Lt. Kelly Visiting Wife Here After Completing Missions In England

Lieut. Ernest I. Kelly arrived here Sunday night for a visit with his wife, the former Miss Madalyn Taylor, after completing his required missions as a bomber pilot in England. He arrived back in the states November 7th.

The following article was received this week end from the United States Public Relations office regarding Lt. Kelly.

AN EIGHTH AIR FORCE BOMBER STATION, England—

An Oak Leaf Cluster to the Distinguished Flying Cross has been awarded to 1st. Lieut. Ernest I. Kelly for "extraordinary achievement - courage, coolness, and skill" while participating in numerous bombing attacks on military and industrial targets in Germany and enemy installations in the path of the advancing Allied armies in Western Europe.

Lt. Kelly, 26 year-old son of Mr. and Mrs. D. C. Kelly, Petersburg, Texas, whose wife, the former Miss Madalyn Taylor, lives in Clarendon, also holds the awards of the Air Medal with Four Oak Leaf Clusters to the Air Medal and the Distinguished Flying Cross in addition to the Oak Leaf Cluster to the DFC. He is the pilot of the Eighth Air Force B-17 Flying Fortress, "Golden Goose," with the 385th Bombardment Group, commanded by Lieut. Colonel George Y. Jumper, Natoma, Calif. His group is part of the famed Third Bombardment Division, the division cited by the President for its now historic England-Africa shuttle bombing of the Messerschmitt aircraft factories at Regensburg, in August, 1943.

Since arriving overseas in April, 1944, in this toughest theater of aerial warfare, Lt. Kelly has piloted his fortress on more than 250 hours of bombing attacks against the Nazi war machine through the hostile skies over Continental Europe. Some of the objectives which he has bombed is the industrial targets in Berlin, Hamburg, and Munich, tank factories in Leipzig, tire factories in Hanover, aircraft factories in Regensburg, Warnemunde, and Magdeburg, docks and shipyards in Bremen, marshalling yards in Munster, and oil refineries in Merseburg. The Texas flier has also flown in direct support of the ground forces, bombing enemy troop concentrations, bridges, rail junctions, supply dumps, and communications lines.

Lt. Kelly's first DFC was awarded for bringing back his flak battered plane from Munich's industrial targets after two engines, both on the same side, had been knocked out. "We really sweated that one out," said the lieutenant. "Coming home alone in a crippled plane over Germany doesn't make for a long life."

A graduate of West Texas State Teachers College in Amarillo, in 1941, where he majored in physical education and played on the football and basketball teams, Lt. Kelly was football and basketball coach at Matador, Texas, High School before his entry into the AAF in June, 1942. He received his pilot's wings in October, 1943, at Fort Sumner, New Mexico.

Oliver Goldsmith said, "The first time I read an excellent book, it is to me just as if I had gained a new friend: when I read over a book I have perused before, it resembles the meeting with an old one." Many people can testify that "book friends" are very real friends.

The Nobel Prize committee announced a few days ago that its 1944 award for literature had been won by the Danish author Johannes V. Jensen.

Elizabeth Goudge continue to lead the best-seller list with Maughams "The Razor's Edge" second and "The Robe" third. Ben Ames Williams' "Leave Her to Heaven" is a little farther down the list this week.

The author of "Land Below the Wind", Agnes Keith Newton, was in Borneo when the Japanese invaded the island. Nothing was heard from her for a long while, but recently a relative in California has had a postal card saying she is in an internment camp with her baby. Her husband is a prisoner near by and they are allowed to

see each other occasionally. A former Connecticut Librarian who has recently spent 19 weeks in Texas writes, "The Camp Libraries are fulfilling their function admirably. They are small with a well chosen selection of books, Surprising, perhaps to some, they specialize mainly in non-fiction, with biography, history and the war and war subjects predominating. This is a well-informed army, and though current news is several weeks late when we get time to digest it, we still could hold our own in any discussion of present and post-war problems."

Recently a college girl went to a librarian in a city library to try to find the origin of "They that go down to the sea in ships"—and she was astonished when the librarian took the Bible and read her the 107th Psalm. She left saying, "I'm certainly glad I found it. The whole United States Navy has been trying to find that line."

Since "Private Hargrove" there is being a deluge of humorous war stories—a few of which we have.

We used to ride a lot

Wistful young America may not be able to understand why those long, lovely rides in the country are now only a memory.

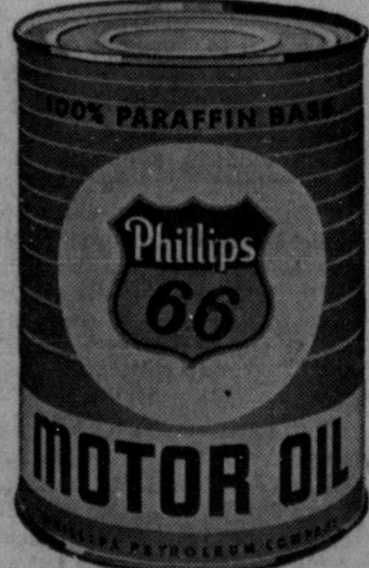

But their patriotic fathers, meeting the necessity for conserving gasoline and for prolonging the life of tires and cars, have reduced their driving to a minimum. They know that "Care for your car—For your country" is more than a slogan, that such care is important lest the nation face a wartime crisis in domestic transportation.

So now, more than ever, they want a quality oil to preserve and protect their motors. Their only question is: How can I tell which are the quality oils?

Here is one easy answer, in a very frank statement by Phillips: If you want our best oil, remember we specify that Phillips 66 Motor Oil is our finest quality . . . the highest grade and greatest value . . . among all the oils we offer to average motorists.

Experts recommend changing oil every two months. Especially, don't neglect the seasonal change this fall. Get rid of contaminated, summer-thin oil. Drain and refill with a quality lubricant. Ask for Phillips 66 Motor Oil.

THE TEMPLE OF TRUTH

By the Apostle

AESTHETICAL.
The absent-minded professor drove up to his carless garage, opened the door, peeped inside and blinked a few times. Then he rushed back to his car, jumped in and hurried to the sheriff to report his car stolen.

POPULARITY.
Criticism can be avoided by saying nothing, doing nothing and being nothing.

DISCOVERY.
A noted medical scientist has at last discovered the cause of bald heads. It is because the hair falls out—he claims.

CAUTION.
A drink in the hand is worth two bucks in the honky-tonky.

EXPLANATION.
The hard thing about making money last, is found in making it first.

EXPLANATION.
The reason a hole in the tooth feels so large is due to the natural tendency of the tongue to exaggerate.

MUSHY.
Fat women all in love more slowly, says a prominent social writer, and we might add more heavily, too.

LONESOME.
A service man in the south Pacific wrote home: "Write as often as possible. Long time no she."

PUBLICITY.
It has been said that the only couple that held no secrets from the other was the pair where both talked in their sleep.

"The melancholy days have come, the saddest of the year," so strummed the poet years ago. Poor devil! He must have been a dyspeptic. Who could be sad with punkin pie, turnip potlikker and many other good things that we only get in the fall of the year.

And that reminds me. John Naylor, thanks a lot for that sweet, solid turnip you brought me that weighed 7¼ lbs. I made a full dinner on it, and since I eat dinner at noon in good old West Texas fashion, there was time to recover before night after gorging on turnip. Thanks a lot.

Have a "Coke" = ¡Adelante con la musica!
(GET IN THE GROOVE!)

... or getting along in Guatemala

Music makes friends among our Latin-American neighbors, just as it does here at home. There's another custom that helps make friends even faster. It's the pause that refreshes with ice-cold Coca-Cola. Have a "Coke" is an invitation of welcome as quickly understood in Guatemala as in Georgia. In many lands around the globe, Coca-Cola has become the same symbol of friendliness that it is in your own living room.

METHODIST CHURCH

H. W. Hanks, Pastor

We are glad to be back for another year's work and splendid fellowship. God helping me I shall do my best. With the cooperation of the entire membership we can experience one of the very best years—the congregation has ever had. There is someone who can help. There is someone who will be lost forever if you fail to do your part. So let each of us gird ourselves for the duties of the new conference year. Only as we do our best are we true to our boys in the service. Only as we do our best are we true to our Saviour who died to save the world. The Christian religion is the cure for all the ills of our world. It is the only cure. God works through individuals. He wants to work through each of us. May none of us disappoint Him. We should have a hundred additions to the church this year. We should double the attendance at all our services. To do so however, we shall have to do more than wish. We shall each have to work. I covet your prayers and cooperation.

FIRST CHRISTIAN CHURCH

L. Guy Ament, Pastor

The Thanksgiving services will be at the First Christian Church, Wednesday, Nov. 22, at 7:30 p.m., the evening before Thanksgiving Day. This is a union service. Rev. Upchurch will deliver the sermon. All are invited to attend and singers to aid in the song service. Mr. W. D. Kidd will lead in the song service.

Our next Sunday services will be at 11 a. m. and night at 7:30. Next Wednesday night Bible study is postponed with reference to the Thanksgiving service which will be a union Thanksgiving.

CARD OF THANKS

Words are insufficient to express our heartfelt thanks and gratitude to each and everyone of our many friends for your many kind deeds and loving words of sympathy and comfort during our sorrow following the death of our precious son, brother and uncle.

May God's richest blessings be bestowed upon each of you, who were so nice to us.

RED CROSS VOLUNTEER SERVICE

HOME SERVICE Mrs. C. A. Burton

Still we find people delaying furloughs in emergencies when they send telegrams to the boys in the Army and Navy without first getting Home Service to verify the need. No emergency furlough is ever granted until Red Cross does that. When I am notified, I send my telegram immediately after that from the family.

No country in the world has ever taken care of the families of its soldiers as has ours. The two principal benefits administered by the Office of Dependency Benefits are the Class E allotments of pay—which are made by the soldier entirely out of his pay, and the family allowances which are paid partly by a deduction from the soldier's pay and partly by the Government. The ODB—Office of Dependency Benefits—is operated by over 200 officers and 9000 civilian employees working on two shifts. It is the world's largest check-writing installation, using modern business machines for the complete preparation of checks at extremely high rates of speed.

There are about 4,000,000 family allowance accounts and 3,300,000 Class E allotments, making over 7,500,000 checks mailed out each month. The number is constantly increasing, for there are now being received daily about 3,000 family applications and 7,000 Class E allotment applications. The ODB is issuing benefit checks at the rate of \$18,000,000 a day. More than 6½ billion dollars has been paid out since the government began the plan. There are approximately 11 million dependents of men serving in the American Army relying on the ODB every month for some portion of their support. This has been in effect since September 1, 1942. There have been various amendments and changes in the law.

Cpl. Bob Allison spent the week end with his parents, Mr. and Mrs. R. C. Allison and friends.

Penelope Blocker is visiting friends in Dallas this week.

QUESTION OF THE WEEK

What do you dislike in a boy?

Edna Lamberson: talking about other girls when he is with me.
Beverly Stricklin: talking too much.
Erma Lee Elliott: pestering me.
Marilyn Maher: when they get in those "awful" moods.
Ada Sue Smith: disagreeing with everything I say.
Louise Mann: I dislike boys who are thieves.
June Atteberry: unfriendliness.
Ruth Patman: being sarcastic.
Dorothy Jean: smart alecks.
Melba Ruth: not taking me home when it's time.
Treva Nell: ditto Lamberson.
Kathleen Grady: saying one thing and meaning another.
Billie Jean Knox: being late for a date.
Mary Williams: being conceited.
Edith McCrary: keeping me in suspense.
Joyce West: keeping me out too late.
Dot Kemp: never agreeing with anything.
Laverne Darden: He tells your best friend what he thinks about you.
Barbara Bell: They have to go to the Navy.
Frances Peabody: Smart alecks and "stuck-ups".

What do you dislike in a girl?
Donald Beard: when they are too noisy.
Douglas Lowe: when you can't trust them.
Richard Maxey: Fickleness.

"Jiggs" Mann: nothing, except when they run out on you.
"Tuffy" Ellis: two-timers.
Lynn Leathers: Fickleness.
Billy Neal Bogard: being a flapper.
"88" Keys: conceit and lack of self control.
"Dude" Merchant: female politicians.
Jr. Mann: when they have too many boy-friends.
"Hatrack" Parker: female wolves.
James Palmer: silliness.
Jim Douglas: being sarcastic.
Manly Bryan: forwardness.
"Rube" Adams: nothing.
U. G. Swinney: Ah shucks!
Lee Shelley: some I do, some I don't.
H. R. Cowan: when they lie to you.
Billy Roy Blackman: telling you one thing and doing another.

"HELL WEEK"

Monday morning when the doors of old C.H.S. was opened a garbled smell rushed out to meet us. We thought the chemistry lab. was at work again, but no, it was the Kappa pledges.
Mary Ann Bromley has twenty-four colored ribbons in her hair. Her long handles show under her sheer dress and hose. Her dainty school satchel looks very much like a toe sack.
Betty Brown really looks like a Negro; even her hair is frizzy. She has on about three pounds of jewelry.
Edna Lou Lamberson looks as if

she didn't have time to dress. She has on a house coat and house shoes. She is carrying her doll. Her hair is in pig tails. She is carrying a candle to light her way to bed.
Mary Nell Hanks has her hair oiled with a red ribbon tied on it. She wears a lamp shade for a hat. She looks like a dope the way her face is made up. She has on big rubber boots over levis. On top of her levis she has a green skirt, shirt and blue jacket.
This intoxicating perfume is not harmful—it is just a mixture of Fitch hair oil and onions.

BRONCHOS vs. CYCLONES

Last Friday night the Clarendon Bronchos met the Memphis Cyclones on the gridiron at Memphis. All of our team played an excellent game, but Adams, Maxey, Bulman, Bentley, Cowan, and the Mann brothers played an outstanding game. The score was 12-6 in favor of the Cyclones.
We of the press on behalf of the school and the people of Clarendon wish to thank the boys on the Broncho team of 1944 for the good sportsmanship they have shown in all the games. Let's all turn out for the game between the Clarendon Bronchos and Canyon Calves on Nov. 23, 1944.

DID YOU KNOW THAT—

J. B. took Sue to the show Tuesday night.
Wanda Cornell had a nice ride last Thursday night—Why Billy Chilton.
Douglas Lowe was with Beverly Stricklin Tuesday night.
Jimmie Dean took Melba Lee to the show Tuesday.
Ruby Jo is trying to rate a date with Jiggs Mann.
Laverne Darden stepped out on Billy Ray Graham last Tuesday night with Tommy Saye.
In the band we are sure going to have some good trombone players and bass players.

Treva Trussell and Barbara Bell have plaid skirts alike.
C. A. Ellis was sitting in the show with Sybil Head Saturday night.
Louise Mann claims that Alonzo Robertson came to see her Sunday.
Bert Barns was horse-back riding last Sunday.
A certain three people went to Memphis and had a soldier with them. What is all this that happened?
Louise, Douglas, Sue and J. B. went to Church Sunday night.

ARMISTICE DAY PROGRAM

Patriotic songs were sung for the opening of our Armistice Program last Friday. To carry out this theme several readings were given. Johnnie Johnson read "Armistice Day," Billie Jean Knox gave "Flanders Field," and Peggy Wiedman recited "The Service Flag." Jean Porter played a saxophone solo "Golden Wedding" accompanied by Mary Nell Hanks. The speaker was Mr. Burton who gave a very interesting talk on World Wars I and II. The Pep Leaders led the student body in fifteen raps for the Bronchos, and the football boys expressed their opinions concerning the outcome of "Coach's Story."

THE BIG DAY

Tuesday, November 7th, was a big day for the students of Clarendon High School and Colege. The College government class, under the leadership of Mr. Burton, held a Presidential election. The ballots used in this election were the same as the official election ballots used at the polls all over the country. The main reason for holding this election was to teach

the students exactly how to vote.
For the last few weeks discussion about the candidates has been going on. Some very interesting facts have been given by both sides, so therefore, everyone was looking forward to voting.
The results, after being tabulated, were as follows:
National Officers—
Democratic Party—128
Republican Party—25
Texas Regular Party—17
Socialist Party—0
Prohibition Party—0
State Officers—
Democratic—145
Republican—15

MOOS OF THE MOMENT

BY UNCLE BOB
of the Kraft Dairy Farm Service

Any of your calves showing up with circles under their eyes or turning in poor report cards? Chances are, if so, they are not getting enough Vitamin A, B complex or D.

All joking aside, calves do need vitamins, to keep them healthy, to build their bones properly and to help fight off certain diseases.

Vitamins are contained in the feed your calves get, but they may not be present in sufficient quantity. It's a very good idea and not too costly, to give them vitamins in capsules.

A circular called "Calves Need Vitamins" issued by the University of Wisconsin, Madison, Wis., recommends a double O size capsule of Vitamin A oil every other day, starting at birth and continuing until the calf is eating good quality hay.

B complex is recommended every other day for two or three weeks. These vitamins help clear up scours.

If your calves are getting plenty of sunshine, they may not need Vitamin D, but to prevent rickets add 1/4 to 1/2 pound of irradiated yeast to each 2,000 pounds of grain mixture.

The Wisconsin bulletin tells what vitamins do and why they should be added to your calves' diet. I suggest you write the extension service at Madison for a copy.

Another important point is that milk will not freeze as long as it is in a cooling tank.

Protect Cows in Wintertime

About this time of year, a fellow starts to think about digging out the old red flannels, but you can't get them big enough to dress your cows in. Cows put on winter coats which do a pretty good job of protecting the animals against cold, but you need to do your part, too.

If your cows stay out in cold wind and rain, a lot of the feed you give them will be used to keep them warm, instead of producing milk. A cheap shed will do a great deal to prevent this waste of feed. Extra milk produced and manure saved will pay for the shed in a very little time.

If you house your cows in a barn, the extension services advise that it should be well ventilated, but free from drafts. The barn temperature should not go below freezing.

Farmers' Bulletin No. 1470 has some sound advice on protecting cows in winter. I suggest you ask your county agent for a copy.

Protein Needed in Feed Ration

The size of a book won't tell you how much good you'll get out of it. Likewise, the quantity of feed you give your cows is not the only measure of the nourishment they are getting. The protein content is of first importance.

As far as quantity is concerned, standard recommendations are for one pound of grain for each 2 1/2 to 3 pounds of milk produced, plus two pounds of hay for every 100 pounds of live weight of the cow.

It's pretty difficult for an ordinary guy like me to figure out just by looking how much protein is in a feed ration, but there's an easy way to get the dope on it. All you need is a copy of the feeding booklet issued by the extension service in your state. It contains tables showing different protein contents of different rations and will tell you how to plan your rations properly.

Among these booklets are Circular 405, Extension Service, University of Missouri, Columbia, Mo., and Bulletin B-69, Extension Service, Texas A & M College, College Station, Texas.

NOTE: There usually is a 5c charge for pamphlets mailed to non-residents of a state; but possibly your own state has a free pamphlet on the same subject. Ask your county agent.

Deep in the Heart of Taxes

You've heard the song "Deep in the Heart of Texas." Most people today are deep in the heart of taxes. A bad pun to make a good point. Last year America's tax-paying electric light and power companies footed a tax bill of more than seven hundred million dollars. One-fourth of the electric dollar goes for taxes of one kind or another.

Still, taxes are necessary in modern war, and seven hundred million dollars or any fraction thereof will buy a lot of planes and guns, medical supplies, tanks and ammunition.

The business-managed companies which pay the taxes are glad to contribute to this fight for freedom. But a lot of people say: How can the electric companies pay these increased taxes and other wartime costs and still keep the price of our household electricity so low? For the truth is, if you're the average user of home electricity, you're getting about twice as much electricity for your money as you were getting, say, fifteen years ago. To do this takes the utmost operating efficiency and economy, and constant engineering research under sound business-management. You can be sure that experienced business management will keep your electric service dependable and low-priced.

Lt. Colonel Paul J. Greene Awarded The Distinguished Flying Cross

15th AAF in ITALY—The Distinguished Flying Cross for "extraordinary achievement in aerial flight" as a 15th Air Force P-38 Lightning pilot has been awarded to Lieut. Colonel Paul J. Greene of Clarendon.

The one-time member of "The Flying Tigers" was cited for distinguished achievements on July 22, 1944, while participating in the historic first all-fighter shuttle to Russia. En route to Russia from Italy his formation swept in at tree top level through a hail of ground fire to strafe five Rumanian airdromes.

"Colonel Greene personally exploded two enemy fighters on the ground with cannon and machine gun fire, and played an important role in the success of this opera-

tion in which he and his comrades destroyed 41 aircraft on the ground and five in the air, as well as causing heavy destruction and damage to enemy motor transport and railroad stock," his citation discloses.

"His outstanding flying ability, leadership, and personal courage have reflected great credit upon himself and on the Armed Forces of the United States," the citation concludes.

Col. Greene, operations officer of his group, the top scoring American fighter organization in the Mediterranean Theatre with over 550 aerial victories, scored his initial victory as a member of this Lightning unit on July 30, 1944, shooting down a FW 190 fighter plane near Budapest, Hungary.

While a member of General Claire Chennault's Flying Tigers in Burma and China the 26-year-old Texan accounted for three Japanese planes in aerial conflict.

Col. Greene participated in many savage aerial battles with the Japanese before returning to the United States and being reinstated as an army pilot. He was then placed in charge of a gunnery school in Texas where he served for over a year before obtaining a transfer to combat.

In addition to the Distinguished Flying Cross, Col. Greene has been awarded the Air Medal with three oak leaf clusters.

Col. Greene is a son of Mr. and Mrs. W. J. Greene of this city. His wife resides at 2285 Sedgwick Ave., New York, N. Y.

Mr. and Mrs. O. W. Latson left Monday night for Mt. Pleasant to attend the funeral of her mother, Mrs. W. T. Grigger who passed away Monday.

Killing Mesquite With Kerosene

When kerosene is used to kill mesquite trees it should penetrate to all of the buds beneath the ground at the base of the tree, says M. R. Bentley, agricultural engineer for the A&M College Extension Service. Some buds may be several inches below the surface, and a complete kill is necessary for successful eradication.

Before making a general application, Bentley suggests testing the depth a certain amount to see if kerosene will penetrate the soil. Penetration likely will depend upon the kind of soil, the moisture content and, possibly, the temperature, especially if diesel or fuel oil is used. The deepest penetration might be expected in sandy soil which is not wet and when the weather is warm.

A suggested test is to select six or eight trees about the same stump diameter and use a different amount of kerosene around each. For example, if the average stump diameters are about four inches, pour a quarter pint around one, a half pint around another and so on until the heaviest application is well above what is thought to be sufficient. A record of quantity of each application must be kept and notation made whether the ground is wet, moist, or dry, and of the temperature for future use.

Bentley says that it cannot be determined for a year or two whether the applications have killed all of the under-ground buds. However, a week or more after kerosene has been applied, it would be worth while to dig the soil away from the base of the trees to find out how deeply it had moved down each tree base. Similar tests should be made with trees of larger diameter, if such are on the acreage to be deadened, and with several of small diameter.

The purpose of these tests would be to determine within a few days about how much kerosene is needed to cover a tree base of a certain size down to a depth of some six or eight inches below ground surface under conditions which exist.

"It is a waste of time and material to apply an insufficient amount of kerosene to a tree," Bentley says.

WEEKLY CROP LETTER

Charles Reed, Donley County Agent has received the following crop letter from D. A. Adam, Farm Labor, Field Assistant at Plainview for week ending November 11, 1944.

Cotton Pulling Situation
Cotton harvest is progressing in good order in most counties with crews moving from farm to farm and pulling in a very orderly manner. Some crews have been moving on in a northerly direction to the counties with later cotton crops, and from present indications more crews will be moving soon to relieve most of the pressure in the entire area. With frost, much of the lower yielding cotton will be sledged to further increase the percentage of cotton harvest.

The Migratory Field Assistants are doing a very commendable job of making placements, replacements, and assisting in solving the problems of both the farmers and the pullers.

Grain Sorghum Situation
Sufficient frost in the northern grain sorghum area has stimulated combining. The peak of harvest will be reached soon. This will again congest elevator facilities as grain is now being piled on the ground at elevators and in the fields. This congestion has caused a slight decrease in price, both at elevators and on the farms.

Areas with trucks available and within trucking distance are urged to make contacts and truck their winter grain needs at this time, taking advantage of the lower price and helping to relieve the extreme transportation congestion.
