WITHOUT COMPENSATION, OF COURSE

Ask any American citizen and he will tell you government costs an awful lot of dough. A recent news release indicates that governments - federal, state and local - will collect in the neighborhood of \$1400 for each adult in the United States this year.

ment. We occasionally contemplate what the unidentifiable cost will run.

Individuals spend many hours throughout the year sorting and filing receipts, keeping books, etc. Then, about this time of year, along comes the governmentally prescribed arithmetical exercises of getting complicated income tax forms filed in addition to the financial drain, the hours

and sometimes days of time, there also is the mental strain. We seriously doubt anyone, including Internal Revenue Service agents, can truthfully say he understands all of the tax law.

The time individuals spend working for the government, free of charge, trying to keep records and file forms properly is nothing compared to that imposed on employers. Not only are there many more forms to file, but, in addition, employers must serve, without compensation, of course, as tax collectors.

A mathematical genius couldn't compute the expense Americans employers are required to shoulder, taking money that doesn't belong to them out of pay envelopes of their employees and transferring it according to formula to the Bureau of Internal Revenue. In addition to so-called withholding and social security taxes, some of the other diabolical schemes are unemployment compensation, compensating, license tax, etc. Then, of course, employers are also expected to assess and collect taxes from their customers.

Each of these many schemes to relieve American citizens of money requires a complete and accurate set of records and a fair sized pile of forms must be filed monthly, quarterly and/or annually in order to satisfy the bureaucrats that everyone is progressing according to plan.

The last report we saw indicated a total staff of the Internal Revenue Service at approximately 64,000, who spend an annual budget of slightly less than \$700 million.

We've tried to visualize, at times, what kind of purple fit the founding fathers would have if they were suddenly transported to the present time. They threw the tea overboard in Boston harbor because of less taxes than modern citizens are forced to pay. We suspect American citizens could relieve themselves of a good percentage of the bite if they visited the voting booths during the elections and defeated all politicians who subscribe to the Pie In The Sky spending schemes which are so popular among modern American politicians.

-Clayton, N. M., Leader

HOW TO SUCCEED WITHOUT REALLY WORKING

In 1961 the government paid the American farmers \$680 to retire 20 million acres of land from corn production. These same farmers then increased the farm surplus by 20 million bushels.

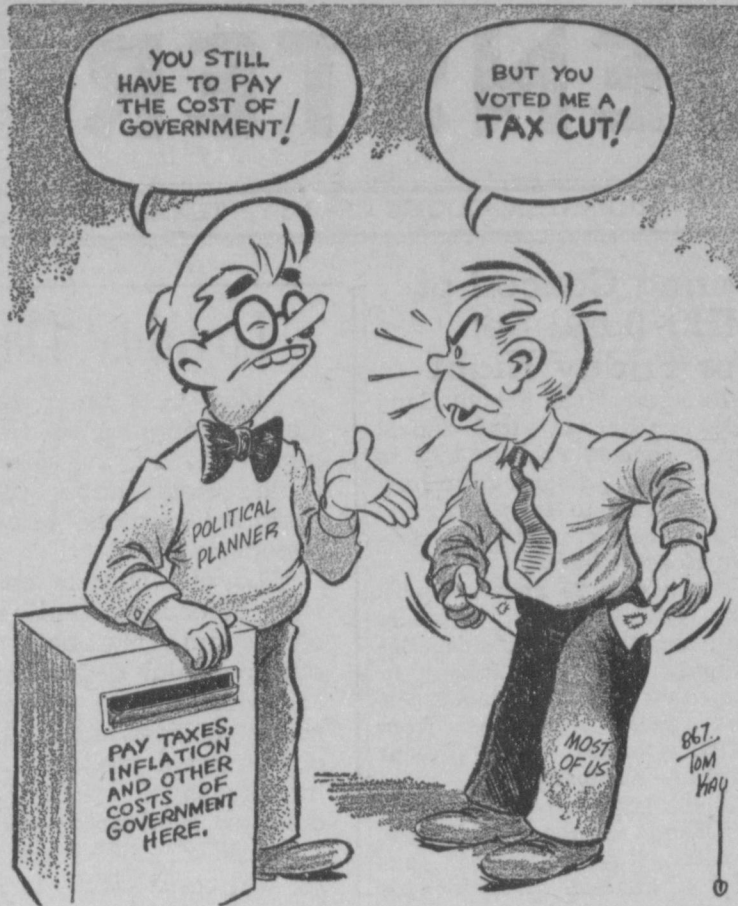

Senator Williams, the Delaware watchdog of the treasury, found that 699 "farmers" collected more than \$10,000 a piece under the Feed Grains Program.

One of these farmers was the Farmers Investment Co. of Tucson, Ariz., which rented 582.3 acres from the state of Arizona at an average cost of \$3 per acre. The Department of Agriculture then contracted with them for \$37.90 per acre not to cultivate the land. In another section of the state they rented an additional 155.2 acres for an average of \$4.50 and collected \$44.54 per acre not to cultivate this land.

Their net is easily followed, as they cleared over \$26,000 on an investment of less than \$2,500 on public land owned by the taxpayers who paid the bill.

Only A Cut In Government Spending Will Save Us

COMMENTS ON THE NEWS By Tom Anderson

Recently a "team" representing the United Nations Subcommittee on the Prevention of Discrimination and Protection of Minorities went to Atlanta to "observe" an American city "beset with racial woes."

One was from Communist Poland, where the citizens don't even have a "civil right" to leave; they're prisoners. Another was from India, that unintegrated polyglot of Moslems, Hindus, Untouchables and Sacred Cows, which lie around the public squares side by side with starving children who never tasted milk. One Atlanta "observer" was from Russia, where a citizen can't travel from one city to another any more than a prisoner in San Quentin can visit a sick friend in Sing Sing.

Another UN delegate was from Egypt, where American movies with Jewish actors can't be shown.

Recent Development

A former Marine Corps Colonel has written five articles which recently appeared in a New York newspaper, saying that Soviet Intelligence has penetrated every United States Department and Agency except the F. B. I. The articles report that "our" CIA diverted \$1,200,000 of U.S. taxpayers money, and the Communist Party, USA, the Communist Party of Italy and the Soviet Intelligence each got \$400,000. The Colonel further reported that a Soviet defector gave the CIA names of spies in high level positions in our State Department, but nothing was ever done about it.

On February 10 newspapers revealed that a high-ranking Soviet secret police official, Yuri Nosenko, who was attending the Geneva Disarmament Conference as an advisor to the Soviet Delegation, had defected and had been granted asylum in the United States. He is said to have given information about Russian spies within our CIA and State Department. He also reportedly has stated that employees of the United States, French

and British diplomatic and intelligence agencies are members of five Soviet spy rings operating throughout the Western Hemisphere. Nosenko names these spies, along with American businessmen, scientists, editors and other American traitors. Nosenko offered to appear before a Congressional Committee and name hundreds of communist spies in our government, our defense industries, our press and networks and in other key positions. He is now under guard of "our" State Department and CIA.

Merits Investigation

Who is going to guard the guards? Many of the traitors Nosenko has named are within our State Department and CIA. Don't be surprised if Nosenko is reported a "suicide" soon. It's more "practical" for him to do it than for a hundred of our State Department employees to do it.

A former high official in our foreign services has said that he believes we have no secrets from the Communists. Killer Khrushchev bragged to one of our diplomats, "I read those (CIA Reports) before you do."

So why did President Johnson clamp a tight lid of secrecy on Nosenko's testimony? Not to keep the enemy from finding out, but to keep the American people from finding out. Where is Nosenko? Why aren't the American people to be allowed to know who is selling us out to the enemy? Why aren't they tried for treason and shot?

Write your Congressman and insist that they support Congressman Ashbrook's bill calling for a Congressional investigation of the State Department. Then we the people can take it from there.

HUGE POWER SOURCE

An answer to the world's fuel problems may lie in the five oceans, according to Princeton University scientists. There is enough deuterium (heavy hydrogen) in the water, they say, to supply the world with power for millions of years, adding that the deuterium contained in one gallon of sea water can produce more energy than hundreds of gallons of gasoline! "But tremendous technical difficulties" must be overcome before this immense power source can be tapped.

The nurse shortage continues to be a national problem. In one city alone, Dallas, Tex., there will be a shortage of 4,600 nurses by 1985 unless "positive action" is taken, hospital consultant Douglas Kincaid has reported after an extensive survey. Chemetron Corporation, Chicago manufacturer of medical equipment which polled a thousand U.S. hospitals, says there is a shortage nationally of 100,000 nurses. Texas, the canvass shows, is now short some 3,800.

Sweeper Expected To Prolong Life Of City Pavement

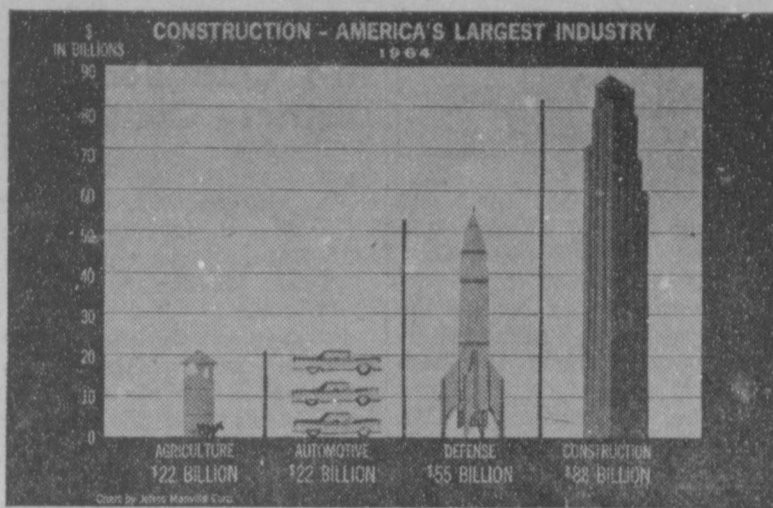

Streets will look better, which is already apparent, and the city council hopes they will last longer since a street sweeper has been put on the job. It is a rebuilt unit costing \$2367.50, about one third of its original cost.

Reports from street supervisors of larger cities were that pavement lasts much longer if dirt is kept off, especially during warm months when asphalt gets soft and the dust can be worked in by traffic. The council estimated that a 10 to 20 per cent increase in the life of pavement would easily justify purchase of the sweeper.

Getting some spring into your step is easy with a new Australian invention, rubber heels with built-in steel springs. Fitted with a pair of these heels, the inventor says, "you can idle along at three miles an hour, cruise at four to five, accelerate to six and, if you're in a hurry, reach a top speed of more than eight miles an hour and keep it up."

Agriculture will contribute \$22 billion to the gross national product — total value of all goods and services — produced in 1964. That will equal all the GNP money generated by the automotive industry which is also estimated at \$22 billion in 1964, as shown by the above chart.

National defense will account for \$55 billion GNP dollars in 1964, according to an early analysis of the construction market by Johns-Manville Corporation, world-wide manufacturer and distributor of building products. Construction, now America's largest industry, will put a whopping \$88 billion into circulation — an amount equal to one seventh of the \$615 billion gross national product forecast for the same period and very close to equalling in GNP dollar value the combined output of all three next largest industries — national defense, the automotive industry and agriculture, the J-M market analysis shows.

Farmers will spend some \$1.225 billion on farm construction of all kinds, the J-M market analysis estimates, with another \$6.7 billion going for new highways, many of which will improve road nets over which farmers get their produce to market.

The J-M market analysis expects total new construction in the United States to hit \$67 billion in 1964 — a new all-time high record — with more than \$21 billion additional going for alterations, modernization, repairs and maintenance, for a total construction year of \$88 billion.

MEMO

To Our Friends and Neighbors

FROM:

Tarrant County Friends of Jim Langdon

We are working to keep Jim C. Langdon as Railroad Commissioner, for several reasons. These reasons include:

1. Jim Langdon has the ability, training and integrity necessary in this unusually important office. He is a distinguished lawyer who was serving as Chief Justice of the El Paso Court of Civil Appeals when Governor Connally appointed him as Railroad Commissioner.
2. Jim Langdon, in a year's time, has proved himself to be a really outstanding member of the state agency that regulates oil and gas production, truck and railroad rates, and other vital industries.
3. Jim Langdon is well known to us, either personally or as the brother of Jack Langdon of Fort Worth, Associate Justice of the Second Court of Civil Appeals which serves Cooke, Denton, Montague, Clay, Parker, Tarrant, Wichita, Wise, Archer, Jack, Young and Hood Counties. Jim himself was born in Erath County and has lived in Somervell and Johnson Counties.

We urge you to join us in supporting Jim Langdon and voting for him in the Democratic Primary, May 2.

Relatives Attend Funeral Services For Matt Yosten

Matt Yosten, 91, an early-day resident of Muenster died at his home in West Point, Neb., April 23. Muenster relatives attended the funeral Monday.

At the last rites were Mrs. Bob Yosten, Joe Swirczynski and Mr. and Mrs. Larry Yosten. The Larry Yostens left early Thursday before the message reached Muenster. They were on their way to Grand Island, Neb., to get Mrs. Yosten and Mr. Swirczynski, who had attended the funeral of their sister, Sister Ruperta, and were visiting another sister, Sister Angeline. The Larry Yostens spent Thursday night there and the four went to Schryler, Neb., to visit relatives enroute to West Point where they planned to visit Matt Yosten. It was at Schryler that they learned of his death.

Requiem mass for him was held at West Point and burial followed at Howells where his wife is buried. Larry Yosten was one of the pallbearers serving with five grandsons of the deceased.

He is survived by three sons, two daughters, a number of grandchildren and great-grand, one sister, Mrs. Joe Swirczynski and two brothers, Frank and Nick Yosten of Muenster.

On the way back the Muenster quartet stopped Monday overnight in Omaha with relatives of the Swirczynski family.

Seniors to Spend 3 Days at Resort

Sacred Heart Seniors and four adult chaperones will be on their way after 6 o'clock mass Sunday for three days of resort living at Bar-K Ranch on Lake Travis northwest of Austin. They'll return Tuesday night.

The resort features fishing, swimming, skiing, horseback riding, etc. Also on schedule are drives to Austin and Johnson City.

Adults going are Father Bruno Fuhrmann, Adam Wolf, and Mmes. Herbert Cunningham and John Streng.

The proclamation also urges good attendance at precinct conventions, which are held on the same day, so that opinions from the grass roots can be sent through channels to state and national levels of government.

An old slogan urges us to "vote as you please, but please vote." Strictly speaking that slogan needs another word or two. Voting should be guided by intelligence and conscience — a sincere effort to pick and support the best person for the office. Each person should vote to the best of his judgment, not merely cast a vote.

To the Voters of Cooke County:

The office of sheriff is very important to everyone of the county and the qualifications of candidates in the race deserve careful consideration.

We want a good, reliable, honest, hard-working man — one who is mild tempered but firm and fair in all respects — one who will work for the welfare of both youths and adults — an officer who is respected by all and can get along harmoniously with all who will try.

BILL PRATT has shown these qualifications in the past 4½ years as deputy sheriff of Cooke County and city officer of Muenster. He has shown his ability many times. He is highly regarded as a good friend and good officer — calm, firm and fair in all his dealings.
