Wheat Harvest Nearly Done

With the 1940 harvest season practically over, it was estimated today that the current crop will run around 1,800,000 bushels—a figure which was generally accepted by grain men and farmers before the harvest started. Very little wheat has been shipped from Hereford this season and warehouses over this territory are filled to capacity with 1940 wheat.

The County Agent's office reported that 350 government loans has been made so far this season, covering approximately 600,000 bushels of wheat. However, a much greater amount of wheat is expected to go into the loan program, which is higher than the current cash market. Complete figures on production and loans will be released as soon as the work is completed.

Meanwhile, a few scattered loads of wheat are still coming into the elevators, but after Saturday they are expected to be rare.

For Congress

R. V. CONVERSE, above, of Spearman is a candidate for U. S. Congress from this district. He was in Hereford Tuesday shaking hands and getting acquainted with the voters.

R. V. Converse Places Platform Before Voters

R. V. Converse of Spearman, candidate for Congress, has authorized The Brand to announce his candidacy. His announcement follows:

MY PLATFORM When a candidate solicits the support of the voters, I believe he should set out what he stands for and what he expects to try to accomplish if elected. The following is a brief summary of the questions that are important at this time: *The Democratic party has brought many beneficial things to the people of this nation and started others that were stopped by bad administration. I am a Democrat, and will work for Democratic principles. I believe in a government of the people, for the people, and by the people, and am opposed to the encroachment of the government on the liberties and rights of the people.

Our President has said "I found 1-3 of our population ill-fed, ill-clothed, and ill-housed" in the richest of all countries. This is a deplorable condition and must be remedied, or we will have disorder and perhaps serious trouble as foreign agents find a fertile field among the underprivileged in which they spread their nefarious schemes of disloyalty.

I endorse the CCC camps, the NYA and all government setups that help our boys and girls grow into good citizens, provide them with a good education, and have the means to provide themselves a living.

I am a farmer, live on my own farm, and earn my living from farming and stock-raising, and know exactly how the farm program affects the farmer. I have been called into consultation many times by the farm leaders of the state, as well as Marvin Jones and farm leaders at Washington, and several of my recommendations have been written into the law. Mr. Lindsey will be in the county a short time only, and if you are interested in getting rid of your dogs you should report them immediately, the office advises.

Peculiar Job Open; Hard Work, No Pay

Wanted: Several workers. Work is hard and there will be no monetary payment.

That's just about how an ad would read if written right now by Beryl Elliston, Sank Ramey and E. B. Posey and others who are working each night in the Vocational Study rooms of the High School in preparation for the County Fair, exhibits from which will be shown in Amarillo and perhaps in other fairs.

At present the group is building wheat for displays. Due to lack of assistance, they state that the stalks are getting brittle—and besides, there are other crops which need attention immediately.

"We have already collected a nice assortment for display, and if anyone ever needed help, we need it now. We feel like the fair belongs to everyone and we will certainly appreciate some volunteers," they said.

Time Now For Transfers To Other Schools

Transfer time is here again. Supt. Knox Kinard and Judge A. J. Schroeter are urging that all parents whose children should be transferred appear before the County Judge and make application for such transfer. These transfers may be accepted to and including August 1, 1940.

Children may be transferred to adjoining school districts if their grades are not taught within the district in which they reside, or they may be transferred to the nearest high school if no high school is taught within their district. Rural school students attending high school for the first time must be transferred to the Hereford Independent School District or to another school district if the residence of such child is nearer another high school than the Hereford High School.

With few exceptions all grade school students whose grades are not taught within their district must also transfer to the school that they desire to attend in 1940 and 1941.

Parents are urged to make the transfer of their children at the earliest possible date.

The State Game Department is again making plans to rescue millions of them. Last year a total of 1,758,247 bass, crappie, bream and catfish were rescued by state hatchery employees and game wardens.

While the unusually abundant rains this year probably will prevent some lakes and streams from drying up during the hot months, the Game Department will be forced to rescue many fish. These are transported to the nearest stream of lake in which it is known the water supply is constant and are placed in those waters with as much care as the more than 5,000,000 fish raised in the state hatcheries.

Many states are now supporting fish rescue stations placed in various parts of the state. The Texas Game Department, according to the Executive Secretary, has long desired to do just that, but lack of funds has made it impossible. Instead, wardens and hatchery workers handle the task. Special equipment should be available. Trucks with large tanks through which air circulates while the fish are being transported are needed. Washing tanks, with which to cleanse the silt from the gills of fish rescued in extremely low water, are also needed.

TO THE VOTERS OF Precinct 4

As I may not get to visit with you again before the Primary Election, Saturday, July 27th, I take this method of asking each and every one who feels they want me for their next commissioner to give me their vote and influence.

THANKS,
J. G. Fortenberry
(Paid Political Advertisement)

To The CITIZENS of DEAF SMITH COUNTY TEXAS:

Since writing the following letter, which was mailed to all voters in Precinct No. 1, the total County Indebtedness has been reduced to \$32,712.00 in stead of \$36,000.00 as shown below.

I want to thank you for your cooperation while I have been your Commissioner. I have tried to deal fairly, always using my best judgment and showing no partiality. Now, for your information, I have taken some figures from the records and offer them to you. I hope to see the voters personally, but should I miss you, this letter will explain a few things.

FIRST — The Commissioners' Salary: This salary is set by the State and governed by the total assessed tax valuation of property in the County. We accepted this raise of \$16.66 per month, but the Commissioners and Judge have paid all expenses on trips to Lubbock, Plainview, Amarillo, Vega, etc., out of our salaries. We have even paid for banquets given while endeavoring to get road help. And, contrary to opinion of some, we furnish all our own gas and oil in over-seeing our jobs.

SECOND — As to Labor: We first agreed what was fair to the laborer, the needy and the tax payer. At the beginning of 1939 we had 4 workmen running road graders at a salary of \$125.00 per month, one other workman on monthly salary and 23 workmen on hour-basis. We put all men on hour basis and now 5 men drive road graders at 45c per hour, gas and oil furnished their cars for transportation to and from job. During the three shortest months, hours set to work was 8 hours per day; next three months, 10 hours, and remaining 6 months 12 hours per day with 50c per hour for all over 8 hours, paying better than average for such labor. Bridge and repair workmen foremen rate at 40c per hour, workmen at 30c per hour with transportation. Relief workers at 25c per hour at 8 hours per day. Wind erosion laborers in line with county. I think we have high class and well qualified workmen throughout our various crews, and I am sure the majority of them are satisfied with the present salary arrangement.

THIRD — Financial Condition of Our County: Total expense for County operation during 1939 was \$158,000.00. County indebtedness of \$45,000.00 was reduced to \$36,000.00. Taxes were reduced 10c per \$100.00. Of the \$10,500.00 due County for wind erosion work, only \$1529.14 is now due. Your Tax Collector has had excellent success with tax collections and at present we are in better financial condition. I would like for you to look over the roads. You will find practically all under new grades and within two years I feel that our roads can be in first class condition for County roads.

We have other programs that will not be completed for two to four years; and this and above mentioned is why I ask to be your Commissioner for the second term. I am very interested in the welfare and condition of our County, for you know my possessions are in this county and I am a tax payer, too. Of course, you know you cannot please everybody, and we have probably made some mistakes, but we have tried to adjust them.

If you see fit to re-elect me for a second term, I feel that I can make you a far better Commissioner, as it takes some time to get adjusted to dealing for the people as a whole. Your cooperation and influence will be appreciated.

Respectfully yours,
NOAH EWTON

To the VOTERS of the 69th Judicial District:

I desire to inform each of you that in the event I do not have time to see you personally before the Primary, I trust you will consider this as a personal appeal for your vote and influence. Since the adjournment of the Dallam County Court in June, I have visited many of the voters in the District and hope to see as many more as possible before the 27th. However, Court is now in session at Farwell, where I spent most of the past week. The criminal docket was set for trial on July 15th, which will require my presence there. After all, I am sure it is your thought that if it comes to a matter of neglecting the duties of my office in order to make a personal visit to each of you that I forego as many visits as necessary to give full attention to office.

As to my ability to perform the duties of the office of District Attorney, I again refer you to my record since appointment, viz: sixteen convictions, with no acquittals. While I am not taking the sole credit for this record, as I know that a large part of it is due to the high type of citizens who sat on the juries, and to them is due a large portion of credit for the results we have attained. With continued co-operation as I have received in the past, both with the grand juries in investigating and seeking to apprehend the law violators, and the petit juries in returning verdicts of guilty, when the facts warrant the same, I feel that we can improve the conditions existing in our District. As I have stated repeatedly, I feel that it is my duty to use all resources available to prosecute, but never to persecute any person, and that when all law enforcement bodies and officers pursue this course, crime will soon be stamped out.

As you perhaps know, I was born in Dallam County, graduated from the Dalhart High School, attended college four years, and then took my law course and received my degree and license. I devoted nearly three years to the general practice of law before my appointment in January, and I believe that I am capable of performing all of the duties of the office.

Assuring you and each of you that I will deeply appreciate your vote and influence in the coming Primary, I remain,

Yours very sincerely,
Milton Tatum

work of Mrs. J. W. Lambuth in China. She also gave interesting facts concerning the life of Miss Lochie Rankin, an early missionary to China.

Mrs. Fred Harrell gave a resume of the story "The Seaman's Bride." This book deals with the achievements of Dr. Young J. Allen who took his bride to China in 1859.

Mrs. J. F. Ward, general president, and Mrs. Marvin Norwood were guests at the meeting.

The next meeting will be held at the church on Friday, August, 2.

BULL

By Jimmie Gillentine

Well, folks, the wheat guessing is over and it looks like the 1940 wheat crop is fast dwindling. It will be some time before the winners can be announced, probably not until after the government loan program has been completed. The winners will be listed in the paper just as soon as possible, however.

Press notices indicate that Jim Fraley is cutting loose from his responsibilities as head of the Democratic Party. I sure am glad that is, if Genial Jim will pay a little more attention to the post office department. I make this statement in view of the fact that Postmaster Jim Lipscomb would do anything in the world for me. Yes, sir, he is a real friend. Like a lot of other local people I had a little run in or two with this fellow Graff, who served as inspector of the Federal Building here in Hereford. Since I am a little hard-headed—and Mr. Graff is a very dignified fellow—we didn't speak to each other during the last three weeks he was in Hereford.

When Mr. Graff started to depart he spent an evening going over things with Jim Lipscomb, and after they had all of their business well in hand, Mr. Graff made a remark or two regarding me. I presume his remarks were none too flattering, because Jim immediately rallied in my defense. Yes sir, he's a real pal. Jim just sort of grinned, and said, "Oh, that fellow. Well, he's a little bit off." Then he pointed his finger

to his head and made a few imaginary circles, before hastily adding: "When he is normal, though, he's all right. Around here we just make allowances for him and most of the time he is as sane as anyone else."

Yes sir, Jim sure is a diplomat. Right off Mr. Graff began to feel pretty bad. "I'm sorry I didn't know," he said, and shook his head. Then Jim shook his head, too, and they shook hands very solemnly.

I'll tell you, folks, good friends are hard to beat, and in the face of things it looks like Jim Lipscomb is the best friend I have. I don't know but one other man who would go so far for me—and that's good old Bob Higgins.

This week The Brand is carrying ads from practically all of the precinct, county, and district candidates, along with a few from various state candidates. These candidates are presenting in their ads the things for which they stand—and everyone should read these ads. Right now times are critical. It is every man and woman's duty to vote July 27, and every vote should represent a careful study of each of the candidates. Vote how you wish, friends, but vote. Too long, it has been a custom for people to cast their ballots without due thought—and too many have not even taken the trouble to vote.

Furthermore, Hereford is getting a bad name over the country. When candidates speak here they are lucky to get a crowd of from 12 to 30 people. In most other counties the candidates are welcomed by crowds ranging from 300 to 2,000 people, even an Amarillo paper carried an article regarding the indifferent attitude of Hereford people toward politics. Pretty soon they might be calling us Fifth Columnists down here. Who knows?

Mrs. Nona Jowell called up recently and gave us some valuable information. It seems in the post office story we said that Chas. Howell was the first mail carrier out of Hereford. In the first place, the name should have been Chas. Jowell—and Mr. Jowell, incidentally, was not the first carrier. Instead Mr. Rayzor was the first carrier. Chas. Jowell started as carrier in 1913 (not 1909) and succeeded Mr. Rayzor. However, he did carry mail on a horse and at times even used a sled.

Thank you, Mrs. Jowell. We have always felt that a newspaper should really serve as a community history, as well as dispensing the weekly news. Timely correc-

tion of this error may avert considerable conflict 100 years from now when someone attempts to write a complete history of the post office department.

SOMETHING TO THINK ABOUT

Dear Jimmie, When a member of this county has anything of importance to the community on their mind they invariably write to you, and to my knowledge there are very few things more important to any community than first aid in case of emergency, especially car accidents.

There was a car wreck Tuesday afternoon between Logan and Tucumcari N. M., and I happened to be one of the first to arrive on the scene. People were standing around doing nothing while two of the victims, seriously injured, and three with minor injuries lay on the ground waiting for help to come. One of the seriously injured men had the main artery in his leg severed and the other the artery in his arm cut. Still out of the entire crowd assembled only two men knew enough elementary first aid to prevent these two from bleeding to death.

A short time later a truck drove up and the driver got out with the most complete first-aid kits I have ever seen. If it had not been for this man and the fact that he knew how to use the kit the victims would probably have been in a more serious condition than they were. Later I talked to him and he told me that he had taken a first aid course in emergency treatment sponsored by the Red Cross.

I decided to find out more about this course and by inquiring around I learned that a group as small as ten would be able to take this course if they were interested enough to attend an hour a day for two weeks.

I am sure there are more than enough people in this community who would jump at the chance to learn the correct uses of first aid.

If the people in this community will realize how little most of them do know about the essentials of elementary first aid, and will push this, I am sure the Red Cross will cooperate gladly in order that you and your neighbors might save a fellow man untold suffering, or perhaps even a life.

Sincerely yours, Billy Smith.

Why America Has A Farm Problem

One factor that has contributed to America's farm problem is the increased cost of farming. In 1935, farmers received only a little more than half the share of the national income they did in 1910, but their costs were several times greater.

Thus where in 1910 the operating costs of motive equipment totaled 4 million dollars, in 1935 the cost amounted to 440 million dollars.

Interest on farm mortgages totaled 199 million dollars in 1910 and 400 million dollars in 1935. In 1910 autos, tractors, and other machinery cost farmers 222 million dollars; in 1935 this cost was 593 million dollars.

There were no expenses for electricity in 1910; in 1935 this item cost farmers 68 million dollars. Several of these items have combined to make the work of the farmers go further and have thus contributed to the agricultural surpluses.

Charles McGinnis will begin his work this week in helping to survey the wheat land.

Mrs. A. Streu and Helen Frances of Hereford called in the Carl Frye home Sunday afternoon to see little Terry Higgins.

Raymond, Bobby and Neal Smith spent Saturday night with Mr. and Mrs. A. Epperson at Summerfield.

Mrs. Carl Frye and Carl Rae were in Lubbock Monday morning where they went to take Louise, who plans to attend Summer School at Tech.

Farm Tenancy:
The dispossessed farm tenant has become a serious problem in this district, as well as in other parts of the country. In one locality of this district 625-tenant farmers were compelled to leave the land the past year, with no other land available. What is to become of them? Only the relief rolls of the city are available to keep them from suffering want. I expect, to immediately support a bill, if I am elected, making millions of dollars available for the purchase of land, livestock and farm machinery and let the deposed tenant buy it on long term of years at low interest rates that will make them self-sustaining. It costs the government nearly \$600 per year to keep a family on relief. Why not invest this money where it will help to make them self-supporting?

Idle Labor:
Over 12 million men are out of employment, yet our army officers deplore the lack of roads for military purposes. Why not spend some of the millions that go for relief on building coast to coast highways according to army specifications and give hundreds of thousands of these men decent work at decent wages?

Parity Prices for Farm Products:
I see no reason why the prices of farm products should not be pegged at parity rather than 3-4 of parity, or less—as was done.

and I will strive earnestly to bring this about. Parity means that a bushel of wheat or a bale of cotton or a given amount of any farm product would purchase as much goods in the market now as it would have in 1909 to 1914.

Farm Program:
I would favor a more simplified farm program and one that the ordinary individual can readily understand.

Civilization depends on the soil now as always and soil and water conservation and irrigation where practical should continue to be encouraged. When the farmer is broke, the rest of the country is not far from the same condition. I will at all times use my utmost endeavor to promote prosperity for all.

As far as present world conditions permit, I would favor the enlargement of our foreign trade especially in agricultural products and oppose the importing of competitive agricultural products so far as possible. We must increase our home consumption by restoring the buying powers of the people of the U. S.

Corporations Operating Farms:
During recent years the large Life Insurance companies and other leaders of money on farm mortgages have taken over hundreds of thousands of acres of farm land and now are operating it with hired labor. I would favor some method of inducing them to sell this land to actual farmers within a reasonable time.

Co-operation:
The co-operative idea is gaining ground among farmers. I have been a member and worker in these various organizations since early manhood and strongly favor federal aid where it appears practical.

Labor:
The right of labor to collective bargaining is established, but there are perhaps many places where labor's position can be strengthened, and I would align myself with the friend of labor, to see that their interests are properly safeguarded.

Old Age Benefits:
I favor the U. S. government taking over all "Old Age" benefit activities and removing this political football from state politics; all should receive the same amount, the money should be collected and paid out by the Federal Treasury.

National Defense:
As war clouds gather and we see the conditions other Democracies found themselves in when they were invaded, I would favor

or a strong centralized supervision and command not only men but money and industries for the duration of any war.

Under present world conditions it seems to me that our safety lies in a strong national defense to keep the totalitarian countries from over-running and destroying us, as they have other countries. I am opposed to war but would not hesitate to vote for war to protect our nation or its people from an aggressor.

A well-equipped Air Force is indispensable under modern conditions, and we should have numerous air bases and training fields, some of them located in the 18th Congressional district.

I favor continuing the Dies Committee's investigation of un-American activities, and would insist on prompt trial and conviction of anyone trying to sabotage our national interest.

Economy in Government:
There is a vast amount of waste and duplication in the conduct of our governmental departments. I favor all means that will eliminate this condition. I am in favor of strict Economy in Government.

I do not favor encroachment of government in the affairs of the people, or meddling in business affairs; therefore, I am opposed to the Cole Bill which would place our oil industries under Federal Bureaucrats.

As Your Representative:
I will always be glad to talk over our problems with the vot-

Hereford's Building Permits For 1940 Pass Total For 1939

New home, business structures and other building activities have already brought building permits since January 1, 1940 to a total well above that for the entire year of 1939, according to an announcement from the City Office.

Last year's total figure of \$50,000 has been topped \$12,400 to total \$62,400 for a little more

than half the year 1940. Building permits are expected to total \$100,000 by the end of the year, if building continues at the present rate.

Grasshoppers Are Reported On The Increase In County

"Grasshoppers are worse in Deaf Smith county this year than they were last year at the same time," Hugh Clearman, assistant county agent, reports. The hoppers are on the increase, he said and urged farmers and ranchers to take advantage of free poison offered by the county to combat the grasshoppers.

Poison is available every week day afternoon and all day Mondays, and persons desiring the poison should go by the County Agent's office. As much poison may be taken as desired, as long as the supply lasts.

Land Measuring Gets Underway Here Monday

Measuring of land under the AAA and ACA program began Monday morning when 17 reporters started work.

Farmers whose land is to be measured are notified by card of the day and approximate hour, County Agent A. R. Bateman announced. The farmer or his representative should be present, otherwise the land will not be measured. If it is necessary to make as many as three trips to any one farm, Mr. Bateman said, the farmer must pay the cost of measuring.

Farmers who cannot be at home on the day set for measuring should advise the county agent's office, he said, so that other arrangements can be made.

Reporters are Lee Conn, Carl P. Cockrell, Douglas W. Beene, Ralph Smith, Joe T. Weddle, Wes Bradley, Guilford Miller and Stanford Knox. Junior reporters are Fred Northcutt, Troy P. Halford, Jack J. Boydston, Thomas E. McCollum, Hicks Roberson, Cliff H. Estes, Ellis B. Posey, Jr., Jack Knox and Bud Wilkins.

Big Political Rally Planned By Candidates At Amarillo

Lewis P. Fields Favors More Horse Sense

Amarillo. — Several congressional and senatorial candidates are planning big delegations to the All-Panhandle political holiday in Butler Field at Amarillo the evening of July 23. The rally will start at 8 o'clock.

More than 200 residents of Dalhart and the XIT Band will attend the rally and bring some good words for the XIT Ranch Reunion there August 5.

Deskins Wells of Wellington, congressional candidate, said a large delegation would accompany him to the rally and make stops at Childress, Estelline, Turkey, Gaultaque, Silverton, Tulla, Dimmitt, Hereford and Canyon.

The Mr. Worley Goes to Washington Club at Pampa promised to send 600 members, a band and several entertainers.

An effort is being made to bring Gov. W. Lee O'Daniel to the rally. Ernest O. Thompson, gubernatorial candidate, will attend, and Jerry Sadler is attempting to arrange his schedule so he can be at the rally.

All candidates and voters of the 28 counties in the 18th congressional district have a public invitation to attend the free rally—nothing to sell; nothing to buy—just politics—which is being sponsored by the Amarillo Globe-News.

The various delegations and bands will stage parades downtown during the day. There will be plenty of comfortable seats at Butler field.

Max Boyer Urges Voters To Look At His Record

Max Boyer, candidate for State Senator, enters the final days of the democratic primary campaign with the statement, "I have no last minute suggestions to make to the voters of the 31st district. When I asked for the honor of representing the people of this district, I told them that I based my plea for their support on the record I had made in serving as Representative of the ten northern counties of the Panhandle. I have asked them to check the records at their court house and find out if Max Boyer has ever been a member of the bloc of state officials who impeded or killed worthwhile legislation. I have told them repeatedly that I have worked and voted for a reasonable solution of the all important Social Security Program of this state, and in a paid advertisement in this paper, you will find the volume and page numbers of the House Journal to verify this record. I have proven my friendship to the agricultural voters of this district with my record of work for the state soil conservation legislation, the successful fight to retain the gasoline tax refund to farmers, the live stock legislation, the freight rate for lower rates on agricultural products. These facts remain the same as they were when I made my first announcement, and I shall repeat again, if I have proven by my record that I deserve promotion, then I urge every voter to support me at the polls July 27. If I have not tried (Continued on Page 8, Sec. 2)

Goodrich Said To Be Gaining Over District

"Goodrich is gaining consistently," is the expression of disinterested men who have been over the district this week and it is welcome, but not surprising, news to friends of the Wheeler county man all over the district.

Widespread comment is being caused by Goodrich's radio talks because of his ability to get down to main ideas quickly, discuss them clearly and take a definite stand instead of trying to straddle issues. He will speak from KGNC, Amarillo, from 6:30 to 6:45 a. m. on Monday and Wednesday, July 22 and 24, and from 11:45 a. m. to 12 noon on Tuesday, Thursday and Friday, July 23, 25, and 26.

"Adopted" daughter of Mrs. Franklin D. Roosevelt is three-year-old Joan Cameron of Philadelphia, Pa. The "adoption" simply means that Mrs. Roosevelt has agreed to assume \$30 per year expense to guarantee proper food and care for the child in a Philadelphia nursery.

Grows Four Times Faster Than Wheat, Is Claim Being Made

Offering pasturage possibilities of great interest to cattlemen all over the country is a cross between the hardy wild rye grass of the west and Mosida winter wheat. The result is a grass which is a drouth resistant, hardy, winter perennial, which provides good grazing for cattle. One of its characteristics is the ability to provide abundant growth quickly after snow disappears in the spring.

It has been named Michels Grass, after Dr. C. A. Michels, University of Idaho agronomist, who developed the plant.

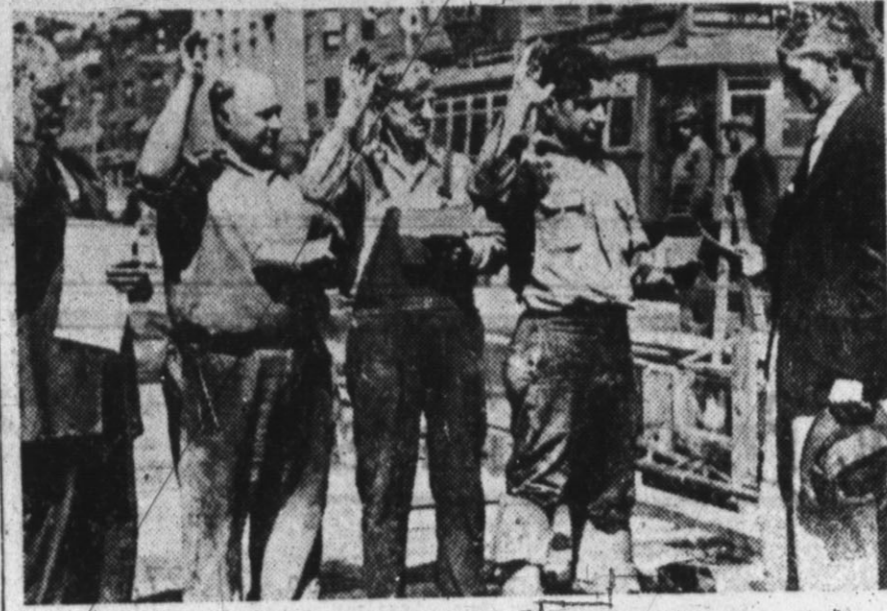

The new grass, which has brought nation-wide inquiries from interested persons, was tested last year by Dr. V. A. Young, University of Idaho range management specialist, in experimental plantings of screening seed on burnt over ground. He found that the seed lay in the dust until rain came in the fall. Then it sprouted, came up early in the spring until it reached a height of eight inches by May 1. This seed was drilled in with a hand drill. The broadcast planting was slower coming up, but was satisfactory.

That Michels grass was liked by cattle was shown when the animals left native grass to graze on some of the grass planted by Dr. Young in a fence corner. Cattle kept the Michels grass eaten down.

Although just out of the experimental stage, the performance of Michels grass has been the kind that makes livestockmen loquacious. The New Mexico Stockmen reports the experience of a Gallup rancher who planted the seed in the fall of 1938 in rows on a third of an acre. The seed germinated the following spring and produced large, thrifty plants from which 140 pounds of seed were harvested. The plants grew all winter and were six inches high in February. It seemed that in a few years the grass plot would have a solid stand of grass as volunteer plants from seed lost in harvesting had come up within the rows.

A South African newspaper reported in January that "Michels grass stood luxuriantly green while the recent heat wave parched the yield nearly to whiteness. It is green in win-

ter and green in summer—a real perennial, since neither frost nor drouth seems to injure it. The grass stands up to great soil temperatures and thrives in poor sand. It can prove to be the saving of cattle in time of drouth." Sometime later, after many letters had been received, the same paper reported that the manager of the ranch mentioned could not supply seed and that "the article was meant to be of interest only and not an advertisement."

A Benewah County, Idaho, rancher said that "The grass makes an early growth in the spring, has large leaves that are relished by all kinds of stock, and shows promise of being an early pasture grass which would be a boon to stockmen in this section of the country."

GRASS LOOKS LIKE RYE

The grass looks like rye when growing; its seed is practically indistinguishable from rye. In its early stages, the grass clings closely to the ground as if gathering itself to spring into the air. Unlike such grasses as brome and crested wheat, it has a large seed, which makes it easily established and which makes possible its early and abundant spring growth.

A Moscow, Idaho, farmer reports that "cattle are greedy for it. I believe it is similar to winter wheat for pasture, but it grows four times as fast. Forty

days after planting in the spring it is ready for pasture. I have a row that I planted three years ago this spring. I let the cows eat it to the ground, June 25, July 13, and Oct. 1, of that year and found an eight inch growth when the snow left in the spring." A western Kansas farmer said that he "has never seen anything so fine. We had a very mild winter and, believe it or not, the grass grew all winter long."

Three new buildings—for music, petroleum and chemical engineering—will soon be erected on the University of Texas campus.

Kraut Making Demonstration To Be Given

A kraut making demonstration will be held on the afternoon of Saturday, July 20. The meeting is open to the public. This demonstration is given in recognition of the value of Vitamin C for good tooth structure in the diet.

Floyd and Fraps at the Texas Experiment Station analyzed 217 samples of raw vegetables for Vitamin C content. In each 100 grams used the ascorbic acid or Vitamin C is given in milligrams in the following table:

Cabbage, 130; Mustard greens, 145; Green peppers, 104-218; Turnip greens, 162; Cantaloupe, 7.3-37; Grapefruit, 31-44; Lemons, 11-44; Oranges, 29-46; Persimmons, 43; Turnip roots, 47; Sweet potatoes, 20.3; Limes, 16-21; Tomatoes, 17.9.

When cabbage is made into kraut according to the method given in C-149, Starring Kraut, none of the vitamin C content is lost; when properly canned 50 per cent of the vitamin C is lost. Compare this with oranges and tomatoes in the above table.

In furnishing raw materials for the national defense program is currently broadcast over the Texas Quality Network each Sunday afternoon at 1:15 p. m. from University of Texas Radio House.

Kindergartners Wear Gas Masks at Play

Toddlers at a British nursery school who learned to play while wearing their grotesque gas masks have become so accustomed to them that they no longer want to take them off for greater freedom under exertion. This fact may save their lives some day. The tots are proud of their ability to don the masks in a jiffy.

Bulk Of Texas Wheat Going Under Loan

College Station.—Indications are that more than 90 per cent of the 1940 wheat harvested in the major wheat counties of Texas will be placed under government loan.

Reports from county AAA offices and an inspection tour of the major counties indicate that nearly all the wheat producers in 123 Texas counties will take advantage of the loan offered by the Commodity Credit Corporation, P. C. Colgin, state wheat loan supervisor, predicted. During June, the first month in which the loan was offered, 267

"Do I really and truly wanna know? ... Nope! And I betcha you don't, either."

"Betcha all this talk about new gasolines and octanes makes you yawn, too. Whadda us consumers care how many octanes there's in a gasoline?"

"What we wanna know is: How many miles to the gallon? ... Yes sir! and how much zip and power? ... And how about knocks on hills and heavy pulls?"

Little man, you're right from start to finish. Be as skeptical as you like about the anti-knock

claims for new gasolines.

But remember, at every Orange and Black 66 Shield, you get at regular price a gasoline which gives you practically the same anti-knock performance for which you previously had to pay two cents extra per gallon.

So judge by results, and we believe you will certainly feel that difference with your first tankful of NEW Phillips 66 Poly Gas. Driver after driver says that it's the greatest self-demonstrating gasoline he has ever used.

Phill-up with Phillips for Greater Mileage

loans were made on a total of 205,436 bushels. The supervisor expects the amount of loan wheat to greatly exceed the 15,759,986 bushels, representing 10,807 loans, stored last year in both farm-storage bins and warehouses.

Greater emphasis is being placed this year on the advantages of farm storage of loan wheat, and much of the wheat placed under the loan will be stored on the farm in counties eligible for that type of storage. Held over under the extension of the 1938 loan were 187,452 bushels of wheat in farm storage.

Three main reasons why the loan is attracting more wheat this year than last were listed by Colgin: (1) the loan rate is equal to or a little above the current market price; (2) producers who availed themselves of the loan last year netted a

profit by holding their wheat for a better market; (3) the loan makes it possible for the producer to realize some cash return immediately and at the same time keep possession of his wheat while awaiting a market upturn.

Let's Cook Something

Even in looks this recipe is a winner. Its lovely orange color is so tempting it forms a sort of challenge to the eye. After you've tried it piled high in your best sherbet glasses you'll find yourself making this orange sherbet over and over again, for it's the sort of concoction that takes on value through the passing years—and its healthy and wholesome with important vitamin C content.

The recipe belongs to Mrs. Seth B. Holman and is her favorite among desserts. This is how she makes it.

ORANGE SHERBET

- 1 1/2 cups orange juice
- 1 tablespoon lemon juice
- 3/4 cup sugar
- 1/2 cup of water
- Rind of one orange
- 2 egg whites
- 1/2 cup whipping cream

Cook sugar and water for 5 minutes. Grate rind. Add rind to syrup and cook for 2 minutes. Remove from fire and strain. When cool add to the fruit juices. Pour into tray and freeze to a mushy consistency. Remove mixture to an ice cold bowl and beat with egg beater until light. Add stiffly beaten egg whites and return to tray. Allow to freeze for thirty minutes. Remove to ice cold bowl and beat again with egg beater. Fold in the whipped cream and allow to finish freezing without agitating.

The texture depends upon the method of preparation. The cream should not be overwhipped or a fatty taste will result in the dessert.

Mrs. Hicks Is Club Hostess

Informality continues to hold the keynote for hot-weather parties as rising temperatures continue. One lovely club party was that given by Mrs. E. B. Hicks Friday afternoon for the Coterie Club, featuring a green theme in decorations and appointments.

Snap dragons and daisies predominated in the floral accent. Two special guests were Mrs. W. L. Davis and Mrs. W. M. Emmons. High score award in the bridge games went to Mrs. Colby Conkright.

Members attending the party were Mesdames F. L. Lucas, A. R. Bateman, Colby Conkright, Grant Fuller, C. F. Moore, J. W. Witherspoon and the hostess.

CARD OF THANKS

We wish to thank our many friends and neighbors for their acts of kindness during our bereavement of our dear husband and father; for the beautiful floral offerings; and we wish to thank the ladies of the Baptist Church and Assembly of God Church for the lovely dinner they prepared. May God bless and keep you, is our prayer.

A TEEN-AGE CREATION

Navy blue accents the collar and borders the hem-line of Virginia Weidler's favorite afternoon dress. Stripes of paisley-print lend color to the beige background. The wide waist-band and shirred bodice are grown-up touches.

Mrs. McVay Is Party Hostess

Mrs. J. W. McVay used a green and white and yellow color combination in decorations and appointments for a delightful bridge party when she entertained at her home Saturday afternoon.

Yellow daisies and marigolds in fern backgrounds and other flowers in orange and yellow provided the floral note with accessories for the games, prize packages and the salad plate repeating the colors.

Mrs. N. E. Milburn played high for score award and Mrs. J. C. McCracken second high.

Those playing included Mesdames Meade Halle, Grant Fuller, Colby Conkright, Travis Dameron, W. M. Emmons, Alton Fraser, N. E. Milburn, J. W. Witherspoon, Jack Wayland, W. L. Davis, J. C. McCracken, Henry Sears, J. T. Gilbreath Jr., Ralph Hastings, Speck Lunsford and Oscar Easley.

27-4tp SNAKE BROUGHT ANGLER FISH A sportsman whose veracity is above reproach; but who is publicly shy, recently related an odd experience to the Game De-

partment. While fishing in the Colorado River he saw a water snake swimming toward a sandbar upon which the angler was standing. The snake had a 12-inch catfish in its mouth. Upon reaching the sandbar, the snake when only three feet away from the fisherman, apparently became alarmed, dropped the fish at the sportsman's feet and darted back into the water.

Long Jumps Between Pumps

THE SCOTS, you know, had a grand old war song, "The Campbells Are Coming!" And the correct kilties for any of the Campbell clan from the Argyll region, for instance, would be green with wide blue and black "crossings" or stripings, plus secondary black crossings, plus a yellow and white overcheck. But now if you want to be pure "Scotch" at buying gasoline, the color that means most to your own self is Bronz-z-z... Conoco Bronz-z-z. Conoco Bronz-z-z is the Bronz-z-z that gives you long jumps between pumps. And that statement, you can prove, isn't the least bit colored, for Your Mileage Merchant will give you one of the fascinating Conoco Mile-Dials free. LEAD IN GAME PROJECTS

Game restoration in Texas is moving at a more rapid rate than at any time in the history of the state. The Texas Game Commission is taking many steps to restock areas now depleted of game and too, by improving habitat, increase game on many other areas.

That Texas is among the leaders in game restoration is attested by a recent report of the U. S. Fish and Wildlife Service, which shows there are now 196 federal aid projects under way in 43 of the 48 states. That is an average of four to a state. Texas is using federal aid funds under terms of the Pittman-Robertson act to finance six big projects. Several others have been submitted to the federal bureau for approval and probably will be inaugurated soon, it is announced by the executive secretary of the Game Department.

Federal funds finance three-fourths of Pittman-Robertson projects and the state provides the other fourth. Texas' projects include state-wide survey of game, state-wide improvement of gull habitat areas, trapping and transplanting of antelope, turkey and deer trapping and transplanting. Javelina trapping and transplanting and a survey of the bighorn mountain sheep.

WHITEWING DOVE STRAYS
A whitewing dove is reported by F. L. Roark of Cleveland, Texas, as sighted in Liberty

County near the Trinity River. That is a long ways from the natural habitat of whitewings in Texas, which is the Rio Grande Valley. That bird strayed farther than any other reported to the State Game Department, but whitewings are being forced to increase their nesting areas primarily due to the fact that much of their nesting area in the Valley is being cleared of vegetation, Game Department biologists studying the birds believe.

Whitewings were observed last year nesting as far north as Medina County, which is near San Antonio. Hunting was good in that section last fall.

Due to the fact that much of the brush native to the Valley is being uprooted to make way for agricultural practice whitewings are not only expanding their nesting areas, but many have taken to nesting in the citrus trees of the Valley. Some fruit growers have feared that the whitewings would damage their oranges, lemons and grapefruits by pecking holes in them. However, Game Department biologists point out that this would be difficult for doves due to the fact that they have extremely soft bills and weak feet. They are almost entirely ground feeders and it is not likely they could pierce the citrus fruit during its green stage, which is at the time when whitewings are in the Valley. The birds migrate in October and early November.

Hunters addicted to whitewing shooting will be glad to know that reports to the Game Department indicate a better nesting season for whitewings this spring than at any time in several years.

DESTROYING ILLEGAL TROT LINES

Game wardens in many sections of Texas are campaigning vigorously against illegal trot lines and scores of them, 500 to 1,000 feet long and equipped with illegal hooks have been found and destroyed by wardens. Many game fish as well as catfish are caught on trot lines. One outfit found recently had 2,000 expensive, needle-point hooks on it and probably cost \$50. The hooks were not baited, but the line was set in zig-zag style across a channel and hundreds of fish were caught in the sides by these "daggers."

Two wardens had a terrific battle with a 43-pound catfish caught on one of these "dagger-point hook" equipped lines, but finally subdued the cat and took it to an orphanage. All illegal game and fish confiscated by the Game Department representatives is donated to charitable organizations in various parts of the state.

ABOUT FISH SANCTUARIES
Waters which have been declared fish sanctuaries by the State Game Department are closed to all activities connected with fishing, the executive secretary of the Department warns and pointed out specifically that it is illegal to seine for minnows in the sanctuaries.

It is unlawful for any person to fish in a sanctuary with nets, trotlines, seines, hooks and lines, artificial bait or otherwise in any manner take or catch or remove any fish from a sanctuary under penalty of a minimum fine of \$25 and a maximum fine of \$200.

NEW TURKEY RAISING PLAN

Another experiment in game restoration attempted by biologists of the Texas Game Department has apparently succeeded. It is that of raising wild turkeys in semi-captivity, but in pens large enough to prevent turkeys from assuming the characteristics of tame turkeys.

Located in Robertson County on one of the six large areas the Game Department has under lease in various parts of the state is a twenty-acre pen. Twelve hens and three gobblers were placed in it last winter and nearly fifty turkeys were released outside the pen on the 30,000 acre tract. It was believed that not only would the turkeys inside the vermin-proof fence raise young, but their presence would decoy the pens and gobblers outside the area and thus keep them from leaving the game preserve. To date the projects have been successful on both counts. A state game manager recently counted thirty-six young turkeys

inside the 20-acre pen and there probably are more. Too, the turkeys outside have not roamed to any noticeable extent. The turkeys outside the pen have also hatched a good many poults. Thus the turkey population of the area has been doubled and many have been tripled. An accurate count is impossible due to the adeptness of turkey hens at hiding their nests.

Turkeys placed inside the fence had their wings clipped last winter. However, the wings are growing out and the birds will be allowed to leave the pen soon.

This method of raising turkeys was attempted in one other state, but with not as much success as attained in Texas, it is understood. The experiment is a Pittman-Robertson project, the federal government paying 3-4 of the cost and the Game Department the remaining fourth.

FOX QUAIL HUNTERS MERGE

Texas fox and quail hunters have almost always been at odds so the announcement to the State Game Department that an organization has been formed in Henderson County which includes sportsmen from both groups is really headline news. The new group, the Henderson County Hunters Association, with Bryan Wofford of Athens its president, has as its aim the uniting of the interests of quail and fox hunters in that county.

WHAT IS MALT?..

and how is it used in making beer and ale?

BARLEY

Answer: Brewers' malt is barley that has had its starches modified. The barley is first permitted to "sprout" by the addition of moisture. At the right instant, the growth is checked by heat and the sprouts are removed.

What remains is malt . . . the essential base of all good beer and ale.

Every step in the brewing of good beer and ale has been taught by centuries of experience. Today, amazingly expert brewers — using only

the purest ingredients — make beer and ale the mild, tasty, wholesome beverages that they are.

Now the brewing industry is taking action to keep the retailing of beer as wholesome as beer itself. A plan to eliminate abuses is already in effect in a number of states. It is being extended. Ask us for an interesting free booklet.

The Correct Way To Display Our Nation's Flag

Do you know the right and wrong ways to display the American flag? Many people are not acquainted with etiquette concerning the Stars and Stripes. Today, correct display and respect for the flag is the earnest desire of many more persons than usual. The following rules are given:

Our flag must not be used as a table cloth, nothing but the Bible can rest upon it.

No other flag should be hoisted above our flag except a church pennant, which is allowed to fly at the masthead above the stars and stripes when religious services are in progress in a military chapel or aboard a ship of our navy.

Do not display the flag of the United States with the union (blue field with stars) down except as a signal of distress.

Do not let the flag touch the ground or the floor or trail in the water.

Do not drape the flag over the hood, top, sides or back of a vehicle, or of a railway train or boat. When the flag is displayed on a motor car, the staff should be affixed firmly to the chassis or clamped to the radiator cap.

Our flag should always have the stars to the left of the pic-

ture, fabric floating to the right. When hanging with the stripes in a vertical position against the wall, the stars should be in the upper left hand corner.

When our flag is carried with other flags in parade, it should always claim the place of honor, at the right.

When used on a speaker's platform, the flag, if displayed flat, should be displayed above and behind the speaker. If flown from a staff, it should be in the position of honor, at the speaker's right. It should never be used to cover the speaker's desk nor to drape over the front of the platform. Use bunting.

When displayed over the middle of the street, the flag of the U. S. should be suspended vertically with the union to the north in an east west street, or to the east in a north and south street.

The flag should be displayed on the following holidays:

Lincoln's Birthday, Feb. 12; Washington's Birthday, Feb. 22; Battle of Lexington, April 19; Memorial Day, May 30 (on this day the flag should fly at half staff from sunrise to noon and full staff from noon to sunset); Flag Day, June 17; Independence Day, July 4; Constitution Day, Sept. 17; Columbus Day, Oct. 12; Battle of Saratoga, Oct. 17; Surrender at Yorktown, Oct. 19; Armistice Day, Nov. 11; Evacuation Day, Nov. 25.
