If the Volstead Act is knocked out, will it be announced by a coast to coast "hicup"?

Safety First.

Over in New Mexico last week a party mistook his fellow hunter for a lion and promptly shot him. Possibly had he drank three bottles, he would have taken the other man for an angel and embraced him. This is offered as another tip for the argumental benefit of the repealist.

Reward.

The man in public life who expects his reward in the form of appreciation from the people he serves, is doomed to disappointment, we learn upon reading a statement from a well known public servant of Texas. His deductions are no doubt correct. In meriting a reward, he merely pays rent on the space he occupies in this world.

Chicago's Big Show.

Despite financial conditions Chicago goes right on spending millions of dollars getting ready to open the "Century of Progress" exhibit in June. Individuals and giant corporations will vie with each other in making it a great show.

Sinclair, picturing the prehistoric animals in their advertising, will show the giant monsters as they are supposed to have existed from 80 to 400 millions years ago. These animals will be propelled by motors walking and snorting in realistic style. The educational feature will be worth a lot to say nothing of advertising the products of the Sinclair company. This feature is expected to cost more than a million dollars.

Suggestion.

Texas never has profited in that manner from her access to the sea, then why not have the future sessions of our law-making bodies held aboard ship on the Gulf. No lobbyists or other outside interests could interfere. The legislature could convene, receive the Governor's message, and then put out to sea, returning only after they had disposed of the business expected of them by those who elected them. No one should be permitted to go aboard or leave the ship until the sessions closed. Then in the event that nothing was done as has been the case this time, the people could delegate a committee to go out and sink the ship. In that case, we could elect a new bunch by the time for the next session two years hence. The second and those following, would show us how much a real working body could do, with the session lasting probably ten days.

Resourceful.

Florida may have better lemons, and Texas better grape fruit, but California has more resourceful artists than either state. For instance, some years ago a man went out there looking for a dry, sunny climate. A real estate man finding out the buyer's intention, promptly told him that he could count on no more than three cloudy days in a year which he considered a very liberal estimate. Foggy weather was not discussed, it being clear at the time the sale was being made.

Earthquakes have caused many a realtor to scratch his head, especially in California. Now the boys come out with a batch of highly colored advertising in which they tell us that a single cyclone in Oklahoma has been known to

kill more people in one hour than earthquakes have killed in California since 1886. But why pick on Oklahoma? After reading all of that literature, one finally comes to the conclusion that earthquakes are a good thing. Leave it to the Pacific coast boys to put it over.

Wheat—High and Low.

In the Panhandle of Texas, often referred to as the "Bread Basket of America", the wheat crop over the greater portion, is about a thing of the past. The farmer has no wheat to offer and no prospects of any until the crop harvest of 1934. Millions of bushels are stored in elevators. It is becoming valuable because of the local shortage being quoted on the market at 81 cents.

While this is true, representatives from Canada, Argentina and Australia are gathered in Washington in an effort to curtail wheat production. The price is low in those countries because the farmer still owns the wheat. Argentina harvested a bumper crop during our mid-winter which is their summer. They have a slow market since the farmers continue to hold most of it in an attempt to get cost of production.

There is no overproduction of wheat in any nation much less the international overproduction because thousands hunger for bread. There is underconsumption and a faulty system of distribution. Just how long the human family will have to exist on this planet before they learn to "live" rather than exist, is the next big problem.

Fooling Publishers.

Were it not for the fact that statements have appeared in this column many times in the past to the effect that publishers of the average country weeklies are a simple bunch of folks, this article would not be written.

As further proof that we are simple, the secretary of the Texas Press Association mails out this

The editor of Railway Age will line the boys up on rail transportation. He will have little to tell the boys about financing a country weekly.

The editor of "Editor and Publisher" will tell the daily newspaper men many things worth while. He edits a journal read by most every live daily publisher or editorial writer on such publication. The weekly publisher will sit through the session without a brain cell working.

The president of the American Association of Advertising Agencies will have something to tell the

daily publishers from a financial standpoint. The Association is designed for daily papers and delivers the goods. Sometimes it looks like the weekly publishers ought to wake up to the necessity of something similar in his field.

Another speaker of note will be the president of the Thompson-Koch advertising agency of Cincinnati. This firm places no advertising directly with the weekly papers. If the publisher gets any business through this firm, it must come through a second agency which will make the commission amount to thirty percent instead of fifteen. It will be interesting to learn how a weekly publisher can continue to pay double duty.

The majority of the dues paying members of the state association are publishers of weekly papers, and very few if any know the reason why. While the daily publishers are enjoying the Houston program, perhaps the weekly publishers could better spend the time wrangling "clawdads" down on the Bayou. No one should blame the dailies for copping the deal since it was done through and by the consent of the weekly publishers themselves.

TEMPLE OF TRUTH By the Apostle

When you drop into a home on a casual visit, and the folks don't do any more than sweep and clean up when they see you coming, they are moving along in regular form.

Speaking of family rackets, some folks just won't have 'em. I once knew a young lady who testified that she was married something like three years and the only favor or consideration shown her by her husband was when he told her to "pack her suit case and leave."

Some folks seem to think that too many men marry women for the way they look in the evening, and then leave them because of the way they look in the morning.

"I'm a constable but there are a few things yet that I don't know" said Shell Mopes of the Bugscuffe community as he purchased a box of 22 shorts in town Saturday.

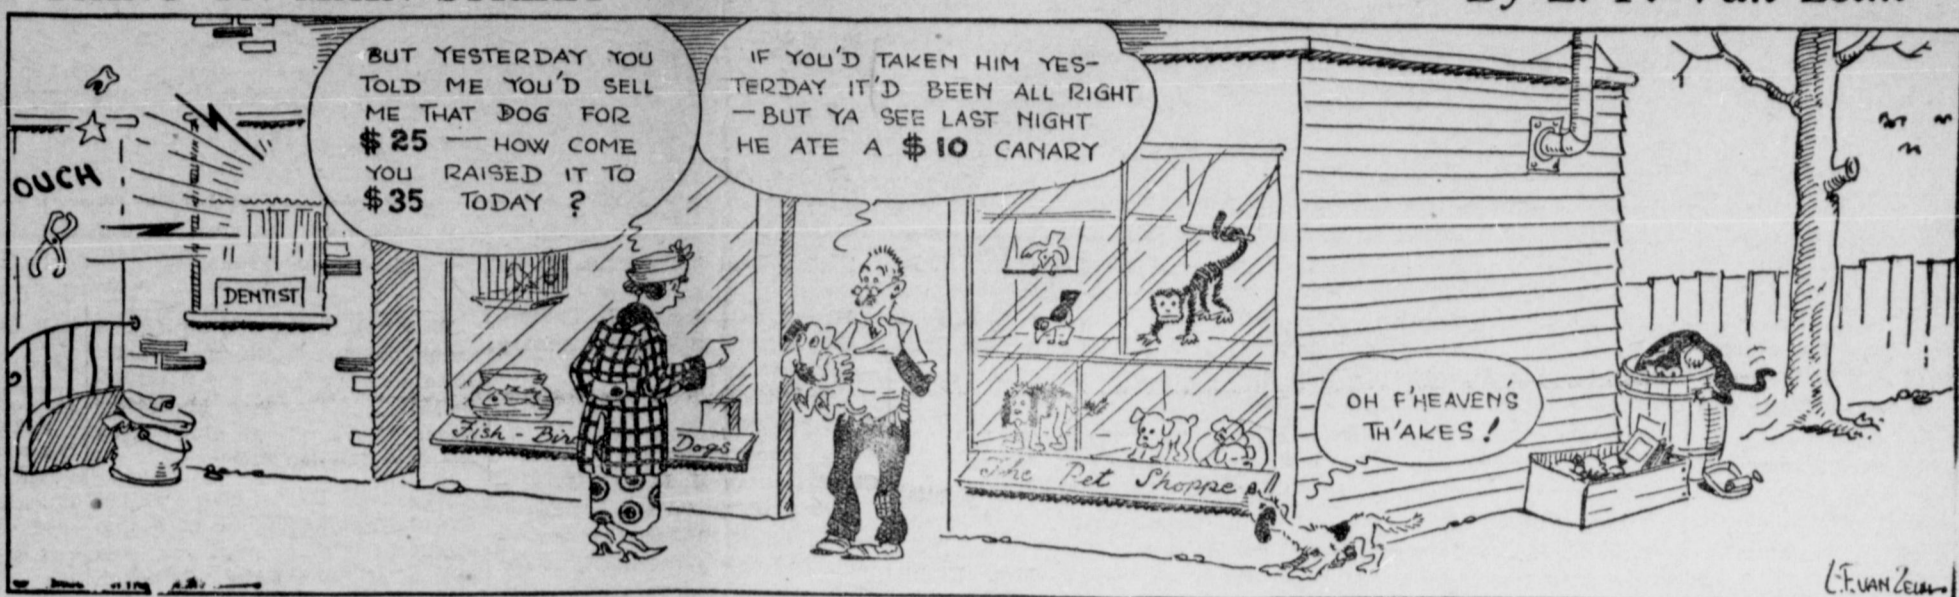

We used to have all our revivals in the summer time when the work was "laid by." It was a time for making peace with the Almighty.

tion with the summer crop of converts, it was just too bad for him in the hereafter. Now they have a revival most any time the preacher gets a new book of sermons.

Back in the old days we always had a limited number of folks who really "had religion" to the extent that you could tell it from the way they lived. Some were actually proud of it and shouted right out before the crowd.

This man Bailey who has been holding a meeting here, or rather preaching several days up at the Methodist church, is about the most practical man I ever met. He said he used to think that only Methodists went to heaven.

start preaching until he found out he was not in Clarendon. He missed his preaching place by 30 miles, but he has never missed his point in a sermon by a nat's bristle since he found his bearings and got in the pulpit to which he had been invited.

Some folks wear a face that makes them look like they were disgusted with their brand of religion. Why they don't change is a "miserable" to most every one.

Now if you have read this series of "sermons" down to this point, feel glad that there will be no plate passed. You owe no one a penny. If you feel like you ought to do something worth while, start right in helping somebody that needs it without regard to his or her religion.

Blackleg is already causing a big loss in some places. Better play safe and vaccinate right now. The vaccine is cheaper now than for many years if ever before.

Boys, boys, cut out that bootleg gas business. Some mighty fine folks have been careless just because it was a common practice.

An old hepecked brother just dropped in to say that he "wished they would pass a law to make some couples raise less hell and build more heaven in their homes."

He looked like he needed that law enforced too, believe me.

O. M. Reece of Clovis is having a wonderful sale for a new breed of chickens that grow gold nuggets in their gizzards.

"Teacher," said little Mary one day in the Robbinsdale school, "Johnny Jones went and wrote a bad word on my desk."

The teacher asked: "What did he write, Mary?"

Mary said: "I don't wanna tell."

"Well, then, Mary, said the teacher, 'you may spell it.'" And slowly Mary spelled: H-E double L.

When the common duties of life become irksome it is well to consider the reward that comes from carrying on. This is impressively set forth in these words of Charles Kingsley: "Thank God every morning when you get up that you have something to do that day which must be done whether you like it or not."

A school marm wants to know if the bumps and bushes lined up in places in the Panhandle are "brakes" or merely "breaks."

Accordingly the brakes were removed, beams and all. The abandoned brakes cause the sand to accumulate and raise the level of the "brakes" on an average of 20 feet.

That is a difficult subject even for an etymologist of note, and we hope it is never sprung on us again.

Potter County's 1st Sheriff Passes to Final Reward

James R. Gober, aged 68 and a Panhandle resident for 51 years was buried at Amarillo Monday afternoon. Rev. E. Gaston Foote, pastor of the San Jacinto Methodist church had charge of the funeral services.

Those attending the casket were old-time friends of the deceased who had ridden the range with him when he began as a cowboy on the LX and Frying Pan ranches years ago. These men are John Arnot, A. S. Kenyon, J. S. Chestnut, John Snider, Charles T. Ware, B. T. Baker.

For the past several years Mr. Gober had conducted a detective agency in Amarillo with much success. He made his home with a sister, Mrs. A. E. Kirkman at 312 South Pierce St.

Child Health Day Observed On May First

Austin, Texas, April 26.—Mothers and Children First is the slogan for the tenth annual observance of Child Health Day. May first was set by Congress in 1928 as the date for this annual check up on what was being done for the health of the child. The Bureau of Child Hygiene, Texas State Department of Health, has been the leader in this State since the first observance.

Childhood has been proven to be the best time for preventive measures as this includes immunization and vaccination against certain diseases, physical examinations and correction of defects, education in personal hygiene and community sanitation, etc. Mothers are included also for it is known that the health of the expectant mother must be carefully watched if the baby is to be healthy. The well rounded program for child health starts before birth and continues through school age.

The newly formed Texas Conference on Child Health and Protection is having its findings and recommendations printed. These will be ready for distribution soon and will form the basis for a year-round program on this important subject. It is planned to form county councils on child health and protection which will serve as a permanent committee to carry on this important work. The Bureau of Nutrition and Health Education of the Extension Division

THE REVENUE FROM BEER

First reports on beer tax collections, while indicating that the revenue from this source will not reach the more enthusiastic early estimates, make it apparent that beer consumers are going to contribute a very tidy sum to the support of government. In the first week, the federal government collected about \$4,000,000, and it is estimated that the several state governments collected half as much. With the list of beer states being steadily lengthened, the prospect is that this revenue will be a very appreciable factor in budget-balancing.

Such a condition adds much to the difficulties of the dries. Practically every political entity needs more revenue. Practically every other form of taxation is sure to encounter bitter opposition, when most taxpayers are already hard-pressed. In that situation, the thought of revenue from beer is apt to be alluring to both officials and taxpayers. The license fees and gallonage taxes are so welcome, in the treasuries into which they are paid, that they tend to obscure some other aspects of beer-selling. Moral and sociological considerations cannot weigh as much, in times like these, as financial ones. Revenue gives beer legalization a virtue it could not otherwise attain.

Mr. and Mrs. Stevens and small daughter of Amarillo were weekend visitors in the E. M. Ozier home.

Mrs. Duke who has been visiting her daughter, Mrs. J. J. Granelius returned to her home in Memphis Sunday.

COUNTY SCHOOL NEWS
By Sloan Baker
County Supt. Schools

The schools have not failed the people. Whether you regard their past performance or their present achievement they stand out as the largest single successful industry in the world. Quantitatively and qualitatively no progress of the last quarter-century is comparable to that of our peoples' schools.

Whatever the opponents of public education have said they have not been able to charge that it has produced a group of narrow specialists. That for which it is most criticised, the overcrowding of the curriculum, has in many instances been its merit rather than its defect. The various aptitudes and talents of boys and girls have been stimulated by the rich variety of the overcrowded curriculum.

The diversity and availability of culture, then, is one of the great achievements of our educational system.

The teaching profession above all is a spiritual profession and the weakness of American business today is its loss of its soul. We shall recapture our foreign trade when we rehabilitate our national spirit, when we rebuild our conception of fair play, and promote kindness to our neighbors at home and abroad; when we reconstruct out national ethics; when we ground the minds of youth (these citizens of tomorrow) in fundamental principles of business conduct and human behavior. This is your holy task. And only the love of man and fear of God will give you courage to achieve it.

—President Bruce Payne, Of George Peabody College for Teachers.

The State Meeting held at the Austin Hotel in Austin last Wednesday in interest of legislation which will hold the per capita apportionment next year to \$16 was well attended by Superintendents of Independent Schools, County Superintendents, Trustees, Teachers, and Patrons of Schools. At this meeting fourteen trustees were appointed to represent the schools before the Texas Legislature, to favor the Kayton Tax Bill as one means of raising revenue to hold the per capita to \$16. Hon.

Coke Stephenson, Speaker of the House of Representatives, conferred with this committee last Wednesday allowing this committee to present their cause to the legislature Wednesday, April the twenty sixth. A large lobby of school people will meet in Woodridge Park at 10:30 a. m. this date and march to the House of Representatives to present the cause of the schools. The spokesman for the schools will be able to present thousands of petitions from all over Texas to the Legislature to add weight to the lobby and to his plea. The bill, the schools are most interested in, is the Kayton Sales Tax Bill. All food stuffs are exempt under its provisions, with a 2% tax on all retail sales. Fifty percent of the tax money raised in any city or county will revert back to lower the advalorem tax. Twenty five percent will go to the State General Fund and twenty five percent to the school fund. Twenty Million dollars is the estimated revenue. Every one in Donley county who want the schools to remain open next year for the full term should write their representatives at Austin to vote for this bill.

The County Board of Trustees will organize next Monday, May 1st. At this meeting the schools of the county will be classified.

Donley County Superintendent of schools represented this county at the school meeting in Austin last Wednesday.

Principals of all schools will present seventh grade diplomas this year to those pupils graduating into the High School.

The Trustee-Teacher Association meeting are growing in interest as shown by the interest in the meeting at Glenwood last Monday night.

MELLOWED A HUNDRED MILLION YEARS

While ferns grew high as trees in PENNSYLVANIA

GLANCE into any petroleum trade journal and you will see that Bradford-Allegany crude oil commands the highest price of all Pennsylvania grade crudes. For Bradford-Allegany crude was formed a hundred million years ago during the Devonian Age—that wonderful age which produced so little of the world's oil compared to other geological ages—yet produced it of such superior quality!

The Sinclair Refining Company uses nothing but Bradford-Allegany crude in the manufacture of Sinclair Pennsylvania Motor Oil. In the big, new Sinclair refinery at Wellsville, N. Y., expert refining skill does what Nature left undone. Here Sinclair Pennsylvania is triple-filtered, de-waxed at as low as 60° F. below zero and its carbon-forming content reduced to the minimum.

Have us change your oil to Sinclair Pennsylvania according to the Sinclair Law of Lubrication. Then examine this oil after long, hard driving. Note how it stands up—how it comes out of the crankcase almost as good as it went in. Note, especially, how little has been used up—positive, visible proof that this rich, Pennsylvania oil protects the last mile as well as the first!

Our Weekly CHURCH CHAT

W. E. FERRELL
Minister First Christian Church

"How to Destroy Your Church."
By looking over the attendance records and watching the small number of people that attend the regular church services and the mid-week services it looks like so-called church members are trying to kill or destroy the church and its influence. To destroy the church that is to make a good job of it we are outlining a sure policy. **Destroy the Confidence of the Community.**

Tell the people that you are in the church by force of circumstances, but have no respect for the way in which its business is conducted. Publish the faults of your brethren, taking care to magnify them, make no effort to induce people to attend the church services. Take no part in the labors of the Sunday school or church work. Publish it on all occasions that you have no confidence in the concern. Predict that it must fail, go down, blow up or never succeed. **Discourage Your Fellow Members** Complain about every thing they do and don't do. Contrive to make yourself the head of a clique, and by their industry and your assistance help to keep the church in hot water generally. While doing this, lose no opportunity to complain of the BAD treatment that you are receiving. Be as much like Diotrepes and as little like Paul as you can. Discard charity and can-

dour, take distrust in your bosom and make scheming your specialty. **Discourage Your Preacher.** Absent yourself from one service every Sunday, or miss at least one in three; if he is not very strong, once in four times may answer. Neglect the prayer meeting. Criticize him freely, praise him very sparingly, find fault plentifully, pray for him very little or none. If he proposes to hold extra meetings, withhold your co-operation. Give yourself no concern whether his salary is paid or not. Never call on him, socially, or allow him to think his comfort or that of his family, is a matter of any importance in your eyes or consideration.

Many church members are following this plan and the churches are feeling the effect of their program. Is this the method you have been following?
Sunday we are bringing a special message on "The Missing Man." Sunday night, we bring the anniversary message to the Odd Fellow. Our subject is, "Does Morality Alone Save." Try to attend both services.

Don't Get Up Nights

Make This 25c Test

You need this easy bladder physic to drive out impurities and excess acids which cause irritation that results in leg pains, backache, burning and getting up nights. BU-KETS, the bladder physic, containing buchu, juniper oil, etc. works on the bladder pleasantly and effectively, similar to castor oil on the bowels. Get a 25c box (5 grain size) from your druggist. After four days, if not relieved of getting up nights go back and get your money. You are bound to feel better after this cleansing and you get your regular sleep. Locally at

Born to Mr. and Mrs. Dalton Ford of Pampa, a 6½ pound boy, April 20. His name is Charles Lane. Mrs. Ford is remembered as Miss Ima Lane.

Judge Alexander returned last week from an extended stay in Ft. Worth.

During 1930, Donley county had 261 deaths. In 1931, 248 deaths. In 1932, 215 deaths. Births for the three years were 77, 68 and 96 respectively according to the state bureau of vital statistics.

Everyone seems to feel that the new administration has gotten off to a good start. This is preeminently a time for action, and the President is certainly a man of action.
The Congress has voted him broad powers along many lines. No doubt other powers will be granted to him in his effort to work out of the emergency with which the country is faced.
He is not only endeavoring to secure essential legislation and to carry out the program which he has in mind, but he is trying in every way possible to reduce the expenses of government in accordance with his pre-election pledges. Many bureaus have been abolished and others have been merged in such a way as to do away with overlapping activities.
I have been called into conferences with other members a number of times at the White House, and we have all been amazed at the fine knowledge the President has of the entire situation, as well as his ability to stand the strain of long hours of continuous work. He works day and night, and seems to remain in good health and in good spirits at all times.
It was my privilege to be assigned the task of introducing the President's farm mortgage refinancing bill and of handling the same in its passage through the House. It was passed on April 13 by the record vote of 387 to 12.
I regard the farm mortgage situation as one of the most pressing problems of the hour, and I hope the Senate may see fit to pass the bill at an early date, either separately or as a part of the general farm bill to which it has been attached.
The establishment of credit facilities, the adjustment of freight rates which are discriminatory against agriculture, and the adjustment of trade barriers in the interest of markets are also important steps in the farm program. I hope that all of these may be worked out.
For some time a number of us have been urging that the currency be liberalized in such a way as to make the dollar more truly a measure of values. Several methods have been suggested. The result of the adoption of any of these methods would mean an increase in commodity prices. It seems to me an increase in the price level in farm and other commodities is essential to national recovery.
The day this is being written the President has issued a statement in which he announces his determination to change the basis of our money in such a way as to increase the general price level. I believe that the carrying out of such a program will be in the interest of the entire country.
We are in a great national emergency which calls for discarding of selfish interests in an effort to save our institutions. For this reason I expect to continue to support the President in the program which he has planned.
I am glad we have a man in the White House who is unafraid, who is willing to assume responsibility, and who has a program. The American people are thrilling with a new hope under his leadership.
I have every faith that he will lead us forward into the full promise of better times and happier conditions.

DON'T LOSE YOUR GRIP, YOUNG FELLOW!

No matter what the passing "business conditions" may be, there's one fact that we can't get around, and that is that America is a great business nation—always was and always will be.

Other nations are famous for other things — Switzerland for scenery and tourists, Norway and Sweden for fish, South Africa for mines and cattle. Of course America has all of these, but America's great central activity and Young America's great opportunity is—business.

Today's unusual business conditions are rapidly passing. The world of business will move forward. Every day thousands of young people are drafted into the great business system, taking modest positions at first perhaps but rising as swiftly as their talents permit.

Any young man or woman who says, "There's no chance in business today," is worse than foolish. Such weak-kneed ones are whipped before they start.

There is probably more opportunity today than at any time in the past three years.

Some young people, when they finish high school or grade school, are going to loaf around home and talk about hard times.

Others are going to write to some good, well-managed school—we have in mind Tyler Commercial College and School of Business Administration at Tyler, Texas—get a catalog and begin planning a career. We recommend that T. C. C. catalog—it's a beauty.

Some are going up to business success; others are going down. Every boy and girl must determine his course for himself.

We Find TROUBLE

The untrained ear may or may not catch little warning sounds of expensive parts being damaged and ruined — but to the expert it spells T-R-O-U-B-L-E. That's our job - - - finding trouble and we allow no job to leave our shop until the motor purrs in the manner which only perfect timing and all part functioning will give. - - - Summer months are driving months - - - the time when longer and longer trips are the regular order of the day. You will save needless expense later on by bringing your car to us now and telling us to overhaul and tune it up for the season. Rates most reasonable.

Replace old rubber now

THERE'S no doubt about it—old tires and hot weather just don't go together. The first real hot spell will prove this fact. The roadsides will be lined with cars that tried to squeeze the last nickel's worth of mileage out of thin, weak tires. You can buy Goodyear All-Weathers—better now in quality than ever before—the world's best-known and best-liked tires—at prices which have never been as low as they are today!

Holland Brothers Improve Auto Facilities

Getting the family bus in prime condition to avoid extra wear and tear and to give the greatest amount of pleasure with the least possible outlay of cash is a far simpler matter this day than formerly.

For instance Holland Brothers have installed a device or machine for flushing various gears and parts. A special oil is used in the process. In fact they use a special oil or grease for practically every part of an auto.

A chart is used and some cars require as many as 36 places where oil or grease is demanded to save the machinery. Their Seven Point system is explained in an advertisement in this issue. Their company is getting out a number of new ideas of merit with the coming of the busy auto season.

Mrs. W. B. Haile is in Dallas for medical treatment.

Colored Man And Hog Have Grave Misunderstanding

While trucking a large sized shoat to his new owner Sunday, Mance Spencer, colored man formerly in the employ of the City, suddenly saw the hog that was chained to the truck bed rise and fly. Not only did the hog rise and fly, but he saw him flee also as he struck old mother earth.

The colored man is greatly troubled because he had sold the hog. He can't deliver said hog according to the old rules of "range delivery." It is ranging somewhere between Clarendon and Memphis with a chain and a rag tied to its front foot. A reward of two dollars is offered for its recapture if the information is phoned to the Leader office.

Mrs. Lenode Goldston and daughter, Mrs. Fred Mahar and daughter, Marylin left Sunday for their homes at Dallas.

ELLIS WRECKING COMPANY FILLS MANY DEMANDS

Hundreds of Dollars Saved Motorists Who Purchase Used Parts

In this day of high priced auto parts, the various auto wrecking yards supply necessities that mean a saving of thousands of dollars. Locally, the Ellis Wrecking company of Clarendon supplies parts for practically every make of car, and these parts are sold at a very low price as compared with prices quoted on new parts.

This company makes a specialty of taking the parts of wrecked cars purchased and dissembled. These parts are then classified and stored where they may be found on a moment's notice to insure prompt service to the auto public.

Honesty in dealing with the public has enabled the Ellis firm to build up a trade over a large territory. No faulty parts are sold at any price. Coming to Clarendon in 1925, F. M. Ellis, senior member of the firm, conducted his business down town. As the business grew, greater space became necessary.

In 1927 acreage was purchased in the east end of town near the end of the pavement on First street. At this time acres of parts are on display. Parts that might deteriorate from weather action, are housed in a systematic manner in the building used for general auto repair work.

Associated with F. M. Ellis is his son Charles, who, with "Shorty" Foust, are the main mechanics in filling the demands of the public for any grade of auto repair work. Charles Ellis has general charge of auto parts, making purchases and sales.

In addition to the general wrecking and repair business, the firm conducts a filling station selling Sinclair products and auto accessories, tires, etc. At this time when a saving is most appreciated, mechanics and others in need of auto parts find it convenient to purchase the parts "good as new" of the Ellis Wrecking company which means a steady expansion for the firm that built a business on honesty.

In order to increase the expansion and to further acquaint the public with the policies of the firm, the Ellis Wrecking company has contracted for a liberal space in the advertising columns of the Leader, the series of advertising to run for the next three months, and possibly longer. The first advertisement of the series appears in this issue. Read it.

Brunk's Comedians Coming Here Next Monday

On Monday May 1st Fred G. Brunk's Comedians will open a week's engagement in Clarendon in their big tent theatre on the grounds of the old Grammar School building. This will be the first appearance of this popular company in this territory for six years, they having recently completed a two year stock engagement in Tucson, Arizona.

Entirely new plays are being presented this season and all are late releases of New York comedies with high class vaudeville between acts. A feature orchestra offers a fifteen minute musical presentation before each performance.

Plays, vaudeville and musical numbers are changed each night. The opening play "She Knew What She Wanted" is from the pen of a well known author and is a comedy full of laughs and thrills. It recently enjoyed a successful Broadway showing and is only one of the feature plays that Mr. Brunk will offer to the showgoers of this district during the week.

Joseph L. Turner, publicity manager for the company, is now in the city completing arrangements for the opening and states that they are offering prosperity entertainment at depression prices. In keeping with his policy originated over sixteen years ago, Mr. Brunk will admit one lady free with each paid adult admission on opening night. Doors will be opened at 7 p. m. Musical presentation at 7:45 and the curtain promptly at 8 o'clock.

Ivas Peabody Suffers Very Painful Accident

While handling well casing on the Sawyer farm north of town Monday, the casing in some manner slipped falling on the foot of Ivas Peabody, 16 year old son of C. M. Peabody.

The foot is badly lacerated and a number of bones are reported as being broken. While the wound is extremely painful, it is believed that recovery will be made in such manner that no permanent injury will result.

Weekly Poem

TRUISM
If it is fate that I should know defeat,
That all my glowing dreams must fade to dust,
Then I will wander down your little street
And pour my heart out as a lover must.
It would be sacrilege for me to go
Along the trail that fools and wastrels take,
Until, in my poor way, I let you know
That all these dreams have blossomed for your sake.
Yes, I must thank you for a score of things--
A verse you wrote--a shy kiss in the dark--
And when the fitful rain of April stings
You must be gay again nor stop to mark
That those we love are ever on their way--
And only heartbreak has a lengthy stay!

Groom Turns Out to Welcome Convict Players

The Odd Fellow dramatic club put on the convict play at Groom Tuesday night, a large crowd being present despite the heavy cloud and heavier rain soon afterwards. "Tony the Convict" is becoming quite noted, as well as the cast that is rapidly working up into the "professional" classification.

The play will be put on at Alanreed Friday night of this week.

Ashtola showed a high sense of appreciation of the efforts of the Club by turning out a large crowd which showed enthusiastic approval of the play last Friday night.

E. A. Sloan, citizen of Clarendon for more than 30 years and who underwent a major operation some time ago, is slowly improving at this time, he being able to be out of bed a part of the time.

Visiting Hours at Canyon Museum Building

The Panhandle-Plains Historical Society Museum will be open from two to six o'clock each Sunday, Tuesday, and Thursday afternoon, according to an announcement made by Professor L. F. Sheffy, field secretary.

These hours were chosen as the most convenient for out-of-town visitors as well as local residents. An attendant will be on hand to assist in showing visitors through the rooms.

Mrs. Burnam is at Amarillo with her son, H. E. Burnam who is very ill.

Mrs. Ottis Jackson and children returned home Friday from Canadian where she has visited the past week with her parents, Mr. and Mrs. Houston Miller. Mrs. Miller accompanied her home.
