VOLUME XLIII

MUENSTER COOKE COUNTY TEXAS 76252

JULY 13, 1979

NUMBER 34

**We complain a lot about inflation, and rightfully so because we feel strongly that this economic curse was avoidable in the first place and that it was brought on by political mischief in high places of a number of countries. But when we cool down from our justifiable wrath we realize that we are still much better off than other people around the world.**

The National Federation of Independent Business has just completed a comprehensive study on the standard of living, transportation, energy, labor, gross national product, and other factors in comparing the U.S. with England and Russia. Also NFIB has combined that information on a comparison poster which reveals that America actually is the "promised land" of the world.

The study on standards of living does not complicate the comparison with adjustment for variation in money values but rather lists prices in the number of work hours or minutes needed to buy an item. By that method the prices of a number of needs of every day living were listed for the cities of Washington D.C., London and Moscow.

For instance, a liter of milk cost 7 minutes in Washington, 9 minutes in London and 18 minutes in Moscow. A kilogram of ground beef cost 43 minutes, 57 minutes and 128 minutes respectively in the three cities. Also, a kilogram of pork sausage cost 31 minutes, 43 minutes and 145 minutes; a kilogram of potatoes cost 2, 4 and 7 minutes; a kilogram of eating apples cost 11, 15 and 40 minutes; a kg. of sugar cost 5, 11 and 59 minutes; a kg. of white bread 8, 12 and 18 minutes; 10 eggs cost 10, 20 and 99 minutes; a half liter of vodka cost 52, 161 and 380 minutes; a pack of 20 cigarettes cost 9, 22 and 23 minutes.

Summing up food prices, it was determined that the cost of a weekly food basket for four persons was 12.5 hours, 21.4 hours and 42.3 hours respectively in the three cities. That is another way of saying that an average U.S. worker spends less than a third of his week to feed himself and three others. The English worker, needs more than half a week and the Soviet by himself cannot pay the food bill for four. One of the others needs to help.

Interesting comparisons in cost of living continue. 150 grams of toilet soap cost 5, 6 and 23 minutes respectively in the three cities; men's leather shoes cost 8 hours, 11 hours and 33 hours; a man's business suit cost 20 hours, 25 hours and 68 hours; a small refrigerator (120 liter) cost 43 hours, 35 hours and 208 hours; a large TV set cost 86 hours, 177 hours and 713 hours; and an automobile (Fairlane, Granada or Vega GAZ24) cost 4.1 months, 8.5 months and 35 months.

In a number of other respects the survey reveals that U.S. is far ahead of the United Kingdom and U.S.S.R. A summarizing category, the gross national product per capita, shows figures of \$7,860; \$3,870 and \$3,590 respectively. Some specific items of production show U.S. and U.S.S.R. about evenly divided for leadership. For instance, production in metric tons is listed as follows for the principal products... with U.S., U.K. and U.S.S.R. in that order.

Cement 66.77 million, 15.78 million and 124 million; iron ore 80.54 million; 4.38 million; 239 million; steel 105.8 million; 20.2 million; 141.3 million; cotton yarn 1.142 million; .125 million, 1.573 million; synthetic fibers 2.9963 million, .409 million, 405 million; grain (wheat, corn, barley, rice, oats) 238.24 million, 13.38 million; 223.47 million; meat 18.02 million, 2.19 million, 13.4 million.

Energy production was reported in the equivalent of barrels per day of crude oil. The items are coal 9.189 million, 1.733 million, 6.968 million; crude oil 10.042 million, .246 million, 10.39 million; natural gas 12.662 million, .623 million, 5.37 million; hydro/nuclear 3.036 million.

It is a two man scramble in two divisions the teams to be made up at the course before 8:30 tee-off. Entries are asked to be there by 8 o'clock. Entry fee is \$10 per person to be paid at sign up time.

## Chamber Okays Park Projects

Three improvement jobs at the Muenster City Park were approved by the Chamber of Commerce at its regular meeting Tuesday.

Tennis courts will be given a seal coat to close cracks which are developing and likely would lead to severe damage in a rough winter.

Also the basketball-volleyball court north of the swim pool will get a surface coat of an inch of paving asphalt.

And a sidewalk will be built around the Jaycee pavilion. The three jobs are being financed by income from this year's Germanfest, and they are being supervised by Jerry Wimmer.

The Chamber is also interested in a bike-pedestrian trail entering the city park from the west, near the location of the old fighter plane. Its purpose is to provide a way for kids to and from the park without crossing the busy highway.

After the four lane road is finished the present detour will remain and the trail will continue from its west end, under the bridge and into the park. The Chamber's intention is to cooperate with the city on the job.

## Motorcycle Accident Is Fatal to Curtis Grewing

Before a near-capacity crowd in Sacred Heart Church at 10 a.m. Monday, final service was held for Curtis E. Grewing, 18, who died on July 6 of injuries received in a motorcycle accident on July 4.

Father Stephen Eckart officiated at the Mass of Christian Burial and delivered the funeral homily. Con-celebrants in the Mass were the Reverend Fathers Denis Soerries, Nicholas Fuhrmann, Eugene Luke, Leonard Wangler and Jerry Mosman.

In his sermon Father Stephen said that he and Father Nicholas were vacationing in Mexico City when they received the message of Curtis' death.

The next morning before leaving for Muenster, they remembered Curtis in a Mass at the Shrine of Our Lady of Guadalupe, patron saint of the Americas.

Other participants in the liturgy were the Sacred Heart Choral Group directed by Frank Luke; Joe Bartush in the scriptural reading; Floyd Haverkamp, John Hartman and Laurie Walterscheid in petitions; and Sharon Grewing in a poetic reading. Classmates of the deceased, each with a long stem red

rose, attended in a group and sang "The Way We Were." Another group attending was the Grewing Reds baseball team.

Prior services were the Rosary Saturday night and at 8:30 and 4 p.m. Sunday and a wake service at 8 p.m. Sunday, all in the chapel of Miller Funeral Home.

Burial was in Sacred Heart Cemetery directed by the Miller Funeral Home. Pallbearers were Wayne Grewing, Donny Grewing, Gene Luttmier, Kevin Cler,

Billy Haverkamp, Tim Walterscheid, Wilfred Luttmier and Jimmy Barnhill.

Curtis was the victim of a motorcycle accident about 7:45 p.m. at Rock Creek Camp beside Lake Texoma. As related by State Trooper Bill Kelly, the investigating officer, Curtis was standing on the seat of the machine while it was in motion and apparently fell while he was trying to sit down. He was taken to Texoma Medical Center of Denison with severe head injuries and did not recover consciousness. He died at 11:50 a.m. Friday.

Curtis Grewing was born on September 27, 1960, a son of Mr. and Mrs. Walter Grewing and has lived here all of his life. He was employed by Grewing Brothers, Inc.

Survivors are his parents; a sister, Mildred; and two brothers Bob and Brian, all of Muenster; and his grandmother, Mrs. John Grewing of Muenster.

Classmates of Curtis have indicated their intentions to create a memorial for him at Sacred Heart School. They expect to make an announcement next week regarding the nature of the gift and persons accepting donations.

## County Eliminates Nine Voting Boxes

Elimination of nine voting boxes by the Commissioners Court early this week does not affect Muenster except in a county wide saving of about \$1000 per election in the future.

Unlike other areas of the county where neighboring boxes were in the same commissioner or justice precinct, the two local boxes could not be combined because one is in precinct 3 and the other in precinct 4. However, in the shuffle of precincts before eliminating voting boxes, Muenster's Justice Precinct 5 was combined with Gainesville's Precinct 1. Total of all the county's voters was reported at \$12,290.

In other action the commissioners court completed its deal with the city of Muenster relative to fighting Continued on Page 7

## Local Burglary Solved By Arrest in Alabama

The case of a frustrating burglary here on March 20 was closed during the past week with the arrest of Gary Duwayne Waldrip in Denopolis, Alabama. The man was picked up on a traffic charge and routine investigation by computer revealed that he was wanted here for burglary of the Kountry Korner.

The local angle of the case begins with being stopped for a defective tail light. When Officer Robinson saw a number of items in the car, including a TV, a check writing machine and cigarettes, he suspected burglary and brought the man to the police station for investigation. After some two hours of questioning Officers Province and Robinson released the subject because they had no report of a theft, hence no basis for a charge.

However, they took the man's name and other identification.

Next morning early they Continued on Page 8...

**ANALYSIS SALT II**  
 We are indebted to a publication of the United States Industrial Council written by Edward J. Walsh for the clearest explanation we have yet found for the terms of SALT II.

Under the terms of this agreement, both the United States and the Soviet would be limited to a total of 2,250 intercontinental ballistic missiles and manned bombers. The U.S. now has 2,100 while the Soviets would be required to reduce their arsenal by 300.

Of these 2,250, only 1,320 can be missiles which can be armed with more than one warhead. These MIRVs, multiple independently-targetable vehicles are capable of striking several different targets, and can be launched from either land or sea. Of the 1,320 permitted, only 850 can be land launched.

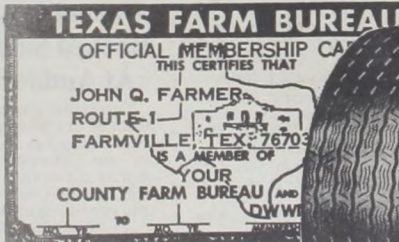

For some unknown reason the latest two versions of Soviet intercontinental ballistic missiles, the SS-19 and SS-20 are not included in restrictions imposed by SALT II. This will give the Soviets "a four-to-one advantage in missile throw-weight by 1980," according to Walsh.

Aside from the neutron bomb, development of which was cancelled by President Carter, the most important strategic weapon being developed by the U.S. has been the air-launched cruise missile. American negotiators have agreed to limit the range to 1,560 nautical miles and according to Mr. Walsh, "the range limit on the air-launched cruise missile will

**AUSTIN** — Texas Attorney General Mark White blasted the national energy policy last week, painting a gloomy picture of double-digit inflation and a continued energy crisis.

The crisis brings "economic chaos" at a level of "deeper concerns than Vietnam or Watergate," White told a Young Texas Lawyers convention in San Antonio.

The national policy has a particularly negative impact on the economic vitality of Texas, he told them, and Congress "has not dealt with us (Texas) in an even-handed fashion."

White referred to a series of rulings by the Interstate Commerce Commission which granted increases in coal freight hikes... "additional gouges," White called them.

Coal transport rates have risen from less than \$8 per ton to more than \$18 per ton.

Later this week Governor Bill Clements took advantage of authority given to him by President Jimmy Carter to announce he plans to shift up to five percent of the state's monthly gasoline allocation from low-use rural areas to metropolitan areas.

Clements is considering a plan to require some service stations in big cities to sell gasoline on weekends or not get their share of an additional 40 million gallons of fuel expected to be channeled to the big cities this month.

**Kubiak Pushes "Agrihol"**  
 If fuel continues to flow from rural to urban areas, the slack in tractor fuel tanks may be taken up by alcohol fuels, according to one state legislator.

State Rep. Dan Kubiak told a Capitol news conference Tuesday that Texas farmers will one day have "agrihol" plants on their farms and burn pure grain alcohol in their tractors and farm machinery.

Kubiak also announced he is building a pilot "agrihol" plant in Milam County to demonstrate how farmers can grow their own fuels. Irked by Clements' veto last month of a Texas A&M University alcohol fuel plant, Kubiak went to farmers and engineers in his district for financial backing for the plant.

Clements, meanwhile, submitted to Environmental Protection Agency officials a Texas plan for complying with federal clean air standards.

If it is not accepted, the state could lose millions in federal funds in highway and sewage treatment plant construction grants and face a ban on building new industrial facilities.

The plan calls for Texas to meet the Clean Air Act of 1970 guidelines through additional pollution controls on refineries, chemical and manufacturing plants and automobile emissions.

**Demos Favor Convention**  
 While Texas Republicans

will hold a presidential primary election next spring, Democrats will probably choose their delegates to the 1980 Democratic National Convention through the convention system.

The overwhelming sentiment of testimony at a Democratic Party Rules Committee hearing in Houston was that the party reject the idea of a binding presidential primary.

Only one of 21 witnesses opted for the primary: Franklin Garcia of San Antonio who said, "Let the people choose. Period."

On the eve of the Fourth of July, Republican presidential contender John Connally met in Austin with a group of 200 of the state's most powerful lobbyists.

When the group discovered a news reporter in the adjacent room, Connally's microphone was shut off and the press was effectively left out of the meeting.

Clements has also been entertaining the political movers and shakers lately trying to pay off a \$4.75 million campaign debt. Meanwhile, his 1978 opponent, former Attorney General John Hill, said he will wait until 1981 to decide whether to take on Clements again. Hill predicted Clements will only serve one term in the mansion, but some of Clements' friends are saying the same thing: they predict he will be chosen as vice president in 1980.

**Colson Bid Rejected**  
 The Texas Department of Corrections rejected a request by Watergate figure Charles Colson to bring an evangelistic crusade to Texas prisons.

Colson, one-time aide to former President Richard M.

Nixon, became a born-again Christian during his Watergate ordeal and in the last three years has taken his Prison Fellowship crusade into federal and state prisons.

Department director Jim Estelle admitted he disliked some reported Colson comments that prisons are breeding grounds for criminals, but that Texas prisons already had enough religious activity. It was "no slight to Mr. Colson," he said.

On a Biblical note of another sort, Texas Agriculture Commissioner Reagan V. Brown said grasshoppers have invaded Texas in their greatest numbers since 1958 but he is "declaring war" on them. About 1.4 million acres of Panhandle rangeland were sprayed with insecticide to stop the pests who were counted at from 10 to 18 per square yard.

ONCE THERE WAS A LITTLE SPEED LIMIT WHO WASN'T NEARLY AS MACHO AS THE BIG SPEED LIMITS. THEY LAUGHED AT HIM AND CALLED HIM A MILKTOAST, AND WORSE.

BUT ONE BIG SPEED LIMIT KEPT CRACKING UP IN ACCIDENTS. AND ANOTHER WENT BROKE BUYING GAS. AND SO IT WENT.

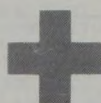

AND THE LITTLE SPEED LIMIT WENT PUTTERING RIGHT ALONG, SAVING GAS, SAVING MONEY, SAVING LIVES.

Mike Douglas says: "Give a gift from your heart."

Call Red Cross now for a blood donor appointment.

Folks who save money for rainy days will be delighted by annoying drips who didn't.

### Here's a Great Summer Recipe

Take on hot Texas sun, mix with a full measure of blue sky and add a dash of sparkling lake water (almost any Texas recreation site or even your own backyard may be substituted). Blend in a generous amount of fun and laughter and garnish with thick, juicy slices of ice-cold Texas watermelon.

Texas watermelon producers harvested 4.4 million hundredweight of the melons last year and the 1979 harvest is currently in full swing across the state, according to the Texas Department of Agriculture.

After returning to Lindsay in 1951 he was a farmer until his retirement in the early 60's because of failing health.

Survivors are his wife; three daughters, Mrs. James Bass of Fort Worth, Mrs. Jim Schindler of Pilot Point, and Sister Bernadette of Harlingen; three sons, Joseph J. of Houston, Michael H. of Denton and William A. of Dallas; five brothers, Hugo and Rufus of Lindsay, Ralph of Fort Worth, Walter of Dallas and Herbert of Arlington; a sister, Mary Louise Duffy of Gainesville; and ten grandchildren.

While the couple attended church Sunday morning, their daughters arrived, placed a "welcome home" and "happy 65th birthday" sign in the yard, guests arrived and dinner was ready for thirty five relatives and friends.

All returned to their homes Sunday evening.

Lignite coal...

**Last year, it saved the average TP&L customer \$55.00**

The price of electricity supplied by Texas Power & Light has gone up in recent years, but lignite coal has kept the increase from being much greater.

In the 1960's, natural gas, for many years the only fuel used to produce electricity at TP&L generating plants, began to rise drastically in price and supplies became uncertain. TP&L and two affiliated companies began a massive program to reduce their dependency on gas by building plants which use lower-cost lignite as fuel.

Since 1971, eight lignite-fueled generating units have been placed in operation. In 1978, about 47 per cent of TP&L's fuel requirements was supplied by lignite. For the average TP&L residential customer who used 12,435 kilowatt-hours of electricity in 1978, use of lignite to produce that electricity meant a saving of \$55.00.

**Have Papers When Applying for SS Disability Benefits**

Applicants for social security disability benefits can speed a decision on their claims if they're prepared when they apply, according to Gus Jones, Social Security District Manager in Sherman.

"Bring the names, addresses and telephone numbers of the doctors who have treated you for your disability, the names and addresses of any hospital, clinic or other agency where you've received treatment so that we may have a complete picture of your condition," Jones advised.

He also stated that the dates and types of work applicants have done for the 15 years before becoming disabled will be described in the disability application.

All social security applicants are expected to have their social security cards and proof of age as well as those of their family members eligible for dependents' benefits with them while applying for benefits.

Social security disability benefits are payable to those who have worked long enough and recently enough under the program and are suffering from a medically-provable disability so severe as to prevent them from engaging in any substantial gainful activity for a year or more or to result in untimely death. Although no such benefits are payable for the first five full months of disability (the waiting period), those who believed they might qualify are urged to apply as soon as possible to allow for processing of their application during the waiting period.

Applications may be made in person at the Sherman Social Security Office located at 810 North Travis or by telephoning 665-0770. This is a direct line to the Sherman office. Office hours are from 9:00 a.m. to 4:45 p.m., Monday through Friday, except national holidays.

A representative may be contacted in Gainesville each Tuesday and Thursday from 9:30 a.m. to 12 noon and 12:45 p.m. to 2:00 p.m. at the Federal Building.

The bridal bouquet was a cascade of white, pink and yellow roses, with gypsophyllia and lemon leaf atop a Bible.

## Back to Basics

By Principal A. Winn  
It is time that we return to basics; basics in the classroom and basics in the home. Basics in the classroom is fairly well understood to be reading, writing, and arithmetic. Basics in the home means something a little more complicated.

Several years ago public schools did a very good job of teaching the basics. They did a good job for several reasons. First of all, educators realized that before students could begin to understand science, history and other things, they must be able to read well. Classrooms were sometimes crowded, with several classes in one room, and teaching aids were almost non-existent, yet children learned. Perhaps this was due in large measure to the second reason; parents supported teachers. Children who misbehaved were punished more severely by parents than by the teacher.

Third, students were held responsible for their own conduct and their own learning. The teacher was not blamed for the student's not learning; he was. If a baby never is allowed to take a step without holding on to his mother's hand he will never learn to walk. Several studies show that one of the major reasons that students fail the first year in college is that they have never had to be responsible for getting to class, for getting their work done, etc., and suddenly it is thrust on them in college and they just cannot cope.

Parents seem to have abdicated their role as parents and do nothing to try to bring about a desired behavior in their child. Parents expect the school to make the child dress tastefully, keep up personal good grooming habits, and do the assigned work without the parent having to get involved. Sometimes parents ask the teacher or administrator to do it because they cannot.

Parents sometimes are afraid to make their child do something for fear of losing his love. Tests show that this is unfounded fear for children expect and want discipline. This does not mean that the parent is to beat the child, only that he is to make the child do whatever he wishes the child to do.

Parents should not always take what their child says as being the whole truth and nothing but the truth. A good example is a seven year old riding a bus for the first time. He came home saying, "Gee it sure is exciting riding the bus. We was goin' down this road real fast and hit a tree and broke the mirror. We stopped and fixed it and went some more and did it again." The same incident was reported by the driver to the superintendent, "The limbs along my route sure do need trimming. Twice today they knocked my mirror out of adjustment and I had to stop and adjust it." Neither of them had lied, but the stories were quite different.

Parents must stop viewing teachers and administrators

as the enemy and start viewing them as allies in the education of their children.

If schools do not return to basics and retain those students who do not attain the goal set for that grade, the state or the federal government or both will ad-

## Fuhrmanns Enjoy Carolina Vacation

Mr. and Mrs. Val Fuhrmann vacationed in North Carolina this year, spending most of the time in Pinehurst with their son and family, Fred and Denise Fuhrmann and 8 1/2 month old Scott.

Best part of the trip was getting re-acquainted with

the infant grandson. Together the two couples toured the Outer Banks, traveling by car and ferry. Some of the highlights were the Cape Hatteras Lighthouse tallest on the American Coast, and the Wright Brothers Memorial at Kitty Hawk, site of the historic flight. In Pinehurst they also saw hang gliders in action on the sand dunes at Nags Head; also the

Clarendon Gardens, unusual shops, the World Golf Hall of Fame, President Eisenhower's golf cart, his favorite putter; beautiful scenery, tall pine trees, rolling hills and stately homes. Pinehurst, North Carolina, the golf capital of the world has eleven country clubs in the immediate area. Pinehurst Country Club, where Fred Fuhrmann is on the

Golf Professional Staff, has six 18-hole championship courses. Their world famous No. 2 course is the site of the Annual Colgate Hall of Fame Classic. Fred is currently training as Assistant Pro at the newly-opened No. 6 course, and is enrolled in the PGA apprentice program.

## Growing Reds Take Top Tourney Prize

Growing's Reds, sponsors of the baseball tournament last weekend put a firm claim on the champ trophy by clobbering Davis 12-0 and Bowie won the consolation prize in a 14-13 squeaker over Ardmore.

As the final event of the tourney the Reds faced all stars from the other teams and went down in their first defeat of the season. They were like a completely different team in biting the dust 16-4. Following the loss their record was still a very impressive 14-1.

Playing Davis for the big trophy the Reds had things completely their way. They did the job by running up a lead of 10 or more in five innings. Phil Wolf was hot as the pitcher, allowing only one hit and no walks while striking out six. Meanwhile the Davis hurlers gave up 9 hits and 5 walks and fanned 8. Growing hitters were Brian Bednorz 2 doubles, Ken Hartman a double and a single, Ricky Winn 2 singles, Todd Richey and Phil Wolf each a double, Monte Endres a single.

In their next contest the situation was reversed with the All Stars banged out a homer as a starter and kept on slugging. Todd Richey, Monte Endres and Mike Hesse allowed a total of 13 hits and 7 walks and fanned 6, whereas the Stars gave up 4 hits and 3 walks and struck out 6. Red hitters were Brian Herr, Monte Endres, Todd Richey and Craig Walter-scheid.

## News Notes From the Library

Summer Story Hour at the Muenster Public Library for incoming first and second graders ended last week with a treat from the Friends of the Library. Mrs. Dick Ferber conducted the four Tuesday sessions and was assisted by Mrs. Clinton Endres, Mrs. Robert McDaniel and Meredith. Each Tuesday two or three six to twenty minutes films were shown along with sing-alongs, stories, finger plays, and nature study. Attendance for the month's program was over one-hundred.

The summer reading program continues until August 9. Readers are reminded to list titles and authors of at least ten books read on their grade level and bring the lists to Muenster Public Library at the end of the program. Certificates from State Library will be issued as well as a coupon for a McDonald treat. A circulation of 1,300 books in June shows that many are already participating in the program. New Books continue to be shelved, such as the Alfred Hitchcock's mysteries and Trixie Belden series. The library staff is anxious to serve you. Library Hours — Tuesdays and Thursdays 8:30 to 5:00, Wednesdays 2:30 to 5:30.

The Clifford Hudspeth Abode is always a very active busy place but here the last week or so things have been humming there:

Mr. and Mrs. Buck Miller of Elgin, Okla., spent Sunday night June 24 with them and Monday night June 25 Cliffords' sister Mrs. Barbara Phillips of Wichita Falls was their overnight guest.

On Friday June 29 the grandchildren started coming in—Pat, Tim and Colin O'Brien, sons of Mr. and Mrs. Gerald O'Brien of Wichita Falls came to spend a week with grandma and grandpa.

A granddaughter—Amanda Wood, daughter of Mr. and Mrs. Raymond Wood of Wichita Falls, and her boyfriend Jackie James also arrived on Friday June 29 to spend the weekend with Merle and Cliff. Amanda and Jackie are to be married Friday July 6. Amanda's mother is the former Carolyn Hudspeth.

Mrs. Shelia (Ellzey) Lamoine and son Eric of Houston visited with grandmothers—Mmes. Decie Ellzey and Ti Cook from Monday June 25 to Wednesday June 27. Shelia also visited with Mollie Moore while here.

The Forestburg United Methodist Church had its monthly Fellowship Supper and official Board Meeting Wednesday night June 27. A nice group attended and much good food "attended also."

Willie Sandusky celebrated his birthday Wednesday p.m.

His mother, Faith, honored him with a family get-together.

Mr. and Mrs. Kenneth Wilkerson and granddaughter Heather of Wichita Falls and Mr. and Mrs. Chris McGee and children of Midway spent Sunday afternoon visiting with Vera Mae McGee.

Saturday afternoon Perryman and I "used up" some of that precious stuff—gasoline, to drive to Argyle to visit with Price and Elaine Truitt. We also enjoyed a lovely fish supper later in the evening. Other guests of the Truitt's were Mr. and Mrs. George Hasting of Denton.

Sunday July 1 the folks from the Saint Jo and Forestburg United Methodist Churches had their annual combination church services and picnic at the Clifford Hudspeth lake. A nice group of folks attended. As usual, as at any Methodist doing, there sure was alot of good food for all to enjoy.

Also in the same hospital are Mmes. Eula Moore and Naomi Scott.

News these days is almost as hard to come by as a tank of gasoline. Folks are just busy to take time to share their news items with us. Perhaps this heat wave we are having is taking its toll also.

This part of North Texas is certainly having summer time weather—sure is hot and humid hereabouts. While living in Florida many years ago a native once told me that no one should have to live there in the summer. Well, I've almost come to the same conclusion about these parts—just gets warmish here in the summer.

Mms. Marion Sockwell and Vera Mae McGee are celebrating their birthday this month—Marion's comes up on Friday 13th and Vera Mae on the 14th.

Am constantly amused by the surveys taken by our government officials—Federal, State, City and County. The recent one taken in Montague County, concerning the grasshopper "invasion", has many of us shaking our heads in utter unbelief. They came up with a ridiculous estimation of so many "hoppers" per square yard-mile-or something. We can find that many on our carport and patio alone with many hundreds more in our yard. Sure don't know where they took their survey but it sure wasn't in the Forestburg area.

## Fire Destroys Car for Nick Demshocks

Mrs. Nick Demshock, the former Joan Fisher and daughter of the Earl Fishers, wrote recently to tell of a close call she had on June 6 after a PTA meeting. A resident of Lutherville, Maryland she was installed as a PTA officer during the meeting.

As she entered her driveway, the dash lights of her car flickered. Stopping near the kitchen door to tell her husband, she returned to find the car totally engulfed in flames. She had been out of the car, miraculously, for only moments.

Three fire companies responded quickly, but the only things not damaged on the car were the bumpers and engine. Luckily the gas tank did not explode and their brick home sustained only minor damage.

Mrs. Demshock also mentioned meeting the Butch Fisher family when they were touring New England and were guests of Rosemary and Mike Lardner.

The moon affects tide—also the untied.

**What's the Difference? Wash. D.C., London, Moscow**

Where's the best place to buy your weekly groceries? Not in Moscow, according to an economic-comparison chart just released by the National Federal of Independent Business (NFIB). The tricolor poster — comparing the standards of living in Washington, D.C., London, and Moscow — indicates that the U.S. city is your best bet. Americans would work 12.5 hours and Britains 21.4 hours to buy the weekly groceries included in a Soviet diet for a family of four. Soviets, however, toil 42.3 hours to buy the same items.

The above example is just one of the comparisons found on the 1979 edition of the poster, "What's the Difference? Washington, D.C., London, Moscow." The publication compares 19 consumer products in the three cities in terms of work time — rather than rubles, pounds, or dollars — because of the fluctuation of currencies on the world market.

Prices, surveyed in March, 1979, were converted into work time bases on the hourly take-home pay in January for factory workers: U.S., \$4.61; Britain, \$3.25; and Russia, \$1.38. Health insurance premiums, income and Social Security taxes were deducted from U.S. and British wages, while unemployment insurance was deducted from British wages only. Family government allowances given in Britain and the U.S.S.R. were added for a family of four.

Despite inflation in America, the U.S. comes out on top overall. For instance, if a citizen in the U.S. capital needs to drive to work, he or she can buy a middle-sized car for 4.1 monthly paychecks. A Londoner spends 8.5 months (based on a 44.2-hour workweek compared with the U.S. and U.S.S.R. equivalents of a 40.6-hour workweek). The price tag on a comparable car in Moscow would confiscate 35 months of pay from the average factory worker there.

Some items, such as lipstick and panty hose, could not be found by surveyors in Moscow in any state retail store at the time of the study. But the poster does include a 72-minute lipstick along with a 427-minute pair of panty hose in Moscow, taken a previous study. Those times compare with 22 minutes for panty hose and 26 minutes for lipstick in the U.S.

Some items were not included in the study, however, because they weren't avail-

able in all cities surveyed. For instance, frozen and convenience foods, prevalent items in many Western households, are not widely available in Moscow.

In addition to commodity-cost comparisons the poster includes statistics from government sources on such items as energy resources, productivity, trade, and transportation. It even points out the U.S. has over 10 times as many telephones as the Soviet Union per capita and almost twice as many as Great Britain.

The comparative-pricing statistics come from the research arm of Radio Liberty, the U.S. government-supported station in Munich, West Germany, which broadcasts to millions of listeners throughout the Soviet Union. NFIB and the AFL-CIO requested the study and funded the research.

Copies of the poster are available by writing to the Education Department of NFIB, 150 West 20th Ave., San Mateo, CA 94403. NFIB is a nonprofit, nonpartisan organization representing the legislative viewpoint of small and independent business. With more than 581,000 members nationwide, it has the largest individual membership of any business organization in the United States.

**Price Increased on Recycle Aluminum**

The local Pearl Aluminum Can Recycling Center now is paying 23 cents per pound for all-aluminum beverage cans, according to Bob Vogel, general manager of Cooke County Distributing Co., who said that the 3 cents per pound increase will make recycling more attractive than ever.

Vogel said that the number of persons recycling has gone up steadily since the program started in 1973, and the higher price is expected to attract more cooperation.

Collectors can receive cash for their cans Saturday mornings 8:30 to 11:30 at the Pearl Distributorship, 624 East Third St. It takes 23 cans to make a pound.

Vogel said that Pearl has more than 100 collection centers in the state, each shipping the salvage cans to Pearl at San Antonio, where they are shredded or boxed and shipped to smelters. The recycled aluminum is sent to Pearl and used in making new containers. To date more than a billion cans have been recycled by Pearl and total payments to collectors have exceeded \$8 million.

More than an environmental campaign, the Pearl recycling program provides hundreds of jobs, returns millions of dollars to the economy, recovers valuable metal from waste and saves 95% of the energy needed to make aluminum from virgin ore.

**Stenholm Opposes Windfall Profits Tax on Crude Oil**

Congressman Charles W. Stenholm indicated that he voted against the Crude Oil Windfall Profits Tax Act of 1979, because it was unfair to the royalty owner and the independent producer. The bill creates a complicated new tax law that will require additional accounting each month. In most cases, the land owner is the royalty owner, of which there are approximately 28,000 in the 17th District. The royalty owner will pay their share of the windfall profits tax. To tax one specific group of people in this manner is inconsistent with any basic principle of fairness.

The independent producer drill 90 percent of the wildcat wells and finds 75 percent of the new fields. Thus, accounting for more than half of all the oil and gas reserves discovered. During the last five years, they have re-invested more than 100 percent of their wellhead revenues in exploration. These funds come from outside private investors and borrowed capital. No outside investor would put money into a wildcat well, knowing that if a discovery was made, part of the revenue would be taxed-away. The whole idea of crude oil price decontrol is to stimulate new production incentives. However, the windfall profits tax, counteracts these incentives with respect to the independent producer. Congress recently voted to use taxpayer's money for synthetic fuel development. Why then, under the guise of a windfall profits tax, are we attempting to take revenues from the independent producer, who presently is investing more than 100 percent of their wellhead revenues in search of new reservoirs?

Congressman Stenholm further states that the bill will now go to the Senate Finance Committee.

**Basics...**

minister competency tests to make sure that students have attained a minimum competency before passing on to a higher grade. This means that the local school and people lose some more control of their school. Much local control has already been lost; we can ill afford to lose much more.

Parents must return to basic discipline and establish basic rules that conform to the rules established by the local board of trustees and not condone their child's breaking those rules. Children must also be brought back to basic courtesy. Children of today are discourteous to everyone including their parents.

Schools must get back to basics but more than that, parents must get back basics. Only in this way can the goal of education for all be reached.
