Food Prices Not Too High

No sooner did beef prices reach the highest level in 20 years than we began seeing signs of agitation back East among some people for "price controls" on food.

I say, isn't it about time that beef prices got up to levels of 20 long years ago? Farmers' costs are 50% higher now than then. Compared with 20 years ago, average hourly wages in

this country have more than doubled.

We can invite a searching look at agriculture by any open-minded person, keeping in mind the tremendous expansion of the economy since then. Money paid to wage earners in the United States is 3.4 times greater than 20 years ago; money paid to service industry workers is 4.9 times more, money for wage supplements and fringe benefits has gone up sevenfold; total money paid to Government employees is 4.3 times higher; dividends are up 3 times from 20 years ago; business and professional income has doubled. But total net farm income to the nation's farmers has stayed almost the same — a bare 3% increase in 20 years.

Isn't it about time that farmers did a little better than that?

Twenty years ago people spent \$7.5 billion more for services than they did for food and beverages. Now people are spending \$146 billion a year more for services than for food and beverages.

Total expenditures for food and beverages are 2.3 times higher than 20 years ago — but total expenditures for furniture and household equipment are 2.7 times higher, and expenditures for automobiles and parts are 4 times higher than 20 years ago.

Food prices at the store have increased 43% over 20 years ago — but rent is 57% higher and medical care is 128% higher. The fact that whereas people two decades ago were spending 23% of their take-home pay for food, they are now spending only 15.5% of

Loyalty Day Proclamation

WHEREAS The progress, tranquility and worthy influence of our city depends in large measure upon the determination of its citizens to create and to maintain vigorously the loyalty practice of true American ideals, and . . .

WHEREAS It behooves us to periodically take stock of our achievements in such matters and to strengthen our stand against any influence, either foreign or domestic, which might threaten to disturb our preferred way of life, and . . .

WHEREAS There is in our nation evidence of some subverting forces endeavoring to undermine and destroy American unity, now . . .

THEREFORE I, Arthur Felderhoff, Mayor of the City of Muenster, do hereby concur with our national and state leaders in praising the concept of LOYALTY DAY, celebrated on the first day of May; and in further support of that special occasion I do urge every citizen, school, church, organization, business establishment and home within my official jurisdiction to display the flag of our country proudly and to participate in public demonstrations and ceremonies sponsored by the Veterans of Foreign Wars of the United States, and others, on LOYALTY DAY, May the first, nineteen hundred and seventy-two.

(Signed) Arthur Felderhoff, Mayor

The Happiness Of Womanhood

An organization has sprung up in Kingman, Arizona, that is called Happiness of Womanhood. It is dedicated to the preservation of the family, that is, preservation of the masculine role of guide, protector and provider, and the feminine role of wife, mother and homemaker.

It seeks to achieve a membership of 10 million, to "insure respect for God's divine plan, the family structure," to "remove Communist and Socialist teachings from our schools," to "remove Women's Liberation movement teachings from our schools," to "teach our young daughters the joys of womanhood," to "preserve femininity" and "restore morality," to "eliminate drug abuse, return to patriotism and "elect to governmental office men or women who are dedicated to God," the family and the nation.

It has a League of Housewives who promise "never again to say, 'I am JUST a housewife,'" or to accept mail addressed to Ms., or to subscribe to "so-called women's magazines that are promoting the Women's Liberation movement." Instead they promise to "practice the art of Femininity and make my husband aware at all times that I am a woman," and "to do all I can to dispel the idea that HOUSEWIVES are frumpy." Their pledge to the men is: "You make the living and we'll make life worth living."

HOW is opposed to the Equal Rights Constitutional Amendment, and expressed outrage that only eight United States Senators opposed it. HOW said that the destiny of American women was being determined by Women's Lib, representing 3 per cent of the women of the country. It is now seeking to prevent ratification of the amendment by the required number of States — 38.

8.5 Per Cent of College Students Get SS Benefits

One out of every 12 American college students is a social security beneficiary through protection established by a deceased, disabled, or retired parent.

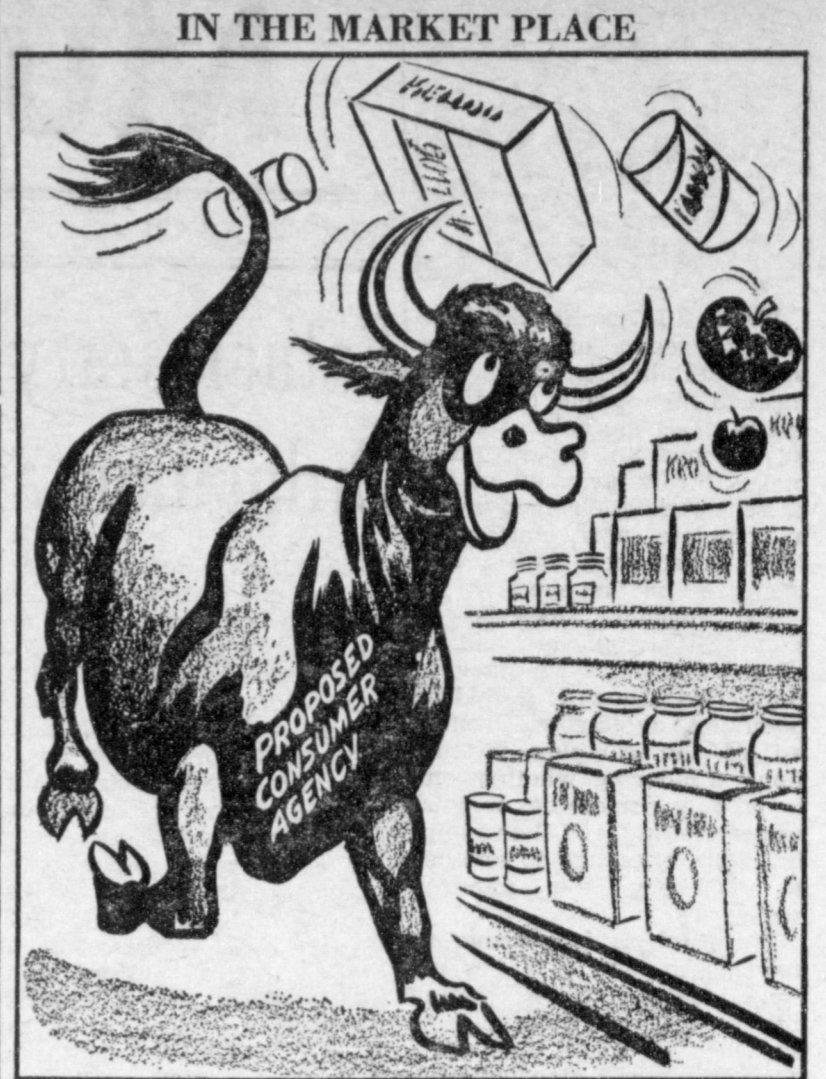

That statistic, compiled from social security records, was announced by Gus Jones, manager, to stress that social security insures children dependents, a fact which may not be generally known.

A child may receive monthly benefits when one of his parents gets social security disability or retirement benefits. The child may also receive benefits if a parent dies after having worked under social security long enough to be insured. The payments stop at age 18 unless the child is disabled or attends school full time.

Students benefits will continue to age 22, including vacation periods of not more than four months. Ordinarily, payments will stop if the student is married or adopted.

The school must be a qualified high school, college, or vocational school. Many private and foreign schools, as well as public schools, meet the requirements.

It pays to advertise with the Muenster Enterprise.

Protection or Nuisance

A new star has risen over Washington, D.C., called "Consumer Protection" and most politicians seem to have hitched their bandwagons to it.

The idea is to create a new government bureau to be called a Consumer Protection Agency. One of its chief duties would be to publicize and promote legal action with regard to all the faults in products and services committed by companies, including management and all of the persons employed in the plants, stores and other workshops of the nation.

For example, the new agency would receive all customer complaints and put them on public display. It would be empowered to demand private company data and the files of other federal agencies to obtain complaints for public display. Reports would be written, press releases issued, federal action started, private lawsuits encouraged — all to get nationwide publicity critical of companies, their products, and their operations.

What could companies look forward to? Lost confidence, lost customers, lost sales, and lost respect in their communities and industries. Also, there would be lost products, lost production time, and lost money, time and talent fighting public and legal battles.

What could consumers look forward to? Higher prices and taxes. What can employees look forward to? Lost jobs. "Consumerism" as a voluntary, do-your-own-thing movement may be keeping those who provide goods and services on their toes. But, putting consumer advocates on the federal payroll with power to condemn products, ruin sales, raise prices and kill jobs is "protection" we can do without.

their disposable income for food that is of better quality, of wider diversity, better packaged, and the safest in the world.

Most wage-earning Americans who have received their regular pay increases over the years do not protest very much when their fellow workers also receive pay boosts. I hope they can see the justice in fair treatment for farmers, especially when the record shows that farmers are making only three-fourths as much income as nonfarm people.

The housewife may complain about spending a little more on her weekly trip to the store; then when she gets home she takes panty hose, detergent, mouthwash, and other nonfood items out of her shopping bag. They make the food bill seem higher.

Russia Moves North Viet Drive

The North Vietnamese drive into South Vietnam through the strangely named Demilitarized Zone started on March 31 with a characteristically Russian artillery barrage of great intensity. This suggests that the Soviet Government now has taken over full military direction of North Vietnam's war against South Vietnam, Laos and Cambodia.

There was never any obfuscation on Moscow's part that the Russians ran the Korean War on the North Korean side from the beginning to the end. Nor was there any doubt in military observers' minds that Russians directed the Chinese Communist campaign that resulted in the installation of the Communist Government in Peking in 1949.

It is said that the aim of the present North Vietnamese drive is to convince President Nixon before he visits Moscow on May 22 that Vietnamization of South Vietnam's military effort is a failure. That analysis makes much sense, for it is clear by now that the Russians never intend to stop meddling in other nations' affairs, and that they will go on in Indochina to whatever the end may be. For them the United Nations is only a means to an end, not any kind of end in itself.

In the circumstances President Nixon will be well advised to stand firm for the principles of international order and national sovereignty in his dealings with the Russians. Raw appeasement is worse than useless with them. It is an invitation to more aggression.

Beet leaves are more valuable food than beet roots.

Output per man hour for the nation's agricultural producers is 3.3 times higher than 20 years ago, while out-put per man hour in U.S. manufacturing has increased only 1.7 times in that period, according to the Farm Bureau Federation.

3,594 Died in '71 Texas Traffic

A total of 3,594 persons died in Texas motor vehicle accidents during 1971, according to Texas Department of Public Safety tabulations.

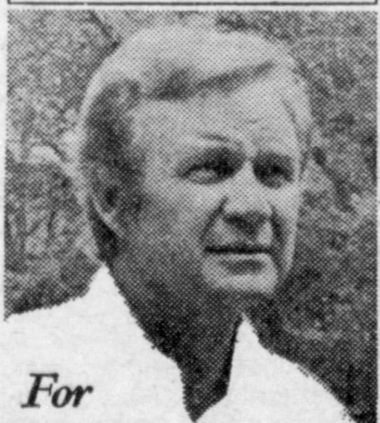

DPS Director Col. Wilson E. Speir said the death toll represents a one per cent increase over 1970, when 3,560 died on the streets and highways.

Speir noted that vehicle miles driven increased from 68 billion in 1970 to more than 70.7 billion for 1971 — a four per cent rise in driving. At the same time, the number of licensed Texas drivers rose by nearly 324,000 to a total of almost seven million.

The death rate per 100 million miles of travel actually decreased three per cent from 5.2 in 1970 to 5.1 in 1971, Speir said. The death rate in 1966 was 6.2. Of the 3,594 deaths in 1971, 2,184 occurred on rural roadways and 1,410 in urban areas. Their were 2,993 fatal accidents and 394,166 total accidents last year. Speeding and driving while intoxicated were listed as primary violations in fatal mishaps.

Lindsay Prepares For 50th Jubilee Of Father Joseph

St. Peter's Parish at Lindsay is making preparations for a celebration on the occasion of the golden jubilee observance of Father Joseph Fuhrmann, O.S.B., on Ascension Thursday, May 11. He was the first priest from Lindsay to be ordained.

His Mass of Thanksgiving will be celebrated at 4 p.m. in St. Peter Church followed by a community reception in the Parish Hall. Clergy, sisters, and immediate family members will be together for supper afterward.

May 30, 1922, was another festive day for Lindsay. On this day Father Joseph, formerly Paul Fuhrmann, son of Mr. and Mrs. Henry Fuhrmann, read his first Mass. Dinner and a community picnic were held.

Father Joseph attended St. Peter's Parochial School and received his secondary education at Subiaco College, Arkansas. He then entered St. Francis Seminary in Wisconsin where he studied philosophy. He joined the Benedictine Order on March 9, 1918, and was ordained to the priesthood May 28, 1922, at New Subiaco Abbey by Bishop John B. Morris of Little Rock. Science Building At CCJC Named for Ruth Schlaudroff

The chemistry-biology building of Cooke County Junior College is officially named the Ruth Bonner Schlaudroff Science Building. That action was taken by the board of trustees in last week's meeting in honor of the late Mrs. Schlaudroff, former chairman of the science department, who died suddenly last year.

The board also continued with the college's building program. It awarded a contract to Boyd Builders for construction of the school's beef cattle evaluation center and changed the plan to lengthen pens from 60 feet to 100 feet. The purpose is to provide more exercising space for the animals and to increase capacity.

Construction on the facility will begin May 1 and will require about 45 days. The board took into consideration a request presented by John Pagel and Vincent Zimmerer of Cooke County Electric Co-op to have power for the facility supplied by the co-op.

Trustees also accepted a bid by B. J. Construction Co. for fencing around the new tennis courts now being finished. And President Shasteen reported that a new maintenance building will be finished about June 1, also that a golf driving range is near completion.

First business of the meeting was to swear in Urban Endres, Parker Yarbrough and Wendell Proffer who were elected April 1. Then the trus-

tees re-elected Paul Campbell chairman, William Pulte vice-chairman and Boyd Ware secretary of the board

Many people made this system-wide service possible

- ... The city council by approving necessary rates
- ... Low interest, long term loans available through the REA rural telephone program. Also technical assistance from REA.
- ... The many people who allowed private right of way, especially in the rocky areas. The splendid cooperation of all made it possible to complete a very difficult job.

Without these three kinds of help we couldn't have made the improvements, and we are most grateful to everyone concerned.

THE INFORMED CONSUMER

By Crawford C. Martin
 Attorney General of Texas

Have a cold, the flu, indigestion, arthritis, or maybe you just don't have the pep and energy you used to have. If so, then you are probably familiar with the infinite number of home remedies which are available on the market today.

You may also be aware of the fact that a great number of these cure-alls and pseudo-medicines do not work.

Billions of dollars are spent each year in the United States on quack medicines and secret potions by today's modern consumer.

The elderly are particularly victimized because with old age come many minor aches and pains and a few major ones. Many older folks hesitate to consult a competent physician and choose to prescribe for themselves, instead, through mail-order cures or door-to-door health consultants. The result is that they are bled out of their money and disappointed when their problems are not solved by the "wonder" medicines they purchase.

Whether quackery is intended or not is beside the point — incorrect medical advice and cure-alls that don't cure are deceptive to the public and often dangerous as well.

Assuming that the cure or therapeutic device is harmless, it can still destroy one's faith in legitimate treatment by a doctor. Frauds in the health field are almost too numerous to mention, but the Food and Drug Administration has compiled a list of items which should be noted. Fertile grounds for health hucksters include vitamins and pep pills, impotency cures, alcoholism treatments, air purifiers, mail-order eye glasses, hair restorers, and tired-blood tonics, to name only a few. Most of these items simply do not provide any relief or satisfaction to the hopeful individual seeking a cure.

The best advice to remember is that a physician should be consulted before being tempted to try any of these "sure-cure" remedies. Three points which should prove helpful in recognizing health frauds and false cures are:
 1. Does the medical profession disapprove them?
 2. Do they claim to have a secret remedy?
 3. Is a fast sure cure guaranteed where medical science fails?
 If the answer to these questions is "yes" then keep a firm grip on your pocketbook and

**The cooler the home,
the warmer the marriage.**

Marriages may be made in heaven, but it's hard to keep them heavenly when it's hotter than blazes. That's where central gas air conditioning comes in. It can bring you together. All summer long. As close as you want. All summer long. And it won't cost you much either. In fact, if you have gas heating in your home, you could easily have half a central air conditioning system already. Because you may be able to use the duct work and furnace blower you already have. That saves about fifty percent on installation costs.

That's just part of the savings. Gas costs less to operate than electricity. And you get special low rates during the long hot summer months. But you'll save more than money with gas. You'll save time and energy, too. Because with central gas air conditioning there are fewer moving parts. Fewer breakdowns. Fewer repairs. This summer, have central gas air conditioning installed. For love's sake.

"Certainly not," said the vacationer, "but if he wants to pay for the call himself, put him on."

"Think nothing of it," responded the friend, "I'm calling from your house."

Health Hints FROM BLUE SHIELD

Tornado Season Ahead

With most tornadoes occurring during the spring and summer months; it's time to acquaint yourself now with certain safety precautions. If the weather bureau issues a "tornado watch" prepare to take shelter and gather a transistor radio, flashlight and emergency food supplies. When your local weather authority actually sights the tornado in your area, a "tornado warning" will be issued. At such time, the American Red Cross recommends you take immediate shelter in the southwest corner of the basement or under a heavy table or workbench near the center of the house. Keep several windows open on the side of the house away from the wind to help equalize atmospheric pressure inside and outside. If you are in a school or large building, take shelter in lower interior floors away from windows. If you are outside, seek refuge in a building of reinforced construction; or if a sturdy structure is not available, lie flat in a ravine or ditch.

Bicycles and Fitness

Over 64 million cyclists have discovered the fun involved in riding bicycles often without realizing the health benefits involved. Medical authorities contend that steady pedaling can keep you as physically fit as a jogger — and a lot less monotonously. Besides improving the muscle tone in the legs, cyclists also aid their circulatory systems. Riding a bike three to four times each week for a half hour or hour will keep you in shape and will help you burn 4½ times more calories each minute than if you were just sitting still. Keep in shape and have a good time — at the same time — by riding a bicycle this spring.

Joe Hoenigs Back From Flying Trip

Mr. and Mrs. Joe Hoenig returned Sunday night from a flying trip to Maryland, New York and New Jersey. They were away ten days.

They left April 13 from Dallas by jet to Baltimore where they visited four days with a cousin Mrs. Joe Bada of Germany who is there with a daughter and family. The Hoenigs had stayed with Mrs. Bada three weeks when they visited in Germany four years ago.

From there they traveled by bus to Pasadena, Maryland spending one day with cousins, the Mike Crowe family, and then to New York City where they were met by Mrs. Ronnie Hoagland and visited with her in her city apartment. Miss Anna Hoenig joined them there for visiting. She is employed in New York City.

After that Mrs. Hoagland took the Hoenigs to her lake home in Rumson, N. J., until they flew back Sunday.

Mrs. Hoagland soon will be moving to Muenster to occupy her new home on North Hickory St.

A note from Mr. and Mrs. James D. Cook of Mexia, formerly of Muenster, says: "Please tell all our friends up there hello and we are doing very well for two old people."

Boys Will Be Boys!
Little Tom had just been vaccinated. When the doctor tried to put a bandage over the spot, Tom insisted that he wanted the bandage on the other arm.
"Why Tom, the bandage should be put on the sore arm so that the boys at school won't hit it," the doctor said.
"Put it on the other arm, Doc," Tom replied. "You don't know those guys."

THE INFORMED CONSUMER

By Crawford C. Martin
Attorney General of Texas

Earn big money right in your own home — home workers wanted! Make extra \$\$\$ working at home.

The work-at-home scheme, usually heralded in junk mail or newspaper want-ads similar to those above, have particular appeal to pensioned older folks with time on their hands and to mothers with young children. Here's a chance to pick up a little extra cash to buy that new furniture or appliance, to take the dreamed-of vacation or just to help meet the everyday cost of living. At least that's the appearance given by the company making the offer — but don't bet on it.

My Consumer Protection Division gets numerous complaints each year concerning these work-at-home gimmicks. Experience shows that far too often consumers who bite on the work-at-home pitch wind up spending money instead of

making money. The swindlers range from addressing envelopes to making some article in the home for the company to sell. The work involved varies greatly but there is one common theme which runs throughout all of these plans. The person, in order to secure the home employment, must first part with some money. The amount of money typically is small. We have had instances reported to us of companies asking as little as 25c but generally the cost runs from \$2 to \$10. This purchase by the consumer is what the company is interested in and not in providing employment.

Often the consumer who gets nothing for his money is luckier than the consumer who gets a kit to make a product which is to be sold to the company. The finished product is rarely bought back by the company because it is not "up to standards" or the handwriting on the envelopes is "not legible and neat." Probably worse than the loss of the small amount of money involved, the victim has wasted his time and is left with the feeling of humiliation and failure at his inability to produce "quality merchandise." Unknown to him however, is the fact that no one produces merchandise which meets the "standards" set by the company.

Be an informed consumer. Don't be victimized by the home employment racket. Think before you part with your money for a home employment opportunity.
