Sights and Faces Seen

Mrs. Harold Close says she really felt relieved when graduation activities were over. "It was fun," says Mrs. Close, "but a lot more work than my own graduation was."

Future address Leavenworth—or just make it the state hospital at Wichita Falls—that was what a lot of Hereford business men were looking forward to this week after some heavy struggling with those O. P. A. price rulings.

Roy Crutchfield can really claim a record for his 55 acre hegarl field. He has threshed around 90 bushels to the acre.

Proof that people are plenty interested in those "sons in the service" can be seen by the crowds of interested observers who have been looking at the soldiers and sailors pictured in a display at the Star Theatre this week. The pictures are being shown in connection with the March of Time army feature now showing at the Star.

School is out, but Miss Irene Crawford and Mrs. Ralph McCullough feel that many Hereford young people are not going to waste any time getting started at their education again. Miss Crawford is offering private speech lessons for children and young people and tutoring English for students who have failed or who want to get special training necessary for army and civil service tests. Mrs. McCullough is offering business courses (shorthand and typing) for beginners and advanced students, and points out the rapidly expanding opportunities in the business field.

## End Of School Finds Teachers Away To Diverse Vacations and Activities

The approach of summer and the close of the long school session marks the exodus of faculty members of Hereford High School and Central School. Many will be returning to their homes for a period of rest before engaging in defense activities while others will be inducted immediately into the armed forces. Following a meeting in Amarillo Friday, it was announced that plans are being made for a salvage drive in this territory. Urin Streu has been made Chairman of the County Salvage Committee, and A. R. Bateman, chairman of the U. S. D. A. Committee for this county, and A. J. Schroeter, County Co-ordinator, will work with them.

E. E. Kirkpatrick, state chairman, and Lewis Huff, state secretary, spoke before the Amarillo meeting, pointing out that there is still a drastic need for scrap iron, old metals, and old rubber.

"In fact, they urgently need everything except tin cans, which have a very low salvage value," Streu said. "Plans are being made for a county-wide drive. Next week The Brand will carry complete details for this drive, including the place, time." (Continued on page 12)

## County Quota Reached For First Half May

Deaf Smith County bond and stamp purchases had reached a total of \$121,489.35 by the end of the first 15 days in May, County Bond Sale Chairman J. C. Ricketts announced this week. Sales for the first 15 days of the month were \$16,498.75.

"This is a good start for the month," Mr. Ricketts said. "But we will have to keep up our average if we reach our goal for the first half of the year."

County quota for the entire year is \$398,000.00 and to reach the goal, a concentrated effort of all citizens of the county will be necessary. "It will take every one of us doing the very best he can to put over our part in the bond sale program," the county chairman points out.

## Graduation Programs Work Out Theme of Education For Living

### Last Rites For Castro Pioneer Held Tuesday

Pioneers of Castro and Deaf Smith Counties were saddened this week to hear of the death, on Monday, of Mrs. Ellen Carter, 87 years old. Mrs. Carter, a resident of Castro County for 58 years, died in Dimmitt at the home of her daughter, Mrs. J. C. Tate, with whom she had made her home for the past two years.

Coming to Castro county with her husband, a leading rancher of pioneer days, Mrs. Carter had seen the development of this territory from its earliest settlement and had been a leader in Castro County for many years.

Her son, J. W. Carter, Jr., now of Oklahoma City, was the first white child born in Castro County. Mrs. Carter was born in West Virginia and came to Castro County from Taylor County in 1884.

Survivors are two sons, J. W. Carter, Jr., Oklahoma City, John A. Carter, Amarillo, two daughters, Mrs. Elizabeth McEntire, La Jolla, Calif., and Mrs. J. C. Tate, Dimmitt; seven grandchildren and six great-grandchildren. T. J. and Albert Carter of Hereford are nephews of Mrs. Carter.

Services were held at the high school auditorium in Dimmitt Monday afternoon in charge of Rev. Sherrill of the Dimmitt Methodist Church. Other services were in charge of the Order of (Continued on page 12)

## Poppy Day Revenue Goes for Support of Disabled Veterans

Poppies of patriotic remembrance will bloom in Hereford on Saturday, May 30, Mrs. Ralph Smith, president of Post 192 of the American Legion Auxiliary, announced today.

Every man, woman and child in the city will be asked to wear a poppy on that day in honor of the men who have given their lives for America. The poppies will be distributed by volunteer workers from the Auxiliary and the coins contributed for them will be used in Legion and Auxiliary work for the war disabled, their families and the families of the dead.

Poppies which will be distributed here have been made by disabled veterans in the various government hospitals. The work is limited to men receiving little or no government compensation and to those with families to support.

Contributions received for the poppies are a principal source of support for the vast welfare work carried out by the Legion and Auxiliary among the disabled men and dependent families. With the new war adding to America's list of war victims, there will be greatly increased need for funds during the coming year.

## Ration Board Lists Maximum Used Tire Price

To put a stop to profiteering and to protect the honest dealer who sincerely desires to comply with the law, the Deaf Smith County Rationing Board, this week submitted the following information to clear up misunderstandings which exist concerning the maximum price regulations on used tires and tubes. The following are excerpts from the OPA booklet giving official regulations on used tire sales.

POSTING OF PRICES. Every person engaged in the business of selling used tires or tubes not mounted as a part of the equipment of a vehicle, shall furnish the purchaser with a written statement setting forth the price, size and type of tire or tube sold, either stating that the tire sold is a basic tire carcass or giving the thickness in 32nd inches of the tread design depth at the shallowest point, and reciting whether, to the knowledge of the seller, the tire or tube, as the case may be, has been re-grooved, is a used re-treaded or re-capped tire, requires repair, or has been vulcanized or repaired, together with a description of the extent of vulcanizing or repairing if it was done.

MAXIMUM PRICES FOR USED PASSENGER CAR TIRES AND TUBES.—The maximum price for

any used passenger car tube shall be one dollar and fifty cents. (\$1.50)

In the list of prices, the first price quoted is for tires retaining 7-32 inch, or more tread design depth, when measured at the shallowest point. Second price is for tires retaining more than 3-32 but less than 7-32 tread design depth. Third price is for tires retaining 3-32 or less tread design depth, and the last price is for tires with smooth treads and other basic tire carcasses.

Tire sizes listed are those most commonly sold, according to tire dealers:

6.00-16 — \$8.10-8.55-4.15-1.50  
6.50-16 — \$9.25-9.65-4.35-1.50  
7.00-15 — \$10.95-8.55-4.55-1.50

Truck tire prices, depending upon the depth of the tread, are:

30x5 — \$15.25-12.45-8.30-6.00  
32x6 — \$19.40-15.90-10.80-8.00

Programs presented by Hereford High School seniors this week struck a note of high efficiency in education, giving to the parents and friends that packed the auditorium the idea of "Education for Living" as a basis for the many months of preparation that have preceded the climax of each student's endeavor.

Baccalaureate Service  
The Baccalaureate Service Sunday night was marked by musical entertainment presented by members of the class with selections from the High School Glee Club directed by Miss Mary Helen King; a trio composed of Rachel Ireland, Nadyne Newell and Mattie Lawhon; a string quintet and a girl's ensemble.

Minister H. P. Cooper gave the invocation, Rev. M. B. Norwood gave the scripture reading and Father Nathaniel Madden, pastor of St. Anthony's Catholic Church, delivered the sermon. "The most important thing in the world today," he said, "is that people should not lose faith. Christians of olden times did not lose faith; Greece has not lost faith; if the nations under attack today lose faith, then all we hope for in the world will disappear. Speaking directly to the 57 class members, he said, "You must keep faith in your democratic ideals and in your hope for peace, ever striving to hold aloft your cherished banner for right living."

Commencement Program  
The commencement program presented at the high school Tuesday night was both unusual and unique. The whole program was built around the theme "So This is Hereford High" and as the class looked backward over a period of developing years, a clear picture of the inside workings of the school system was presented in the form of a "Code of Ethics". Laying aside the usual custom of securing an outstanding speaker for the occasion, members of the senior class presented the entire program, using the code of ethics which was worked out and adopted by the student council in 1937.

The professional was played by Margaret Barrett and followed by the invocation given by Richard Petersen. "America, The Beautiful" was sung with the audience participating and the salutatorian, Rena Rae Noland, gave the welcome.

Code of Ethics  
Honor for self and school, Don McCullough; Equality of students, Mary Lookingbill; Right attitudes, Nadyne Newell; Enthusiasm, Billye Self; Fairness, Harold Close; Open-mindedness, Mildred Bousher; Reliability, Lois Henderson; Diligence, Mary Ellen Hensley; Vocal solo, Agnes Albracht; Harmony in school, John Estes; Interest in school activities, Rachel Ireland; Group responsibility, Larry Trimble; Hospitality, Ruth Temple Hastings.

As the code of ethics unfolded, each student explaining an integral part of its construction, the idea of "Education for Living" loomed large and W. J. Stanford, president of the board of education, voiced a climax (Continued on page 12)

## Do You Remember?

May 23, 1902

Frank M. Avis was a candidate for county judge.

Work had been started on the building for Hereford College.

John Clark was elected captain of the Hereford baseball nine and Eugene Dyer was secretary.

The Brand was positively lyrical in describing a double wedding ceremony performed near the banks of the Tierra Blanca at the ranch home of G. R. Jewell. "United in the happy bonds of Hymen," according to the reporter were Miss Dora McDonald of Newport and Mr. Emmett R. Rice and Miss Johnnie Johnson and Mrs. Joe Killough.

H. H. Hawkins of Midlothian, who with his brother had a ranch eight miles northwest of Hereford, was attending to business interests here.

Murchison and Boyd had sold the J. B. Farley Ranch, 13 miles north of town to E. B. Orr of Denton, for the sum of \$1,200.

Back in 1902, Hereford was advertising its dentist, Dr. W. E. Robertson, instead of its perfect teeth. According to the paper "Dr. W. E. Robertson, proprietor of the Hereford Dental Parlors, operated on Jesse DeVaney Saturday for abscess of the Antrum Highmore. It was performed successfully, as are all Dr. Robertson's dental operations."

No reticence whatever about Mr. DeVaney's dental troubles, and those technical names make it sound positively scandalous.

May 17, 1917

Jeff Roberson had the role of "Papa Jacques Rose, Mayor of Rose Arbor" in the seventh grade graduation pageant, "A Day in Flowerdom."

E. B. Black had just completed a new undertaking parlor and announced the purchase of a new motor driven hearse—six cylinders and 45 horsepower.

Pinkie pupils of Miss Minnie Coffin were presented in a recital and the speech pupils of Miss Mathea McClurkin were

having a recital.

Miss Helen Sisk had closed her school in the northwest part of the county and was home for the summer.

Misses Inez Ricketts and Zula Woods had returned from Canyon where they were attending Normal School.

Mrs. J. R. Stubbs and daughters were Kansas City visitors.

Mrs. H. G. Conkright and children were visiting her parents in Winchester, Ky.

May 19, 1932

Joint funeral services were held in Hereford on May 16 for "Uncle Harry" Webb and his son, Edgar.

The Odd Fellows had top standing in the city baseball league.

Jas. W. Witherspoon announced his candidacy for district attorney.

Howard Morel died at the home of his daughter, Mrs. Edgar Sowell.

Miss Emma Jean Donald was president of the HHS Alumni Association and helping her with arrangements for the annual banquet were Miss Gwendolyn Spradley and Vohnnie Biggs.

Wheat farmers had held a mass meeting to discuss the cause and cure for prevailing rock bottom wheat prices. Sign of the times was the resolution condemning activities of the Chicago Board of Trade. Also on the program at the meeting was a talk by Dr. R. C. Snodgrass of Amarillo on "What I Would Do If I Were Colonel Charles A. Lindbergh."

## TAKING THE MYSTERY OUT OF BANKING

TO Many people a Bank is something mysterious. In fact the reverse is true.

FUNDAMENTALLY, banking is as simple as A-B-C. A bank is a reservoir of capital, created by depositors out of their earnings, to be used for the help and expansion of human enterprise.

THE Major problems of bankers arise out of the release of the contents of the reservoir for the best advantage of all concerned. This does call for technical skill and ability of high order.

BANKERS Today have an opportunity to explain some of the principles of sound money, credit, dangers of inflation, etc., to those wanting to know. Will you not drop in, customer or not, for a chat over some of the so-called mysteries of banking?

A lot of merchants are on the verge of going plain "nuts." The cause is an honest effort to comply with government regulations on price commodities. In the first place, instructions seem to be confusing. Each person who reads them seems to get a different interpretation. To say the least, they are not definitely, or clearly, stated. In the second place, it is no small task to mark and tag every piece of merchandise, bin or shelf in the United States of America. Many business men worked all day Sunday in an effort to meet the requirements—only to find conflicting ideas on their methods. Add this burden to the confusion resulting from "priorities" and you have a clear picture of what the little business man is up against. It is expensive and difficult—and it will likely get worse.

However, practically every business man in Hereford is doing his dead-level best to comply. Nowhere will you find a fairer or more loyal group of Americans than in Hereford business firms.

So far, Mrs. Homer Fox seems to be the Champion fisherman (and fisherman, too) of this region. It all happened one afternoon last week when Homer bought a new fishing rod and decided to give the fish a whirl. Mrs. Fox inherited the old fishing rod (in accordance with the same custom which always hands those out-grown suits down to the younger brother)—and they went fishing. Homer let her out when they reached the creek and then proceeded on down the creek to catch some fish. Tess made two or three casts, then it happened. She said she thought she had the Pitman elevator on the end of her line. She doesn't remember just ex-

Dear Friend:

The following suggestion as to how wheat farmers can participate in a definite bond-buying plan was submitted to us by Mr. John E. Mayo, of Amarillo and Hereford, who farms several thousand acres in Deaf Smith County. The News-Globe is using the story, and I am passing on Mr. Mayo's idea just as he submitted it to us, for any use you might see fit to make of it. Mr. Mayo suggests that the amount invested in bonds can be practically doubled if the farmer holds out five instead of ten bushels for expenses and overhead.

Cordially,  
Wes Izzard

actly how, but she finally managed to get the fish to the bank—and the reel slipped off the old, badly worn rod. She jumped on top of the fish and for the next few minutes there seems to have been a worthwhile wrestling match. Finally, she got her hands in its gills and drug it safely away from the water. Homer came back after a few minutes and they took the fish to some scales. It was a five-pound bass.

Homer will probably never hear the last of this episode, and justly so. I remember some of the remarks he made about my bald head, but I don't hold that against him. I am really glad that at least one person in the Homer Fox family can catch fish.

Things are picking up around our house. Mrs. Kelly Gray sent in a great big sack filled with fresh, tender asparagus, and Mrs. O. E. Sherman gave us a gallon of the best buttermilk you ever tasted. For two years H. V. Hennen has been promising such a treat—but he never got around to bringing them. I got to eating cornbread, buttermilk and asparagus the other night and it was so good that I felt a little mean. I happened to think of the people in England, France, Greece, Norway, Holland and other conquered countries, who are barely getting enough scraps to remain alive. They say the Japs exist on a cup of rice a day. It made me realize how worthwhile this war really is. Never before has there been a country like ours, filled with such fine people.

I. W. White, editor of the Friena Star, writes that he is going to have The Brand force down to his place soon for a big fried chicken and strawberry supper. After he sees this bunch eat, it will be a good lesson for Mr. White. To date, he probably thinks that Methodist preachers are champion chicken eaters. Anyway, he has already made the offer and we won't let him forget it.

Charley Hardwick dropped in today for a chat and casually mentioned that he booked the Universal feature-news release, "The Town Without A Tooth Ache." As many of you recall, this picture was filmed here some five or six weeks ago by Universal. Pictures were made at the schools, along Main Street and one of the McDonald bulls was even brought in for a pose. It will be released to Universal subscribers over the entire world, and shows in Hereford June 7, 8 and 9. The fellow who came out here to make the pictures frankly told me that he was good. He even admitted that he was probably the best photographer the company had—so you can expect the picture to really be something worthwhile. They didn't even get a picture of me, but I am going to see the film anyway.

I thought someone was committing a murder in Abe Martin's Barber Shop Tuesday afternoon. Walls and screams were floating out the door as I rushed up and looked in. Marie Roden had the situation well in hand. She was supervising a haircut for their small son probably his first.

**Let's Cook Something**

A woman is never quite so happy as when she is sure of her cooking recipes. Look into this recipe especially if you feel you've a special problem in food for guests or for the family. It is a contest prize-winning recipe used often by Mrs. Grant Fuller, and while it does call for a little sugar—you are going to have a little sugar—and it's well worth trying even tho you have to cut down the sugar content in something else.

**SWEDISH HAM BALLS**

- 1 1-2 lbs. ground smoked ham.
- 1 lb. ground fresh pork
- 2 cups bread crumbs
- 2 eggs well beaten
- 1 cup milk
- 1 1-2 cups brown sugar
- 1-2 cup vinegar
- 1-2 cup water
- 1 teaspoon dry mustard

Combine brown sugar, vinegar, water and mustard and heat until sugar is dissolved. Combine rest of ingredients, mix thoroughly and form in balls about the size of golf balls. Place in casserole or baking dish and pour brown sugar mixture over them. Bake in moderate oven 1 1-4 hours, basting frequently with the sauce. When done the sauce will be thick and the balls golden brown.

Mrs. Fuller has the knack of assembling complementary foods and with Swedish-Ham Balls she likes to serve Irish potatoes au gratin, tomato aspic salad or a salad using apples and pineapple, however, any vegetable and a tart salad may be used.

**CHDA NOTES**  
 By Sadie Lee Oliver

**ABOUT LETTUCE**

With an unusually large crop of lettuce now on the market, lettuce is being featured as a Victory Food Special, and the U. S. Department of Agriculture is suggesting some new uses of this green, leafy vegetable.

According to the Bureau of Home Economics, green lettuce is a good source of carotene, which the body can change into Vitamin A. It contains some Vitamin B-1, riboflavin and Vitamin C. It is also a good source of iron and calcium. In general, the thinner and greener the leaf, the better a source of iron and carotene is the lettuce. Bleached lettuce contributes most of these same food values, but it rates considerably lower than does green lettuce as a source of the vitamins and minerals mentioned.

In addition to its use in salads, lettuce may be cooked in various ways. Here's the way to make tasty, old-fashioned wilted lettuce. This recipe makes about six servings.

Into a heavy skillet put about 1-4 cup fat, or, if bacon is on hand, cook several slices brown and crisp, and use the bacon fat. Add to the hot fat a small onion, chopped. Cook the onion until it turns yellow. Then add 1-2 cup vinegar. When this is heated, add two quarts of garden leaf lettuce or shredded head lettuce. Cover and cook until the lettuce is just wilted. Season with salt and pepper and serve hot—with bits of crisp bacon added to it if at hand. Or try it cooled off and served as a salad for a change.

Another good cooked lettuce dish is braised lettuce. To make this, cut two hard heads of lettuce into quarters—lengthwise—leave a little of the center stem on each section to help hold the leaves together. Heat four tablespoons of fat in a large skillet, then put in the lettuce. Cover

and cook for 30 minutes or until the lettuce is tender. Turn the lettuce carefully if necessary during the cooking. Sprinkle with salt and pepper and serve on a hot platter.

**COSMETICS—NATURE BRAND**

Cosmetics are essential to health and beauty, and, according to a bulletin of the extension service, nature's brand is the best on the market. You can obtain these cosmetics from your garden so be sure to plant plenty of them and have a fresh supply every day.

Further hints: Apply internally for the most part. Keep your vanity case on the dining table, not the dressing table.

Rouge your face with carrots, spinach and turnip greens, taken internally. Best face cream is cow's vanishing cream; use daily.

Water, yes, plenty of it taken both internally and externally. Drink at least one quart per day and apply often externally. Take a shower or tub a day.

For clear skin, apply fruit juice and plenty of vegetables, both raw and cooked, down the inside of your neck.

For sparkle in your eyes, eat boiled onions or spinach. They contain phosphorus which concentrates in the beacon-like beam, one from each eye.

Brush yourself to clean your teeth after each meal or the dentist will drill them for you.

Vegetables, both raw and cooked, fruits, fresh air and milk are health-givers. Take freely every day and note results.

To be frife, this is definitely more truth than poetry. A garden and a cow, A speckhouse and a sow, Ten or four hens and a rooster And we live better than we uster.

**Rationing Set Up On State Basis As Price Control, Shortages Hit Home**

With over-all price control becoming a reality in the Southwest this week, the regional OPA administrator, Max L. McCullough announced that its administration would be on a home front basis.

Each state will have a state office and director working under the region OPA office at Dallas, and in each state there will be OPA field offices in certain key cities. In addition, the local rationing boards are taking on greater importance and will function as "War Price and Ration Boards," to handle all OPA matters on a local basis.

With consumers and retailers cooperating in the battle against the cost of living; this program of decentralized administration of both price control and rationing will make the problem easier for all, Mr. McCullough said.

State offices in the six-state region include those being set up in Fort Worth for Texas; Baton Rouge, for Louisiana, and Oklahoma City. Directors already appointed include U. S. Goodman in Louisiana and Mark McGee in Texas.

While consumers and business men were getting used to such terms as ceiling prices, cost-of-living-commodities, and services sold at retail, rationing took on greater importance as war necessity.

At first glance, Southwesterners might think that the newly ordered gasoline rationing is strictly a headache along the East Coast and in the states of Washington and Oregon, but actually it is only one aspect of a

national transportation problem. It's true that there's plenty of crude and gasoline available from the Texas, Louisiana and Oklahoma fields where holding down production is a problem. The difficulty, however, lies in getting it from the Southwest to the shortage areas.

Gasoline rationing also hits close home here in the Southwest for those who normally plan vacation or business trips to the East and Far Northwest. Southwesterners will be subject to rationing upon reaching affected areas.

In addition to the gasoline problem, all of us—and the Southwest is included—must save all of our transportation facilities for essential uses, just as we must save our rubber, our materials, machinery and manpower.

Without transportation, the whole war effort would fall. Men and munitions must be moved to embarkation points and raw materials must stream toward the factories. That's why it may even be necessary to ration travel by civilians.

That's also why civilian delivery services are being curtailed and why all Americans must give up "motoring as usual" for the duration. We've got to make every thing we have last as long as possible, go as far as possible, and be used where most necessary, whether it is tires, or gasoline, or train and bus space, or sugar.

Voluntary compliance with rationing and price orders is sought by the OPA, but where violations are reported proper actions will be taken. Following

Production of anti-freeze by quota is provided in a new order issued by the WPB Division of Industry Operations. Quotas, which have not yet been set, are expected to approximate 50 per cent of the amount sold by each producer last year. The amount of anti-freeze permitted by the order is expected to meet requirements of the shrinking number of motor cars in operation next winter.

extended investigations, the first case involving conspiracy to evade price and rationing regulations in the Southwest reached the courts. Three tire dealers of Houston indicted by a Federal grand jury on charges of conspiracy and violation of tire rationing and maximum price regulations, pleaded not guilty before U. S. Judge T. M. Kennedy, who set trial for July 6. The defendants—Ed Pace, operator of the Pace Tire Co.; J. F. McGurk, formerly district manager for Kelly Springfield Tire Co., and Leland Hammer of the Leland Hammer Co.—were indicted on 11 counts. One involved conspiracy to violate rationing regulations. Five charged concealment and falsifying records, and five were for alleged sales of tires above the price ceiling.

Following up a suggestion made by a New Orleans tailor, the War Production Board has asked that tailors and clothing stores over the country turn in old wool samples and wool clips to the Red Cross. Trouser cuff clips already are being collected by the Red Cross. H. Stanley Marcus of Dallas, chief of the WPB apparel section, pointed out that contribution of wool samples not only will add to the supply of reprocessed wool but also will increase Red Cross revenues.

**TYPEWRITER RENTALS OKAYED**

Although new and used typewriters cannot be purchased except with certificates issued to eligibles by local ration boards, any person or business needing

a typewriter is entitled to rent a used office machine or a new portable directly from any dealer, the OPA announced.

**GASOLINE RATIONING FOR VISITORS**

Vacationing automobile drivers from the Southwest will obtain the same gasoline ration in the East Coast and far Northwest areas in which rationing is now in effect, according to Max L. McCullough, region OPA administrator. Motorists entering the regions on business will be eligible for ration cards to provide for their needs. Ration cards will be issued to visitors by local ration boards in the affected areas.

Spring Housecleaning Offers Opportunity For Material Salvage

Victory Demonstrators in all home demonstration clubs have pledged to repair and take good care of all equipment, buildings and furnishings.

Whether you have signed a Victory Demonstrator pledge or not, Miss Oliver says, you can take advantage of your spring cleaning to do the following things.

Salvage materials needed for the war effort.

Reduce fire hazards in your home.

Eliminate hiding places of insects and rodents.

Increase space needed for other uses.

Increase space needed for other uses.

Make your home and grounds more attractive.

Use a fine tooth comb Go into every nook and corner of your house. Take stock of everything you've stored away in closets, attics and garages.

Examine them and decide: What can be given to the government to help win the war.

Many scarce materials are needed.

If the furniture can be repaired and put into use.

If the clothing can be renovated and worn.

If articles can be used; if not, can they be put in good condition and sold.

If articles which you no longer need can be given to someone who will use them.

What is of no use and how to get rid of it.

Remember, the home of a Victory Demonstrator or of any patriotic housewife should be as orderly as an army camp and as clean as the deck of a battleship.

## Junior Club Entertains 'Mother-Club' And Celebrates With New Name

To entertain the mother-club, the Pioneer Club whose members organized the Junior organization, members of the Junior Pioneer Club held a "Grown-Up" party Thursday night at the home of Mrs. T. E. Seigler, Jr., celebrating their maturity and announcing a new name. The club membership could no longer qualify as a junior group and as plans were being made to become a senior organization the entertainment was a gesture of

appreciation to the older group for the interest manifested since the junior club's organization in 1933.

The new name chosen for the club is "La Plata" which carries with it the significance of pioneer days since that was the name of the county's first town.

A cleverly arranged skit told the story in the form of a mock wedding with Mrs. Meade Halle, the new president, lovely in a real bridal gown, being the bride.

Acting as her father who gave her away was Mrs. J. M. Gilliland, charter member of the Pioneer Club; Mrs. Robert Veigel, the new county federation president, served as the groom and Mrs. Homer Brumley was the officiating minister.

Mrs. Lynn Kester, vice-president, was matron of honor and serving as bridesmaids were Mrs. Ralph Roden, treasurer; Mrs. R. R. Wills, corresponding secretary, and Mrs. Wayne Evans, reporter. Mrs. A. J. Schroeter, recording secretary provided music.

Mrs. Wayne Evans entertained the guests with a book review, giving a clear and graphic resume of John Steinbeck's much talked about new book "The Moon is Down."

After the program refreshments were served from a table decorated with lace, mirrors and spring flowers in a variety of colors. Appointments were in crystal and Mrs. Meade Halle presided at the tea service.

Members of the Pioneer Club present included Mesdames J. E. Beyer, Noah Ewton, N. E. Gass, J. M. Gilliland, C. T. Guseman, Bob Higgins, F. M. Kester, Wirt Phillips, T. E. Seigler and F. L. Terrell.

Hostess club members included Mesdames Homer Brumley, Roger Brumley, O. H. Culpepper, Willis Edelman, Wayne Evans, Meade Halle, Ralph Hastings, Frank Huckert, Lynn Kester, Ralph Roden, A. J. Schroeter, Urlin Streu, R. R. Wills, Liston Wilson, T. E. Seigler, Jr., Miss Genevieve Eberle and Miss Edna Daughete.

### Mrs. Anderson Is Honored At Farewell Party

An informal farewell compliment to Mrs. W. W. Anderson, who with her husband will leave

Friday for Nocona, was the gift party given by Mrs. Glenn Parker at her home Tuesday afternoon.

A variety of games provided entertainment and after gifts were presented refreshments were served to Mesdames Jimmy Allred, Gerald Wilson, Clinton Jackson, O. B. Woolsey, Roger Brumley, Raymond Cole, Owen Stagner, Manly Finch, the honoree and the hostess.

### Club House Party Follows Commencement Program

Senior Mothers Organization entertained for members of the 1942 Senior class Tuesday night at the clubhouse following graduation exercises at the high school auditorium.

Approximately 200 guests enjoyed the courtesy to the seniors with parents of members of the

class, members of the high school faculty and out-of-town friends of the graduates included on the guest list.

The fact that May-time is flower time as well as time for the close of school was evidenced by the profusions of May-time blossoms used everywhere about the club house in decorations. Red roses decorated the refreshment table where Mrs. Ralph McCullough, Mrs. Boyd London and Mrs. Henry Hastings served. Informal entertainment and dancing were enjoyed.

### Westway H. D. Club Has Interesting Meet

Westway Home Demonstration Club met Tuesday May 12, in the attractive new home of Mrs. Moody Stephens with Mrs. E. H. Little as assistant hostess. Large bouquets of iris furnished springtime decorations. Mesdames Merlin Kaul, T. B.

Cox and Paul Rudd gave reports of the Home Demonstration district meeting held recently in Amarillo. Mrs. Buran Sowell and Mrs. Al Werner gave demonstrations in baking whole wheat bread and rolls. When baked the bread and rolls were served to the guests.

After group singing the hostess served refreshments to Mesdames: Merlin Kaul, T. B. Cox, Al Werner, C. F. Rickels, A. C. Pierce, Wilbur Smith, Elmer Combs, Maurice Tannahill, Nettie Dale, Joe Landers, C. O. Houser, Paul Rudd, P. B. Sowell, Glenn Rutter, R. L. Wilson, W. S. Rice, E. H. Little, Joe Marnell and Nannette Little.

### Sugar-Saving Recipes Stress Use Molasses

College Station.—With sugar rationing here for the duration, homemakers will do well to substitute molasses for it in some dishes, says Hazel Phipps, specialist in food preparation for the A. and M. College Extension Service.

In reality, molasses offers more food value than most sweets for it contains minerals and vitamins not found in sugar. As a rule, the darker the molasses, the better its nutritive value.

Menus found in "Better Meals for Less Money," a study of the Texas State Nutrition Committee, show how molasses easily can be included in low cost meals. Here is a sample day's menu.

Breakfast: Corn meal mush, sugar, milk and hot water tea.

Lunch: Fried salt jowl, fried onions, baked sweet potato with peanuts, biscuit, margarine and Indian pudding.

Dinner: Peas with margarine, turnips, cornstarch with margarine and molasses pudding.

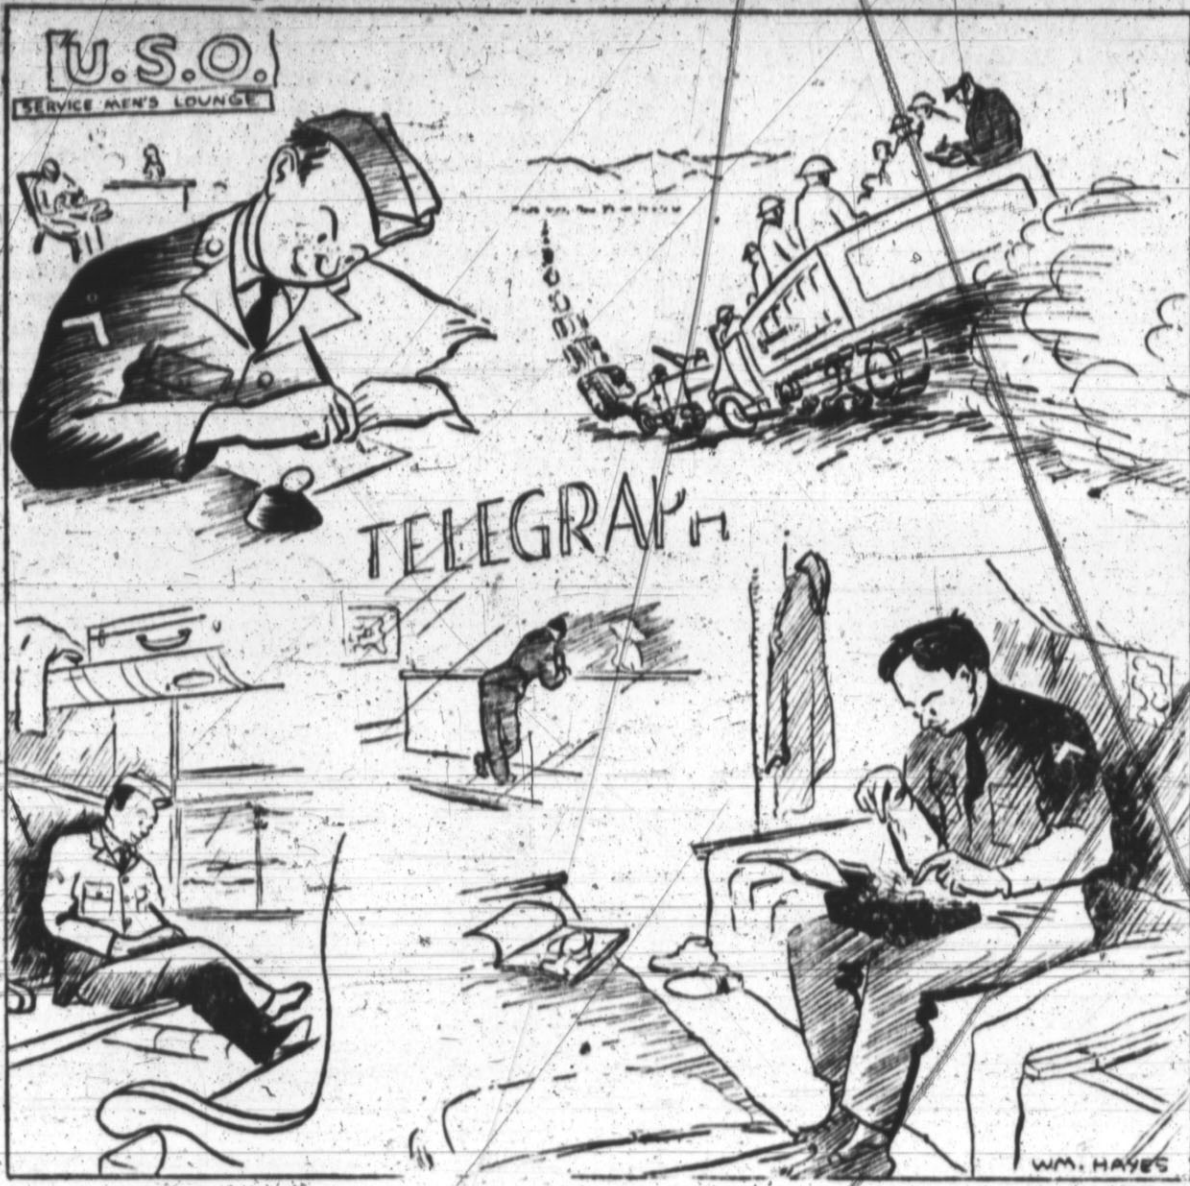

Recipes for molasses dishes given in the study include:

- Raisin Brown Betty (serves 5)
- 2 c bread crumbs
- 1-4 c sugar
- 2 T molasses
- 1 c raisins
- 2 T margarine
- Skim milk or water to moisten
- Brown crumbs. Add sugar. Add milk or water and molasses. Sprinkle on top with sugar and dot with the margarine. Bake in moderate oven until crust is formed on top.
- Prune juice may be substituted for the liquid if available. Grated lemon rind will improve the flavor.

- Cereal Pudding (Serves 6)
- 4 c scalded milk
- 1-2 c corn meal
- grated rind 1-2 orange
- 1-8 c molasses
- 1-4 c peanuts
- Boil peanuts (chopped) 20

# May We Suggest 3 Ways to Get Best Results at lowest cost, with your "VICTORY COOKING"

**PLAN YOUR DAY'S MEALS FOR MAXIMUM NUTRITION**  
Follow daily the Official Nutrition Food Rules issued by your Government, in selecting the foods your family needs for maximum health and vigor.

**TAKE ADVANTAGE OF THE COOKING AND ECONOMY FEATURES OF YOUR GAS RANGE**

- SAVE VITAMINS**  
Cook vegetables by the "waterless" method. The flexible Gas flame will give you the exact degree of heat you need. Cover vegetables and bring to boil quickly over full Gas flame. Turn flame low, cook gently.
- SAVE FOOD**  
Roast meat at low temperature in your Gas oven to reduce shrinkage. Remember that the flexible Gas flame can be regulated to any degree of heat you need, eliminating scorching of food. Use any remaining vegetable liquids in soups, gravies, sauces, or cold in tomato juice.
- SAVE FUEL**  
Do not pre-heat your Gas oven or broiler too long. Remember Gas is fast. Plan complete oven and broiler meals, to make full use of Gas. Avoid using small pans on large or giant top burners. Do not heat any more water than you need at one time. The speedy Gas flame is so fast that it will heat the water quickly next time you need it.

**BUY FOOD CAREFULLY... COOK IT PROPERLY... WASTE NOTHING!**

In these days—when meal-planning, cooking methods and food economy are so important in keeping America strong—your Gas Company considers it a patriotic privilege to support our Government's National Nutrition Program.

"...Electricity is too important a public service to encourage or invite curtailment when it is unnecessary..."

J. A. Krug Chief of the Power Branch of the Materials Division of the War Production Board

When you save rubber or sugar, tin and lead, they accumulate for war production...

**BUT...** When you curtail your use of electricity none of it is saved so long as sufficient capacity is here to serve you.

Curtailling now simply means shutting down a power plant.

That's like telling a farmer not to milk his cows so as to save milk!

It is impossible to accurately predict future developments in war production. However, there is at present in this section of the country an ample supply of electricity, not only for war projects, but also for our industries, commercial establishments and homes. This is the result of hard work, careful planning for the future, and sound engineering, under American business management.

If and when a power shortage comes to this section of the country, we will be the first to know about it, and we will cooperate to the fullest in urging our customers to conserve electricity so that additional demands for new war purposes can be met.

### Pa To Wear Hats Made Out Skim Milk

NEW YORK—Skim milk felt for papa, cotton girdles for mama, and vegetable quilts for the family—these are some of the problems of war-time priorities. They were among the projects displayed by leading firms to prove that manufacturing genius could provide substitute articles of equal and better quality than those formerly made of materials now converted to war-time needs.

The display was convincing in that the average citizen will still be able to buy household gadgets and luxuries he thought he would have to do without when current supplies were exhausted. To replace rationed rubber, metal and other war-scarce materials, industry has plumbed the sources of forest, farm and chemical laboratories.

For example: Little Jimmy may now anticipate repairing his roller skates with plastic wheels that last longer and make less noise than steel ones.

And Mistress Mary will find her dolls cuddle just as cozily with milkweed instead of wool, a fibre.

Musicians who used to boast about their specially imported reeds for their clarinets (a South American product) can now "go out of this world" with a home-made plastic lip piece.

Comforters of sufficient warmth to withstand the coldest night are now made from plain garden variety vegetables. The technical name for the filling is cellulose, but it's still just a vegetable offspring.

Pillows, like Mary's doll, are softer when they contain milkweed silk instead of wool matting.

And, incidentally, the U. S. Navy is using some life preservers filled with this same milkweed silk instead of kapoc.

Drapes, curtains and even dress materials are being made of soy beans, skim milk cloth, fiberglass and rayon. Tough new products such as belts and synthetic rubber goods are produced from a resin derived from coal, salt and water.

Plastic trims, available in every color of the rainbow and touched by war priorities, are substitute for chromium and other polished surfaces.

Cooking wear of glass and earth are being demonstrated as flame proof and oven proof. But the old iron skillet and roaster are coming back into their own to take the place of aluminum.

Chairs and tables of glass with substitute cloth coverings lend modern touch.

The manufacturers have gone as far as to develop fan propellers and gears from impregnated plastics, which won't corrode.

And for hard-working government officials, one manufacturer has created the "victory fan" with plastic blade, cotton insulation and silver wiring. For every 100 fans delivered three tons of aluminum, steel, brass, copper, zinc and rubber are saved.

Mr. and Mrs. L. S. Kennedy of Olton were guests of her brother, Wm. McGehee and Mrs. McGehee here Sunday.

**COPPER STOCKS TO BE USED**

Notices from the WPB's inventory and requisitioning branch setting out the manner in which inactive stocks of primary and fabricated copper will be purchased by the government soon will go out to some 20,000 copper fabricators. It is estimated that 300,000 tons of copper and brass products, once intended for ash trays, door knobs and roofing, will thus be channeled into munitions factories for conversion into rifle cartridges and artillery shells, and the engines and motors of fighting ships and planes.

### PRIORITY FORMS SIMPLIFIED

After May 23, standard applications for priority aid by firms with an annual business of less than \$100,000 a year will be made under the WPB Production Requirements Plan, and use of the special PD-25X application blank will be discontinued. The new instructions for filling out the regular PRB application will permit applicants to leave a considerable number of columns blank and thus reduce the paper work required from small manufacturers.

### SELF-POLICING ON SUGAR

Persons to whom War Ration Books were not issued during the recent registration because they had excess supplies of sugar are urged to police their own use of sugar by Max L. McCullough, region OPA administrator. No ration books will be issued to such persons until a sufficient number of ration periods have

elapsed during which they might have purchased an amount of sugar equal to the excess they registered.

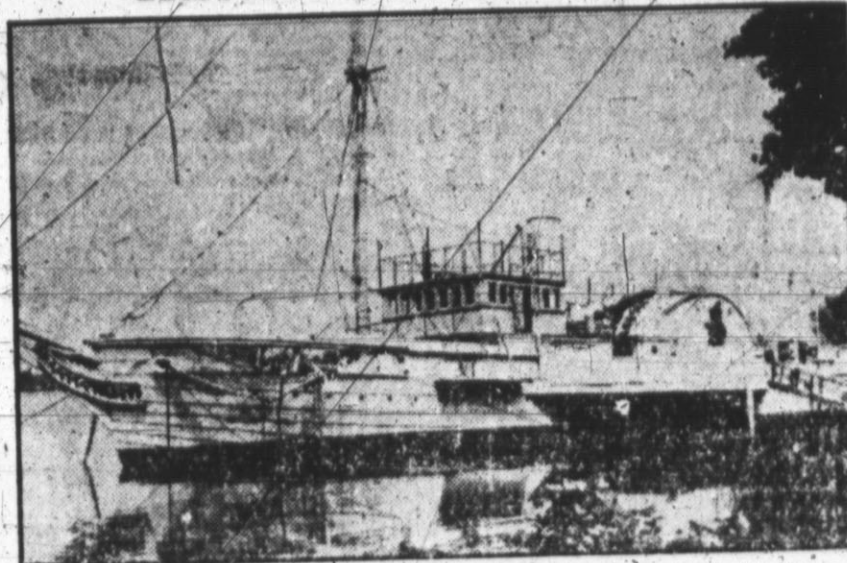

### COLORED SHEETS OUT

To save limited civilian supplies of dyestuffs, the WPB bureau of Industrial Conservation has requested manufacturers of bed sheets to discontinue manufacturing and selling colored sheets.

### MORE BOTTLES, JARS—BUT THINNER

Orders that will result in thinner and less fancy glass containers and an estimated increase in production of 30 per cent, have been issued by the War Production Board. Standardizing of certain glass container sizes and weights, by making possible greater production with the same machinery, is expected to help meet the shortage of tin cans and other metal containers.

### Historic Vessel Scrapped

Built 98 years ago, the U. S. S. Michigan, first ironclad ship built by the Navy, has been scrapped and her metal used for war purposes. The ship, now better known as the Wolverine, has been a tourist attraction at Erie, Pa., for several years.

## President Reviews Outstanding Years Work for Club At Concluding Meeting

Concluding meeting of the year for the Music Study Club was an alfresco party given at the home of Mrs. R. P. Coneway Friday evening. Members of the club enjoyed a picnic supper in the spacious grass-carpeted back yard.

Reports for the year were heard and Miss Mattie Mae Swisher, delegate to the Texas Federation of Music Clubs meet held recently in Belton, reported on that meeting.

In giving the president's annual report, Mrs. J. C. McCracken listed the achievements and accomplishments of the past year in what was one of the most outstanding records made by the club.

Realizing that education to be real must be shared through activities planned for community betterment, Mrs. McCracken placed the entertainment of the Seventh District, Federation of Music Clubs at the top of the list, mentioning also the splendid work of the district president, Mrs. A. O. Thompson.

One project that was adopted by the club was defense work. During the summer committees worked in the aluminum drive and contributed as a club to the USO. The club has sent phonograph records to four army camps, made calls for musical instruments and co-operated in the "Bundles For Britain" campaign.

The patriotic motif was featured in decorations, furnishing an appropriate setting for the International Relations program which was given under the direction of Mrs. H. L. Broadwell. Larkspur and iris predominated in the floral decorations and provided a colorful note to the lace-covered table, at which Mrs. Travis Dameron, president of the club, served coffee with orange bread, sweet rolls and sausage.

Proceeding the scheduled program which was presented by members of the Music Study Club, Barbara Burney, niece of the hostess entertained with two piano selections.

In introducing the International Good Will theme, Mrs. Broadwell displayed souvenirs from Cuba and spoke briefly on understanding the arts of South America. Dwelling on the theme of "Knowing Our Neighbors Through Music" she told of the influence of the radio and described the folk music of the different countries that make up the Pan-American group, and described the type of music and gave the national background of each number presented.

## IT'S OUR AMERICA LET'S KEEP IT FREE!

Our fighting men can "beat the life out of the enemy!" And every one of us at home can help . . . but only if we give our dimes and quarters and dollars to the very limit of our ability. Today, MORE guns, MORE tanks, MORE planes are a dire necessity. And Defense Bonds will help to pay for them. Our fighting men deserve the best equipment. The least we can give is our money, while they give their lives.

A WEEK OF WAR

The White House reported the nation's vast cargo ship construction program is on schedule and "the American people can be assured that the shipyards will do the job assigned to them". The statement, said shipyards delivered 120 new vessels in the first 130 days of this year, 20 per cent more than were built in all of 1941, and the production peak has not yet been reached.

American shipyards are building merchant vessels faster than ever before in the history of the world, the White House said. Cargo ships are being built in less than one-half the time originally allotted. "The progress made thus far is easing our shipping problem, but there will be a shortage of ships until sinkings throughout the world are brought under better control and the shipbuilding program gets into full production," the statement said.

Eastern Military Area Eastern Defense Commander Drum proclaimed all East Coast States from Maine to Florida to be the Eastern Military Area—primarily to enforce effectively the dimout restrictions to safeguard shipping. The proclamation said the protection of United Nations commerce from enemy attack involved the effective control of artificial lighting along the Atlantic and Gulf Coasts and for a "reasonable distance inland."
