A Common Paper for Common People

## Federal Auto Stamps Go On Sale

Beginning this morning, the truck and auto owners have an opportunity to decorate their windshields with a new stamp. The new stamp, canary yellow in color, costs \$5.

The new stamps may be put on the windshield any time. While this may be done, do not remove the old red stamp until the morning of July 1st.

Those who have no stamps, may purchase one for the remainder of the month at any post office for forty-two cents.

Auto stamps are now on sale at each of the post offices in the Nation. After August 1st, the reduction schedule will be followed each month the same as last year.

Don't attempt to operate a motor vehicle without a federal stamp on your windshield. To do so, subjects the owner to a fine that will amount to the price of several vehicle stamps.

## THOMAS HOLMAN ENTERS SPECIAL TRAINING

Technicians from Armored Divisions all over the country had been enrolled today in the Armored Force School at Fort Knox, Ky. for a special course in tank mechanics.

Included among those enrolling was Cpl. Thomas L. Holman, son of Mr. and Mrs. Plummer E. Holman, Naylor Route, Clarendon.

## LAST HALF SPLIT TAXES DUE BY JULY 1

The Tax Assessor-Collectors office announced this week that all those who want to take advantage of the split tax payment plan had until the 1st of July to get in the last half of their current 1942 taxes before penalty is added.

## Gas Coupons Must Be Endorsed

Filling stations operators must comply with OPA regulations or risk suspension, the district office of OPA warned today, in revealing that several operators in West Texas had been suspended from doing business on various violations of the program.

Pointing out that a motorist may bring suspension upon a filling station operator by failing to endorse his gasoline rationing coupons, the OPA called upon the motorists to cooperate. No coupons should be released to the operator without endorsing them on the back with the auto license number and the state of registration. The OPA said that the endorsement was the government's chief weapon against illegal traffic in mileage rationing coupons.

## Would Be Robbers Receive Surprise Sunday Night

Would be robbers received a delightful surprise from the wrong angle Sunday night as they attempted to crack the safe at Douglas and Goldston Drug Store. It was assumed that the invaders were possibly locked up Sunday night at the close of business as no place of entrance could be found.

The safe had a large round vial, painted to resemble metal, filled with tear gas around the combination, and as the robbers attempted to chisel the combination, they broke the vial and also interrupted their plans as no further damage could be found. The gas in a strong stage might be paralyzing, and it is believed that the would be robbers possibly remained in the store for several hours before gaining enough senses to escape through the front entrance.

## ARMY CHAPLAINS GIVE LIVES TO SAVE SEAMEN ON CONVOY

The four United States Army Chaplains who gave their lives so that seamen of the Army Transport Service might live to carry on are shown here. 1. Rev. Clark V. Poling; 2. Father John P. Washington; 3. Rev. George L. Fox; 4. Rabbi Alexander D. Goode.

As thousands of American churches prepare to take part in "Flag Week," activities by holding War Bond rallies on "Flag Sunday," June 13, there comes from the files of the War Department, Office of the Chief of Chaplains, a tale of stark heroism, love for fellow man and love for flag and country unrivaled in the patriotic annals of the United States.

Surrendering all hope of saving their own lives, four young Army Chaplains, a Catholic, a Jew and two Protestants aboard a torpedoed vessel in the Army Transport Service, insisted on giving their own lifebelts to four seamen, joined hands as they stood upon the unsteady deck of their sinking ship and prayed as the last lifeboat drew away in a hazy winter sun.

The chaplains were seen no more; the sailors reached havens of safety, and the story of these self-denying men of the church was partially told by one of the saved men, Daniel O'Keefe, a 19-year-old seaman of the United States Merchant Marine Service. Eventually the few facts of the heroic episode were gathered by the office of Chief of Chaplains, Brigadier General William R. Arnold, and is now being told in its entirety for the first time.

The chaplains were: Rabbi Alexander Goode, of the Congregation Beth Israel, York Pennsylvania; Father John P. Washington, of St. Stephen's Roman Catholic Church, Arlington, New Jersey; the Rev. Clark V. Poling of the First Dutch Reformed Church of Schenectady, New York, and the Rev. George L. Fox of the Methodist Church of Gilman, Vermont. Rabbi Goode left a widow and a three-year-old daughter, Rosalie.

"Just before our ship went down," O'Keefe related, "these chaplains took off their own life preservers and gave them to us. They were standing on the deck praying hand in hand as our life boat drifted out of sight."

The story of this heroic act as gathered by the Chief of Chaplains Office was given to the United States Flag Association which is asking all churches in the United States to take up special collections among their own congregations on Flag Sunday, June 13, as their contribution during "Flag Week" exercises, and utilizing the money for the purchase of War Bonds. The association is asking American citizens to increase their War Bond purchases during this week so that sales increase by at least one hundred million dollars over the seven-day period.

### ATTEND MEETING

Mrs. U. J. Boston and Miss Charlotte Molesworth attended the organizational meeting of the North Plains Camp and Hospital Council Tuesday at the Amarillo Army Air Field. This Council will serve the Military bases at Pampa, Dalhart, Amarillo and Hereford.

## Bill Gaither Dies Of Heart Attack

William T. Gaither, well known in this section, and for the past several years a resident of Breckenridge where he was employed by the Phillips company, died of a heart attack at his home early Saturday morning.

Mr. Gaither, who was about 40 years old, complained Friday night of suffering from indigestion and went to the E. B. Misamore home nearby to get some soda.

His mother, Mrs. Stella Gaither, and his twin sons had gone to Panhandle, Texas, for a visit. Mr. and Mrs. Steve Cozby were guests in the Gaither home for the night. Cozby was reported to have related that Gaither went for the soda about 1:30 o'clock and some time later he saw him lying in bed.

Gaither was employed at the Phillips Company distributing warehouse, and his home was called Saturday morning because he had not come down as was his custom.

It was said Cozby told them Gaither was in the bathroom, but failed to answer. The bathroom was entered and Gaither was found lying there dead. He had been dead some time.

Funeral services were conducted at the First Baptist church in Clarendon Monday afternoon by the pastor, Rev. E. L. Moody, and Rev. Merle Weathers of Panhandle. He is survived by his mother, Mrs. I. Gaither of Breckenridge, and a step-sister, Mrs. Vella Finley of Floydada. He leaves two sons, Henry and Billie, of eighteen months. His wife, the former Henrietta Longan, passed away shortly after the birth of the sons, on November 22, 1941.

Attending the casket were E. B. Misamore, Harold Guinn, Harry Bowser and Dave Crowell of Breckenridge, and Carl Pittman and Slaton Mahaffey of Clarendon.

The Buntin Funeral Home had charge of funeral arrangements.

## ALL SCHOOL DANCE TO BE HELD FRIDAY NIGHT

An all-school dance at the Jr. High Gym is scheduled for Friday night, June 11 at 8:30 p. m.

The dance is sponsored by the Clarendon Junior College Dramatics club. No admission charge will be made and all students of the High school and College for the 1943 year are invited.

## OFFICER FOR SEABEES TO BE IN AMARILLO JUNE 12-13

Lt. C. B. Parrott, CEC Officer for the Seabees will be in Amarillo Saturday and Sunday, June 12th and 13th to certify men for the Seabees. Especially needed are cooks, bakers, lubrication men and men with experience in the building trades. Men should have two letters of recommendation and be in 1-A or 3-A draft classification.

## Lions Elect Next Official Family

Elected by unanimous choice by the Lions club when its membership is largest in the fifteen years of its history, is something to brag about. But John Gillham won out. He is president of the Club after July 1st for a whole year.

Others elected are: First vice, Chas. M. Lowry; 2nd vice, John C. Knorpp; 3rd vice, Dr. Keith S. Lowell. Secretary, Walker Lane. Treasurer, D. O. Stallings. Lane and Stallings hold their offices by principle of "eminent domain."

Lion Tamer is Fred Cook. Tail Twister, Bill Riney. Dr. H. R. Beck is assistant Tail Twister. This selection usually falls to the man who has usually for forceps, or can get them. Joe Holland and Alvin Landers are added to the Board to succeed the two whose terms expire.

## War Ration Book 3 Will Be Issued to Service Men

Assurance that service men would be issued War Ration Book III was made today by Howard Gholson, district director of OPA. Numerous service men from the air fields in West Texas have been appearing before local boards to find out why they are not to make out applications for the books at this time.

Applications of service men will be taken at a later date and final details for taking the applications are being worked out now, the OPA announced. Military personnel eating in their own homes were previously issued Book I and II. Book III is merely a replacement book and probably will not be put into use until August. Members of service men's families file applications for the book in the same manner of other civilians and must send in their applications before June 10.

## RED STAMP "J" VALID THROUGH JUNE

Red Stamp "J" worth 16 points of rationed meats and fats will be valid throughout the month of June instead of expiring May 31st, the office of Price Administration announced today. At the same time, OPA announced that four new series of Red Stamps—a total of 64 points—will become valid at weekly intervals beginning May 30 and will be good for meats-fats purchases of consumers through June 30th.

The schedule of validity dates for the new series of Red Stamps is as follows:

Stamp	Validity Date	Exp. Date
K (16 points)	May 30	June 30
L (16 points)	June 6	June 30
M (16 points)	June 13	June 30
N (16 points)	June 20	June 30

## ATTEND GAITHER RITES HERE MONDAY

Among the out-of-town near relatives and friends attending the last rites for Bill Gaither here Monday afternoon were Mr. and Mrs. Dub Hudgins and Mrs. Elizabeth Evisizer of Amarillo, Mr. and Mrs. Cecil Beach and Mr. and Mrs. A. B. Stevens and babe of Plainview.

## Canning Facilities Ready For Use Next Week

### ROBERT HOWREN REPORTED TO BE A PRISONER IN JAPAN

Some time after the fall of Bataan, W. D. Howren of Amarillo received word that his son was reported missing. The months passed and still no word was heard of his fate. The other day word came through from the War Department informing Mr. Howren that his son was a prisoner in Camp Kawas-ki Blanch, Japan.

Robert Howren is a nephew of Miss Mary H. Howren of this city and is well known by a lot of Clarendon people.

### KEITH SWINBURNE PROMOTED TO CORPORAL

Elmo Keith Swinburne of Clarendon, who has been stationed at Frederick Army Air Field, Okla., for the past several months, has been promoted from Private First Class to Corporal, the field's public relations officer has announced.

Cpl. Swinburne entered the service on Feb. 13, 1942 at Clarendon, and is a member of the 452nd Base Hq. & AB Squadron at the field, on of the Gulf Coast's newest advanced twin-engine flying schools for bomber pilots.

### VISITING DOWN STATE

Mrs. J. C. Estlack is visiting in Austin with her son and family. Mr. and Mrs. E. H. Estlack, She plans to spend some time there before returning home.

### ON BUSINESS TRIP

Fred Cook and H. T. Burton left Wednesday afternoon for Pine-dale, Wyoming and Salt Lake City, Utah. Mr. Cook will attend to business at the above places and Mr. Burton will play with the finny tribe when the occasion affords along the way. They plan to be gone about two weeks.

Mr. and Mrs. N. S. Percival Jr. of Amarillo visited his mother, Mrs. N. S. Percival here over the week end.

According to J. R. Gillham, supervisor for the Rural War Production Training Program, arrangements were made this week whereby Lelia Lake and Hedley will also be included in the canning program to be offered. School officials of these two towns have agreed to allow the use of the home economics room in each of the schools to be used as a canning center in that respective town.

All persons living in and around Clarendon who desire to take advantage of the use of the canning facilities offered by government in the above training program are urged to contact either J. R. Gillham or Mrs. J. E. Humphrey at an early date.

The canning facilities at the Clarendon Junior High School will be available on the morning of June 17th at 9 a. m. The facilities at Hedley High School will be open Friday, June 18th, and at the Lelia Lake Home Economics room on June 22nd.

The use of hot and cold water for washing, the use of cookers, and sealers will be offered free of charge to those desiring to take advantage of the facilities. An additional service will be offered at a later date to be announced when pressure cookers will be tested by the ladies in charge of the course.

Miss Maurice Berry, Clarendon High School Home Economics Instructor, will serve as home economics supervisor of the three plants and will offer demonstrations in food processing at dates to be announced. Each of the plants will be under the supervision of a lady experienced in canning all types of food who will be able to offer suggestions to anyone on any type of canning.

## CHURCH OF ST. JOHN BAPTIST TO CELEBRATE FIFTIETH ANNIVERSARY

The Church of St. John Baptist is the oldest Episcopal Church in the Texas Panhandle. It was dedicated June 24, 1893. Two weeks from today it will celebrate the fiftieth anniversary of its dedication. Further details of the celebration will be announced next week.

### TO BE TERMINAL HOSTESS

Miss Mary Charlotte Word returned Friday from Dallas where she has accepted position as terminal hostess with Braniff Airways in Amarillo. She will report for work June 15th.

## Earl Jones To Be Buried Here Friday

Earl D. Jones, 37-year-old line operator at the Pantex Ordnance Plant, died at 6:30 o'clock Wednesday afternoon in an Amarillo hospital.

Mr. Jones and his family had made their home at 3501 North-east Eighth Avenue, while in Amarillo.

Mr. Jones was reared in Clarendon where he received his schooling. He also attended W.T.S.T.C. at Canyon and was a school teacher for a long number of years.

Survivors include his wife, Mrs. Stella Jones; two sons, Stuart Carroll and Barry Lynn Jones; his parents, Mr. and Mrs. W. C. Jones, pioneer residents of Clarendon; and one sister, Mrs. Althea Ellis of Bivins, Station, Amarillo.

The body will be brought to Clarendon today for funeral services to be held here tomorrow afternoon at 4 o'clock in the Methodist Church.

Burial will be in Citizens Cemetery under the direction of Blackburn-Shaw Funeral Home of Amarillo.

## RATION CALENDAR

**SUGAR**—Stamp 12 in Book 1 (5 lbs.) expires May 31. Stamp 13 (5 lbs.) valid from June 1 until midnight August 15.

**CANNING SUGAR**—Stamps 15 and 16 in Book 1 (5 lbs. each) valid through October 31. Those needing additional sugar for canning may apply to local rationing boards.

**COFFEE**—Stamp 24 in Book 1 valid (1 lb.) beginning May 31—expires June 30.

**SHOES**—Stamp 17 in Book 1 good for one pair through June 15th. Stamp 18 becomes valid June 16.

**MEATS, EDIBLE FATS AND OILS, (INCLUDING BUTTER), CHEESES, CANNED FISH**—Red stamps E, F, G, and H expire May 31. Red stamps J, K, L, M, and N expire June 30 and become valid as follows: K, May 30; L, June 6; M, June 13; and N, June 20. (Stamp J is already valid.)

**PROCESSED FOODS**—Blue G, H, and J stamps valid from April 24 through July 7. Blue K, L, and M stamps valid from May 24 through July 7th.

**GASOLINE**—Value of each coupon in A, B and C books is 4 gallons. Eight A-6 coupons became valid May 22 and expire midnight July 21st.

**TIRE INSPECTION**—All "A" holders must have second official tire inspections by September 30, 1943. Subsequent inspections for A book holders will be once every six months. "B" book holders must have second official tire inspection by June 30, 1943. "C" book holders must have second official tire inspection by May 31, 1943. Next official tire inspection for "T" book holders must be made within 60 days of last inspection or within 5,000 miles, whichever occurs first.

**TIRES**—If official tire inspector recommends a tire replacement, apply to local ration boards for the tire ration certificate. Tires will be rationed to all on the basis of tire inspections and county quotas available with most essential mileage to come first. Recaps can now be secured without rationing certificates.

**Increased Purchase of War Bonds Asked As Tribute To Flag**

By increasing their purchases of War Bonds during the week of June 8 to 14, American citizens can play their part in the team work called for by President Roosevelt in his proclamation broadening the purpose of Flag Day celebrations, the United States Flag Association declared today. The Association pointed out that by purchasing an additional \$100,000,000 worth of bonds, the American people will be paying substantial tribute to the flags of the United Nations and, at the same time, provide more armament for the common struggle against the Axis.

"Save by Sacrifice," is the slogan of the campaign.

As President Roosevelt in his proclamation, declaring June 14 as "Flag Day," paid special tribute to the peoples of the United Nations. Special programs are being arranged by organizations whose members are of recent foreign origin. Emphasis is on heavier War Bond buying and the teamwork necessary for winning the war and establishing a lasting peace.

Nearly every governor of the 48 states has issued similar "Flag Week" proclamations, while thou-

sands of mayors and other municipal heads are arranging programs to give proper recognition to the United Nations and "Flag Week," with due consideration of the necessity of maintaining our production schedules at top peak.

Four thousand church organizations have been asked to enlist the cooperation of their various minister members to hold special services in their churches on "Flag Sunday," June 13. Ministers have been asked to announce special collections in their churches, the proceeds to be used immediately for the purchase of War Bonds and Stamps. Where special conditions exist the Flag Association has asked the church leaders to make its regular collection first and then to conduct a second collection which will be used entirely for the War Bond effort.

To further support the war effort the thousands of members of the Flag Association have pledged themselves "to forego the purchase of things that they need and place the money through War Bonds and Stamps, out there on the firing line where our Flag is being advanced and maintained with such heroic sacrifice."

The association also has pledged "to our Government our full effort and leadership in urging all Americans during this week of self-denial to purchase War Bonds and Stamps as a tribute to our Flag and as an expression of gratitude to our armed forces."

**Give Red Cross Priorities For Disaster Relief**

Emergency priorities for the American Red Cross in disaster relief and rehabilitation have been approved by the War Production Board so that scarce and restricted materials can be obtained in serious cases within twenty-four hours. The 171 disasters in which the Red Cross participated in one year show the extent of the possible application of this wartime service.

In March 1942, tornadoes which struck Kentucky, Tennessee, Indiana, and Mississippi brought in sharp focus the need for priorities in disaster relief. At that time WPB stipulated that the release of materials to the American Red Cross, accepted agent of disaster relief, must include not only beneficiaries of Red Cross rehabilitation awards, but those disaster sufferers who possess financial resources as well, allowing those of the latter class to purchase necessary materials through the priority assistance of the Red Cross.

**Rebuild With Speed**

The WPB policy of handling priority assistance in natural disasters began in that way. Complicated at first, methods have been improved to make possible immediate repair and rebuilding. The speed which this service is now given was doubly appreciated in Bertie County, North Carolina, when the sawmill and lumber yard in the town of Roxobel were destroyed.

Since the first priorities through Red Cross were granted, \$2,598,061.00 in materials needed for rehabilitation in disaster work have been approved. During April, the Red Cross requested priority ratings for critical materials to the value of \$125,000. The largest single request in April was for Alabama, which suffered exceptionally severe damage from tornadoes. These figures do not include rehabilitation of the May flood disaster in the Midwestern state.

**Save Crops and Stock**

Red Cross assisted in saving the bean, berry, hop and cattle and dairies industries in Oregon by getting immediate priorities on 320,000 pounds of fence wire, 486,000 pounds of vine wire, 35,000 pounds of staples, and 120,000 pounds of barbed wire. The rich Willamette Valley's berry vines and crops could be replanted and saved only by immediate action.

**RETAILERS MAY STILL REDUCE POINTS**

Retailers may lower the point values of rationed meats and fats which are in danger of spoiling until July 31, OPA has decided. These emergency reductions must be accompanied by a cut of at least 25 percent in the established ceiling price of the item. If the point value is lowered more than 25 percent, the price must be reduced proportionately, but never more than 50 percent below the ceiling.

**You Don't Have to Stand in Line . . .**

**To Buy ELECTRIC POWER**

THAT'S TRUE, even though the electric light and power industry in America was called on to produce, in 1942, the greatest amount of electric power in history—189 billion kilowatt-hours!

And at the same time the average cost per kilowatt-hour to the consumer was lower than ever before!

Not only were all the demands of war plants, military camps, naval stations, and arsenals met—but there remained 27 billion kilowatt-hours of electrical energy to take care of the needs of shops and stores, 30 billion for homes, 13 billion for public transportation, street lighting, and other uses.

These are some of the accomplishments of the electric light and power industry and of the electrical manufacturers who build the equipment used to generate, distribute, and utilize electricity—working together with the teamwork so typically American.

**How We Helped**

**POWER GENERATION.** More than one half of all the electric power generated by electric light and power companies in the U. S. is produced by generators manufactured by General Electric.

And such has been the improvement in the efficiencies of turbine-driven generators that if the electric power used in 1942 had been produced with the machines of 1924, it would have required more than a million extra cars of coal and one hundred and forty thousand men just to mine and haul this extra coal.

**POWER DISTRIBUTION.** To have ample power available wherever new war plants have sprung up requires large and highly efficient transforming and switching equipment and the solution of highly intricate engineering problems. General Electric has had a hand, and a head, in the development and manufacture of much of this equipment.

**POWER UTILIZATION.** Building machines, lamps, and appliances that put electricity to work more efficiently in factories and homes is one of our most important jobs. The United States has more of these electrical helpers than any other nation. In 1942, the average home used twice as much electricity as in 1930, and in those 12 years the average price per kilowatt-hour decreased 40%.

This is only a small part of the story of America's electrical industry. When the full story becomes history with the passing of the years, it will reveal a group of men who, with a determination which now seems providential, kept on—co-operatively developing new and better equipment, increasing generating capacity, lowering costs, expanding service, planning always to be ready for the demands of the future. It will be a story of remarkable vision and courage—for it all had to be planned, and the work started, years ahead of the need.

The next time you meet a man from your electric service company, be he the local manager, or meter reader, or spurred lineman carrying out his assignment in rain, sleet, or heavy winds, give him a word of encouragement—for he is the man who is making it unnecessary for you to stand in line for electric power. General Electric Co., Schenectady, N. Y.

**GENERAL ELECTRIC**

**Women's Land Army Helps Farmers Grow And Harvest Their Crops**

Helping farmers grow and harvest their crops this year will be 360,000 women, part of the U. S. Crop Corps' 3,500,000 workers which includes businessmen, transported farm workers, and high school boys and girls of the Victory Farm Volunteers. Sixty thousand of these women will be enrolled in the Women's Land Army—10,000 for year-round work and about 50,000 for seasonal work of one month or more.

**Super Farm - Hand**

Farmers who need additional help can get members of the Land Army through the county agricultural agent. Last year the "city folk" proved their worth by saving crops in many parts of the country. One dairy farmer asked for an experienced man to help in the present emergency. He was sent a super-woman worker who could drive the tractor, milk the cows and clean the barns. The farmer had to admit: "she's a wonder!" The woman who headed the Farmerettes in World War I, Mrs. Bertha Vorhorst, was out shucking corn last year with the Land Army. She's seventy-one years old and can shuck corn faster and better than some of the younger workers. The farmer she helped asked for more workers like her.

**How to Get Them**

The Women's Land Army will be supervised by the Cooperative Extension Service of the Department of Agriculture and state agricultural colleges. County agents will place the workers, help them to become adjusted to farm work, give necessary supervision, and help the farmers to train the new workers in farming skills. The Extension Service of each state will review applications and select the workers needed to meet farm-labor requirements.

Women placed on farms for year-round work will receive from 3 to 6 weeks' training in one of the agricultural short courses offered by State agricultural colleges or similar institutions or equivalent training on the farm. The recruits for seasonal work will not require so much training but will be given some preliminary instruction.

Women who wish to contribute their services to farm work should await the local call. Requirements for Land Army women will vary from area to area, and drives for recruiting the desired number of workers will get under way in

various localities when the need arises. The volunteer must be at least eighteen years old and must furnish a doctor's certificate as to physical fitness.

**Athlete's Foot Is Common Disease**

The common disease, popularly known as athlete's foot, is said to be the third most common disease seen by skin specialists during the summer, and the fifth most common disorder in winter. It is due to a little mold-like growth or fungus which thrives best where there is moisture and warmth. Therefore the feet make an ideal place for the growth of this germ.

"To have athlete's foot, the infection must be gotten either directly or indirectly from someone else," states Dr. Geo. W. Cox, State Health Officer. "The most common places to contract the infection are around shower rooms, baths or bath houses, locker rooms, and other public places where persons go barefoot. And it is probable that at least one-half of all adults suffer from the infection at some time."

Dr. Cox suggested the following as some effective measures for preventing and avoiding recurrent attacks of athlete's foot:

1. Dry carefully and thoroughly the spaces between the toes.
2. Use a mild alcoholic solution on these areas after drying.
3. Liberally apply a plain, un-scented talcum to those areas and sprinkle it freely in socks, stockings, and shoes.
4. Wear socks that are absorbent but not too coarse. Shoes should be well fitting but not too tight; sufficiently roomy but not large enough to chafe and rub.

**NO MORE WHEAT FOR FEED**

Sales of wheat for feed have been discontinued by the Commodity Credit Corporation. However, farmers may still obtain some feed wheat through dealers and county AAA committees to whom shipments have already been made. Additional orders will not be accepted by the Corporation unless the state U. S. Department of Agriculture War Board determined that the wheat is needed to feed livestock during June.

**TEMPERANCE.**  
Some people over-eat and are said to be "obese." Others over-drink intoxicants and are classed as "sots." Really, there is not a

great deal of difference since quite a quantity taken while over-eating, is soon changed to alcohol by that masterful chemical laboratory, better known as the stomach. "Be ye therefore temperate in all things," was the best advice mere man ever had. On the one hand, those who overeat, still are considered respectable. But when a poor devil overdrinks! Oh boy! Do we hear him (or her)

romped on and plumb plenty. The only reason is that more people overeat than overdrink. Why do too much of either?

**THE HYPOCRITE.**  
There was a time when a fellow took a long trip, he liked to talk about it. He even went so far as to share his pleasure with others by seeing his story in the home town newspaper. Now when he takes a

trip, he doesn't want anything said about it. Bum rulings like bum laws make hypocrites of a lot of otherwise good people.

**HARD TO CHOOSE.**  
Once there was a woman who had three suitors. She didn't know which to marry. One was a grocer; one was a doctor; one was a preacher. If she married the grocer, she would get groceries for

nothing. If she married the doctor, she would get well for nothing. If she married the preacher, she would get good for nothing. A very fine old minister told me that story many years ago. Don't jump on me, ladies, go after the minister who told me.

**PERFECTION.**  
Human nature boils down the fact that imperfect people expect perfection in others. That's why we have what is termed "sore-heads."

**CHANGE.**  
One thing, the nation could get along with fewer economists in Washington, by having more economizers.

**MONEY MENDING.**  
Money won't mend a broken heart, but it is about the best known cement that a genuine gold-digger ever found.

**THOUGHT A LIE.**  
Do you recall the time that you thought you were strictly in the "swim," only to wake up and find out that you were only in the "soup?"

**HOSPITALITY.**  
"Auctioneering is my special line of business. Prices are very reasonable. If I am out of town, make dates with my wife. Jackson G. Nord" — Enid, (Okla.) News.  
Hospitable folks, those Oklahomans.

**MODERN STUFF.**  
"Do you know that your wife is telling it around that you can't keep her in clothes?"  
"That's nothing. I bought her a home and I can't keep her in that either."

**RESOURCEFUL.**  
"Johnny, use the word 'paralysis' in a sentence."  
"Alice and I were in swimming and some one stole my trousers, so I had to borrow a paralysis!"

**HOME REMEDY.**  
The teacher sent a note home with the boy: "Your son Charles shows signs of asigmatism. Please have it investigated and correct." The next morning the kid brought a note from his dad. "I don't know what Charley has been into, but I give him a darn good wallopin' and you can do the same. That ought to help him some."

**COMING BACK.**  
The nudist idea is said to have started in Germany in 1900. It must be coming back because Adolph already has his shirt tail out.

**HISTORY.**  
The old-time religion will be remembered by many of the older folks as the kind that made a man kind and courteous to everybody except the members of his own home.

**WAR STUFF.**  
Crossing carrier pigeons is another war idea. They are crossed with woodpeckers so that they will knock on the door to deliver the message.

**SEASONING.**  
A seasoned trooper is one who has been mustered by his officer and peppered by the enemy. (That's another \$5 suggestion.)

**INVENTIONS.**  
Substitutes have been found for about everything since the war started. In looking over a long list of things, there is a substitute for about everything except honesty, charity and thrift.

So long, folks. Got to hoe the garden. Durn them goatheads!

**MORE MONEY INTO BONDS**  
The average American family "should and must" be investing 25 percent of its income in war bonds by the end of 1943. Secretary of the Treasury Henry Morgenthau, Jr., said recently in announcing a new "streamlined" bond campaign. "Of the 45 billion dollars still necessary to complete our war financing needs for 1943," Morgenthau said, "at least 18 billion dollars, or almost 25 percent of the national income for the remainder of the year should come from purchases of bonds by individuals. From those workers earning \$1,000 to \$5,000 net, who will have seven-eighths of all the current available individual savings, 25 cents of each dollar is not too much to expect. In fact, they should and must invest more if our goal is to be met."

"I will bear true Faith and Allegiance . . ." is this young Marine Lieutenant's oath, as she is commissioned in the newest of the women's auxiliary corps, that of the Marines. Her pledge to her flag is backed by disciplined service, and with War Bonds. The Bond you buy on Flag Day helps protect that flag.

**GOLDSTON**  
Beatrice Smith  
A larger number attended Sunday school Sunday than last Sunday. We want everyone to come next Sunday and bring someone else with you.  
Mr. Gregory of Memphis is spending this week with his daughter and family, Mr. and Mrs. Odell McBrayer.  
Mr. and Mrs. Jesse Vick and family spent Saturday in Memphis. Mrs. Vick and small daughter stayed in Memphis to return the next day with her parents, Mr. and Mrs. Allen.  
Mr. and Mrs. Lloyd Brock of Groom spent Saturday night and Sunday visiting with relatives here.  
The young folks Sunday school class enjoyed a party at the school house Friday night. A number of visitors attended and we want to welcome them all back.  
Wayburn Phillips of Lelia Lake spent last week with his uncle and family, Mr. and Mrs. Odell McBrayer.  
Mrs. Irene Heath and Boyd Brock spent Saturday evening with their brother and wife of Groom, Mr. and Mrs. Loyd Brock. They returned home with them.  
Odell McBrayer went to Wichita Falls on business Sunday.  
Fern Haynes who graduated from Amarillo high school this past school term is home spending the summer with her parents, Mr. and Mrs. J. E. Haynes.  
Ina May Brock spent Thursday night with her cousin Lorene Brock.  
Gladys May Johnson spent Saturday night with Ina May Brock.  
Wesley Gray Farr spent Friday afternoon with James Vick.  
Mrs. Eulan Higdon spent the week end in the John Stewart home.  
Mr. and Mrs. Philly and family of Texola, Okla. is visiting in the Davis home.  
Mr. and Mrs. McDonald and family and her sister spent Sunday in the Joe Dilli home.  
Jimmie Tucker and Orrin Brock spent Sunday with Ray Lee and H. C. Johnson.  
Mrs. Christy and Mrs. Sophie Wardlow of Amarillo spent Sunday with their brother, Mr. and Mrs. Edd Mooring and family.  
Those to visit in the Nath Helton home of Goodnight Sunday were her sisters, brothers and parents, Mr. and Mrs. Roy Stewart and son of Chamberlain, Mr. and Mrs. Howard Stewart and children, Mr. and Mrs. Al Devers of Clarendon, Mr. and Mrs. Neely Hudson and son, Mr. and Mrs. Dick Eichelberger and Mr. and Mrs. H. M. Stewart.  
Mr. and Mrs. J. J. Carlile, Mr. and Mrs. Les Carlile and daughter and Mrs. Roy Carlile attended the funeral of a brother of Mrs. J. J. Carlile at Arlington last week.

## ZOY FRONABARGER BECOMES BRIDE OF CLIFTON RISINGER

Mrs. Nell Fronabarger announces the marriage of her daughter Zoy to William Clifton Risinger on Sunday, May 30th at the home of Rev. W. N. Green, pastor of the Baptist Church at Altus, Okla.

Mr. Risinger is a son of W. A. Risinger of Goodnight and was coach at the Goodnight school the past year. He received his education at Cameron Jr. College and at Texas Tech.

## WOMEN'S SOCIETY OF CHRISTIAN SERVICE

The Women's Society of Christian Service met in the Methodist Church Wednesday afternoon at 3:30. Mrs. J. R. Buils gave the devotional on "The Christian's Code." Mrs. L. N. Cox gave the lesson from the World Outlook, "I Come Because the Light is Here." Mrs. Lena Antrobus was in charge of the program.

## FRIENDSHIP CLUB

The Friendship Club met with Mrs. J. A. Pool as hostess Tuesday afternoon at her home. The afternoon was spent in doing Red Cross sewing and visiting.

After the meeting, a delicious plate refreshment was served by the hostess who was assisted by her daughter, Miss Ila.

Those present were guests, Mmes. R. L. Bain, J. A. Moreman, W. D. Van Eaton; and members, Mmes. G. J. Teel, L. Ballew, H. Tyree, C. E. Lindsey, J. A. Meader, J. W. Morrison, J. D. Stocking, C. R. Skinner, Miss Katie Meaders and hostess Mrs. Pool.

## BIRTHDAY PARTY

Mrs. A. B. Turner entertained Friday night with a supper party, honoring her husband on his birthday.

A picnic supper was served cafeteria style at 8 o'clock after which a variety of games were played.

Several nice and useful gifts were received by the honoree.

Those present were Messrs. and Mmes. Walter Flynt, John McMahan and daughter, Alfred Estlack and three daughters, and Misses Helen Hudson and Vallie Harrell.

## 1937 BRIDGE CLUB

Mr. and Mrs. Alfred Estlack entertained this club at their home Tuesday evening. Three tables of Auction were played with high score going to Mr. and Mrs. G. W. Estlack and low to Mr. and Mrs. B. G. Watson.

A salad course was served after the games to guests, Mr. and Mrs. Walter Flynt, and to members, Messrs. and Mmes. B. G. Watson, Geo. W. Estlack, A. B. Turner, John Gillham, Alfred Estlack.

## CARL BARKER HONORED

Mrs. Carl Barker entertained Wednesday evening with a birthday dinner for her husband which was the occasion for a family reunion.

Those present were Mr. and Mrs. W. F. Barker, Mrs. I. M. Noble, Miss Theola Noble, Mr. and Mrs. Doyce Graham and family, Pvt. and Mrs. Dick Noble of Bryan, Texas; Pvt. and Mrs. Earl Barker of Lubbock, Mrs. D. W. Tomlinson, Jr., and Miss Mamie Barker.

Mr. and Mrs. Glenn Riley and children of Belen, N. Mex. are visiting her parents, Mr. and Mrs. John Rhodes.

## CELEBRATES BIRTHDAY

Last Thursday, June 3rd was a happy occasion in the L. B. Mauldin home when a birthday dinner was given in his honor. Those present besides the family, were relatives of Mr. Mauldin. They were two sisters, Mrs. Luke Reeves from Blanket, Texas and Mrs. R. A. Boyd from Sylvester, Texas; a brother, Walter Mauldin from Abilene, Texas; and a niece and nephew, Mrs. Vera Sparks from Rockford, Colo., and Bert Boyd from Sweetwater, Texas.

The relatives had gathered in to see Mr. Mauldin who has been quite ill, having undergone a major operation some weeks before.

Mr. Mauldin reports that he is feeling a lot better at the present time, especially since the birthday celebration. He vows that he enjoyed the occasion very much and had the best time of his life. "There is nothing like a get-together to make a person feel better," he said.

## BLANCHE GROVES Y. W. A.

The Blanche Groves Y.W.A. met in the home of Mrs. Joe Goldston at 7:30 Wednesday for Bible study. Bro. Moody reviewed the 7th chapter of Revelations.

Members present were Maxine Robertson, Lavoise Armstrong, Hazel Bingham, Hulda Cautin, Jane Wright, and Mrs. Goldston. New members, Nelda Massey, Frankie Hommel, and Loveta Cowan, and guests, Bro. and Mrs. Moody.

## ASHTOLA NEEDLE CLUB

The Ashtola Needle Club met last Thursday at school house with Mesdames Hubert Rhoades, Lu McClellan and Francis Brown as hostesses. Eighteen members were present.

After short business meeting, time was spent in Red Cross work. Delicious refreshments were served by the hostesses.

Next meeting will be July 1st with Mesdames Slayton Mahaffey, Millard Word as hostesses.

## WINDY VALLEY CLUB

The Windy Valley Club met on the afternoon of May 26th at the Clubroom. Members present were Gladys Seago, Grace Ayers, Leona May Shaw, Hazel Hutson, Myrtle Crone, Della Barker, Mamie Mills, Ruby Reed, Nova Barker, Bernice Anderson, Lucille Swinney, Aubrey Swinney, Mrs. Kidd, Mrs. Marvin Crone, Mrs. Molder, Mrs. Bert Ayers, Mrs. Waddell and visitor Lola Marie Ayers.

Those to receive polly anna gifts were Gladys Seago and Mamie Barker. Two quilts were quilted. The next meeting will be June 9th, Mrs. Waddell hostess.

## NOTICE

Prof. Larimer announced this week that the school annuals have arrived and that students could see him or Bill Andis and get theirs any time.

## CARD OF THANKS

We wish to thank our many friends for the kind sympathy and lovely floral offerings in the passing of our loved one. May God's richest blessings be with you always is our prayer.

Mrs. Pat Longan  
Mrs. I. Gaither

## Church News

**ASSEMBLY OF GOD CHURCH**  
J. J. Grubbs, Pastor  
Sunday school—10 a. m.  
Preaching—11 a. m. and 8:45 p. m.  
Prayer Meeting, Wed.—7:30 p. m.

**EPISCOPAL CHURCH OF ST. JOHN BAPTIST**  
Rev. Frank H. Hutchins, M. A., Clergyman  
Mr. Walter B. Knorpp, Lay Reader

Sunday, June 13—Whitsunday—8:30 p. m.—Evening Prayer and Sermon. No morning service.

**FIRST CHRISTIAN CHURCH**  
L. Guy Ament, Pastor  
Back to our regular run now. Next Sunday morning at 11 o'clock our worship will be as follows: Theme will be "Hold Fast That Which is Good". Night services will be at 8:30. All are earnestly invited to come and worship together.

Next Wednesday night our Bible study and prayer service. All are asked to be with us. There is a blessing for you in worshipping the Lord.

Donley County Leader, \$2 a year.

## GARDEN GLANCES

"America beautiful lies in the hands of the gardeners."

The yards and gardens are still very attractive as flowers and shrubs are blossoming in profusion almost every where.

The golden elder at the First Christian Church is in full bloom and adds a formal touch to the landscape. A number of elders are also blooming in the garden of Roy Clayton.

The home of Mrs. A. H. Baker is very attractive with numerous flowers and the recently clipped lawn.

Lilies are still blossoming in profusion including the orange colored day lilies. The Vada Carpenter home is made a place of beauty by the huge bed of day lilies.

Tall catalpa trees are white with their blossoms and sweet with fragrance in the gardens of U. Z. Patterson, S. W. Lowe and A. T. Cole.

Victory gardens are fine. It has been aptly said, "If you expect to live out of your garden you must live in it."

Mrs. Wayne McElroy and son, Jackie, arrived Wednesday for a visit with her parents, Mr. and Mrs. John Rhodes before joining her husband in Michigan.

Mr. and Mrs. Glenn Riley and children arrived Tuesday to be with his mother, Mrs. J. N. Riley who underwent a major operation Wednesday. Mrs. Riley is reported to be resting comfortably at this time.

L. C. Williams, after a visit of several weeks here with his father, Z. N. Williams, and other relatives, left Monday for Arizona for the benefit of his health.

## RED CROSS VOLUNTEER SERVICE

### Soldier's Kits

Ashtola has completed and turned in 50 Kits made by the following ladies: Mrs. H. S. Mahaffey, Mrs. F. M. Watkins, Mrs. Watt Hardin, Mrs. M. H. Rhoades, Mrs. J. R. Brandon, Mrs. C. G. Cobbs, Mrs. Austin Rhoades, Mrs. Chas. Harp, Mrs. W. P. Holley, Mary Swinburne, Mrs. Hubert Rhoades, Mrs. J. M. Graham, and Miss Jessie Cook.

Ashtola has taken 50 more to make, and these ladies are meeting once a month to do Red Cross work. We want to thank Mrs. J. R. Brandon for her help in collecting \$24.00 from the Ashtola Community for the Kits. Donations were received from the following: Mrs. H. S. Mahaffey, Mrs. M. H. Rhoades, Mrs. S. G. Evans, Mrs. C. G. Cobbs, Mrs. Watt Hardin, Mrs. J. R. Brandon, Mrs. Chas. Harp, Mrs. Lu McClellan, Mrs. Hubert Rhoades, Mrs. W. P. Holley, Mrs. Mary Swinburne, Mrs. Joe Bownds, Mrs. N. L. Jones, Mrs. J. M. Graham, Mrs. M. R. Word, Mrs. G. G. Henson, Mrs. F. M. Brown, Dr. M. H. Rhoades, Mrs. Selden Bagby, and the Ashtola Needle Club.

Mrs. Doss Palmer has taken 41 more Kits for Mrs. Burton's Sunday School Class. This is a total of 66 Kits that this class is to make.

Other donations for the Soldier's Kits were given by Mrs. S. T. Sayer and two others in memory of Mrs. C. W. Bennett.

Two quilts were turned in last week, one from the Goldston Community, and the other made by Mrs. L. O. Jacobs.

Mrs. Doss Palmer turned in 15 shirts made by Mrs. W. E. Riney,

Mrs. Bill Bromley, Mrs. Oller, Mrs. Alfred Estlack, Mrs. Forrest Sawyer, Mrs. Regan Bain, Mrs. Bob Hay, Mrs. Bob Head. These ladies belong to Mrs. Burton's Sunday school class of the Baptist Church.

Mrs. J. F. Elmore helped to make button-holes for 21 men's shirts. She was assisted by Mrs. G. R. Grant and Mrs. Bill Crawford.

Miss Maurice Berry made 200 buttonholes for the men's pajamas and night shirts.

The following ladies gave a morning or afternoon helping to size and pack garments for our June shipment: Mrs. Victor Smith, Mrs. Frank Hutchins, Mrs. Rolle Brumley, Mrs. Tom Goldston, Mrs. Pete Koontz, Mrs. Floyd Lumpkin, Mrs. Geo. Norwood, Mrs. Alan Jefferies, and Miss Edna Mae Mongole. We will be able to give the number of garments sent in this shipment in our column next week.

Used clothing was donated to the Red Cross by Mrs. Marguerite Goodner and Mrs. Tom Bugbee.

### HOME SERVICE

Mrs. C. A. Burton gives regulations regarding the wearing of uniform after discharge. After a man has been honorably discharged from service wearing of the uniform is permissible under only two circumstances: when the man is traveling to his home from place of discharge, within three months after date of discharge; or in case of a man who has served during war, upon occasions of ceremony, when the uniform of the highest grade held during war service may be worn.

New instructions have been issued simplifying procedure of sending small essential articles such as eyeglasses, watches, fountain pens, insignia, publications, church bulletins and similar articles to Army personnel at APO's.

overseas. In sending such items the requirement that there must be a request from the serviceman, approved by his commanding officer, is not applicable provided. The sealed parcel does not exceed 8 ounces in weight, and First Class postage is prepaid. An approved request is no longer required for renewal of subscriptions to newspapers and other second-class matter publications for overseas personnel.

As the number of servicemen overseas increases, the use of V-Mail is urged. It is given preference over other classes of postal matter, including air mail, except official air mail.

### HERE ON VISIT

Mrs. Guy Pierce and children from Devine, Texas are visiting her mother here, Mrs. Will Peabody. Mrs. Pierce says that she plans to be here for a month or more. Capt. Guy Pierce is with an Army division stationed at New Orleans, La.

Mr. and Mrs. E. J. Chenault were down from Amarillo over Sunday visiting relatives and friends at Lelia Lake and Clarendon. Mr. Chenault is an inspector in the Ordnance Department at Pantex.

Pfc. R. Weldon Warren was home this week-end on furlough. He met his wife here and they left Wednesday, he returning to his base at Frederick, Okla., and she returning to her home in Vernon.

D. L. Phillips was called to Odessa Monday to be with his father who is reported as being seriously ill there.

W. C. Stewart, former hardware man here and former resident for more than thirty years, came up from Dallas the first of the week to look after his property interests.

**ANOTHER STEP MADE FOR FUTURE AIR TRAINS**

One more step in the plan for future air trains was completed at SPAAF recently with the inauguration of double-towing of gliders by tow planes.

By the double-tow practice the cargo load can be increased with no appreciable output. At the field it may soon be common to see a plane taking off pulling two gliders—three times the cargo space of a single plane.

Donley County Leader, \$2 a year.

**Lt. Odom Assigned to Headquarters West Texas Recruiting District**

First Lieutenant John D. Odom has been assigned to Headquarters West Texas Recruiting District as Staff Air Officer, it was announced today by Lieut. Colonel Marvin B. Durette, commanding officer. Lieut. Odom, who reported to Lubbock from Headquarters Eighth Service Command in Dallas, will be a member of the Aviation Cadet Examining Board and will interview prospective Air Corps Cadets.

Col. Durette stated that Lieut. Odom is one of the few Air Corps officers holding four aeronautical ratings. He has qualified as a pilot, aircraft observer, bombardier, and as a glider pilot. Qualifying as a bombardier at the Midland Flying School, Lieut. Odom took his glider training at the Elmira Soaring Club, and his pilot training at the Advanced Flying School at Maxwell Field.

"It is believed," Col. Durette reported, "that men desiring to enter the Air Corps as Cadets can get a true picture of their duties from Lieut. Odom since he is not only well qualified through his aeronautical ratings, but has also had combat experience." Lieut. Odom served on Submarine Patrol in a combat area, took part in one major engagement, and has to his credit the destruction of one submarine.

Lieut. Odom stated he will interview all men between the ages of 18 and 26 years interested in becoming Cadets. No high school or college credits are required. These men need only take the Air Corps examinations, and, if found acceptable, may volunteer into the Army Air Corps through their local Selective Service Board. Men 17 but not yet 18 years of age may go before their Aviation Cadet Examining Boards and volunteer for enlistment in the Air Corps Cadet Enlisted Reserve. Enlisted Reservists are called to active duty for pre-flight training at the end of the first school semester after reaching 18.

Lieut. Odom plans to tour the West Texas District, visiting all

towns in which Selective Service Boards are located.

**ICE BOXES FOR CIVILIANS**

A total of 239,575 ice boxes are to be produced in the next three months for civilian use, according to a new order of WBP. Despite limited factory capacities and scarcity of materials, the production rate is expected to reach about 75,000 units a month.

**NOW TO GET FARM SUPPLIES**

According to a new WPB priority regulation, a dealer must furnish farm supplies if the farmer signs a certificate stating: "I certify to the War Production Board that I am a farmer and that the supplies covered by this order are needed now and will be used for the operation of a farm." A total of 140 items are affected by this order. Such certification will enable the farmer to buy up to \$25 worth of any of the items on the list, and more if the certificate is approved by his local county farm rationing committee.

**BUTTER PRICE REDUCED**

A reduction of five to six cents a pound in the retail price of butter will go into effect Thursday, June 10. The OPA intends to effect the roll-back with a minimum of financial loss to the dairy industry, from the farm through to them by the government, buyers of butterfat will get as much for their butter as before, and will be expected to continue to pay going prices to the farmer. "Butter shall include butter manufactured by a farmer on his farm from milk produced on his farm" according to an amendment to Maximum Price Regulation No. 289 under which maximum prices were established for creamery butter.

**Women's Land Army Helps Save Crops**

Housewives, office workers, students, and professional women have enrolled with the American Women's Voluntary Services in the Women's Land Army which will help save vital food crops. Last year 763 workers were sent out in the Washington, D. C., area alone to pick the apple crop that was rotting on the ground. Women for the Land Army need to be strong and healthy. They are paid prevailing wages.

**BOMBARDIER-NAVIGATORS WILL BE PRODUCED AT CHILDRESS SCHOOL**

**MILK ADDED TO RATION LIST**

Evaporated and condensed milk are now on the list of rationed foods with a value of one point will be made available to consumers for such purchases. The rationing is intended to conserve limited supplies for infant feeding, special diets, and for persons unable to obtain adequate supplies of fresh milk.

**DON'T WRITE "ROUND ROBINS"**

Writing soldiers "round robins," or news letters, and inviting composite replies by the group is inadvisable, the War Department has warned. Replies tend to become anthologies of military information, and a custom that arose from innocent motives become security hazard.

Bombardier-Navigators will be produced at the Childress Bombardier school in an expanded training program inaugurated recently, Lt. Col. John W. White, commanding officer, announced.

Inaugurated with a class of cadets which reported Thursday June 3 from pre-flight school, the combined bombing-navigator program will extend over an 18-week period, six weeks longer than the regular bombardier course.

After four and half months of training, during which student bombardiers will receive the same bombing instruction as in the past, and a thorough study in navigation, the new officer will not only be able to bomb enemy targets with the same accuracy of past products of the Flying Training Command bombardier schools, but will be able to take over the navigator's post during an emergency.

Classes in school previous to Thursday will receive wings as bombardiers at the conclusion of their regular 12-week bombing training program.

Combat training at a field base under simulated war conditions where cadets are confronted with many problems which have been experienced by American airmen on the world's war fronts, will continue as part of the bombardier-navigation program. Combat maneuvers for bombardier cadets, originated under the direction of Lt. Col. L. H. Daiton, Childress director of training, has been adopted as part of the training program of all AAF bombardier schools.

**GO FISHING WITHOUT GAS**

It's okay with Mr. Ickes if the country's ardent fishermen continue their sport but he says, "We still think it's a good idea for them to fish when they can and where they can without extra gasoline." Gasoline for fishing trips won't be available, no matter how productive of food the sport may be.

Donley County Leader, \$2 a year.

**Texas Gardens Producing**

Human effort and favorable weather conditions are working together to bring about an all-time high in vegetable food production in Texas.

According to H. M. Breedlove, County Agent for the A&M College Extension Service, Victory gardens throughout the state have reached the point of quantity production of food. Lettuce, mustard, spinach and other salad crops were the principal products available from early season gardens. But vegetables coming into production now generally are those which were planted on a large scale to supply family needs around the calendar year. The largest planting of white potatoes in the history of Texas gardens was made this year, with yields of one to ten bushels per garden, commonplace. If the crop can be stored successfully, Breedlove says, there should be little need for out-of-state shipments at any time of the year.

Tomato plantings were made on a large scale with the idea of having a sufficient supply for daily use and a surplus for canning. An equally large increase in green corn planting, and cream and black-eyed peas was made.

Mr. and Mrs. Alfred Estlack and daughters were in Memphis, Saturday afternoon.

Mrs. Tom Ziegler and daughter Molly Ann and Stella Hinkle of Canyon visited friends and relatives here over the week end.

Bob Baird, old-time cowpuncher of these parts, has returned after many years to take up habitation again in good old Donley.

Mrs. J. D. Jefferies is at home after a visit with her daughter, Mrs. H. J. McDonald and family of Plainview.

Chester Telley, Jr. who has been employed in Amarillo for some time past, recently visited his uncle, Wilmer Reeves and family in Memphis, Tenn., arrived home Monday.

Pfc. Fred D. Combest of the Lubbock Flying School spent a few days here this week on furlough with his wife and other relatives. He returned to his base Wednesday.

**Buy More BONDS**

--- and insure our Country's freedom --- that our children's future may be more secure.

**To Whom it may Concern:**

There has come to the City Office, quite a bit of complaint of the presence of Hogs in the City; we have tried to be considerate, but we can not permit, some to violate the law at the expense of those who try to keep their premises clean.

You had better dispose of your hogs, otherwise it will cost you a fine, when complaint is made.

We also must insist that you keep your cows and other livestock at home. Your neighbor does not want your cow to destroy his garden or flowers. Better take notice.

By ORDER OF CITY Commission in regular session,

THE CITY COMMISSION.

## You are a Soldier in THE BATTLE OF TRANSPORTATION

Every unnecessary mile you drive is a contribution to our Axis enemies.

Every bit of rubber and gasoline you save on the home front is a contribution to the combat needs of our fighting men on every battle front.

You can help hasten the day of victory by confining your driving to a patriotic minimum. Use your car only for going to and from work... for needed shopping... for war-time activities like vegetable gardening... for travel to and from places without other transportation facilities.

Remember, your Government asks you to do your part to prevent a trans-

portation breakdown, asks you to Care For Your Car—For Your Country.

Visit your Phillips 66 Service Man at least once a week. His tire-saving service includes checking air pressures, inspecting for cuts and bruises, criss-crossing with the spare every 3,000 miles. His car-saving service includes inspection of battery, air filter, and radiator; lubrication of every point specified by the maker of your car.

Add Phillips 66 Poly Gas, and Phillips 66 Motor Oil... and you have a complete treatment that perks up weary automobiles... a treatment that makes your money, your tires, and your car go farther.

**FOR VICTORY... Buy U. S. War Bonds and Stamps**

## Plans For Service Olympics To Be Held at Lubbock This Summer Are Receiving Favorable Reaction

Tentative plans for a West Texas service Olympics to be conducted in Lubbock sometime during the summer months are receiving much favorable reaction in this part of the state.

Outstanding track and field stars now stationed at Army and Navy camps over West Texas, in New Mexico and Oklahoma would compete in a two or three-day track and field carnival under plans for the meet. Tech Stadium has been suggested as the possible site for the promising event, and Athletic Director Morley Jennings of Texas Technological college and Lieut. Nathan B. Eubank, athletic officer at SPAAF, are discussing preliminary details.

South Plains Army Air Field would act as the host team if present plans materialize. Col. Norman B. Olsen, commanding officer, has given his hearty approval to the Olympics and for SPAAF athletes to participate. Several

former track stars of the West Texas area are now stationed at SPAAF.

With a majority of the big name track and field stars in service it is believed that such an event would attract a galaxy of national and state champions.

Included on the program would be a full menu of events. Individual contests would include the 100 and 200-yard dashes, 440 and 880-yard runs, mile and two-mile runs and high and low hurdles. Field events would include the high jump, running broad jump, javelin throw, pole vault, hammer, discuss and shot put. Team events also would be scheduled.

Also holding considerable interest at the big glider pilot training center is the organization of a post swimming team. The SPAAF team, which should include some West Texas men, hopes to arrange meets with other teams, and a big

service swimming meet either in Lubbock or at Buffalo Lakes during the summer.

In charge of the team likely will be Staff Sgt. Lynn C. Curles of Milwaukee, Wisconsin, former captain of the Northwestern swimming team and a member of a National AAU championship team.

If plans materialize as expected, surrounding schools may be asked to enter in competition.

There are several expert divers and swimmers on the field who will take part in exhibitions, it was said. Classes in swimming also are planned.

## Somewhere a Boy Has a Rendezvous With Death

Somewhere a Canadian boy has a rendezvous with death tonight. Whether on a carrier's deck in the Pacific, amid the burning sands of North Africa, or in the tropical forests of New Guinea—whether swift and perilous, or terrible and slow his going—he is giving to his fellow men the greatest gift a man can give.

The years un-lived—the warmth and the laughter and the tears, and—most precious gift of all—his sons that might have been. All these he is giving.

No effort of ours, now, can stay the speeding bullet that has his number on it. What to him, now, are the bonds we buy, or the guns

we build?

With nothing that is bought or sold, with nothing that is made of human hands, can we share his sacrifice.

What gift can we give to match his—what sacrifice can we make? The answer will come from that still small voice within our own hearts.

For no one can tell us how many bonds to buy, how hard to work on the guns and planes and tanks we build, to keep his gallant effort from having been in vain. Yes, we must each decide the measure of our own obligation—the gasoline we do not use, the pints of blood we donate, the food we do without, and all the other appeals we answer—to make the precious gift he made worthwhile.

Not for the boy who is dying tonight, but because he is dying, we can make our sacrifices to the cause of freedom. — Reprinted from General Electric Monogram, internal company publication.

## Pacific Coast Evacuees Learn Dairy Farming

Vocational training for rural war production work is being carried on at several of the War Relocation centers where people of Japanese ancestry are learning to help in wartime food production. Under the War Relocation Authority's re-employment program, many of these trainees will soon find jobs on the farms where they are most needed.

While more than 20,000 of these Pacific Coast evacuees are experienced farm workers, many of them have previously worked on irrigated land or in orchards and are not thoroughly prepared for a job in the corn or wheat fields or on dairy farms.

One of the most popular courses given at the Granada relocation center in Colorado is that of the operation, care and repair of tractors, trucks and automobiles. Each group of trainees receives two or three hours of training weekly, and classes are held six nights a week. Over a six-week period 225 of the evacuees will receive 36 hours of this type of instruction.

At the Gila River relocation center near Phoenix, Arizona, 522 have already graduated from one of the rural war production courses and another group of 139 are now in training. Among those already graduated from the courses are 206 in the dairy (milk production) section and 40 in dairy (laboratory) training.

The dairy courses are the most popular at Gila River. These classes are held on Sunday as well as week days. All of those enrolled carry on regular 44 hour work schedules at other occupations at the center in addition to their classes. The courses include such subjects as milking, handling of milk and cream, mixing dairy feeds, dehorning, vaccinating and treating of animals for ailments.

Other rural war production courses given at Gila River center include: hog management, poultry, growing of feed crops and vegetables and woodworking.

At Heart Mountain center near Cody, Wyoming, there is such a demand for seasonal farm workers and for evacuees who are qualified for permanent jobs that arrangements have been made to

SERVICE MAGAZINE HAS STRANGE ADMIRERS—A copy of "Yank", the American Army weekly, found its way to the distant Fiji Islands. Here a Fijian chief and his family view its pictures with interest ranging from the patriarch's critical study to outright amusement among the younger members of the group.

close the high school two weeks earlier than planned. The course of study will not be curtailed to accomplish this but additional hours are being added to the regular session until the end of the school year. Rural war production courses have also been started at Heart Mountain for adults, so that those interested in farm work will have an opportunity of gaining experience before leaving the center.

Courses have just been started at the two relocation centers in Arkansas where soybean production and peanut production are included in the instruction given. The courses given at the relocation centers to the people of Japanese ancestry are under the supervision of the state departments of education, boards of vocational training, in cooperation with the United States Office of Education. All courses are approved by the War Manpower Commission. Any worker over 17 years of age is eligible for rural war production training.

right name and number belonging to the person employed.

Workers who actually do this work fail to get credit on their social security account for wages paid in employment covered by the Social Security Act.

The Social Security Board undergoes expense and lots of time to the Government in finding and securing information from each of the individuals in straightening out their accounts. Account number cards can be secured from the Social Security Board office in the New Post Office Building in Amarillo.

Applicants for cards where workers have lost their original cards can be secured through the same office. It takes only a short time to check the original records for making certain that the worker has a card bearing his correct number.

When a woman worker gets married one of the first things she should do is to have her name changed on her social security account number. This will be done by any Social Security Board field office without charge.

# WOUNDED SERVICE MEN BETTER PROVIDED FOR THAN EVER BEFORE

Never before in the history of the world has the fighting man had available the medical care and equipment the United States now furnishes its defenders. When medical supplies are delayed in reaching the front—and not even a Red Cross can stop a bomb, as the Nazi and Japs know well—our doctors are trained to perform their duties with whatever equipment is at hand. In the North African campaign, ships carrying medical materials were torpedoed. Yet our medical care system was established right from the beaches of the Mediterranean, and the hundreds of recoveries from wounds testify to its effectiveness.

To understand how this mercy system works, we must start with the soldier himself. Each man has fastened to his belt, easily removable, a first-aid packet, a package of sulfadiazine tablets—an improved member of the sulfa family of drugs—and sulfa powder. These sulfa drugs are the marvels of medical science which have conquered some of our most virulent foes—blood diseases, infections, pneumonia.

If the soldier is conscious, he begins to take the sulfa tablets as soon as he is hurt. The special package releases them into his hand one at a time. He dusts the sulfa powder into his wound. He uses the first-aid packet.

In all probability, a hospital

corpsman has reached him before he has a chance to do this. The number of corpsmen to any group of enlisted men has been worked out through long experience by the medical corps.

The corpsman has a larger kit of supplies with him and administers quickly to the soldier, giving him an injection of a drug which stops pain almost instantly. He does not remain with the fallen soldier, as he has to move forward with the attack. After treatment he ties a tag to the soldier's belt telling what type of treatment was administered, fixes a bit of gauze to a bayonet or a stick to mark the place where the soldier is, and goes ahead.

Now come the litter-bearers, attracted by the white cloth. They carry the soldier to a battalion aid station from 400 to 1,000 yards back. This station, a miniature hospital on wheels goes wherever the soldier goes, is staffed by two physicians and assistants and has operating instruments, anesthetics, sulfanilamide, opiates to relieve pain, hot drinks, and, most important, blood plasma to combat shock and loss of blood.

The battalion aid station may be compared to the emergency room in an ordinary hospital. Here the soldier receives treatment which will keep him comfortable until he is removed still farther back.

Just as in the hospital emergency room, speed of treatment is all-important. The battalion aid station provides swift, expert, life-saving treatment and surgery.

In the usual case the soldier remains here a day or less, and then is evacuated by ambulance-jeep or other conveyance back to the Collecting Station, as he would be taken from the emergency room of a hospital to a ward for further treatment. This, too, is mobile, and can be brought up as close to the front line as necessary. Here the various cases are classified so that each man is assured of the exact type of treatment required for his particular injury. A complete record of the injury is made here with recommendations of the doctors who have examined and treated the soldier. Nothing is left to chance. The charts and orders of the physicians are as carefully maintained as in a large city hospital. At these Collecting Stations are a number of ambulances, and other conveyances for getting the injured to them quickly. There are always enough Collecting stations so that one can be kept in reserve, to be used if the number of injured suddenly increases.

From the Collecting Stations the more seriously wounded are evacuated to field hospitals or evacuation hospitals, after going through a clearing station. These are usually some 5 to 7 miles back of the battle line, although, being highly mobile, they can be brought right up to the front. These field hospitals travel on six wheels, four of them with double tires to permit rapid movement over rough or soft ground. They are ready for instant use, and a major operation can be performed in one of these hospitals a few minutes after a man is wounded. These units are equipped with the most modern medical and surgical supplies, and are staffed by expert surgeons. A more advanced type of emergency surgery is practiced here, with specialists available for all kinds of injuries. Yet even these units, complete as they are, are but way stations which prepare the soldier for further treatment—a part of our hospital chain which extends half-way around the world.

Farthest back are the great general, or base, hospitals. These are not mobile. They are far removed from the battle area, sometimes several hundred miles. The wounded are brought to them by ambulance or ambulance plane—those specially equipped air transports which were developed under the direction of the Air Surgeon. The general hospitals have 1,000 beds or more, and are the equal of the most elaborate city hospitals. The men may remain there until they are entirely cured and returned to duty, or they may be sent to general and convalescent hospitals in the United States—huge, well-equipped and staffed institutions maintained in various parts of the country by the Army and Navy.

Often the trip to the home hospital is made by ambulance plane. There have been cases of men wounded on some distant battlefield several thousand miles away reaching this country faster than the report of their wounding; of a cheerful "Hi, Mom!" over long-distance telephone informing a mother of her son's safe return.

One soldier, with a severe abdominal wound, was brought by ambulance plane from Egypt in 72 hours, and is now recovering rapidly in an Army hospital. Others have been flown from the Far East, Europe, India, Africa. The fact that a man knows he can be home in a couple of days from almost any part of the world is a tremendous morale-builder.

These methods of treatment of wounded and evacuating them from battle areas—the whole medical system of the United States—must be extremely flexible. In this war there are no rigid and distinct battle lines. A front may be on a beach, in a jungle, on the edge of a desert, or the bank of a river. It can change in an hour. Our medical care organization must be ready to change. Any system which depends upon inflexible regulations for its effectiveness is useless. That is why our medical officers are trained to adapt themselves to all conditions. That is the reason for our mobile hospital units.

One of these mobile units, to which many a soldier owes his life, is the mobile X-ray machine. In the last war these machines, although technically portable, were huge, clumsy affairs; several men were required to haul them from one room to another. The present battle-field X-ray unit can literally go into action with the men. Composed of sections which are easily taken apart and put together, it can be assembled, including the dark room, in 30 minutes. Built so compactly that it can be fitted into three small trunks, it weighs only 399 pounds, and can be brought by auto or plane right up to the front line.

There is no longer any need to wait until a soldier can reach a base hospital before X-ray pictures can be taken of his injury. This can now be done an hour or so after the wound is incurred, and treatment begun immediately. The portable X-ray machine is a product of the Army Medical School. Besides taking X-ray pictures, it also has a fluoroscopic screen, through which the physician can examine hidden injuries. By means of this screen the physician can locate a foreign body, such as a bullet, within a minute after the wounded man is placed under the machine.

There is also a mobile bacteriological laboratory. In this laboratory tests can be made to determine immediately whether water is fit to drink, the nature of any disease which may attack the troops, the purity of food products. It is a miniature Health Department on wheels, and contributes greatly toward keeping our fighting men in perfect health, wherever they may be.

The traveling Optical Laboratory is one of the newest and most interesting of our mobile field units. Following the soldier to the field of action, it can supply practically all types of lenses for eyeglasses. Thus if a soldier who wears glasses loses them or they are shattered, he is not compelled to wait days, or weeks, to get to an optician for new ones. The optician is right at hand, and in a few hours the soldier is fitted with the proper glasses, ready to return to duty.

There is even a mobile dental unit. It has an easily moved dental chair, and all equipment necessary to care for the teeth of our fighters.

Much has been written about those "wonder discoveries" of modern medicine—the sulfa drugs and blood substitutes, notably plasma. They have, in truth, revolutionized our treatment of the wounded. Sulfa has not only saved thousands of lives, it also prevents infection and thus has

greatly reduced amputations. Plasma—the liquid part of the blood which, through processing, can be dried and carried in small packages—is instantly available for use on fields of action. Easily administered, it literally keeps death from the wounded.

And thus medical science marches on—month after month, doing research and experimenting that wounded men may be healed quicker — that those critically wounded shall not die.

## Texas Almanac Off Press

Great economic and social changes are revealed in data presented by the 1943-1944 edition of the Texas Almanac, which has just been published by The Dallas Morning News. Approximately 400,000 rural Texans have shifted to urban residence and vocation since the census of 1940. For the first time in the history of the state, the majority of population is now urban, according to information in the new volume. More remarkable, relatively, has been the industrial expansion due to the founding of munition, rubber, ship-building, aviation, and other war industries. Texas' manufacturing output has expanded as much during the last three years as in all preceding history.

Mineral production has also been greatly stimulated. Last official figure on value of all minerals produced was \$954,211,150 in 1941, placing Texas far ahead of any other state. On basis of partial reports, the Texas Almanac estimates total value of minerals produced in 1942 was more than one billion dollars. While petroleum, natural gas and natural gasoline counted for most of the production, Texas would rank high among the states without the oil group. During the last two years, there has been rapid increase in the number of minerals produced in Texas, and in 1942 there was commercial output of more than sixty different kinds.

Next to the greatly increased manufacturing and mining production, military activity has had the most notable effect on recent Texas developments. While reasons of military secrecy prevent

release of some information, the new Texas Almanac lists twenty-two major Army camps, in addition to which there are more than fifty Army aviation fields. At San Antonio and Corpus Christi, the Army and Navy have, respectively, their greatest air training centers.

While the chapters on military activities and industrial expansion are the principal items of current interest, the new Texas Almanac is essentially the all-round reference book that it has been, ranging through the whole field of Texas' historical, civic and economic data. The date of the battle of the Alamo, the cotton production of Jones County, the name of the State Comptroller, the number of deer killed in Texas in 1942 and thousands of other classes of information in as widely diversified fields can be found on its pages.

The Texas Almanac is a biennial publication, and the new volume is for the two years, 1943 and 1944. It is bound in paper at 60c on newsstands, 75c by mail; also in cloth at \$1 on newsstands and \$1.15 by mail.

## New Double Star Discovered

Discovery of a new double star, weighing possibly one hundred times as much as the sun has been announced by Dr. Daniel M. Popper, instructor in astronomy at the University of Chicago and a member of the staff of the University of Texas, McDonald Observatory.

If the star, designated as RY in the Constellation Scutum, has a mass 100 times that of the sun, it is of the order of some 200 billion billion tons.

Dr. Popper's photographic observations indicate that it is composed of two stars which are actually in contact and revolve around each other in a period of eleven days. The discovery was reported on the basis of 25 photographs of the faint star, made with the 82-inch reflecting telescope of the McDonald Observatory, Mt. Locke, Texas. The observatory is owned by the University, jointly operated by Texas and Chicago.

## THE STATE OF TEXAS

TO: V. Tallon and wife T. M. Tallon and all persons claiming any title or interest in land under deed heretofore given to V. Tallon of Donley County, as grantee, Defendants, Greetings:

You are hereby commanded to appear before the Honorable District Court of Donley County at the Court House thereof, in Clarendon, Texas, at or before 10 o'clock A. M. of the first Monday next after the expiration of forty-two days from the date of the issuance of this citation, same being the 19th day of July, A. D. 1943, then and there to answer Plaintiff's Petition filed in said Court, on the 3rd day of June, A. D. 1943, in this cause, numbered 2200 on the docket of said court and styled W. D. Shelton, Plaintiff, vs. V. Tallon, et ux, et al, Defendants.

A brief statement of the nature of this suit is as follows, to-wit: Suit to remove cloud on title and Trespass to try title on 19.18/100 acres of land out of Section No. 29, Block C-6, G. C. & S. F. Ry. Co. Survey, Donley County, Texas as is more fully shown by Plaintiff's Petition on file in this suit.

The officer executing this process shall promptly execute the same according to law, and make due return as the law directs.

Issued and given under my hand and the Seal of said Court, at office in Clarendon, Texas this 3rd day of June, A. D. 1943.

ATTEST:

*The rest-pause that refreshes*

*Welcome in peace...  
more welcome in war work*

WAR plant managers will tell you that anything that contributes to contented workers makes better workers. In plant after plant it has been found that a rest-pause breaks monotony, lessens tiredness and tension.

When you add refreshment to a rest-pause, you not only have a pause that rests, but refreshes, too. A moment for ice-cold Coca-Cola makes a rest-pause take on more meaning... promoting contentment that leads to more work and better work. Yes, contentment comes when you connect with a Coke.

Close work brings the need to pause. Ice-cold Coca-Cola brings tingling refreshment to make any pause the pause that refreshes.

Letters from plant managers from coast to coast emphasize that the little moment for an ice-cold Coca-Cola means a lot to workers in war plants. It's a refreshing moment on the sunny side of things... a way to turn to refreshment without turning from work.

**The best is always the better buy!**

*Woman-POWER!*

**"By pushing a button, She's good as a MAN!"**

**She:** And what do you mean, Reddy Kilowatt—"Good as a man"?

**Reddy:** No offense, lady! Just this: 5 feet 1 from your 4A slippers to your spun-gold hair. You love flower-hats, veils, smooth orchestras—and, maybe, being kissed by a boy now in North Africa. *But, man, oh man, how you can handle that big and heavy press!*

**She:** What's strange about that?

**Reddy:** How can 110 pounds of beauty boss 147,000 pounds of steel? Is it magic?

**She:** Oh, no, dummy! It's simple. Electricity does the heavy work. Push a button... or flick a switch... or pull a lever. I learned to do that at home... long before the war. Electricity makes it possible for women to do men's work—

**Reddy:** Then the secret of our great war production is electric power plus woman-power—

**She:** Certainly. Women are able to work beside men, or replace them, on America's roaring production lines because they learned to use electric service in the home. Call it *magic* if you like. But to me it's just good old common horse-sense!

\*\*\*

The West Texas Utilities is helping make America power-full... helping provide this country with the world's greatest supply of electric power... power that enables women to do a man's work just as it has eliminated household drudgery and hard labor from the average West Texas home.

And more and more women are helping us give you the same good, dependable service you got before the war... and at the same low cost and without rationing.

Sixty-seven per cent more women were on our payroll June 1 than in 1940. The continued efficiency and dependability of Electric Service is in no small measure a tribute to woman-power.

Mrs. Geo. Chamberlain and children of Dallas, returned to their home Monday, after a visit here with relatives.

### TO THE PRODUCERS OF DONLEY COUNTY:

Walter J. Flynt, Secretary  
Donley County ACA

All producers who have not met with us in communities or have not come to the county office for premeasurements are invited to the county office at any time to get this work done. We especially invite those who are in doubt as to the acreage in certain plots planted to cotton and war crops (grain sorghum, peanuts, and soy beans). The greatest advantage of premeasurements is that crops (especially cotton) can be changed after premeasurements, but cannot be changed after final measurements. Thus, if there is any doubt as to how much cotton you have we shall be glad to help you if you will come in.

This week we are sending out Forms ACP-140, which are requests for participation in the Vegetables for Fresh Market Program. Incentive payment can be earned on vegetables for fresh market if as much as 3.7 acres are planted provided vegetables (carrots, snap beans, lima beans, beets, tomatoes, cabbage, onions grown for fresh market, and english peas) may be planted only once to qualify for part of the acreage and all other vegetables except watermelons, cantaloupes and cucumbers, may qualify if they are double or triple cropped. Corn or turnips would not qualify singly, but if one was planted after the other on the same land, the acreage may qualify. Incentive payment may be earned at the rate of \$50.00 per acre on the acreage from 90% to 110% of vegetable goal, except for small growers who may earn one \$50.00 payment if from 3.7 to five acres are planted according to the provisions shown above.

If you would like to know more about this program please come in and let us explain more about it. No payment can be made unless a "Request for Participation" is signed before July 1, 1943.

Producers who have not signed and turned in to the county office forms that were mailed them showing cotton production for 1942 are requested to do so before June 15th.

Producers will be pleased to know that the quota on Farm Machinery has been lifted, and all producers may get any type of farm machinery necessary to his farming operations by applying to the Machinery Rationing Committee of the War Board. Certificates for purchase will be issued (if the Machinery Rationing Committee approves application) only if pro-

### New Method Speeds Up Mail Delivery

The new method of speeding up mail deliveries, through addition of a branch post office number to the address; on mail for delivery in large cities, is being placed in operation rapidly. Reports from many cities indicate that it has been received enthusiastically by the press, postmasters, business concerns and the public.

Within a few days after initiation of the plan, under instructions of Postmaster General Frank C. Walker, nearly all the postmasters in the large cities affected had assigned postal unit numbers to their branch offices, millions of residents had been advised of the number to be added to their addresses, and a considerable volume of mail already was carrying the numbers assigned. By June 10, it is expected that practically all whose addresses are affected will have been notified of their postal unit numbers.

The new system speeds up the separation of mail for distribution to branch offices and permits much more rapid handling of mail by inexperienced postal clerks, thousands of whom have been

ducers sign certification that a dealer has in stock, or will be able to obtain very soon, the type of machinery requested. Producers may buy any type of farm fencing without purchase certificate. He may buy wire just as he did before rationing started, if he can find it.

employed to replace personnel who have gone into the armed forces and into war industries.

Rapid increase in volume of mail and the loss of some thirty thousand postal employees to the armed forces made it necessary to accrete the plan, in the interest of accurate, efficient mail service and for the relief of postal personnel who are carrying an extremely heavy burden of work. The average work week in the service now is about 52 hours, and in many post offices, employees are working 10 and 12 hours a day, seven days a week, because of local shortages of personnel.

An example of the new type of address is:  
John C. Smith  
222 Mattapan Ave.  
Boston 8  
Massachusetts

The number after the name of the city indicates the branch post office (or "postal unit") through which delivery is made. Each resident of the large cities is asked by his postmaster to add the postal unit number to his return address, and to notify all to whom he writes that his address is not complete without the number.

Residents of small cities, towns and rural regions should inquire of their correspondents in the large cities concerning the number assigned to the city residents' branch post office so that the mail may be expedited. The degree to which mail will be speeded depends upon the extent to which the numbers are used by mailers.

### Price Ceiling Violation Warning Issued For Sales of Used Farm Machinery

With the harvest season near and many West Texas farmers "figuring on a little trading" for used farm machinery and used trucks, the OPA has come to the fore again with price ceiling violation warnings. Those in the market for the equipment should be careful not to pay more than the legal price ceiling, Howard Gholson, district OPA director, said today.

"All used farm equipment sold by dealers is covered by price ceiling while only certain types sold by farmers, other individuals or auctioneers are covered," Gholson said. In case of sales by the latter group the ceiling prices apply to five critical farm machines including tractors (except the crawler type), combines, corn pickers, corn binders and hay balers (motor or tractor operated). When one of these machines is sold less than a year from the time it was sold as a new machine, its ceiling price is 85 per cent of its base price; in every other case its ceiling price is 70 per cent of the base price, last published F.O.B. factory price. For example, if a base price of a tractor was \$1,000.00 it may not be sold for more than \$850.00 if it is less than a year old, or more than \$700.00 if over a year old.

As for used trucks, the OPA points out that price ceilings apply whether sold by dealers or by individuals.

These are only maximum prices, the OPA has emphasized, and much used equipment will be sold

for less. Non-controlled items such as a cow or bale of hay cannot be thrown in with the sale of the controlled item and violation of the price ceiling will be held against both owner and auctioneer of a sale. Persons wishing to obtain information on a used farm machine or on a truck should write to OPA district office in Lubbock.

#### VISIT PARENTS

Pvt. James K. Morton, wife and son of Frederick, Okla., Mr. and Mrs. Claude Morton and son of Amarillo, and Mr. and Mrs. W. M. Grounds and children of Amarillo were visitors in the J. K. Morton home Sunday. This is the first time in several months that all the family had been together.

#### HAS OPERATION

Mrs. Walter Clifford, who underwent an operation at St. Anthony's Hospital in Amarillo Wednesday, is reported as doing as well as could be expected.
