Sixth Grade Capitalism

A new kind of grading system has been adopted by a sixth grade California schoolteacher. It is based on a point and incentive system that pays the student, in imaginary dollars, for good work and fines him when he falls down on the job. The teacher says the system works: "... It has done away with grades. I substitute academic dollars." At the beginning of the year, the instructor gives each pupil a \$500 credit to start the semester. The next egg expands or shrinks, according to the caliber of academic work produced by its owner. Students can build small empires. A superior student can acquire a firm that dispenses facts to those who were inattentive in class or didn't do homework. There are about a dozen other

firms successful students can buy and operate. They also may earn academic dollars for helping slower students, for good work habits and for co-operation in class. Says the instructor: "You can't keep the kids at home. They come even when they're sick. ... The students are motivated to work."

When parents criticize the idea of bringing capitalism into the schools, the teacher answers, "But I'm teaching the American way of life. ... What is wrong with capitalism? The imaginative California schoolteacher deserves praise. We need more like him."

Union "Help" In Housing

Corporations, churches, civic groups are striving to replace slum hovels with decent modern housing but it is taking too long and costs too much. Two words explain much of the reason: union rules.

Work takes too long because there aren't enough skilled workers, and that's because unions won't allow enough apprentices to build up the ranks of the skilled.

Prefabricated floors, walls, windows, doors, plumbing, wiring would speed work, cut costs, often improve quality. But many unions won't allow them—work has to be done slowly, expensively, on each job. Or the pre-fab part has to be taken apart and put together again!

Honest unions encourage and foster skills, but rules like these by misguided unions are dangerously delaying work that is desperately needed.

And meanwhile slums (and people) rot.

Don't equal opportunity laws apply to all unions, too?
—Warner & Swasey

In the Family

Someone said people who want to change democracy for Socialism are "blind," and added, "Life in Russia is a nightmare which has to end sometime."

Someone else said, "There will never be any progress or peace in the hemisphere as long as the Communist imperialism possesses a sanctuary in Cuba, thus being able to indirectly conspire against and attack all the nations in America."

Do these statements sound as if they were uttered by ultraright wing partisans with no experience of living in Red-controlled lands?

The first quote is from Svetlana Alliluyeva, Josef Stalin's daughter. The second is from Juanita Castro, Fidel's sister.
—Indianapolis Star

Reap the Whirlwind

Victor Riesel is one of the nation's most knowledgeable reporters on the labor scene. There is little that this newsman does not know about the field of his specialty.

We noted with interest, and some mixed emotions, his column reporting the threat of a boycott of Swedish shipping by the International Longshoremen's Association (ILA). Our first reaction was one of sadness that the relations between Americans and Swedes have so deteriorated. There was a time when we were quite close to the Scandinavian country. But with the rapid movement toward the extreme Left by the Swedish government, our ways have parted.

Our second emotion is one of pride in the rugged men of the waterfront. Over the years the Longshoremen have been painted in dark hues. They are presented as caricatures of the Neanderthal—brutish hulks with bulging muscles, but nothing in the way of brainpower. This image is as unfair as it is untrue.

Our pride is in the fact that the proposed boycott is a protest against the financial aid by Sweden to the Communist dictatorship of North Vietnam. The aid is to be in the form of donations of money and extensions of credit to the North Vietnamese. Of course it is the right of the government of Sweden to give help to anybody they choose. But it is also the right of ILA members to refuse to handle the cargo of Swedish products, if the aid is extended. Mr. Riesel states: "They (the ILA) now believe the International Longshoremen are morally and ethically free to boycott Swedish freighters, cruise ships, Volvos, Saabs and any other products from that nation."

"It is my belief such action would have the tacit support of the President of the U. S. and the president of the AFL-CIO. This could cost Sweden scores of millions of dollars in small car sales here. It could also cripple its merchant fleet profits since the U. S. is its biggest marine service customer."

We might add that it will also show Hanoi and the world that there are other "demonstrators" in the United States, who believe in giving support, aid and comfort to our allies and fighting men in Vietnam, and not to the enemy.
—US Press Assn.

Foreman to Bricklayer: "Hey, what are you doing?" "Sharpening a pencil." "Well, don't let anyone see you. That's a carpenter's job."

A Call For Patience

We were contemplating the demonstrations in many of our cities that call for President Nixon to cut and run from Vietnam and let the nation fall into the hands of North Vietnamese and their fellow communists in the south known as the Viet Cong and we thought of an editorial that is in December 1969, Reader's Digest.

Space will not allow a full reprint of the editorial, but we think that everyone who doubts about our commitments in Southeast Asia should read the piece and consider the wisdom of its words.

The Digest notes the restraint with which the war has been conducted. Despite that restraint, "The Vietcong guerrillas control less and less of the countryside, and the North Vietnamese armies are feeling the heavy drain on their manpower. That the United States is able to order the withdrawal of 60,000 troops from Vietnam—with more to come—shows that our position is increasingly strong. The leaders of the communist world know that time is no longer on their side."

"Why, then, do they continue to hold out? Where do they look for hope of victory? As they survey the scene of battle, the North Vietnamese leaders and their Soviet and Chinese allies do not yet despair, for they know there still remains one resource that can tip the scale in their favor."

That "resource" is the demonstrator. The article puts it quite candidly. "To the enemy the constant outcries in the United States must sound like so many bombs being dropped against our troops in South Vietnam. The anti-war speeches in Congress, the campus protests from students and faculty, the barrage of defeatist editorials in some of the most powerful newspapers, these are worth regiments and whole divisions to the enemy. He reads his newspaper, hears the broadcasts, rubs his hands and once more refuses to talk in Paris, refuses to call his invaders back from South Vietnam."

"Were it not for his belief that the American patience will crack, the enemy

would lose his reason to keep on fighting." What better argument could one present in favor of patience? Men are dying for us in Vietnam. Let us not make their deaths an effort in vain.
—U. S. Press Assn.

Goldwater is Right

Few men in national political life have been so purposefully and viciously misrepresented as has been Sen. Barry Goldwater, the effort reaching the crescendo in his 1964 presidential campaign. Yet, a great many people who have looked at where he stood and recognized the frankness and honesty that made him an admirable man—and sometimes a poor politician—can still say with feeling, "In your heart you know he's right."

Sen. Goldwater summed up the moratorium demonstrations with typical pointedness when he said the participants "are playing into the hands of the people whose business it is to kill American fighting men."

That's not the kind of statement many in public office are likely to make. But it's true.

It's as simple as that, though, and as brutal as that. Thousands of Americans will never come home from that war because our leadership failed to set victory as the goal. Still, some here at home fail to face the very clear fact that Sen. Goldwater stated.
—Chattanooga (Tenn) News-Free Press

Dire Prediction

Over 100 years ago, Lord Macaulay, the noted British historian, made this prediction concerning America in the 20th century:

"Your republic will be as fearfully plundered and laid waste by barbarians in the 20th century as the Roman Empire was in the fifth—with this difference: The Huns and Vandals who ravaged the Roman Empire came from without, your huns and vandals will have been engendered within your own country by your own institutions."
—The American Citizen

A Blow to Sooners
A loss of \$252 million for the economy. Some 41,000 persons out of jobs. That's what will happen in Oklahoma, according to a study by a University of Oklahoma research team, if the percentage depletion provision of the federal tax law is reduced from 27½ to 20 per cent and the intangible drilling costs provision is eliminated, according to the publication Oil Facts.

M. Terry at Valley View. The Wiesmans were hosts on the 25th for dinner

and supper in their home for the Terry family and the Don Wiesmans and children Chuckie and Libby of Fort Worth. While they were together the Louis Wiesmans and children called from Kermit and everybody took turns talking.

Mr. and Mrs. Carl Herr of Denton drove to Muenster for a Christmas visit and gift exchange with his sisters Misses Helen, Elizabeth and Katie Herr.

At the J. M. Weinzapfel home Christmas afternoon guests included their daughter Mary and family, the Bill Birdens of Lewisville and their son, Msgr. Thomas Weinzapfel of Dallas. Father Joseph Weinzapfel of Grand Prairie joined them in the evening. The two remained overnight and attended funeral services for Jake Wolf Monday. Mr. and Mrs. Weinzapfel were Christmas dinner guests in the home of their daughter and family, the David Brights. Also there were the Henry Weinzapfels and family. Afternoon guests included Mr. and Mrs. Arthur Hellman.

Norman and daughter Susan came for Mrs. Luke Tuesday last week and Misses Cecile Schaefer and Adelaide Isaacs returned her to Muenster Saturday.

Mr. and Mrs. Tony Felderhoff had as holiday guests their son and daughter-in-law, Mr. and Mrs. Charles Felderhoff of Houston who came on Dec. 24 and remained until Dec. 27. Joining them on Christmas Day and bringing a completely prepared dinner—turkey and the trimmings—were the A. J. Felderhoffs and children of Gainesville, the Sylvan Walterscheids and Joe Felderhoffs and families. The Alvin Hartmans and children joined them in the afternoon.

THE SPECTACULAR SEVENTIES

The decade ahead promises to be the most productive and spectacular in all history as man, with ever lengthening strides, pursues and conquers the unknown. As we progress towards a higher degree of sophistication in our society, let us pledge to dedicate greater effort to the total well-being of all mankind.

Happy New Year

Goodbye To the Sixties

We have just passed the seventh decade of this—the Twentieth—Century. It was, as decades go, an unusual mixture of events. They ranged from tragedy to happiness.

The Sixties began with a presidential election year. Before the decade's end, four men had occupied the White House—Eisenhower, Kennedy, Johnson and Nixon. Two of those men would not see the end of the ten-year span.

The worlds of Jules Verne and H. G. Wells became reality during the Sixties. The United States was stunned by the fact that the Soviets managed to beat us in orbiting of the earth. But before the end of the decade, Americans—not one, but four—were the only humans to have left footprints on the lunar surface.

Many great personalities, including three presidents, died in the Sixties—Sir Winston Churchill, Eisenhower, Hoover, Kennedy, General Douglas MacArthur. The world of the motion pictures lost such greats as Clark Gable, Gary Cooper, Marilyn Monroe, Judy Garland, and, perhaps, the greatest loss of all in the field of entertainment—Walt Disney. Opera lost Kirsten Flagstad. Catholics lost Cardinal Spellman and Pope John XXIII. Three astronauts died in a fire on the test pad—Chaffee, Grissom and White.

The underworld lost Lucky Luciano. And the Communists lost two heads of the CPUSA—William Z. Foster and Eugene Dennis. Che Guevara was finally stopped in his attempts to subvert Latin America. On the other side of the fence, Whittaker Chambers, who exposed Alger Hiss, died in the Sixties.

Assassinations were too often in the news of the decade. In 1960 the pattern was set with attempts on the lives of the heads of state of South Africa, Venezuela and Japan. Murders invaded the United States political scene, just following the assassination of South Vietnam's President Ngo Dinh Diem, with the murder of President John Kennedy by a Marxist. Political murders of the Sixties included Martin Luther King, Senator Robert F. Kennedy and Nazi leader, George Lincoln Rockwell.

Only the years to come can tell what noted personalities were born in the era just past.

In Muenster to spend Christmas and the weekend with Mr. and Mrs. Ed Cler and family were daughters, Mrs. Tommy Youngblood, her husband and their three children, and Miss Debbie Cler and her fiancé Danny Wyatt, all of Fort Worth. Another daughter and family, the Leon Fuhrmanns of Myra joined them during the holidays.

Holiday visitors with Mr. and Mrs. John Fisher were their daughter and son-in-law, the Mike Lardners of Blue Springs, Mo., who returned home Sunday after a 10-day visit. The Lardners also drove to Houston while they were here to visit her brother Johnny Fisher and family.

Some will be evil. Others will be great, and good. Some will move people forward to a better world; others will be a detriment to society. It is awesomely apparent that in the coming years we are going to need men and women who will be great, and good.

Those born in the last decade whose lives will be dedicated to good, or evil, in the decades to come, are in our homes, and schools, and churches right now. Who, then, will determine the kind of a world we will have? (Do you have a mirror handy?)

ble sunlight reflector. The emblems are weather-proof and very effective wet or dry when kept clean.

"These signs are required in addition to any other lighting or reflective devices specified in traffic regulations," Mr. Smetana said.

"Two out of three crashes involving slow-moving vehicles are rear-end collisions, which account for two-thirds of fatalities and injuries and 70 percent of property damage value. Nine out of 10 smash-ups occurred during daylight hours on dry highways.

"We are sure that use of SMV emblems will reduce the number of this kind of crash and have significant benefits for highway safety," said the TSA vice president.

Vehicles and mobile machines being used on the job and within the limits of a marked construction or maintenance area may operate minus emblems, but once on the public road they must display the SMV emblem.

Twenty other states have laws providing for the use of the SMV emblem.

Confetti - - -

our government liquidating a sizeable portion of its assets. But in the business world they see nothing wrong in it. Rather, when an individual's debt burden gets too big his usual solution is to liquidate some assets and reduce the debt to an amount he can handle.

Well, Uncle Sam's situation is no different. He's over his head in debt and threatened with financial ruin. He can relieve the strain by selling some of his holdings to industrial interests. Furthermore, the idea has added appeal when one considers that many of those properties, because of typical government inefficiency, are operating at a loss.

When the Liberty Amendment was more generally discussed it was estimated that resulting benefits would reduce the budget sufficiently to eliminate all personal income tax. At the present level of debt and budget that extent of benefit hardly seems possible, nevertheless the amount could still be a very handsome relief, certainly a lot bigger than the relief just pro-

vided by the new law. Congressmen who are so proud of making a big hit with the taxpayers really ought to look into the possibilities of this method.

This column admits that the proposal is a huge pipe dream, but definitely not impossible. Legislature of the past week may be a sign that Congress is striving for a return to fiscal sanity in the seventies. This could be one of the steps toward that goal.

When a boy starts sowing his wild oats, it may be too late to start the thrashing machine.
