotten." E. C. Simmons

The truth of this statement has been proven by the remarkable success of Simmons Hardware Company. We are glad to pattern our business on a Quality first basis, believing that the price is not the only consideration. With this in view we have for your approval a full line of Quality Furniture bought in carload lots, enabling us to sell to you at Bed Rock prices. We always appreciate your visits whether you buy or not. We will make you a liberal allowance on your old furniture.

20 Acre Hospital Uses Color To Aid Cure

THE greatest hospital in the world was placed at the disposal of suffering humanity recently when six units of the wonderful Medical Centre in New York City were opened. This Centre really comprises several of the most influential hospitals, clinics, medical and nursing schools in the United States, housed in a group of magnificent buildings, which have been under construction for three years. It covers twelve city blocks or approximately twenty acres, and represents the last word in medical and surgical equipment.

A most successful effort has been made to avoid what has been termed hospital atmosphere. To that end color has been used freely in harmonious decorative schemes in place of the usual glaring white. For a long time the medical profession has been testing a theory that color and harmonious surroundings play an important part in the treatment of the sick. In the Medical Centre the use of color has attained a range never before employed in a hospital. In the various operating rooms of the main building, for instance, tiles of a delicate, restful shade of green are used on the walls instead of the usual white. In the building occupied by the Sloane Hospital for Women, daisies are used as a chief decorative motif, the delicate yellow and white colors on a con-

New York's Great Medical Centre and One of Its Wallpapered Wards

trasting background giving a most cheerful note.

In the Harkness Pavilion, the private patients' rooms are fitted with period furniture, and a particularly homelike atmosphere is achieved by the use of wallpaper in attractive patterns and colorings. This form of decoration, never before employed on so elaborate a scale in hospitals, has been used also in the wards. As an example, in the Cromwell Ward shown in the illustration, the walls have been papered with a design of

trees in the softest shades of green and gray, with a faint suggestion of yellow in the background.

The regulation white hospital beds have been eliminated and in their place are metal bedsteads which in the Cromwell Ward are painted a restful shade of green to harmonize with the walls. Special attention has been paid to the lighting of the wards and private rooms and in the Harkness Pavilion, each patient has a private refrigerator, and may order food a la carte.

A Successful Six new winning Even Greater Success

200,000 Buyers Can't Be Wrong

When the Pontiac Six was first introduced less than two and a half years ago, immediate buying enthusiasm was aroused. The public accepted the statement of General Motors and Oakland that here was a new car offering six-cylinder value never before enjoyed at such low price. 75,000 Pontiac Sixes sold in 1926 established a world's record for a new make of car. Sales for 1927 carried the total of satisfied Pontiac owners beyond the 200,000 mark.

And now, even if its unrivaled value could not be proved by comparison with other cars in its field—even if its superiority could not be demonstrated by scores of advanced features combined in no other low-priced six—even if all its claims to leadership were based on generalities—you could still buy the Pontiac Six with confidence... for 200,000 buyers can't be wrong!

If you want to know the truth about the Pontiac Six, go to any owner in town. And if you hear praise almost too enthusiastic to believe, remember that 200,000 owners will tell you substantially the same story!

2-Door Sedan, \$745; Coupe, \$745; Sport Roadster, \$745; Phaeton, \$775; Cabriolet, \$795; 4-Door Sedan, \$825; Sport Landau Sedan, \$875. Oakland All-American Six, \$1045 to \$1225. LIVESTOCK CONDITIONS NOT SO GOOD AS IN 1927

Austin, Texas, May 23—Live stock conditions in Texas during April were poorer than in April of last year, according to Bernard Nichols, assistant in charge of index numbers in the Bureau of Business Research of the University of Texas.

"Rains have brought temporary relief, and the warmer weather has stimulated the growth of plants," he said. "The spring movement of animals to northern pastures is well under way, and range trading is slowing up. Losses so far have been light, but the young animals in some cases are not growing as rapidly as usual because of the scarcity of green feeds and the cold weather."

In regard to stock reports during April, Nichols stated. "Practically all goats have been clipped, and sheep shearing is more than half completed. Wool for the most part is of excellent quality. Prices continue to advance, some of the best staple recently selling for 44 cents a pound. Mohair has been quoted at more than 80 cents a pound. Poultry prices have advanced. Butter is lower, but the market is firm. The egg market is about the same as last month's, but large quantities are going into cold storage. Cattle shipments have decreased 12 per cent below those of last

year. Calf receipts increased 19 per cent and hogs 3 per cent. Sheep shipments run about the same. Prices of cattle and calves declined slightly, while hogs, lambs and sheep advanced."

What Is Necessary to Make Dixie a Dairying Section?

There has been a greatly increased interest in dairying throughout the entire South during the past two years. The South needs to do more dairying because we need to consume more dairy products and need the additional source of farm income dairying is merely another form which dairying will supply. But of farm production and if it is to help in solving our problems it must be done economically and efficiently. Efficient dairy production is dependent on three important factors:

1. An efficient machine—good cows—for converting foods into milk.
2. Good dairymen who will produce cheap, care for cows well, and handle the products efficiently.
3. Suitable feeds secured at the lowest cost and fed intelligently.

In only one of these essentials have we a chance in the near future to compete successfully with the dairymen of other sections of the country. That one most important feature of economical and efficient dairying is an abundant supply of suitable feeds, economically and efficiently produced on the farm where consumed. It will always be necessary that we furnish the best of home grown roughage in abundance. These are good pastures, silage, and legume hays. The first and most important item in dairy production in the south is the production of these roughages in quantities to give the cows all green grass or silages and legume hay they will eat. Much of the concentrates should be produced on the farm where fed but dairymen will always find it advisable and sometimes necessary to buy concentrates to supplement the home grown feeds and which can be bought cheapest, feeding value considered, should be purchased. Dairy production in the South

is first a feed production problem, second a dairy cow breeding problem, and third rearing and training of a generation of dairymen.—The Progressive Farmer.

AMARILLO FURNITURE ENJOY AN ENVIABLE START

One of the features of the opening of Clarendon's latest venture in the business line was the success of the work of the first three days of the opening of the Amarillo Furniture Company. Mr. Griggs stated to a member of the News force that they had done exceptionally well in their first three days of the opening and that the first week in the city was all that could have been expected. He further stated that the opening of the Clarendon store had exceeded to this date the openings that had been staged in other stores in towns of like size to Clarendon in the Panhandle.

A significant feature of the opening of this new store was the fact that in the original three days opening, there was not a single request for credit on any of the home furnishings sold to the patrons of the place of business. This would indicate that the country and city are in a far better condition than many would have thought in that the residents of Clarendon and Donley County have the ready cash for what they most need in any line or lines of their living.

Ravenous Trout Attack Fisherman

LONE NIMROD ON REMOTE STREAM HAS THRILLING EXPERIENCE

A Wild tale of voracious man-eating trout is brought out of the wilderness by Bigges Liaro, an Italian prospector, who recently returned from the upper reaches of the Gunnison River. With grubstake exhausted, Liaro resorted to rod and line to secure a few trout for food. Wading a deep, swift stream, he stumbled and fell. "Instantly," swears Liaro, "I was attacked by hundreds of huge trout. They swarmed over me, bit my fingers, snapped the laces from my boots and almost devoured me alive before I could escape. Some were four feet long."

Whether there is any truth in Liaro's story or not, it is known to be a fact that Colorado's innumerable streams were never more alive with trout and they are hungry enough to snap at almost any sort of fly just now. Glowing reports of fine fishing combined with low summer fares on the Fort Worth & Denver, are attracting fishing fans from all over the Southwest.

BURTON'S HISTORY OF J. A. RANCH IS COMPLETE BOOK

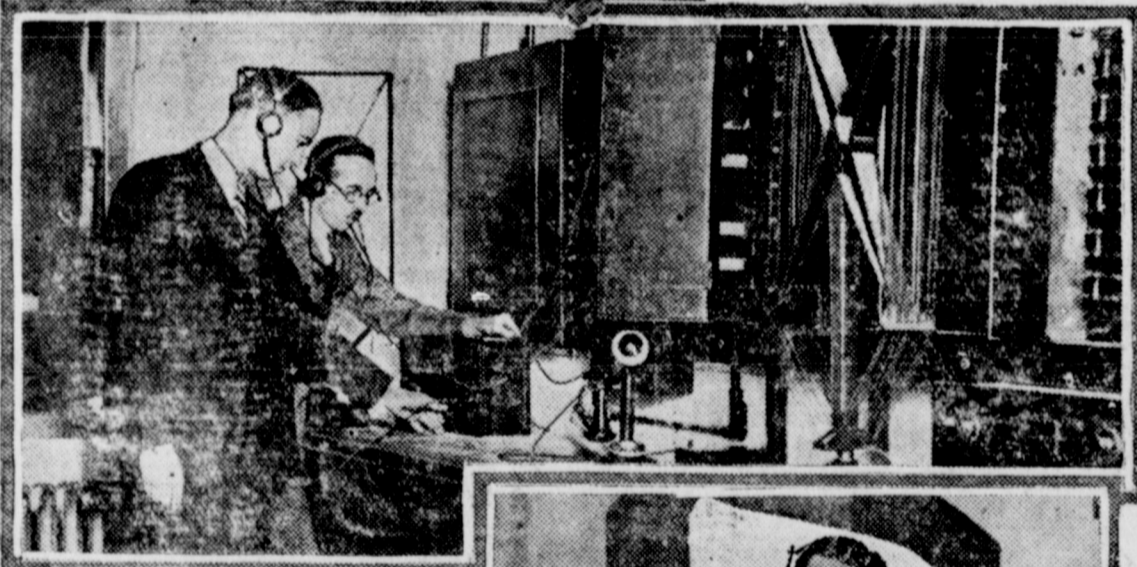

Continued from Page 1

the development of the Panhandle. In addition to this, the book contains vivid descriptions of the life on the Ranch, old and new, given for the most part, in the words of those who lived the life. Colonel Goodnight's description of trailing the great herds across the state into New Mexico and Colorado in the days of Indians and outlaws, and the methods he used in transporting cattle in those early days makes one of the most interesting parts of the book. Other descriptions of a day's work on the Ranch, the year's routine, and the great round-up are so picturesque and vivid that the

reading of them will undoubtedly bring a sense of home-sickness in those who have known the life of the range and left it.

Threading through the book are the life stories of those pioneering men and women who have made the history of the J. A. Ranch and the Panhandle. In these stories is the true romance of the Old West. The book is very fit. Goodnight, the first citizen of the tingly dedicated to Colonel Charles Panhandle, who not only played the leading role in the development of the section, but whose memoirs were of invaluable aid to Mr. Burton in compiling data for the History. While the account of Colonel Goodnight's work in developing the J. A. Ranch is more detailed than any other in the book, yet mention is made of more than one hundred and fifty men and women who had a part in

"Radio in Every Room" Proves Popular Feature With Hotel Guests

Radio receiving sets in every guest room is the newest innovation in hotels that boast "all modern improvements." After having been tried out in isolated cases, the experiment has proved so successful with the traveling public that now one of the foremost chains in the country has installed receiving apparatus in all of its hotels, at a cost of approximately a million dollars. This is the Statler chain, with hotels having a total of 7,700 rooms located in New York, Boston, Buffalo, Cleveland, Detroit and St. Louis.

The Statler in Boston, opened in March of last year, was the first of the chain to be equipped with individual receiving sets. In each of its 1,300 rooms a small table beside the bed had in it a drawer marked "Radio." In the drawer were the means by which a guest might tune in on one of two programs, listening to them either with headphones or through a loudspeaker. These same facilities have now been duplicated by Karr Parker, consulting engineer in charge of the original installation for the Hotel Buffalo, in Buffalo, N. Y., for the Hotel Pennsylvania in New York City and for the other Statler hotels.

Back of the simple way in which a guest may secure radio entertainment lies an elaborate system of receiving and distributing broadcast programs. Each hotel has a control room, usually situated on the top floor. In it are installed two Western Electric commercial receiving sets and amplifying systems, a monitoring system and an operator's desk. Operators are on duty from ten in the morning until midnight. Programs on the air are picked up by the receiving sets and, by means of the amplifiers, are multiplied many times for distribution throughout the hotel. Connected with the amplifiers are hundreds of conductors in lead cables, by means of which the music or speech is eventually channeled through to the individual rooms. If the room is a single one, a head set is provided, while in suites and in the employees' rest and lounge rooms, loudspeakers are used.

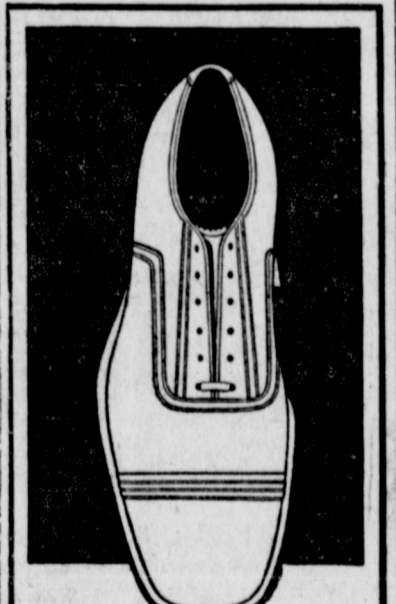

Above: Radio control room in the Hotel Pennsylvania, New York. Middle: At the other end of the circuit, enjoying one of the two programs available. Below: The late E. M. Statler, president of the Statler system, speaking into the microphones during the joint program broadcast to inaugurate the new radio facilities provided for guests.

The remainder of the room equipment consists of a switchbox with positions marked "1," "Neutral," and "2" upon it.

When the guest wishes radio entertainment, all he need do is switch the key from "Neutral" to either "1" or "2." He can then hear either one of two programs which the operator in the control room has selected for distribution throughout the hotel. One of these programs may originate within the hotel itself, for each is fully equipped with a Western Electric public address system. Microphones are installed in the main dining room, ball room, banquet rooms, and in other parts of the hotel where music or speeches may be heard. By means of this system, any occurrence

likely to be of interest to the guests or to the public at large can be transmitted not only to all the guest rooms but can be connected with a broadcasting station and sent out to the world at large.

Proof of the effectiveness of the system was given when all of the hotels in the chain participated in a joint program, broadcast over a network of seventeen of the larger broadcasting stations. From New York the program was shifted in turn to the hotels in Boston, Buffalo, Cleveland, Detroit, St. Louis and, finally, back to New York, the orchestras in each city contributing to the program. In the neighborhood of 2,000,000 people were estimated as having listened to the joint program.

Your feet need FLORSHEIM SHOES

They dress your feet better for less . . . nothing else will serve you as well or satisfy you as much at so low a cost.

OVER PRODUCTION IS NO LIKELY

SURPLUS OF DAIRY PRODUCTS NOT PROBABLE WITH HIGH IMPORTS

Because over-production so directly affects the price of cotton, one frequently hears the excuse of a farmer for not going into the dairy industry. "If too many farmers go into it, the bottom will fall out of the market." "That is not apt to be true," says H. D. Cuykendall, field representative and educational worker for the cotton oil mills and creamery. He says that the United States ships in butter each year, not producing enough to supply demand. Texas ships in more butter each year, not producing enough to supply the demand. Texas ships in more butter than she makes. The northern states are now supplying this butter, it coming from the big dairy centers in Minnesota and Wisconsin.

M. B. Oats, agricultural agent for the Fort Worth & Denver, one time visited a cheese factory in Wisconsin. He asked them where they could find a market for their product. He was told that the cheese was all sold to one man who took the entire output of the factory. Asked who that man was, the manager of the factory stated that the man lived in Dallas, Texas.

This goes to show that the northern states are supplying cheese to a state that is admirably located for dairying in every respect. Why not have our own cheese factories in our own state to furnish a market for our whole milk and to supply the demand for cheese that is set up by our own patrons.

There is a little likelihood that

The West Texas State Teachers College
CANYON, TEXAS
A standard Class A College, recognized throughout the United States.
Summer session opens June 5, 1928, and closes August 24. Students may enter June 5 or July 16. Courses lead to degrees and certificates.

OVER PRODUCTION IS NO LIKELY
production will affect the price of butterfat for a number of years. It certainly will not as long as the farmer in judicious and confines himself to a small herd of five or six head, enough to make his living expenses off of. He should not go into it on a wholesale scale to the neglect of cotton and other crops.
