

# THE BENJAMIN POST

A WEEKLY PUBLICATION PURPORTING TO PRESENT THE FACTS AS THEY OCCUR AND DEDICATED TO THE LIVESTOCK AND AGRICULTURAL INDUSTRIES OF KNOX COUNTY AND ALL WEST TEXAS

VOLUME 27

BENJAMIN, KNOX COUNTY, TEXAS, MAY 18, 1934.

NUMBER 48

## SPLINTER

A merry heart maketh a cheerful countenance.—Prov.

Volume I, Number 1 of the Roaring Springs Reporter comes to our desk this week. It is edited by B. M. Nelson, assisted by K. C. Thatcher. Editor Nelson is a nephew of Geo. Nelson of this place. The Post wishes Messers Nelson and Thatcher the very best of luck with their new publication.

Having been kinda busy the past few days, so much so that we could not take time off, we have had several opportunities to go fishing. A few more warm days like the last two or three and the temptation is going to be too great.

The park at the Lake is daily becoming more beautiful as the plants there put on their foliage. Considerable trouble and expense has been undergone to make the park what it now is. The city does not charge admittance but furnishes free water, benches, tables, shades and places to cook. But those taking advantage of the park are becoming careless about cleaning up before they leave. It is not asking too much to ask those who picnic there place their paper and refuse in containers placed in the park for that purpose. The average citizen should be glad to do that much. But unfortunately there are some who, if you were to give them all of heaven, they would want part of hell for a hogpen.

Angelo is entertaining the West Texas Chamber of Commerce this week. Having on several occasions attended these annual affairs as a member of some band organization, we finally figured out what it was all about. The bands go there to blow louder than the blowers. And, of course, many of the world's gravest problems are settled there although the question of which came first, the chicken or the egg, is still controversial. Plainview is host next year.

Mr. and Mrs. B. W. Snody and Mrs. W. T. Ward were in Ft. Worth this week.

Roy and Burl Snody and J. C. Veal were business visitors in Wichita Falls Monday.

E. L. Covey was in Benjamin Tuesday in the interest of his campaign for county judge.

Perry Moore of Seymour was in Benjamin this week.

## TEVAS BRANCH FORD MOTORS INCREASE WORKING FORCE

The steady increase in sales of Ford V-8 cars and trucks has recently made possible the addition of several hundred men to the large force already employed in the Dallas branch of the Ford Motor Company, according to Mr. O. D. Propps, local Ford dealer.

The Dallas plant is assembling cars and trucks for dealers throughout Texas and Oklahoma and production has been steadily increased to meet the growing demand, resulting in over a 50 percent increase in employment since the plant opened in February.

Mr. Propps expressed considerable pleasure at the thought that sales of Ford cars and trucks in the Benjamin territory had contributed to this improvement and stated that he confidently expected even greater improvement in June and succeeding months.

## Community Committies Meet Here This Week

The community cotton committees have been meeting in the courthouse this week with the county committee and the county agent, revising the contracts as ordered by the State Board meeting at College Station. The contracts were declared to be about thirty-five percent too high by the state board. All the contracts must be submitted to the state board for approval. This is a tedious task and will consume some time.

## Baccalaureate Services Held Past Week For Seniors

The baccalaureate services for the senior class of the Benjamin high school were held Sunday at the Christian Church. Bro. J. C. Mann, former pastor of the local Methodist Church preached the sermon. There are seven members of the graduating class this year, Lois Phillips, Janis Patterson, Catherine Holmes, Omelaine Barnett, Leroy Bisbee, Lloyd Kilgore and Leon Bivins. The commencement exercises will be held tonight at the school auditorium.

## LIGHT SHOWER MONDAY BOON TO CROPS

Benjamin and vicinity received about a half inch rain Monday which was of material benefit to crops. Other parts of the county generally report heavier rainfall averaging about an inch.

Knox County farmers as a rule have their land in good shape at this season and many already have some of their crops up. Others are busy planting. Oats are ripening fast and binders are being put in shape for harvest.

Dr. Hughes of Trusett was in Benjamin Thursday on business.

P. L. Armour made a business trip to Wichita Falls the first of the week.

W. L. Salters plans to leave today for Laredo.

Fishermen returning from Lake Kemp report that they are biting fine but the most of them only bring back reports.

## FORCE OF 3,300 MEN TO WAGE WAR ON BOOTLEGGERS

Washington, May 17.—A force of 3,300 men was turned loose Thursday by the Government against repeal's illicit liquor traffic, with Secretary Morgenthau asserting "we mean business."

This policy was announced by the Treasury head at the formal creation of the Internal Revenue Bureau's new alcohol tax unit which has 1400 men in the field battling the bootleg trade and the rest of its large force collecting legal taxes.

"We are going after this illicit trade," Morgenthau said in the presence of Author J. Mellot, Kansas City attorney who heads the unit, and Capt. William R. Sayles of the navy who personally will direct the enforcement squad.

"We find the public sympathetic to our drive to stop bootlegging. With the public's co-operation we believe we will be successful."

By President Roosevelt's executive order, the new unit was created from the old Bureau of Industrial Alcohol and the Justice Department's alcoholic unit.

The Industrial Alcohol Bureau had 2,337 employees of whom 713 were regulative inspectors, or field enforcement agents, 283 permissive inspectors dealing with the legal industry and 627 storekeeper gaugers who are on duty at various distilleries.

## RHINELAND BRIDGE NEARING COMPLETION

The Rhineland Bridge, located on the Benjamin-Munday road at the Brazos crossing, is rapidly nearing completion. This is an E. R. A. project, No. 139B5-5, and is being erected with the Federal and State funds. The bridge is 700 feet in length. Steel and flooring used in its construction were moved from a point about four miles down the river to the present location. It is estimated that the job is 75 percent completed and it is expected that the bridge will be finished in the next ten days or two weeks. Four shifts of men, thirty-five to the shift are working at present. Venable Moore is the supervising engineer in charge, W. M. Ferrier is the general foreman. Plans and specifications for the structure were drawn by T. H. Dodd, formerly in construction work in federal road building in Kansas and Oklahoma. The foundation of the bridge is built to withstand twice the weight of the present capacity. The specifications are similar to those of the state department for concrete bridges. The estimated life of the bridge is placed at better than thirty years.

Grade, drainage, and topping of the Benjamin-Munday road is complete with the exception of the approaches to the bridge.

A celebration is being planned at the opening of the bridge with candidate speaking, picnicking, and a feed. County musicians are expected to furnish music.

Judge N. S. Kilgore left last week end for Wichita Falls where he is undergoing treatments for his health.

Bill Griffith of Knox City was in Benjamin the first of the week.

R. O. Peavy of Sunset was a Benjamin visitor this week. Mr. Peavy is a member of the local cotton committee in his part of the county.

Mr. and Mrs. Geln McGlothlin of Munday were in Benjamin Thursday.

D. A. Phillips who has been in Wichita Falls the past several days has returned home.

## RANGE CONDITIONS BETTER IN TEXAS

Austin, May 17.—Condition of Texas ranges and live stock improved considerably during April due to beneficial rains in most ranching area and some dry sections have received moisture since May 1, according to F. E. Finley, United States Department of Agriculture live stock statistician. Ranges improved 8 per cent during April and condition is 82 per cent of normal against 79 a year ago and 84.3 per cent the ten-year average. While the Panhandle and sections west of the Pecos River were dry on May 1, more than half of the Panhandle has had rains and should show improvement.

Cattle came out of the winter in good condition, losses were light and animals should mend rapidly with improved range feed. Calf crop prospects are good and the condition of new-born calves excellent in most instances.

Condition of sheep and goat ranges improved during April and only sections west of the Pecos River still need rain badly. Lambing is about over, but is somewhat late and the crop is below average. Screw worms are bad and many ranchmen will not dock their lambs because of this. Ranges are dry in many Western States and unless moisture is received soon a serious feed shortage will result.

## Red Cross Will Send A Man To Safety School

At a meeting of the county chapter of the American Red Cross here Wednesday, the chairman gave a report of what the local chapter had accomplished the past year. Three cars of flour and clothing were distributed in eight of the communities of the county. R. H. Ziehm, field representative outlined the work of the coming year. An educational program will be stressed with emphasis on first aid and life saving. At the meeting a motion to send a representative from the county to Eureka Springs, Arkansas, to attend a course in life saving carried. As yet no representative has been named.

Mrs. Chas. Moorhouse is chairman of the county chapter.

## POLICE BELIEVE ARREST NEAR IN GIRL'S ABDUCTION

Tucson, Ariz., May 16.—A painstaking study of the desert dungeon in which 67-year-old June Robles was kept chained 19 days was made today by authorities in the hope her kidnapers left clues which might elad to their apprehension.

Aided by sketchy descriptions furnished by June, police and sheriff's officers took up the hunt with renewed effort in the belief that arrest of one or two of the kidnapers was not far off.

Authorities also gave close attention to the anonymous airmail letter received Monday at the office of Gov. B. B. Moerur in Phoenix and which contained directions for finding June. They expressed the opinion the letter has been mailed from here to Chicago and remailed from that city.

Commissioner court met in regular session Monday and attended the routine matters that came before that body.

Onie Welch of Gilliland was in the city today on business.

## HAMILTON TO FACE JURY AT DENTON THIS WEEK

Raymond Hamilton, who escaped death in the electric chair by failure of a Dallas County jury to agree, will stand in court again Friday and hear prosecuting attorneys demand that he be sent to his death for bank robbery.

County Attorney Judge Gambrell of Denton County was in Dallas Saturday and talked to Hamilton in his death cell on the ninth floor of the jail. He said Hamilton had little to say to him and that he did not ask Hamilton if he would plead guilty.

Gambrell said a special venire was being drawn in Denton County, and that Hamilton will be arraigned on the indictment charging he robbed the Lewisville bank in Denton County of \$1,000 on April 25. Hamilton was captured a few hours later at Howe, Grayson County.

The jury that heard the case charging Hamilton with robbery of the Grand Prairie State Bank and as an habitual criminal for his previous conviction of robbery of the Carmine State Bank in Fayette County was discharged Friday by Judge Noland G. Williams when it was unable to agree on a penalty for Hamilton. The jury stood ten to two in favor of death.

After Hamilton is tried at Denton, prosecuting attorneys will be waiting for him at West, McLennan County, and at Crockett, where he is charged with murder for the killing of Major Crowson, guard, at Eastham prison farm, Houston County, when Hamilton was liberated Jan. 16 by Clyde Barrow.

## Work On Highway 16 Will Be Finished Soon

N. R. S. project 667A, which is the grade and drainage work on Highway 16 from the Haskell county line to Benjamin, is nearing completion. This job is expected to be finished within the next thirty days. R. B. Stroup and Company of Vernon are contractors on the job. There is only a few miles of the highway in Foard and Knox counties on Highway 16 that are unimproved and when completed this highway will be a surfaced road from Corpus Christi to the Oklahoma line. Foard county is voting bonds this week to buy right-of-way from the North Fork of the Wichita River, the boundary line between Knox and Foard counties, to Crowell. The amount of the bonds to be voted on is about \$6,000. The proposed route will cut the distance from Benjamin to Crowell about 1-2 miles. The present route to Crowell is 32 miles. With the exception of a preliminary survey from Benjamin to the Foard county line, nothing has been done toward improving that portion of Highway 16 in Knox although it is expected that the work on this portion of the road will be begun shortly.

## MRS. S. G. WEST HONORED WITH FORTY-TWO PARTY

Mrs. G. H. Beavers entertained Friday afternoon with a 42 party in honor of Mrs. S. G. West. The Wests are moving to Livingston, Texas, where Mr. West is connected with the CCC work as a First Lieutenant.

The house was beautifully decorated with roses. A refreshment plate was served to Mmes. Clyde Burnett, A. H. Sams, Frank Patton, C. R. E. Weaver, Oran Driver, Jay Driver, R. R. Rouse, Myrtle Bisbee, John Atterbury, Earl Sams, O. D. Propps of Benjamin and Mrs. Henry Jones of Knox City.

Harold K. Dycus, county judge and county superintendent of Archer county who is making the race for the state senate from the 23rd district, was in Benjamin Thursday in the interest of his candidacy. Mr. Dycus claims the distinction of being the only country candidate in the race. He is the son of F. E. Dycus, one of the prominent West Texas lawyers.

Jim Hughes of Vera was in Benjamin this week on business.

Hugh Cook of Gilliland was in Benjamin Thursday on business.

Mr. and Mrs. Galloway and Mrs. Alta McNider left Thursday for Austin where Mr. Galloway will attend a law school preparatory to taking the bar exam in the near future. Leroy Melton, who has been in Fort Worth attending a pharmacy school, has taken the state examination and returned home. He has not yet heard from his grades. He is the proprietor of the local drug store here.

W. P. H. McFadden of Beaumont is in Benjamin this week looking after ranching interests here. Mr. McFadden is the owner of the Mashed O ranch in Knox County as well as a large property owner in other parts of the state.

J. Lyndal Hughes was in Benjamin Saturday in the interest of his campaign for county superintendent.

T. W. Templeton returned the first of the week from Dallas and other eastern points.

A. S. Tarpley of Truscott was in town this morning.

**Kinfolks In Office**

We have at hand the final report and recommendations of the Anti-Nepotism Committee of the first called session of the 43rd Legislature and judging from the report it seems that the business of the state is run by one big family. For instance in the Highway Department there are 2009 kinfolks working and 5925 who are not related. Of this number (2009) 320 report that three in one family are on the state payroll, 72 report that 4 in one family are sucking the public tit, 22 report that 5 in one family are riding the state gravy train, 7 report that 6 in the same family have their fingers in the public till and one reports that 7 members of the family are licking their chops in anticipation of the next pay day. Now the highway department is not the only one in which kinfolks make up a large part of the payroll. In the Rush State Hospital 55 per cent are related; in the San Antonio State Hospital 40 percent are related; in the Wichita State Hospital 43 per cent are related and so on through the sixty seven departments of the state. At the Prairie View State Normal, a colored institution only seven of the employees are related and 296 are not related. That is a colored school. Draw your own conclusions.

We have no accurate record but can recall only one Knox County resident on the state payroll in Austin. As counties go Knox is an average of the state so far as population is concerned.

We feel that most Knox County citizens will agree that any business in which kinfolks are involved does not run as smoothly as one in which holding the job depends on competence and ability. Isn't it about time to clean out?

**The Attorney General's Race**

The attorney general's race is likely to be an interesting one this year. Entered in it are Senator Walter Woodward from Coleman, Wm. McGraw from Dallas, and J. F. Hair from San Antonio.

Walter Woodward is running on a platform of stricter criminal laws which would mete out the maximum penalty to all criminals convicted in the state courts. Another plank in his platform is that he is a West Texan. Had he his way, he would write the most stringent laws ever put on the statute books and wind it by saying, "This does not apply to throwing water pitchers in the Senate chambers."

William McGraw is running on his record as a prosecutor during the time he served as district attorney in Dallas County. While holding that office he made a national record for the highest percentage of maximum sentences for the cases tried. He got very few reversals and in several instances the death penalty was assessed and the defendant duly executed. Except for the case of Judge Brady, convicted of the murder of Lelia Highsmith, a stenographer at Austin, who received a sentence of two or three years in the penitentiary, he was a vicious prosecutor which disproves the theory of Walter Woodward that our laws are not stringent enough.

Then we have the candidacy of J. F. Hair to consider. Mr. Hair, also a West Texan, after 25 years in the practice of law has decided to make the race as a representative of the people. He is by no means unknown and made quite a legal reputation when he recovered a considerable amount of money for the depositors in broke state banks. Among other things he claims that there are about 100 leagues of land lost that can be reclaimed by the state for the benefit of the school funds. He says, "There are state school lands in the 97 Texas oil fields. There are 4,000 acres in the East Texas oil field. In the East Texas and Conroe fields there is enough school land to run the schools of Texas nine months pay all expenses and above that pay every school child in Texas \$25. While this is true, we fight and scheme to get up \$16 per scholastic with taxes." He says, "candidates for attorney general usually just pledge to enforce the laws on the statute books—which is required by law and amounts to nothing." Sounds similiar to some of the ideas Jim Hogg had when he was in the attorney general's office.

**The Rhineland Bridge**

There will shortly be completed a bridge across the Brazos River near the town of Rhineland. Use of the steel and flooring from the bridge which was formerly located down the river about four miles from the present site, and the assistance of Federal and State funds make the present bridge a possibility. That it is most conveniently located is no longer disputed but in the years gone by it was a bone of contention between opposing factions and meant the political graveyard of more than one local politician. But taking a Pollyanna attitude, there is a good side to the question. The growth of salt cedars has narrowed the river bed until only a comparatively short bridge is needed to span it. The county is out very little in the removal of the bridge to its present location. A fitting celebration upon completion is promised.

If you have enjoyed this edition of the Post and wish to read it weekly, just drop a line to the publishers—that is drop your name on the bottom of a check for \$1.00.

**USE AND  
 READ THE POST'S  
 WANT ADS**

RATES: 1½c per word first insertion; 1c per word each subsequent insertion. No ad taken for less than 25c.

**PROGRAM BAYLOR-KNOX WORKERS COUNCIL**

Workers meeting of Baylor-Knox Association convenes with the Gilliland Baptist Church, Tuesday, May 22nd, 1934.

10:00 a. m.—Devotional, Rev. C. J. Tucker.

10:15 a. m.—Reports from churches represented.

10:45 a. m.—The Need of Weekly Prayer Meeting in Local Churches, Rev. H. F. Gage, Benjamin.

11:15 a. m.—Sermon, Bro. Brown, Vera.

12:00—Lunch

1:30 p. m.—Devotional, Bro. Wyatt

2:00 p. m. Close Communion, Rev. J. R. Balch, Seymour.

2:45 p. m.—The Obligation of the Saved to Serve, Bro. E. M. Yeakly, Wichita Falls.

3:30 p. m.—Fellowship Service, Directed by Bro. J. H. Ewing, Red Springs.

**METHODIST CHURCH**

There will be no services at the Methodist Church at the 11 o'clock hour Sunday morning. The pastor will be away preaching the Baccalaureate sermon at Sagerton.

The regular services will be held that night and you are urged to be present. There will be the regular Sunday School services at 10 o'clock. Come to Sunday School and to the night services and bring someone with you.

Federal agents are buying 1,400,000 acres of Texas timber land for forest preserves.

Thousands of subsistence farms will be needed, says the University of Texas Bureau of Business Research, to care for workers to be forced on relief rolls if the cotton curtailment program is made permanent.

**DEPRESSION TEACHES LESSON**

Depression prices for beef cattle, hogs and dairy products taught Texas farmers one valuable lesson—the use of pit silo as an inexpensive method to save feed.

Texas with 80 colleges ranks third among the states, and its 46 junior colleges place the state second in that classification.

The dollar volume of retail sales in Texas for the first quarter of 1934 increased 40 per cent above the first three months of the previous year.

Mr. and Mrs. J. F. Waldron are in Meinerl Wells this week.

J. B. Jones returned the first of the week from Dallas.

Lee Coffman of Goree was a Benjamin visitor this week.

**VOTE FOR TOM F. HUNTER For Governor**

**Subject The Action Of The Democratic Party  
READ AND STUDY HIS PLATFORM GIVEN BELOW**

His platform includes submission of the liquor question to the people of Texas, exclusion of chain stores from other states to give individual business a chance to survive, shifting of the tax burden to those who drain the most wealth from the state, stabilization of farm market prices, voting by registration instead of poll tax, reduction of utility rates, better schools, and reorganization of the state's government with a governor's cabinet supplanting more than 100 boards and bureaus.

I confirm each and every statement of my platform of two years ago and vouch my sacred honor to the more than 220,000 voters who supported it, that they may, in all safety, with our new friends aid me for the reforms that the plain people of this state must have.

The State constitutional amendment for the repeal of prohibition shall be submitted for the edict of the people. It would be just as wrong to refuse submission of the repeal amendment now as it would have been to refuse the submission of the prohibition amendment when it adoption was sought. We shall, through, if and when the sale of liquor is permitted, make sure that the old saloon and its attending evils do not return.

Under our tax system many shameful examples of tax evasion are found. A pipe line in a depression year reported a net profit of \$20,157,000.00. That company paid in taxes (city, county state and school) \$471,000, only 2 and 3-10 per cent of its net profits. A group of utilities showing a value of \$387,000,000.00 with gross receipts for one year of \$66,000,000.00, while they paid only \$442,000 state ad valorem. These things exist while the real estate owner pays many times his proportion of the tax burden.

Our tax system has broken down. The value of our basic wealth, real estate, has been destroyed. Real estate, producing only 15 per cent of our income, pays 77 percent of our ad valorem taxes. The state ad valorem tax shall be abolished. A blended tax system shall be adopted, one that will require every person or concern to pay in proportion to his or its ability to pay. In lieu of the state ad valorem plan, a tax shall be levied upon the net earnings of the big brackets, reaching those corporate interests that do a statewide business, a tax that will require the combines to pay proportionately with the plain man.

A tax shall be levied to recapture for the benefit of the state a part of the proceeds of the sale of its natural resources outside the state to the nation and the world at large.

A select, or luxury tax, shall be levied and allocated back to the counties that the county and school ad valorem taxes may be greatly reduced.

To require the payment of a poll tax is a discrimination in favor of the well-to-do against his more unfortunate neighbors, except for a registration fee, every citizen shall have a tax-free vote.

No part of the road bond issue of the counties shall be paid by the levy of an ad valorem tax.

Reduced tax burdens and a fair price for his products is the greatest relief that can be offered for the farmer. By a sales tax on out of state produced or processed substitutes for state produced commodities our markets shall be kept open for Texas producers.

For the preservation of home ownership a plan for the redemption shall be provided. A foreclosed mortgagor shall have a reasonable time within which to redeem his property by doing equity.

The practice of a state official receiving compensation from a corporation is wrong. This practice shall be made a felony.

Our primary election laws shall be re-written. Voters shall be permitted to express first and second choice when the number of candidates for an office exceeds two, and a third choice if the number exceeds three, in order that the organized combines cannot with "bumper" candidates, set the stage for the run off.

A self-sustaining (free from any tax levy) old age pension fund or old age annuity is advisable. A required percentage of the wage, paid by the employer into a state-supervised or state-approved fund, compounded over a period of time, to which others might subscribe would provide an annuity.

The board of pardons shall remain as it is with the exception that they shall be appointed at the will of the Governor. Their purpose is to aid the Governor. If they are not in harmony, they fail in their purpose.

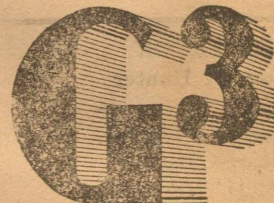

Officials that fail to keep campaign pledges or those found inefficient or for other good cause should be removed. Our present plan for removal is not sufficient. The recall shall be authorized.

Governmental influence and control by political machines and by corporation paid lobbyists shall be prohibited.

Let us show you

**Have You Seen the Frigidaire '34?**

End your refrigeration worries the modern electrical way! The safe preservation of foods, according to food chemists and medical authorities, require a temperature below 50 degrees... constantly maintained.

Modern Electrical Refrigeration assures this necessary low temperature... automatically. When the temperature in your Electric Refrigerator rises to 50 degrees, the freezing unit is automatically turned on... when it has been brought down to the correct level, the unit automatically switches off.

Moderate first cost and low operating expense are added considerations suggesting the immediate purchase of a new model Frigidaire.

The Frigidaire '34 operates quietly and with amazingly small amount of current, has automatic ice tray release, automatic defrosting and many other important features.

This is the "Electrical Age." A Frigidaire will be another step to your All-Electric Kitchen.

Your increased use of electric service is billed on a surprisingly low rate schedule and adds only a small amount to your total bill.

**Itinery of Jewell Faulkner, Home Demonstration agent, for the 4th week in May**

Monday—Office  
Tuesday—All day meeting Lonestar, Mrs. Trainhams Foundation Patterns, Vera girls.  
Wednesday—Goree girls, visit demonstrators.  
Thursday—Truscott girls, Expansion work.  
Friday—Monday, Visit demonstrators.  
Saturday—Judge 4-H bedrooms.

**Knox County Home Demonstration Club Women Attend One Day Short Course at Denton**

Several Home Demonstration club women plan to attend the one day short course at Denton, Friday, May 18. Exhibits of Hooked rugs, American Cottage and Processed Cheese will be featured at this meeting. A very interesting and instructive program has been arranged and those attending are sure to get a great deal of help from this meeting.

**4-H Bedroom Contest to Colse Saturday, May 26th.**

The final judging of the 4-H bedrooms that have been improved by the bedroom demonstrators in each of the 4-H clubs will be Saturday, May 26.

These bedrooms were judged in January before any improvements were made. The principle merits that these rooms are judged are on—getting the most interesting and pleasing results at a small cost as possible and having a room that is comfortable and easily cleaned in the end.

Each of these rooms must have 5 groups of furniture in them, which consist of a sleeping unit, study unit, dressing unit, storage unit and a bathing unit if there is not a bathroom in the house. With the room organized in this manner each girl will have one which will meet all her needs.

The girl who is judged for first place in the county will receive a trip to College Station July 30 to August 3 to the Farmers' Short Course. Her room will also be judged by the district judge on June 13. From the district winners the State winners are selected and announced at the Annual Bedroom Banquet at the Short Course.

**Wardrobe Built at Small Cost**

"I feel sure I will be able to save at least 5 miles a month when I get closet completed and my what a relief it will be to have all my clothes organized in one place and not have to run all over the house," stated Mrs. R. M. Almonrode, class 1, wardrobe demonstrator in the Gillespie Home Demonstration club.

"This closet is 4 1-2x5 1-2 feet. I have used scrap lumber to build the frame. The inside of the closet is lined with heavy cardboard boxes and then papered with the plain side of the wall paper turned out. This paper was left from papering my bedroom. I plan to paint the shelves ivory as I have some ivory paint on hand."

"I think I will just park myself in this clothes closet, I will be so proud of it," Mrs. Almonrode further stated.

**Foundation Pattern Valuable**

"I don't believe I would take \$200 and be without my foundation pattern," said Mrs. W. M. Taylor, Hefner Home Demonstration club. "I have found this pattern most useful in my sewing and I am sure I have much better fitting clothes since I started using it."

There has been nearly 200 of these patterns made yet many others will be made before the year is over.

Austin, May 17.—Make sure that your child is immune from diphtheria warns Dr. John W. Brown, State Health Officer. Children need not have this disease if proper steps are taken and these are very simple.

If parents would have their family physician administer toxoid to their child as soon after it reaches the age of six months as possible, much suffering and many deaths could be prevented.

The administering of toxoid is a very simple procedure and causes the child very little or no discomfort and there is an interval of three weeks between doses. In approximately ninety per cent of the children receiving toxoid, there will be established a life time immunity to this disease.

TO BE SURE. Four to six months after the final dose of toxoid, the child should be Schick tested so that parents will know definitely whether their child is immune. The test consists of just a few drops of diphtheria toxin between the layers of the skin. If not there will appear redness at the sight of the test that reaches its height the third or fourth day.

**BENJAMIN, TEXAS**

**5 Six-Footers... and not a cramp in a Carload!**

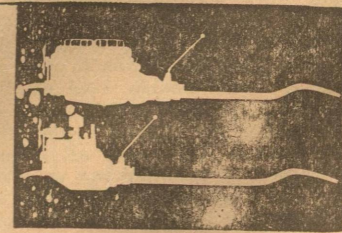

**FIVE** big men can relax in utter comfort on the deep cushions of the Ford V-8. Wide seats keep elbows out of ribs. Ample leg room keeps legs from being cramped.

Why? Because Ford measures roominess in terms of *usable* body room. *Not* in terms of the distance between bumpers, which means *nothing* when you come to analyze it.

The Ford V-8's very engine construction gives you more body room, as the diagram explains. Cylinders are "doubled-up" saving space, not strung along in a line to waste it.

See how much less space is occupied by the V-8 engine as compared with the ordinary "six" or "eight." Less space for the engine means more space for the passengers.

The Ford V-8 front seat is adjustable. It quickly and *easily* adapts itself to a six-foot-two husband or a five-foot-two wife. It ends forever that source of strife.

Before you buy *any* car at *any* price, drive the Ford V-8.

**CHIEF FEATURES BANKHEAD ACT EXPLAINED BY AAA**

College Station, May 17—The administration of the Bankhead Act restricting American cotton production this year to not more than 10 million bales is to be handled in the counties by the county cotton production associations, according to information received by the Texas A and M College Extension Service from Washington. Advance notices indicate that Texas has been allotted a 1934 production of 3,091,200 bales which may be ginned and sold tax free. All in excess of this must pay a tax at time of sale of 50 percent of the average central market price for 7-8 inch middling as proclaimed by the Secretary of Agriculture from time to time, based on spot market quotations. At no time can the tax be less than 5 cents per pound.

The provisions of the Act are operative for the cotton year June 1, 1934 to May 31, 1935 but may be extend-

ed to the next cotton year by Presidential proclamation if two-thirds of the cotton growers approve. Every producer of cotton is called upon to apply to his county cotton production control association for tax exemption certificates for his individual allotment. To date the county agent has not received tax exemption certificate. As far as possible signers of voluntary cotton reduction contracts will be given the same allotments as indicated in their contracts, but these may be raised or lowered, according to allotments assigned the county by the United States Department of Agriculture.

The Texas allotment is based on the ratio between the average five year production 1928-32 to the average national production for this period. Not less than 90 percent of the State allotment is to be allotted to the counties, the remainder being reserved for necessary adjustments to take care of special cases. Allowance is to be made for crop failure in counties where it can be established that the failure is due to an unusual cause. Washington advices point out that in some sections floods and drouths are not unusual. The United States Department of Agriculture has a cotton history of every county for guidance in deciding where special adjustments should be made.

The first duty of every producer under the law is to apply for bale tags for all cotton produced prior to this season now in possession of the farmer. As soon as county production control associations have the forms the farmer should apply for exemption certificates for his allotted cotton for 1934-35. The final date for application for these certificates has not yet been determined. Every bale of American cotton entering trade channels in the cotton year 1934-35 must have a bale tag which the farmer may obtain either by surrendering his exemption certificate or by paying the tax.

The amount of the tax is determined by the tax in effect at the time the cotton is ginned regardless of when it is sold. If stored and held for a year or more it must still pay the tax.

Cotton of 1 1-2 inch staple length or longer is exempt from the tax but the producer of such cotton must first prove his point before exemption is granted. Experiment Station cotton is also exempted from the tax.

The signers of voluntary reduction contracts stand to benefit under the Bankhead Act, the Agricultural Adjustment Administration points out, because these producers will receive their land rental and parity payments in addition to the expected increase in cotton price on the amount sold.

The interests of share croppers and tenants are to be protected in the making of allotments and issuing of exemption certificates, it is promised by the Administration.

Contract signers who violate their contracts are to have their exemption certificates revoked, according to the provisions of the Act.

No allotments are to be made under the Bankhead Act until all producers have applied to their county cotton committees giving their production figures and asking for exemption certificates. The collection of the tax is to be in charge of the Bureau of Internal Revenue, and is to be collected as prescribed by them at time of sale.

**SUNDAY DINNER SUGGESTIONS**

BY ANN PAGE

The tender cuts of beef and lamb are relatively expensive just now but veal, pork and the forequarter cuts of beef are still at low budget levels. These meats require long slow cooking to be at their best. Fish is plentiful and fairly cheap.

Green peas are lower than in months. Asparagus is plentiful, as are also beets, carrots, cabbage and spinach.

Pineapples are plentiful, strawberries are cheap and very good and the first cherries are in market. Cantaloupe and honeydew are becoming fairly plentiful and reasonably priced.

The Quaker Maid suggests the following menus:

**Low Cost Dinner**

Corned Beef and Cabbage  
Boiled Potatoes  
Bread and Butter  
Cherry Whip

Tea or Coffee Milk

**Medium Cost Dinner**

Veal Cutlet French Fried Potatoes  
Glazed Carrots  
Bread and Butter  
Rhubarb and Strawberry Pie  
Coffee Milk

**Very Special Dinner**

Cantaloupe  
Roast Veal Creamed Potatoes  
Green Peas  
Lettuce Russian Dressing

**FEDERAL RELIEF HELPS MANY TO SELF-SUPPORT**

Washington, May 18.—Cecil Allen of Jasper County, Missouri, with a wife and ten small children, found the road to rehabilitation on a farm which the local relief administration ernted for them at \$2 a month, and now the Federal relief administration is pointing to them as an example that it hopes will be multiplied some hundred thousand times in other States.

The oldest Allen child is now 15. The tenth child was about to be born, and the family was being evicted from their home in Joplin, a year ago, when the relief office found them. To cut off their last source of healthful food, the family cow had gone dry for lack of fodder.

Two dollars a month from the relief administration persuaded the owner of a 40-acre tract to let Allen work the land, but there was no house. Three tents were put up by the relief workers, one of them with board walls and floor. With a team loaned by his brother, Allen worked the tillable portions of the land in garden truck and corn. After feeding 50 chickens which the relief administration provided, he had more than enough corn for his cow, and managed for a second one on credit. A second brother loaned him two pigs who fattened on teh remainder of the corn. Mrs. Allen canned 500 quarts of garden produce.

The three tents were replaced by a three-room house which the relief administration bought in the fall

for \$20. Allen moved it to his land and rebuilt it with \$75 worth of relief-bought material. It is now a good home, and is flanked by his newly built cellar and well and large cowshed made of logs.

Last winter, as in pre-depression days, Allen was able to take care of his wife and ten children without direct relief, obtaining a small amount of cash weekly by work on a CWA project. His oldest girl was placed in highschool in a nearby town. She and the other nine are rosy-cheeked and healthy for the first time in years.

The case is one of a number reported to Mrs. Ellen S. Woodward, Director of Women's Work in the FERA, by Mrs. Charley Tidd Cole, Director of Women's Work for the Missouri Relief Administration.

"There are hundreds of thousands of farm families who need a lift more or less like the Allen's received," Mrs. Woodward said. "Each case may need different treatment. Our instructions are to get the job done, whatever it takes, within the limits of our financial resources."

When Lee D'Aubin of Joplin unloaded two and a half barrels of cucumber pickles at the warehouse of the local relief administration in Joplin not long ago, it was in repayment of seed and groceries which had enabled D'Aubin to make those pickles. On top of paying his obligation to the relief administration, he also paid part of the interest on his farm mortgage and all of the back taxes that had been delinquent for several years according to the report made by Mrs. Cole, who quoted the

case a sone of a number exemplifying the varied means in which destitute families may make repayment after they have been helped to become self-sustaining, and thereby removed from the relief load.

During the winter of 1933 groceries were furnished D'Aubion, for himself, wife and two small children, but now they are supplied with canned and dried food of their own production, and with feed for their team and their cow. Out of the \$13.50 a week which D'Aubion was paid on a CWA job, they saved \$10 a week.

A second government agency has entered into the case with the refinancing of the mortgage on the D'Aubion's 20 acer farm.

**84-MILES AN HOUR TO A SNAIL'S PACE RECORD OF SPEEDER**

Shreveport, La., May 17.—Twice arrested today on charges of speeding, Sam Farrow, 42, Longview, Texas, left town at moderate traveling speed in his automobile.

On the first hailing Farrow went into city court in the care of a policeman who said he was going at 52 miles an hour. He posted a \$15 bond.

About an hour later the same officer said Farrow passed him and waved at him at 84 miles an hour. The officer gave pursuit and overtook Farrow with a flat tire.

Farrow returned to court and was required to post a \$50 bond.

On his third time out Farrow used the snail route.

Mr. and Mrs. A. C. McGlothlin and family from San Angelo spent the week end in Benjamin visiting relatives and friends. They were accompanied on their return by Miss Emma Jane Alexander, who is a sister to Mrs. McGlothlin.

F. H. Propps of Gilliland was in Benjamin Tuesday on business.
