AMARILLO, Oct. 6.—Provisions for government loans on cotton has been changed to include all cotton tenderable as to grade and staple. Representative Marvin Jones announced this week.

Jones, the chairman of the house agriculture committee, said the loans for the lower grades of cotton will be slightly below the 9 cents a pound allowed for the higher grades.

The loans, he asserted would be as follows:

Seven cents on cotton shorter than seven-eighths inch staple,

County Agent H. M. Breedlove said yesterday, loans under the new classification would be handled by his office under the same set-up as formerly. The agent also said cotton buyers in the county had been supplied with government sale forms and would execute them for farmers selling cotton.

Cotton must be sold and sales certificate delivered to the agent's office in 15 days after date of sale for the producer to be eligible for government loans.

strict low middling or equivalent in grade.

Six cents on cotton shorter than seven-eighths inch, low middling or equivalent in grade.

Eight and one-half cents on seven-eighths staple, strict low middling or equivalent in grade.

The change was made primarily in the interest of West Texas and Panhandle cotton growers, Jones said. A large percentage of the cotton in those sections did not meet the requirements under the original provisions. Under the new rules, practically all cotton in Texas will be eligible for the loans, Jones said.

 PANHANDLE PRESS ASSOCIATION

**"THE REST OF THE RECORD"**

BY JAMES V. ALLRED  
 Governor of Texas

One of the ablest groups of newspapermen in America is reporting the present legislative session from the capitol pressrooms. Keen and intelligent, they do a good job of covering and reporting the daily happenings of the Legislature.

It is no criticism of their fine work to say that often the average newspaper reader loses sight of the real issues in the mass of conflicting statements and reports which must be carried by the press. An example occurred this week when a good farmer friend wrote me that the farmers of his section "strongly opposed any increase in taxes, especially on farm real estate and taxes that affect farmers as a whole."

Now I have never had any desire for the legislature to pass that kind of a tax program nor have I ever sponsored such a plan. The record shows that I cast my vote with the state comptroller to lower the state ad valorem tax to 7c which is the lowest in over twenty years.

As I told my farmer friend, I am urging a tax program to raise money from only a small, under-taxed and over-privileged group—interests able to pay the cost for financing old age assistance, aid to needy blind, dependent children, and teachers' retirement. An example of such a group is that of five major pipe line companies who in one year reported a total net profit of forty-one million dollars but paid altogether to the state the "tremendous" sum of \$5,647,99 in franchise taxes.

These are the kind of folks I want to see taxed—not to penalize them, but so that they will bear their portion of our state government cost.

The only group that I know who want to levy taxes that "affect ag-

riculture as a whole" are the "sales-taxers." A sales tax would fall squarely on the shoulders of the farmers and the working people.

Lobbyists for all the big pipe line companies and other special interests watching the Legislature favor a general sales tax. Spokesmen for this group are saying no new taxes are needed. Such statements are simply a smokescreen to defeat the people's program. Everyone of that group would vote tomorrow for a general sales tax if I would agree to it.

Their strategy is to stave off any taxes as long as possible until our state is in such a terrible shape that some future governor out of desperation may turn to a general sales tax. To carry out their plan, this group has organized a campaign of propaganda to frighten the farmers and little business men into thinking that my tax program is going to hurt them.

They raise the hollow charge that I want to levy more tax burdens on the people. The taxes I propose would fall on the shoulders of the over-privileged groups which are able to pay.

A certain senator and his associates in the "sit-down" strike against adequate revenues for the needy charge that I have increased the cost of state government. They point to increased appropriations during the past ten years as though I were responsible for all of them.

I wonder why they are not fair enough to let the people know that represented in their figures is the money that is collected for unemployment insurance and for relief bonds which the people voted. Practically everything I have had anything to do with was voted by the people. The increased appropriations for ordinary purposes of government were voted by the Legislature against my recommendations.

Texas cannot have progressive government by launching destructive economies and institution-wrecking politics in order to save a few privileged interests from just taxation.

The people do not want to economize by cutting out unemployment insurance or old age assistance. The votes in every senatorial district registered overwhelming approval for aid to the blind, dependent children and the needy.

I believe that the majority of the legislators have the political courage and the patriotic purpose to provide for the state's unfortunates and to balance the budget.

**P. T. A. NOTES**

The National Congress of Parents and Teachers is the national organization sponsoring the parent-teacher movement in the United States. It was organized in 1897 as the National Congress of Mothers. The purposes of the Congress are the same today as they were in 1897. The field of work has expanded through strength of membership to meet more fully the needs of children and young people throughout the Nation.

Any interested adult may become a member of the National Congress of Parents and Teachers and of the state branch, by becoming a member of a local parent-teacher association. Approximately 2,000,000 parents and teachers in the United States, Hawaii, and Alaska are now members. The membership card which each individual receives covers membership in all three—the local, the state, and the national organizations.

Each Congress parent-teacher association plans programs and activities to meet the needs of children in the community. Guidance for local units in determining these needs is provided by the National Congress in its publications. These publications are distributed free to local Congress units through the state branches before school opens. Books, pamphlets, and leaflets are published annually for the promotion of the program and projects selected for the year.

**TIMELY TOPICS**

(From Mt. Vernon Optic-Herald)  
 "In the social unrest that now plagues our land, we have on the one hand some monied powers that would enrich themselves at the expense of society—in utter disregard of human rights and humanity's welfare. Yet—on the other hand there are some agitators who have not been well schooled in the American way of appeal to law, who have sought by violence,

intimidation, and mob rule to gain for themselves certain desired ends. Let us set ourselves as resolutely against the one as the other—Neither capital nor labor has gained, or can gain, by unlawfulness, violence and disregard for the rights of the other. No group of men—be they laborers, capitalists, or churchmen—are above the strong arm of the law."

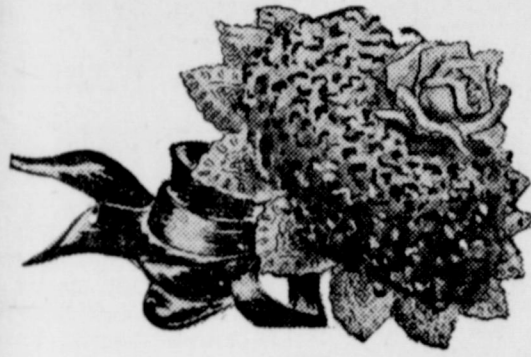

The above remarks are taken from a statesmanlike address delivered by Gerald C. Mann, Dallas attorney, before the Young Democrats of Texas in Houston last week. A former S.M.U. football star, Assistant Attorney General, Secretary of State Planning Board

and Secretary of State, Mann is a formidable candidate for Attorney General in the next election.

**TEMPLE OF TRUTH**  
 By the Apostle  
 \*\*\*\*\*

After bombing about everything else in sight, the Japs are said to be aiming at chow chow next.

A none to polite tourist last August complimented our city by saying that the highway through town was like riding on ocean waves. He was driving slowly, of course. Another bozo attempted a 20 mile rate of speed, skinned a cat and dumped himself into a yard. (In case you don't savvy 'skinning a cat', ask some boy past 50.)

Of course his name is Black from having been born in the black belt. But some day the nation may awake to the fact that Hugo has

ingrowing toenails—after the whole works has gone to pot.

Of course it is none of our business whether Hugo L. Black belonged to anything or not, but there was more interest aroused in the matter by far than was aroused when the packing house trust beat the producers and consumers of hog meat out of over two million dollars through the process tax experiment. It all goes to show that prejudice is mightier than hunger or want in any shade or variety. I often wonder what national men near the head of our government think about us anyhow. They must know what little judgment we have, and how hard it is to help the people, and how little the people appreciate any help at all.

Do members of the supreme court read? If they do, they knew all about the processing tax, and

naturally formed opinions in advance of the final decision rendered. I bet they sat around and talked about the matter like a bunch of old ladies at a quilting party. Then why didn't at least a part of them have enough patriotism to say something about the matter when thousands of people were being robbed of thousands of dollars daily? Ain't the supreme court got any patriotism? Perhaps it is a custom for matters to be brought before them before they pass on it, but to a common clodhopper, it looks like patriotism and the people's interests should come before custom.

Once upon a time a fellow went out in quest of a meal ticket. He, by some hook or crook, landed an old lady who owned quite a batch of property. The old boy wore a glad smile and spun the family flivver to a merry tune about the streets. After several nights, including a few early mornings, her mistrust aroused his distrust. Her suspect changed his aspect until his wine of life turned to vinegar, and the enchanted air became a stench. In this changing world of millions, many men are born to be lonely or let out. He became both.

With all this careful checking when the aged ask for pensions, it would seem that the same method would be applied when the government buys supplies. It has been hinted, right here in Texas, that Uncle Sam has been gyped on some of these modern WPA material purchase deals.

Why stay at home and sponge when you can go to Florida and sponge off the bottom of the Gulf and get paid \$90 a week? The Greeks control the sponge industry as well as the fishing industry of the Gulf of Mexico.

And the Japs control the fig canning and preserving business of Texas.

And the only reason the Japs do not control the citrus fruit business in the Rio Grande valley this very day, is due to the fact that the first batch to land there from California were run out with shotguns. Furthermore, that ain't been more than 20 years ago, either.

The Spicks (or spiks) handle all the lettuce and celery in Colorado. Or that portion on which a profit is made. Italy has more citizens in Colorado than she has in all the islands of the Mediterranean.

If we should run short on any of these foreign managers, there is no doubt but what we could get plenty more to come over. On the other hand, Americans could not get started in Japan, Greece or Italy. They would be boycotted from the first jump off the gang plank.

**87 SPEED RECORDS BROKEN TO MAKE TIRES SAFER FOR YOU**

Never Before Have Tires Been Put to Such Gruelling Torture

Ab Jenkins, World's Safest Driver, Establishes 87 New Records for Safety, Speed, Mileage and Endurance. He Drove 3,774 Miles in 24 Hours on the Sharp Granite-like Surface of the Bonneville Salt Beds at Average Speed of 157.27 Miles an Hour

At SPEEDS as high as 180 miles an hour — with the hot, coarse, abrasive salt grinding, tearing, scorching his tires — Ab Jenkins' special racer, weighing nearly three tons, pounded over the Bonneville Salt Beds at such terrific speed that it caused the surface to break up. Before the end of the run the track was so pitted and rough that it was almost impossible to hold the car on its course. Yet Jenkins set 87 new World, International and American speed records on Firestone Tires.

Building tires capable of establishing such records is made possible only because of patented Firestone manufacturing processes. These exclusive features enable Firestone to provide car owners with tires that are extra safe.

For the greatest protection of yourself and your family equip your car with Firestone TRIPLE-SAFE Tires. By TRIPLE-SAFE we mean—

**1 PROTECTION AGAINST SKIDDING**—The scientific tread design gives longer non-skid mileage and stops your car up to 25% quicker.

**2 PROTECTION AGAINST BLOWOUTS**—Firestone Tires run up to 28 degrees cooler because every fiber of every cord in every ply is saturated with liquid rubber by the Firestone patented Gum-Dipping process. This counteracts the internal friction and heat that ordinarily cause blowouts.

**3 PROTECTION AGAINST PUNCTURES**—Two extra layers of Gum-Dipped cords under the tread add strength to the tire and give extra protection against punctures.

Now is the time to make your car tire-safe for fall and winter driving. Join the Firestone SAVE A LIFE Campaign today by equipping your car with a set of new FIRESTONE TRIPLE-SAFE Tires — the safest tires that money can buy!

**YOU CANNOT AFFORD TO DRIVE WITHOUT FIRESTONE TRIPLE-SAFE TIRES**

Last year highway accidents cost the lives of more than 38,000 men, women and children and a million more were injured!

More than 40,000 of these deaths and injuries were caused directly by punctures, blowouts and skidding due to smooth, worn, unsafe tires!

Left is a section cut from a new Firestone Tire. Note the thick, non-skid protection against skidding, blowouts and punctures. Come in and see a demonstration.

### Memphis Noses Out Lefors Pirates, 6 to 0 Friday

MEMPHIS, Oct. 8.—The Memphis Cyclones, already stirring up dust for a 3-B conference title, took a second district victory here Friday night before a banner crowd by dropping the Lefors eleven, 6-0.

The Cyclone lost no time in scoring, marching down the field in straight first-downs after the kickoff to put Pounds over for a touchdown. D. Sanders' try for extra point failed.

Memphis held a slight edge throughout the game, but in the last period Lefors' aerial attack brought the ball to the Cyclone 15-yard line, where the advance bogged down.

Carrouth, all-district quarterback last year, suffered a broken collar-bone when tackled fiercely in the first quarter and was retired for the remainder of the season.

## PIGSKINS PARAGRAPHS

By DICK COOKE

Forecast—Shamrock 33, Clarendon, 0.

The Irish-Broncho tilt tomorrow night will be of more interest to Clarendon fans who want to take a pick on the District winner than an actual football game. Irish mentor, Rush, claims weak ends, a most important department for a defense against the fast Wellington crew. The local addicts may get a chance to see what Shamrock has.

Clarendon will go into the contest minus Big Boyd Allison, Johnnie Grady, Billie Cooke and probably Homer Tucker and probably Dempsey Robinson.

Allison, leg injury from a block in the first period of the Wheeler bout, is recuperating nicely and may see service before the year is over.

District dopsters still pick Memphis as an underdog. The Cyclones have just managed to win from Lefors and Mobeetie, but they are still in the money. It does, however, look like the big three again, Shamrock, Wellington, McLean.

Considered more or less a one man ball club, the Lefors Pirates lost the main cog when Carrouth was taken off the field at Memphis last week with a broken collar bone. The vicious back ripped off nice gains before going down for the count.

The football future of Clarendon High School is very dark. Football as any highly specialized sport, can not be learned in a few practice sessions. The Bronchos are doomed perpetually to the cellar until some action is taken for fundamentals to be taught in the Junior High School. Practically every school in the circuit has equipped their juniors, and the

grid kindergartens are the making of future teams.

Sandlot scrimmage for youngsters, without proper coaching and equipment is not only dangerous but is detrimental to good football. Instinctively the lads think only of tackling the ball carrier. When they come out for varsity clubs, they must be trained, for months, to break the bad habits and to play their positions.

Example: In the Wheeler game a guard pulled out to help make a tackle around end. On the next down, he again pulled out but a spinner went through the hole he left for yards and yards.

Clarendon may have enough material for a club next year, but it's doubtful if there is enough junior prospects to augment the holdovers for a spectacular club.

### Wellington Crushes Lakeview Eleven, 44 to 0

WELLINGTON, Oct. 8.—Smooth forward-passing combination with effective running plays gave the Wellington Skyrockets a smashing 44-0 victory here Friday night over the crippled Lakeview Eagles in a 3-B conference struggle.

Sharp shooting by Estes and Moore with Bailey, Austin and Estes on the receiving end manufactured three touchdowns during Friday night's melee. Wellington rolled up 19 points in the first period, held a 25-0 lead at the half, and pushed the total to 38 in the third quarter. Austin contributed the longest run of the game when he dashed 60 yards to score after taking a punt.

The Lakeview team, caught in a traffic wreck last week, was minus some of its strongest members.

### McLean Tigers Swamp The Mobeetie Hornets, 39 to 6

McLEAN, Oct. 8.—Reeling off gains almost at will, the McLean Tigers Friday night swamped the Mobeetie Hornets 39 to 6 in a conference game played here. Braxton and Bogan each scored two touchdowns with Watson and Humphries also crossing pay line.

Long runs featured the game. McLean's shortest drive being for seven yards with the longest 75 yards.

Braxton opened the scoring in the first quarter when he went 10 yards around end. Braxton repeated with a 12-yard sprint later in the quarter. Humphries then took a hand with a 7-yard smash for a counter. Bogan started the distance race, reeling off 65 yards in which he sidestepped two tacklers and out-distanced a third. Watson went his running mate one better with a 75-yard dash. Nixon, Mobeetie halfback, caught Watson but was shaken loose. Bogan ended the scoring with a 29-yard run.

A 10-yard pass. Robinson to Nixon, gave Mobeetie a touchdown late in the game.

Mrs. J. L. White and grandson and wife, Mr. and Mrs. Tom Rhyner and children, Tommy J. and Bettie Ray of St. Louis are visiting Mr. and Mrs. Harry Blair.

**Oil burning SUPERFEX**

This modern heater makes slow, poky, dusty, hand-fired heating stoves as old-fashioned as the horse-drawn buggy...

DO YOU WANT HEAT UP HERE, OR-  
 DOWN HERE, OR OVER THERE

WHEN you replace your old heating stove with a Superfex Oil Burning Heat Director, you quit lugging coal and ashes, and the only fire tending you do is to turn a dial for more or less heat, as the weather demands. No more extremes of heat and cold. You need never come back after a day's absence to a cold house with the fire out or dying.

You set Superfex for just the heat you want during the night, and get up in a house that is comfortably warm. If you want more heat, a turn of a dial will produce it quickly.

With the Heat-Director you can adjust the patented shutters and direct the heat where it is most needed. No more cold floors! With the shutters fully open, the Heat-Director supplies radiating heat, and with the shutters all closed it supplies circulating heat. Superfex gives ALL THREE—radiating, circulating, and DIRECTED heat.

Superfex burns low-cost fuel oil in a firebowl that does not require machinery, wick or lighting ring. The fuel reservoir is easily reversed and lifted out for filling outside, without interrupting the heat, or connections are available for an outside supply tank, making filling unnecessary.

Be sure to see these marvelous heaters, made by Perfection Stove Company, world's leading manufacturer of oil stoves. There are several sizes for homes, schools, churches, offices and shops. Easy terms, if desired.

## MIDWAY

Mrs. John Goldston  
We Donley County people who have gone through the drouth and sandstorms of the past few years; through the depression, hailstorms, etc., and now the cotton at low price, so many farmers losing work stock with sleeping fever, sometimes think we are having a hard time and perhaps some feel like just giving up. We really do not know how fortunate we are compared with other places and people in the world. We have a lot to be thankful for if we would only take time to realize it. The past week, a family came to Midway from Arkansas. A man and wife and 3 children under 12 years of age, and a baby under 3 months. They had walked all the way, had only a frying pan with them. They said they were not asking for a thing on earth but a chance to work. They wanted cotton picking, said they had never been on relief work; had lost everything they had by fire. When we see things like this, it makes us realize how prosperous we of Donley County really are.

## AT THE FIRST BAPTIST CHURCH

J. Perry King, Pastor  
There is Always Worship Fellowship :: Service  
There is no work as interesting, challenging and inspiring as God's work. Christ was so completely dominated by the alluring task of God's work that he said, I must work the works of him that sent me. When that spirit obtains in a church life there is no defeat for that church. When that spirit enters the life of a christian he begins to be useful to himself and all those around him. The swing of victory always characterizes the step of a christian who feels that he is engaged in the work of God.  
"Who does God's work will get God's pay—  
However long may seem the day,  
However weary be the way,  
Though powers and princes thunder—nay!  
No human hand God's hand can stay."  
This has been an unusually interesting and history making week in the life of the Baptist church. If you have been out of touch with the life of your church this week your loss is unspeakable.  
Regular preaching services Sunday morning and evening. Sunday School at 9:45, and Training Union at 6:15. The evening preaching service will begin at seven o'clock.

## Four Youths' Trip Ends In Vag Term

### Group Jailed Monday After Gas Theft is Reported

A sight seeing tour ended in the county jail here early Monday morning when four youths from Kansas City were arrested on vagrancy charges following a complaint charging they had pilfered gas from an automobile.

The four, giving their names as Herbert Haynie, Clarence White, George Lashbrook and Albert Parks, said they had been to Oklahoma City for the fair and had decided to continue their journey into Texas.

Trading their spare for gasoline the youths managed to get to Clarendon where they were destitute. They were said to have taken gasoline from the car of K. S. Cox, mail carrier.

Shortly afterwards they were apprehended by the sheriff who held them for investigation. They had no papers on the car they were driving and were without money, Sheriff Pierce said.

One of the boys wired his father who was here last night to return them to Kansas City. He explained they were driving his car.
