

Gravel Surface to Replace Damaged Pavement on Main

A plain gravel surface for a part of Main street is the city's latest solution to the old problem of what to do about the badly damaged pavement.

Meeting in regular session Monday the councilmen agreed that continued patching on many parts of the pavement is a waste of time and money, especially in view of the fact that recent repair jobs have seldom survived the next rain. A properly maintained gravel surface will be much smoother and just as durable, they decided.

The arrangement is a temporary one intended to serve until next summer when the city expects to get a new pavement in connection with the North Muenster farm to market road. In a telephone conversation with Highway Engineer J. M. Isbell Tuesday Mayor J. M. Weinzapfel was informed that a contract on the job is due to be let in October and the actual paving will be done when warm weather returns next year.

Commissioner Earl Robison has agreed to loan county road maintenance equipment to help with the job. His scarifier will tear up the surface and his maintainer will grade it. More durable sections of the present pavement will be left for repairing in the usual manner. The exact sections to be torn up have not been decided at this writing.

2 More Muenster Horses Win at Gainesville Show

The 1948 Horse Show sponsored by the Cooke County Hobby Horse club in Gainesville was concluded Wednesday evening of last week with another large crowd present and two Muenster horses as award winners.

Sport, a Quarter Horse, owned and shown by Dr. T. S. Myrick, was first place winner, and Chubby, owned and shown by Gary Hess, was third in the same class.

Winners on Tuesday night included Don Oro, owned and shown by Dr. T. S. Myrick, first in the Palomino class, and Principe Del Oro, owned by C. M. Walterscheid and sons and shown by Donald Walterscheid, third in the same class. Sis, owned and shown by Dr. Myrick, was third in the Quarter Mare class, and Pinto, owned and shown by Al Waiter, was second in the Five Gaited class.

B. Maniss Announces Candidacy In Race For Representative

B. Maniss of Gainesville this week authorized the Enterprise to announce his candidacy for the office of state representative for Cooke County, subject to the Democratic Primary, July 24.

His formal statement to voters is as follows:

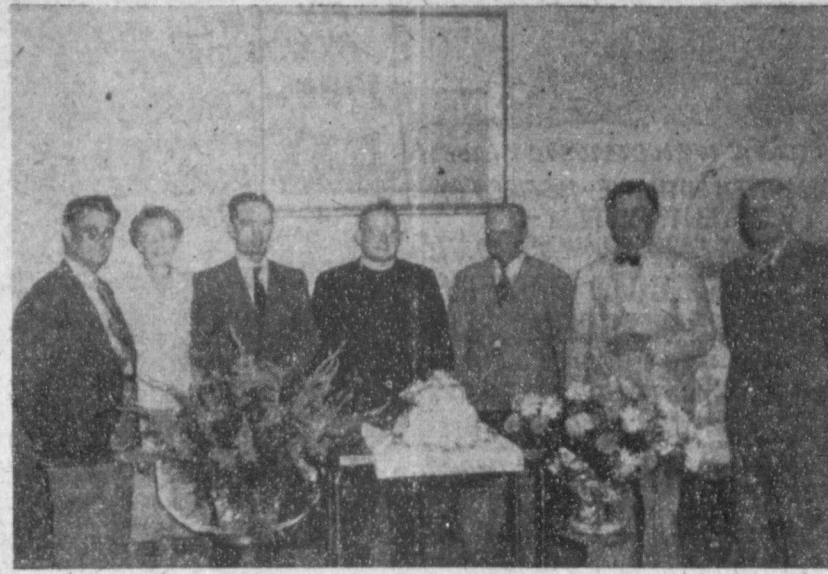

Having been solicited by many citizens of Cooke County, I have filed for a place on the Democratic Ticket for the office of State Representative for Cooke County, District 46.

In doing so, I wish to assure the voters of Cooke County, that I will be your representative if elected. My prime motive in seeking this office is in order to help the school teachers, farmers and the working people of our state who have long been neglected.

I favor conservation of our National resources, and will put forth every effort to prevent these products, such as natural gas, crude oil and sulphur from being sent out of our state without adequate tax. I am a staunch believer in States' Rights and shall put forth my best efforts to preserve them.

Inasmuch as I am a retired railroad conductor, I can devote as much of my time as is necessary to the duties of this office and which I shall do if elected. I have lived in Cooke County for 36 years and I intend to remain here the remainder of my life. Therefore, I would like to be able to contribute something for the welfare of my friends and neighbors before my life's work is ended.

Your vote and influence will be greatly appreciated.

SILVER ANNIVERSARY BIRTHDAY CAKE

The presentation of a birthday cake by the First State Bank of Gainesville was one of the many welcome departures from the "business as usual" observance of its silver jubilee by the Muenster State Bank Saturday, July 3.

Pictured above with the cake and some of the many congratulatory flowers are (left to right) Herbert Meurer, cashier; Mrs. J. M. Weinzapfel; J. M. Weinzapfel, president; Rev. Herman Laux, pastor of Sacred Heart Church; Cecil Murphy, Gainesville attorney; and Frank Morris and Claude Jones, president and vice-president, respectively, of the First State Bank, Gainesville.

Other tributes received at the bank consisted of flowers from county business concerns and correspondent banks besides congratulatory telegrams, letters and personal visits by the dozens.

Unthreshed Grain Suffers From Rains; Other Crops Thrive

Continued rain during the weekend and the early part of this week practically wiped out the unthreshed grain crops of this area. Almost every kernel remaining in shocks is now sprouted.

Other crops, however, are thriving under the bountiful rainfall. Corn, feedstuffs and pastures are all bright and growing profusely, and, on a community wide scale, are more than making up for damage caused to the grain crop.

In one of the most persistent June-July rainy seasons remembered here, the community has had a total of almost 9 inches of moisture during a two-week period. According to the city's rain gauge 4.89 inches fell in the last week of June. Readings, taken at 8 a.m. each morning since then have been as follows: July 3, .99; July 4, .90; July 5, .01; July 6, 1.69. On July 7 the reading at 1 p.m. was .26.

County School Transfers Must Be Made During July

July is the month in which school transfers must be made, County Superintendent Hubert H. Moss reminded parents of the county last Thursday.

The regulation applies to all children who have moved from one school district to another, as well as those who will attend in schools outside of their home districts.

Transfers can be made at the office of the county superintendent any time in July.

LOS ANGELES, CAL.—(Sound-photo) — With lowered head, Tomoya "Meatball" Kawakita enters federal courtroom here, where selection of a jury to try him on treason charges takes place. The California-born Japanese is accused of "giving aid and comfort" to Japan during the war, and of many acts of brutality against American prisoners in a camp at a Jap nickle mine where he was interpreter and foreman. The handcuffed prisoner claimed that he was a Japanese citizen, not American, and therefore cannot be charged with treason. It is believed to be the first treason trial in western history.

ANOTHER PENTHOUSE AT FMA PLANT; THIS ONE FOR WHEY DRYER

Another pent house is about to rise over the roof of the FMA cheese factory. This time, however, it isn't another room but merely a matter of lifting a part of the present roof some 13 feet higher to accommodate the new stainless steel vacuum pan for drying whey.

Kraft Company engineers were here last week to assist Rudy Hellman, manager, draw up the construction plans and they will return later to help install the new equipment which will replace the present copper vacuum pan.

The principal reason for making the change is that processing in copper imparts a slight taint to the condensed whey. Stainless steel overcomes this difficulty. The new unit will also be larger, capable of condensing 6000 lbs. of whey per hour.

42 Foot Extension To Be Built on East Side of Parish Hall

Preparatory to the new church building program the church committee of Muenster's Sacred Heart parish has decided to build a 42 foot extension at the east end of the present parish hall.

The additional space, which is desirable for other parish activities, is a virtual necessity during the new church construction period when the hall will serve as a temporary church.

Work on the program is due to begin within the next week or two, according to an announcement by Father Herman Laux. After that job is done, he added, the plan is to begin immediately on tearing down the church and clearing the site for the new church.

The hall expansion will almost double the useable floor space in the building. Moving the stage to the extreme east end and allowing a small amount of additional space for dressing rooms, the plan, in effect, adds practically all of the extension to the main floor space.

In the basement the addition makes room for urgently needed storage, refrigeration and kitchen space for the school lunch program. As presently operated the lunch room management has been unable to qualify for perishables distributed by the government because it had no adequate place to keep them.

MRS. MAUDE RANDALL OF ST. JO IS HOLIDAY TRAFFIC CASUALTY

Mrs. Maude Harris Randall, 74, a pioneer resident of Saint Jo, was killed instantly at about 8 o'clock Sunday night when she was struck by an automobile while crossing highway 82 within the city limits as she was enroute to church.

Her husband, J. D. Randall, Saint Jo merchant, who accompanied her was not injured as he made an unsuccessful attempt to jerk her out of the car's path. The automobile was driven by John Henry Knox of Nocona, who with his wife and their son, was returning from Dallas.

Funeral services for Mrs. Randall were held Tuesday afternoon from the Saint Jo Church of Christ at 3 o'clock and burial was in Mountain Park Cemetery.

The Randalls were married in Saint Jo in 1890. Mrs. Randall was born in Sulphur Springs, Texas.

Survivors include the husband, one son, Hugh Randall of Fort Worth, and three daughters, Mmes. P. E. Redman and Faye Gordon of Saint Jo and Mrs. Dora Holder who lives in Arizona.

65 TEXAS COUNTIES REPORTED 580 POLIO CASES IN 6 MONTHS

AUSTIN.—Reported cases of polio in 65 Texas counties reached the alarming total of 580 during the first six months of the year, according to Dr. George W. Cox, State Health Officer. For the same period in 1946, the total number of cases reported in sixty-six counties of the state was only 292.

"This staggering increase in polio in a brief two year period evidences a need for drastic measures in all communities to combat the disease," Dr. Cox asserted. "It is the responsibility of the people of the State to report themselves to their doctors whenever they recognize symptoms of polio.

Military Rites Will Attend Reburial of Sgt. Randolph Gruber

Re-burial rites with full military honors will be held Saturday morning at 8 o'clock at St. Peter's church in Lindsay for Sgt. Randolph Gruber, Lindsay's first casualty of World War II.

Sgt. Gruber's remains will arrive at Gainesville Friday morning and the rosary will be recited at the George J. Carroll and Son funeral chapel at 8 p.m.

Rev. Conrad Herda, Lindsay pastor, will officiate at the requiem high mass and at the burial in Lindsay cemetery. The Lindsay Veterans of Foreign Wars will be in charge of the military rites.

Sgt. Gruber was born December 9, 1915, in Albany, Ga., a son of Mr. and Mrs. F. J. Gruber, and moved to Lindsay with them in 1921. He attended school there and enlisted in the Army in October, 1937, receiving his infantry training at Fort Sam Houston. In 1940 he re-enlisted to serve in Hawaii two years. He was on the island when Pearl Harbor was attacked and remained there until December 1942, when he was transferred to the Solomon Islands to serve on Guadalcanal. He was killed in action on August 6, 1943.

Word of his death was received by his parents in a wire from the War Department on August 28, 1943.

Survivors in addition to the parents are a sister, Miss Margaret Gruber of Fort Worth, and three brothers, William and Robert of Lindsay and James Gruber of Fort Worth.

3 Year Old Child Is Latest Victim of Tank Near Saint Jo

The drowning of a 3-year-old boy last Thursday was the second in as many months in what is commonly known as "Dead Man's Hole", three miles east of Saint Jo on Highway 82.

The child, Roy Signo, son of Mr. and Mrs. George Signo of Newark, N.J., was pronounced dead upon arrival at Gainesville sanitarium where he was taken by a Leazer-Keel ambulance.

As told by witnesses, the Signo family, in company with another car of people from the East, had stopped near the pond to rest and have their evening meal. The little boy and another child were riding their tricycles and Roy's turned over, throwing him into the water. His body was recovered in about 25 minutes and artificial respiration was carried out for about 45 minutes, according to Lester Robinson, highway patrolman, and City Marshal Andrew Harrison.

Less than two months ago a youth from Nocona lost his life in the same pond.

GAINESVILLE C OF C WILL SPONSOR PARTY FOR OIL MEN JULY 29

All oil field workers of the county will be guests of the Gainesville Chamber of Commerce on Thursday night, July 29, according to a statement by Bob Murdock, secretary of the organization.

At the time of his announcement plans were still tentative, but he stated that a variety-show will probably be the program headliner.

At this time a committee is preparing invitations to all the oil field personnel of the county. Bill Bratcher of the Jones and Laughlin Supply is this area's representative on the committee.

Schedule of Coming Events

The following is a list of scheduled meetings in the community for the coming week as reported by the organizations concerned. In offering this service the Enterprise invites all clubs, societies and civic groups to use the schedule as a convenience to their members. Please submit reports by Wednesday noon.

FRIDAY, JULY 9, Catholic Daughters of America, K of C hall, 8 p.m.

Recommended reading for every child and adult in the country is the booklet "100 Things You Should Know About Communism in the USA", which has just been released by the House Committee on Un-American Activities.

In a simple, concise question and answer form it exposes communism as a ruthless system, dominated in Moscow, by which a small group seeks to rule the world, and which, where it is established, crushes every trace of human dignity and freedom.

It's a blunt expose of the persistence, treachery and trickery used by the reds to cause strife and chaos and bring on the downfall of organized government. It warns us not to be complacent about Communism's limited numbers because the reds boast of having ten times their own number who can be tricked into doing the dirty work when the zero hour arrives. As an indication that the time is already critical, it reveals that communists took Russia when they were outnumbered 2,277 to 1, and the present ratio in this country is 1,814 to 1. It also points out that every nation which listened to the bright promises of communism has received nothing but slavery, brutality and want for its gullibility.

Emphasizing its own analysis, the booklet concludes with a sworn statement by William Z. Foster, head of the communist party in the United States: "No communist, no matter how many votes he should secure in a national election, could, even if he would, become president of the present government. When a communist heads the government of the United States — and that day will come just as surely as the sun rises — the government will not be a capitalist government but a soviet government, and behind this government will stand the Red army to enforce the dictatorship of the proletariat."

The booklet really contains nothing new. It's real merit rests on the fact that it presents such a wealth of information in a clear concise manner.

It's a must on every good American's reading list, and it's free for the asking. Just write the Committee on Un-American Activities, U. S. House of Representatives, Washington, D. C.

Incidentally the committee is now preparing four other booklets which further expose the sinister workings of the Communists in this country. They are "100 Things You Should Know About Communism in Religion; ... in Education; ... in Labor; ... in Government."

All of us ought to read all of them and become a little more familiar with the number one menace now gnawing at the foundation of our government.

Something I just found out: The auto count in Texas has increased 30.2% since 1944. In actual figures it's 1,553,574 in '44 to 2,023,501 in '47. Experts say this is due partly to recovery from war time shortage but more to the big shifts in population which accompany industrial developments in the state. Obviously Texas is progressing.

Bright prospects for the future of this community's dairy interests are indicated in a report on the manufacture of dairy products just released by the University of Texas Bureau of Business Research.

It reveals that dairy production in the Lone Star State is definitely on the skids, being 37 per cent below last year's figure in the month of May. Broken down according to the various products the decreases are as follows: cheese 45 per cent, creamery butter 43 per cent, ice cream 18 per cent, and others 40 per cent.

As soon as yours truly discovered these figures he went to the cheese plant and asked Rudy Hellman "What about it?" To which he replied "That's only a small part of the story. The same thing is happening all over the nation, and the big dairy people have been worried about it for more than a year."

All of which is a somewhat sour report to the consuming public ... but favorable to the man who has been wondering about the future of his dairy interests. Between the lines that report amounts to an assurance that dairy herds will be good steady money makers for a long time to come.

According to the dairy industry, Hellman said, the decline in milk production is due principally to easier incomes in other (Continued on Page 10)

morning at M & S hospital in Gainesville.

Mr. and Mrs. John Hellman and three children of El Paso arrived Saturday evening and spent until Wednesday night here with her brother, Ervin Hamric and family, and relatives of the Hellman families.

Alois Trubenbach has a new maroon Dodge sedan, Andy O'Connor a new black Dodge club coupe, and J. W. Fisher a new blue Dodge sedan. The cars were delivered by F. E. Schmitz of Gainesville.

Mr. and Mrs. Frank Walterscheid of Hereford are the parents of a daughter, Doris Jean, born in Hereford hospital on June 25. Mrs. Al Walterscheid, who spent a week with her sister and family, returned home Monday.

Little Miss Peggy Espland of Sioux Falls, S. D., is here to spend the summer with her grandmother, Mrs. Emma Morrison and family. Her parents, Mr. and Mrs. Donald Espland, were here for a weekend visit. Mrs. Espland is remembered as the former Miss Odessa Morrison.

Mr. and Mrs. C. J. Kaiser spent four days of last week on a vacation trip to Galveston. Tuesday C. J. was joined by Leroy Eton of Gainesville on a business trip to Memphis, Tenn., and Mrs. Kaiser accompanied them. Melvin and Joan Kaiser are spending the week with their grandparents, Mr. and Mrs. Frank Kaiser.

William Schroeder Jr. and Mrs. Joe Schroeder of Windthorst came here Saturday to visit the former's sister, Mrs. Robert Knabe and family, and the latter's parents, Mr. and Mrs. John Knabe. Mr. Schroeder went from here to Gainesville to spend Sunday with his sister, Mrs. Adam Wolf, and stopped here again for his sister-in-law to accompany him home.

Mrs. Lena Bernauer and daughter, Mary Faith, and Mr. and Mrs. L. A. Bernauer have as guests this week Mrs. Ben Evers and sons, Robert Louis and Alvin, of Saint Joseph, Tenn. Mrs. Lena Bernauer and daughter accompanied the visitors to Waco Tuesday to spend the day with Mrs. Josephine Wernet and on Wednesday visited Mrs. Frances Haverkamp in Fort Worth. The Evers and Bernauers are cousins.

WALTERSCHEID FAMILY HAS REUNION SUPPER SUNDAY

All members of Mrs. Wm. Walterscheid's family gathered for a covered dish supper and informal reunion Sunday at the home of Mr. and Mrs. Henry N. Fuhrmann.

Those present were Mrs. Wm Walterscheid, Martin Walterscheid and Messrs. and Mmes. Lawrence Wimmer, Melrad Hesse, Oscar Walter, Henry N. Fuhrmann, C. M. Walterscheid and Al Walterscheid and their families, Mr. and Mrs. Andy Wimmer, and Mr. and Mrs. Joe Walter and family of Gainesville.

WASHINGTON, D. C.—(Sound-photo)—Charles R. Denny, above, vice president of the National Broadcasting company, told the Senate expenditures committee investigation assertedly "slanderous" broadcasts to Latin America that only "a check of the files" was made on two men responsible for the much-criticized "Voice of America" programs. Sen. Ferguson, (R) of Mich., immediately demanded that the FBI investigate fully all writers employed on "Voice" programs broadcast by private companies under state department contracts.

MORRISON FAMILIES HAVE WEEKEND REUNION

A reunion of members of the family of Mrs. Emma Morrison was held during the weekend when out of town children and their families were here for a visit.

Enjoying the reunion were Mr. and Mrs. Melvin Morrison and son, Jimmie, and Mr. and Mrs. Walter Morrison of Borger; Millard Morrison of Annona, Texas; Mr. and Mrs. Donald Espland and daughter, Peggy of Sioux Falls, S. D.; Mr. and Mrs. Johnie Reppon of Vernon; Mrs. Louada Dawson and Mrs. Evelyn Moore and children of Gainesville; Alton Dawson of Ft. Worth; Mrs. Morrison, Marvin Morrison and Mr. and Mrs. E. G. Smith and family.

Smyrel Owens left Wednesday for a visit with the Gus Travis family at Hamlin. Mrs. Travis is a patient in a Rotan hospital where she underwent major surgery Tuesday. Also visiting Mrs. Travis is Mrs. Jess Ritchey who has been there since the weekend. The Gus Travis family lived north of Muenster for many years before moving to Hamlin.

The F. J. Hess home is being improved with the addition of white asbestos siding.

From where I sit... by Joe Marsh

Will's Hospitality Isn't "Cracked"!

Ever since January, Will Dudley planned to give his living room that "new look"—planned to carefully refinish the woodwork and replaster the walls.

Every time Will got out the putty to start filling in the cracks, a neighbor stopped by to pass the time of day — and first thing you knew, there was a group of us helping Will do the job up right. After Will called a halt to the evening's work, we'd sit around the fire enjoying a friendly argument and a sparkling glass of mellow beer.

So Will's living room doesn't look like it did a year ago—but it's by far the most "livable" living room I know: A place you can always drop in for good talk, good beer, and a warm welcome.

From where I sit, so long as Will puts that atmosphere of hospitality and good fellowship ahead of everything else, we'll all be happy to help Will change the looks of his living room any time he wants.

Joe Marsh

The American Way COST OF LIVING WAGE FORMULA UNSOUND

Tying wage rates to a cost of living index, in my judgment, is about as economically unsound as it is possible for anything to be.

Wages, the cost of labor that is, is the most important item in the price the consumer pays for almost any product. In most cases the cost of labor, from the time the raw material comes out of the ground all the way through until the finished product reaches the consumer, amounts to more than all of the other items of cost put together.

Since labor is such an important item in the cost of production, it must necessarily follow that as wages are increased, prices must also be increased. As prices are increased the cost of living goes up, which in turn calls for another increase in wages. So tying wages to the cost of living sets up a never ending, self feeding, inflationary spiral. How long a thing of this sort can go on before it crashes of its own top-heavyweight is anybody's guess, but crash it will, and when it does all of us, not just the employees covered by this type of agreement, will be adversely affected.

There is only one way to defeat this vicious wage-price cycle. There is only one economically

Awake Too Late

sound basis for increasing wages. The answer in both cases is the same, an increase in productivity per man hour, more pay for more production, and the strange thing about this is that as the workers earn more because of increased productivity, the cost of production goes down, prices can be decreased and the cost of living is lowered.

An impartial survey made a while back covering one hundred two plants in a six state mid-west area showed the following results for the first three months' operation of incentive pay plans adopted by these companies: An average increase in production of 28.7 percent; an average increase in workers' earnings, with no increase in the number of hours worked, of 18 percent; and an average decrease of 11 percent in the labor cost per unit of production.

Here's a formula which always will work whenever and wherever it is given a fair chance, and the beauty of it is that under it every one benefits. The wage earners benefit by getting more money for the same number of hours of work, the employer benefits through a lower cost of production, and the consuming public — that's all of us — benefits by the decrease in prices which the lower cost of production makes possible. The government (I expect it should be included as it is a tremendously large factor in everything these days) also benefits as the total tax revenue increases on a larger volume of business. Lower prices which bring more goods and services within the purchasing range of more and more people always expands the volume of business.

I recommend the incentive pay formula as being worthy of the very careful consideration of every company, large, medium sized or small. Under the cost of living formula the company, in effect, says to its employees, "We hope you will increase your productivity per man hour, but whether you do or not, a few months hence your wages will be increased or decreased depending on the cost of living index." That kills or at least puts a serious damper on incentive. What's the point in working harder if even though you produce more your wages may be reduced because the cost of living has gone down?

Under the incentive pay formula the company says to its employees, "Increase your productivity and you'll make more money; it's entirely up to you." Naturally, human nature being

what it is, if there is more in it for you, you are willing and anxious to work harder.

THE "GIMMES"

A state legislator makes this startling statement:

"In all my years of political service, nobody has come to me to propose a plan for general welfare. Everybody asks for favors or a handout."

If democracy dies, this "gimme" habit will be its murderers. No government "of the people, by the people, for the people" can survive when most of its citizens look upon it as Santa Claus. Yet everywhere you go these days, you'll hear far too much of that kind of talk. Federal aid for every project, every group and every citizen is proposed. People glibly demand more pensions, bigger sums for roads, schools, charities and subsidies, more money for the Marshall Plan, vaster defense funds, and at the same time, they expect a drop in the cost of living.

It is disquieting to find so many people professing the belief that the ills of our time can be cured if only we'll let the government take full charge of things.

May it not also be a sign that we don't like responsibility? Of course it's the fashion to say we sacrificed a great deal for the war; and some of us did. But most Americans had more money

than they ever possessed before. We all liked the fat pay envelopes.

Some of us may actually have enjoyed a situation in which we were not called upon to make decisions. Washington did it for us.

As a smart man once said, "The more your government does for you, the more it can do to you." —Fort Worth Press

nearly 46 billion passenger-miles, equal to carrying every person in the United States about 320 miles."

Mother — "Where do bad little girls go?"

Daughter — "Almost everywhere."

THE RAILROADS' PART IN EVERYDAY LIVING

Illustrating how railroads affected our everyday living in 1947, George Peck of New York cites the following facts:

"One out of every 43 employed Americans worked for the railroads.

"The average annual wage of railroad workers was \$3,200 as compared with \$2,550 earned by factory workers.

"One out of every six bituminous coal miners was digging coal for a locomotive.

"The railroads spent \$900 million for new equipment, roadways and structures."

"Passengers were transported

(SEAL) Attest:
 Martin G. Davis, Clerk,
 District Court, Cooke Co., Texas
 (30-1-2-3)

Citation by Publication
 THE STATE OF TEXAS
 To: Charles Harold Mason Defendant, Greeting:

You are hereby commanded to appear before the Honorable District Court of Cooke County at the Court House thereof, in Gainesville, Texas, at or before 10 o'clock A. M. of the first Monday next after the expiration of forty-two days from the date of the issuance of this citation, same being the 2nd day of August A. D. 1948, then and there to answer Plaintiff's Petition filed in said Court, on the 15th day of June A. D. 1948, in this cause numbered 15254 on the docket of said court and styled Opal Marie Mason Plaintiff, vs. Charles Harold Mason Defendant.

A brief statement of the nature of this suit is as follows, to wit:

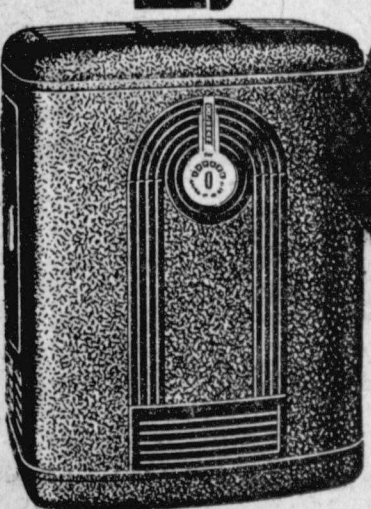

A suit for divorce from the bonds of matrimony for the reasons of harsh and cruel treatment and desertion on the part of defendant toward the plaintiff, and for change of the name of the plaintiff from Opal Marie Mason to Opal Marie Harris, for cause of suit and for general and special relief as is more fully shown by Plaintiff's Petition on file in this suit.

The officer executing this process shall promptly execute the same according to law, and make due return as the law directs.

Issued and given under my hand and the Seal of said Court,

Salute to Lone Star Steel

Long a dream... now an inspiring reality... Lone Star Steel Company's \$35,000,000 plant at Daingerfield inaugurated for Northeast Texas a great new iron and steel industry. This gigantic new development will contribute to prosperity... to better living... to a greater Texas!

We of the Texas Power & Light Company have a very special pride in this new iron and steel industry of Texas... because for many years, it has existed as a dream in the mind of John W. Carpenter, president of this Company. More than 20 years ago, Mr. Carpenter had TP&L Company's engineers compile a report on the possibility of iron and steel being produced in East Texas. Through the years, he never lost sight of the goal of producing iron from East Texas ore... and never ceased working toward the achievement of that goal.

At the outbreak of World War II, Mr. Carpenter redoubled his efforts to establish an iron and steel industry in Texas to satisfy the nation's war production needs. It was the result of his vision and untiring efforts that Lone Star Steel Company was established. Mr. Carpenter was elected its first president... is now chairman of the Board.

Everyone is familiar with Lone Star Steel's current progress. Regular shipments of pig iron are going to market. The East Texas Chamber of Commerce magazine recently heralded Lone Star Steel as "climaxing all major developments in the industrial history of Texas" and credited John W. Carpenter with being the man most responsible for its establishment.

We salute Lone Star Steel... Texas' greatest basic industry!

SEARCH FOR FIVE CENT BEARING LED TO MAGIC POWDERED METAL

A housewife using a vacuum cleaner, and an Army pilot in a new jet airplane, are using products of the fast-growing science of powdered metallurgy. In fact, there's hardly a single mechanical device in U.S. today that does not contain these magic products.

Most of the credit for this development goes to A.J. Langhammer, president of the powdered metal division of a large automobile company.

The process, "Andy" Langhammer says, is much like baking a cake. Finely powdered metals — iron, copper, brass, aluminum and lead — are blended for special qualities then compressed in molds under pressure as high as 2,000 tons.

Then they're "baked" at temperatures that melt some of the metals, but not all. The finished items can be made to an accuracy of a thousandth of an inch, and as strong as tool steel. And no machining is required.

When used for bearings, the metal remains porous, and is impregnated with non-gumming oil. Friction or heat brings the oil to the surface. A permanently self-lubricating unit results.

So a housewife doesn't use an oil can on home appliances any more — and the moving parts on a jet airplane won't burn out for lack of lubrication.

For his 20 years of pioneering in the industrial application of powdered metals, Langhammer recently was awarded the Achievement Medal of the Stevens Institute of Technology.

Andy's career really started when he won another medal, at the age of seventeen. A superb swimmer, he saved a boy from drowning in the Ohio River at Cincinnati, and was given the Carnegie Medal of heroism.

With the medal came an award that made it possible for him to attend the University of Cincinnati, where he graduated in

engineering. While Langhammer later was making a name for himself as an automotive engineering and production expert, a large car manufacturer was struggling over the problem of a five-cent clutch bearing.

The bearing would squeak, and break down frequently — making for costly repairs by car owners. Company engineers began experiments with powdered metals, and 18 months later, in 1927, they got a self-lubricating copper bearing that would hold up.

Langhammer was selected to take over the job of mass-producing the new bearing, and of improving the process so it could be applied to other items.

Today the firm makes home 25,000 kinds of products from powdered metals. They're sold to automotive companies and about 8,000 other firms. About 50 items go into automobiles.

So far did Langhammer carry the work that parts now can be made in weights varying from 10,000 items to the pound, to as high as 235 pounds each. While bearings are the major products, powdered metals also are used for gears, valves, filters and a number of other machine parts.

Because little tooling-up and no machining is required in powdered metallurgy, the process had a special value when U.S. industry had to turn quickly to products for World War II.

A gun-sight bracket that took two hours to machine was made in 40 seconds by Langhammer's firm.

And when a shortage of micrometers and other precision measuring tools threatened to hold up wartime expansion of the machine tool industry Andy's people were producing them in mass volume within a matter of weeks.

Powdered metal can be made from steel mill scale and other waste material. And where 20 to 80 per cent of metal is lost by machining in ordinary manufacturing, there is no loss at all by powder metallurgy.

Thus vast amounts of critical

materials were saved during the war. The powder process produced as many as 2,500 parts for certain bombers, plus countless other items.

Langhammer is sure the potentials of powdered metallurgy have just begun to show up.

"It makes possible," he declares, "an economy of mass production, and a new freedom in design of products, that we never dreamed of before."

MARY EVELYN SEYLER AND TECH CLASSMATE MARRY AT LUBBOCK

Miss Mary Seyler, daughter of Mr. and Mrs. Ben Seyler became the bride of Darrell Adams of Lubbock, son of Mr. and Mrs. Charles Adams of Forsan, Texas, in a pretty twilight ceremony performed at 7 p.m. Friday, July 2 in Lubbock. The double ring service was read by Rev. Father Powers, pastor of Saint Elizabeth's church, and was witnessed by a large assemblage of relatives and friends of the young couple. Mr. Seyler gave his daughter in marriage. She was attractive in a two-piece suit of champagne silk shantung designed with a peplum and a full flared skirt. She wore matching shoes and gloves and a picture hat of nat-

ural colored straw. Her flowers were an orchid corsage. Miss Johann Seyler was her sister's maid of honor wearing a silk shantung coffee colored suit identical in design to that of the bride, with matching shoes and gloves and a natural colored straw hat. Her flowers were a shoulder corsage of yellow roses. James Thompson of Lubbock was best man. The bride's mother wore an off-white costume with brown accessories and the groom's mother wore black with black accessories. Both wore corsages of gardenias and pink rose buds. Following the ceremony a reception was held in the home of the bride's uncle and aunt, Mr. and Mrs. C. W. Ratcliff. Forty guests were registered in the bride's book at which Miss Laurie Wilde presided. Miss Gladys Wilde poured punch. The refreshment table was laid with a peach net cloth and held the huge decorated wedding ring cake. The board was further adorned with white sweet peas and white tapers. Throughout the party rooms with gladiolas were used in decorating. Mr. and Mrs. Adams are both students at Texas Tech and are continuing with their classes in summer school since they returned from a short wedding trip. Mrs. Adams was born and reared in Muenster and is a graduate of Sacred Heart High school with the class of 1946. Mr. Adams is a native of Forsan. He is a veteran of three years' service with the army, saw action in the European theatre and holds the Purple Heart for wounds received in battle. Mr. and Mrs. Adams are making their home at 1006 W. Ave., Lubbock. Among Muenster relatives at the wedding were Mr. and Mrs. Ben Seyler and son, Billy, Miss Johann Seyler, Mrs. Frank Seyler, grandmother of the bride, Mrs. Herbert Meurer, Mrs. Herman Fette, Misses Gladys and Laurie Wilde and Billie Wimmer.

DINNER PARTY FOR 44 AT CAIN HOME SUNDAY

Mr. and Mrs. Dick Cain were hosts in their home Sunday for a dinner for 44 guests, relatives and friends, who visited them during the holiday weekend. Included in the party were Messrs. and Mrs. John C. Hogan and children of Amarillo, Frank Hogan and baby of Dumas, C. C. Hogan and children of Fort Worth, T. C. Rhone and family of Bowie, W. H. Hogan and family and W. C. Hogan and family of Gainesville and Weldon and Misses Imogene and Nina Mae Holland of Mallard.

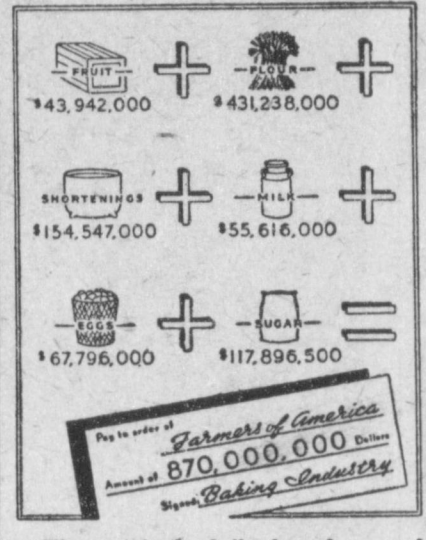

7 NEW MEMBERS JOIN VFW AUXILIARY MONDAY

Seven new members were initiated at the regular meeting of the VFW Auxiliary Monday night when the organization met in spite of the rain and threatening weather. The new members are Mrs. Loretta Wilde, Marcella Wilde, Alice Hennigan, Rose Marie Hennigan, Alma Stoffels, Pauline Mitchell and Myrtle Steele. Mrs. George Mae Trachta, president, presided during the business session and Mrs. LaVeta Schmitz was appointed chairman of the entertainment committee. and Mrs. Leona Luke chairman of the "get well wishes" committee. The next meeting will be held on August 2 and ladies interested and eligible may contact the president.

Sgt. and Mrs. Jack Needham of Wichita Falls spent the holiday weekend here and at Myra with Mr. and Mrs. Walter Richter and Jack's mother, Mrs. Ruth Needham.

CHICAGO, ILL.—Bearing a specially trained Red Cross disaster worker and a cargo of supplies that included 500 pounds of dextrose-rich candy, a mercy plane flew from Chicago to aid victims of the flooded Columbia river. The flight was sponsored by the Chicago Herald-American and business organizations making up the Mercy Fleet in Chicago. Robert J. Casey, former war correspondent, was aboard. Here, Casey (right) helps Chuck O'Connors load the candy, which was donated by Otto Schnering, president of Curtiss Candy Company. The plane was made available by John D. MacArthur, president of the Bankers Life & Casualty Company.

The nation's daily bread — and pies, cakes, doughnuts and sweet rolls — require so much farm produce that the bakers of America are very near the top of the farmer's list of "best customers."

This close economic relationship of baking and agriculture is illustrated above by the check for \$870,000,000 which the bakers spend annually for farm produce.

The baking industry has equal stature by other measurements. According to the American Bakers Association, baking ranks first in the food manufacturing industry in number of employees, motor vehicles, plants, volume of sales, and size of payroll; and second in value of products.

The industry is now nearing the three-billion-dollar total for annual business. Recent studies show that while less than 50 years ago about 95 per cent of all bread was baked at home, 90 per cent or more today is baked in the nation's 30,000 bakeries.

Next Presidency Seen As Economic Booby Trap

WASHINGTON.—One of Washington's biggest-name officials sees the presidential term beginning Jan. 20 as an economic booby trap for the winner, whoever he is.

Speaking privately, he predicts that the beginning of a slump of "depression" size rather than mere "recession" will confront the election victor about the time he takes office.

He expects defaults on the heavy credit extended in the past including home mortgages, to start piling up.

It needs stressing that this degree of gloom is distinctly a minority view in Washington at this time, although some other well-placed officials are moderately pessimistic.

ELECT
James P. Hart

of Travis County

Associate Justice Supreme Court of Texas

seeking his first elective term

JERUSALEM, PALESTINE — (Soundphoto) — Arab regulars crouch behind a stone wall on the Biblical Mount of Olives outside of Jerusalem, as the fight goes on for Jerusalem. Jewish snipers were operating from the hill in the background, one of the bastions of the old city of Jerusalem, which has fallen into Arab hands. The fight for the new city still rages.

TAKE CARE OF EGGS WHEN WEATHER'S HOT

Egg quality takes a terrific beating during hot weather unless poultrymen are on the job to maintain the bloom in their product, says a county agent.

Good hens eating well balanced feed produce high quality eggs, but if they are allowed to remain in a hot nest for a lengthy period of time they deteriorate rapidly. In hot weather eggs should be gathered three to five times daily and put into a cooler immediately. If kept at a temperature below 68 degrees Fahrenheit and marketed at least

SUN VALLEY, IDAHO — (Soundphoto) — President Truman pictured as he takes time off for a ride on a ski lift to Dollar Mountain here. The chief executive later departed from Sun Valley for Idaho Falls on his transcontinental tour.

once per week good eggs will retain their quality.

Most of the egg buyers have already started candling the eggs they purchase. The majority of the thin whites and yolk shadows can be eliminated if these rules are followed:

Produce infertile eggs as they maintain a higher degree of quality in yolk and white than fertile eggs under farm conditions. Keep eggs in a temperature below 68 degrees Fahrenheit.

Give hens a well balanced feed. Market eggs at least once per week.

Gather eggs often (3 to 5 times daily).

WHICH RUNS HIGHER, ALL THE \$1 BILLS OR ALL THE \$100 BILLS?

NEW YORK.— More money is floating around in \$100 bills than in \$1 bills.

This may surprise a great many persons who aren't in the habit of carrying around much of a wad of \$100 bills.

But the Federal Reserve Board says it's so.

The most popular bill of all, however, is that \$20 number. The dollar value total of \$20s in circulation tops the total value of any other denomination, the Federal Reserve Bulletin says. Since prewar 1939, circulation of \$20s had increased 454 percent.

That popular piece of paper, in fact, shook the 10 spot out of its prewar first place. The \$10s increased only 239 percent in circulation.

The \$100 bill is a comer, however. It's in third place in popularity and it increased its circulation a booming 439.9 percent since 1939. Next to the \$20 bill,

it's the fastest growing note in America.

The \$50s are fourth, the \$5s are fifth and \$1s sixth in the popularity sweeps. Don't sell the \$50s short. They rushed forward 436.9 percent in circulation since 1939.

Farm Safety Program Seeks To Eliminate 30 Million Hazards

The goal of the 1948 Farm Safety program is the elimination of 30,000,000 farm hazards.

"Agriculture ranks third among industries in the number of people per thousand workers killed each year by accident."

"Farm people of the 25 to 44 age-group — the most productive group — are most often killed in farm accidents."

"Motor vehicles are the cause of the largest number of accidents on the farm."

These statements were made recently at a meeting of the Texas State Farm Safety Committee when it met on the campus of Texas A & M College to make plans for Farm Safety Week, July 25-31, and to formulate a year-round farm safety campaign.

Accidental deaths on farms are caused by falls, machinery, animals, motor vehicles, burns or shocks, improper handling of equipment, and falling objects, the committee pointed out. Most of these could be eliminated through "safety consciousness" on the part of every member of the family.

"I feel sure, my poor man," said the sympathetic old lady, visiting a state prison, "it was poverty that brought you to this."

"No, ma'am, quite the contrary," returned the prisoner. "I happened to be coining money."

To the Voters of Precinct No. 3

I am still in the race for commissioner of Precinct No. 3 in the Democratic primary this month, although I did not get my name on the official ballot due to a misunderstanding.

My friends and acquaintances have urged me to conduct a "write-in" campaign for the office and I have decided to do so. I ask you to write the name of "A. C. (Clarence) Cotten" on your ballot for commissioner of precinct No. 3, marking through the names of the other candidates.

If I am elected to this office through a write-in campaign, I assure all the voters that I will do my best to make you the best commissioner from precinct No. 3 you have ever had. I have not quit the race. I am in it to the finish.

Respectfully,

A. C. "Clarence" Cotten

Crisp Bread-and-Butter Chips are a must on many a home canner's summer schedule for these delicious pickles are everybody's favorite. Most homemakers say they can never put up enough to last through the winter but they always try! So get a big supply of cucumbers and use this tested recipe from the Ball Blue Book for your "star boarders."

- 3 quarts sliced cucumbers
- 3 onions, sliced
- 5 1/2 cups vinegar
- 3 cups brown sugar
- 1 pod hot red pepper
- 1 teaspoon cinnamon
- 1/2 teaspoon ginger

- 2 tablespoons mustard seed
- 1 teaspoon turmeric
- 1/2 teaspoon celery seed
- 1 piece horseradish

Soak cucumbers and onions (separately) 5 to 10 hours in brine made by dissolving one-half cup of salt in one-half gallon cool water. Drain well. Add onion, 2 1/2 cups vinegar, and 2 1/2 cups water to the cucumbers. Simmer about 15 minutes. Do not cook until soft. Drain. Discard liquid in which scalded. Make sirup by boiling the sugar and spices with three cups vinegar and one cup water for five minutes. Pack well-drained cucumbers and onions in hot Ball Jars. Cover with boiling sirup and seal.

SIMPLE SCIENCE

The custom of not eating oysters in months that do not have the letter "R" in their names (May, June, July and August) is a conservation measure. Oysters are as edible in summer as at any other time but they are kept off the market during this period since it is their breeding season. By our abstinence we are assured a continued supply of oysters. Otherwise it would be exhausted. —Dr. Gerald Wendt.

A man was attracted by frightened screams from a nearby house. He ran in to investigate, and found a frantic mother whose small boy had swallowed a quarter. Seizing the child by the heels, he held him up, gave him a few shakes, and the coin dropped to the floor. The grateful mother was lost in admiration.

"You certainly know how to get it out of him," she said. "Are you a doctor?"

"No madam," replied the man, "I'm from the Internal Revenue Bureau."

Came Close

Neighbor — "Did you go to the doctor the other day?"

Man — "Yes, I did."

Neighbor — "And did he find out what you had?"

Man — "Very nearly."

Neighbor — "What do you mean, very nearly?"

Man — "Well, I had \$10 and he charged me \$8."

For safety, never grease, oil, unlug or adjust a machine that is in gear.

SECOND OLDEST STATE BANK IN TEXAS

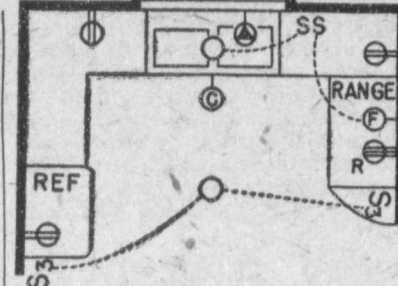

By JANE BAIRD
National Adequate Wiring Bureau

Pictured is a model kitchen, very pleasing to the eye—but what really makes its perfection possible can't be seen. It has hidden charms—electrical wiring that meets all standards of adequacy, insuring the maximum in efficient and economical operation of lights and appliances. Whether you plan to build or modernize—no matter how modest the scale—your choice of wiring is of utmost importance. Adequate wiring costs little more than ordinary wiring, and in the end yields substantial savings.

Costly Changes Averted
For instance, certain heavy duty appliances, such as the electric range, dishwasher-food waste disposer and home freezer, require individual circuits. These circuits should be added at the same time that other kitchen wiring is being done, even though you do not plan to buy all of these appliances immediately. Thus, no costly ripping open of walls, ceilings or flooring when you decide later on to expand your kitchen's electrical equipment.

Model Wiring Highlighted

The diagram above is a wiring layout that highlights the convenience factors of the model kitchen. For example, its central ceiling light has two switches. One is near the entrance to the dining room, on the right, and the other is near the back door next to the refrigerator, on the left. Of particular interest is the placement of a duplex convenience outlet, at elbow height, near each work surface for plugging in the toaster, coffee-maker, food mixer, roaster, etc. One is

- Lighting Outlet
- ⊖ Convenience Outlet
- ⊖ Fan Outlet
- ⊖ Clock Outlet
- ⊖ Single Control Switch
- ⊖ Multiple Control Switch
- ⊖ Range Outlet
- ⊖ Dishwasher-Disposer

located to the left of the sink, the other near the range. The two switches on the plate to the right of the window control a light over the sink and the ventilating fan. Special outlets have been provided for the kitchen clock (recessed receptacle), ventilating fan, electric range and dishwasher-disposer.

Additional Savings Possible

The savings already mentioned are not the only ones. When wiring meets engineered standards in size and number of circuits, costly voltage drop is avoided. A voltage (electrical pressure) slump of 10 per cent is common when wiring is inadequate. It can dim the lights by as much as 31 per cent and cut the efficiency of the electrical heating appliances 20.1 per cent. Only a limited number of appliances can be operated at the same time. Curtailed, too, is the efficiency of the housewife herself.

Lindsay News

James Bezner has returned from a trip to South Dakota.

Mrs. Bruno Zimmerer was admitted to Gainesville sanitarium Saturday for treatment.

Kenneth Zwinggi and Herman Zimmerer have gone to South Dakota with Herbert Hundt's combine to harvest his flax crop.

Gregory Hundt sustained a badly bruised leg last Wednesday when a rubber tired tractor was backed over his leg while he was attempting to hitch a rake to the tractor.

Mr. and Mrs. Herbert Hundt made a business trip to South Dakota last week to look over his flax crop in that area.

Mr. and Mrs. Robert Loerwald returned Saturday from Hereford where they spent a week visiting his brother, Joe, and other relatives.

Leo Zwinggi escaped without a scratch or bruise last Tuesday when the tractor he was riding turned completely over after backing over a dog house.

Irene Dunne, moving picture star, sets the pattern for neighborliness by entertaining leaders of the international coffee industry at an afternoon coffee. Stimulated to good conversation by both the beauty and the beverage, George V. Robbins, President of the National Coffee Association of the U.S.A., and Antonio Stockler de Queiroz, Chairman of the Pan-American Coffee Bureau, enjoy her hospitality. Dr. Queiroz is in the United States representing Brazilian coffee interests which supply the American public with over a billion pounds of coffee a year.

DRAFT REGULATIONS INCLUDE PROVISIONS FOR JOB GUARANTEE

WASHINGTON.—Men going into the armed services under the new draft law will be entitled to return to civilian jobs after their military service.

Their job guarantees will be similar to those of the World War II draft act. If the draftee leaves a permanent job in private industry or the federal government, he must apply to go back to the job within 90 days after completing his military duty.

A private employer will be required to return the man to his old job, or a similar one, without loss of seniority "unless the employer's circumstances have so changed as to make it impossible or unreasonable to do so."

The law says the man must be restored to his former job if he is still qualified to handle it. If he is not qualified because of a disability suffered in service, he must be given a job of similar pay and status.

He can not be discharged without cause for a year after returning to work.

VETCH SEED TESTING SERVICE AVAILABLE AT A AND M COLLEGE

The vetch seed testing laboratory of the Texas A & M College Agricultural Experiment Station is open for business, according to information received from B. T. Haws, County Agent. Germination and purity tests are being run on seed from this year's crop. The service is free and available to all Texas producers.

If you're a vetch seed producer and would like to have your seed tested for purity and germination this is what you do:

Sack up two pounds of the seed, preferably in "small cloth bags or securely packed to prevent loss or breakage, and mail it to the Vetch Seed Testing Laboratory, Department of Agronomy, Texas Agricultural Experiment Station, College Station, Texas. Put your name and address on the outside of the package and send it parcel post. If any information about the sample is enclosed in the bag or package you'll have to pay first class postage.

ST. LOUIS, MO.—(Soundphoto)—Babe Ruth, himself, accepts from Joe DiMaggio of the New York Yankees a trophy awarded him by the Sporting News, national baseball weekly, as a tribute to what Ruth has done for baseball. The Yanks then went on to slug out a 10-5 triumph over the Browns at Sportsman's Park. Twelve thousand kids attended a free "baseball clinic" sponsored by the American Legion.

When You Gotta Rock

Eph Williker, the laziest man in Jayhawk County, was conducting an experiment. Lolling in his favorite rocker on the front porch of his little cabin, he would turn his face to the west and rock a little while, then turn toward the south and rock some more. Changing back, the experiments would go on.

"What's the trouble, Eph?" his wife called out, finally attracted by his peculiar conduct. "What air ye moving' about so much for?"

"Just trying to find out which is the easiest — rockin' east and west with the wind or north and south with the grain in the floor," was Eph's reply.

FAIRY TALE

The passenger bought his ticket, picked up his change and walked away. He returned a few minutes later and told the ticket agent,

"You gave me the wrong change just now."

"Sorry, sir," said the agent. "You should have called my attention to it at the time."

"Okay," smiled the passenger. "You gave me five dollars too much."

Just As Sensible

William Wrigley Jr., the chewing gum king, was riding in an airliner when his seat companion said, "I just can't understand, Bill, why you keep pouring millions of dollars every year into advertising when everyone is already aware of your product."

Wrigley pondered briefly, then asked, "How fast would you say this plane is traveling?"

"About three hundred miles an hour," was the answer.

"Then" answered Wrigley "should the motors go dead the plane will travel only a mile or two on its own momentum; after that it will crash. So it is with advertising. You stop advertising and you crash."

Confetti--

farming ventures. The high prices on beef and grain have induced thousands of people to quit their dairy herds because they were able to make a comfortable living on less work.

The trend is apparent also here in Muenster. Cheese production from local milk is down 20 per cent, and the plant is receiving only a small fraction of the outside surplus it received last year. Instead of 2 million pounds of cheese the plant expects to make about 1.5 million.

Getting back to the future dairy prospects, there's another factor currently smiling on people around here. That's the growing popularity of condensed whey and kraco. This community is producing a scarce by-product which already adds a handsome sum to dividend checks and is likely to add more as the demand becomes greater. In case you did not know, there are very few plants in the country equipped with whey drying equipment. The nearest to Muenster's is some where in Missouri.

When working around machinery, don't wear any type of clothing that can catch in wheels or gears:

for your past business with Home Furniture of Gainesville as owned and operated by the Claud Forsters. Since Tuesday, July 6, the job of transferring ownership of this great furniture store is complete. Under its new owner, V. A. (Harry) Sullivan, it will continue to serve you with outstanding home furnishings.

The Forsters would like to take this means of expressing to all of you their sincere appreciation for your friendship and pleasant business association. In the hundreds and hundreds of homes which are furnished wholly or in part with pieces from Home Furniture, they know that in comfort and satisfaction, they will remain with you for years to come.

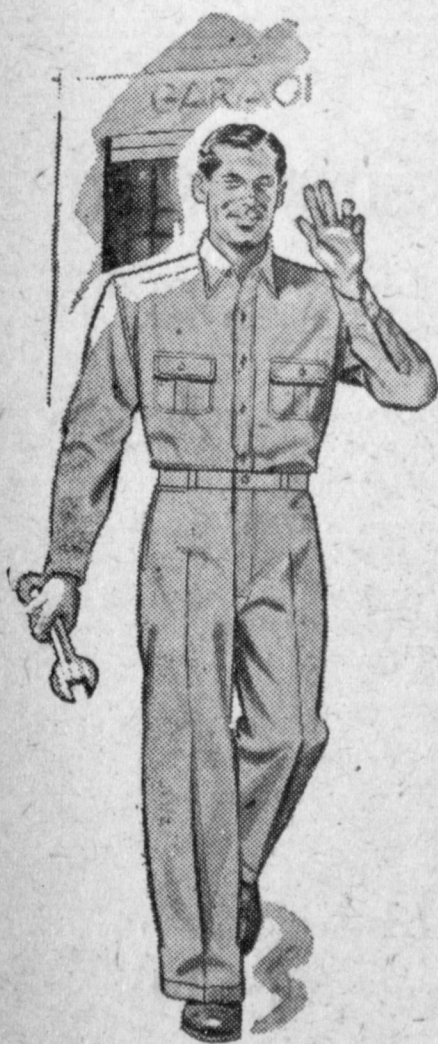

It would be impossible for the Forsters to see and tell each of you who have been welcome visitors in Home Furniture that they have enjoyed knowing and serving you . . . so this means is taken to say "thank you sincerely, so long and best wishes to everyone."
