June is traditionally the month for brides . . . not housecleaning . . . but Hereford this month is getting plenty of both. Lots of people are getting married, and they could hardly have a nicer wedding present from the city as a whole than a clean town to come home to after the honeymoon.

Speaking of cleaning-up, Lake Park is beginning to look like a park again now that some of the camouflage of weeds and tall grass have been removed. The trees and hedges are getting a manicure, too. It's ac-

tually possible for a motorist to see what's coming now at that three-way intersection of North Main and Avenue B. It's amazing how much a little well-directed work can accomplish.

Chamber of Commerce Secretary E. B. Posey has problems. Needs housing for about 20 people this week. Mr. Posey says a sudden flood of requests came in Tuesday by to phone, and some in person. in regard to the local situation. At his request, forces and influence of the State department are being brought to bear on the Federal government agencies controlling disposition of the Hereford Prisoner of War Camp property, in an effort to secure approval for the city's application for one of the prison compounds to be used to establish a labor camp here this summer.

The city has filed application, both with the Federal Public Housing Agency and the Federal Land Bank of Houston for that portion of the camp for emergency use.

Dr. George W. Cox, State Health Officer, makes no attempt to minimize the seriousness of the situation facing city during the summer months. In a letter to Col. F. J. Moss, Senior Sanitary Engineer of the U. S. Public Health Service, he wrote:

"We have been in discussion with Mr. C. A. Purcell, city sanitarian of Hereford, with regard to an anticipated public health problem caused by the migra-tion of transient workers to his

Reasons Why --- LAND BANK LOANS Provide Borrowers Extra Savings & Safety

Sound Stable Institution.

THE FEDERAL LAND BANK is not a periodic lending institution. Its loans permit their borrowers to own their homes regardless of adversities. In BAD times as well as GOOD times the Federal Land Bank provides financial assistance to home seekers.

Low Cost Re-Payment Privileges . .

THE FEDERAL LAND BANK is the originator and leader in reduced interest rates and re-payment privi-leges. It offers the MOST attractive terms available.

Co-operative Institution . .

STOCK OWNERSHIP is the keystone to the Federa Land Bank system. It has supported this type of credit through 29 years of dependable service. Its program is not a side-line to some other activity but has its only reason for existence the opportunity and obligation to furnish credit to farmers and ranchers. By reason of stock ownership to average net cost of money to Federal Land Bank borrowers through the Hereford National Farm Loan Assiciation is now 3.6 percent taking into consideration dividend payments made to its memberborrowers.

To the Farmers of This Community

You no doubt have read or heard statements regarding the advance in the retail price of farm machinery which was announced by OPA on Saturday, May 11th, which inferred that the increase in price to the farmers was only 3%. May we at this time call your attention to the fact that this is incorrect; the raise in the retail prices in most cases is 5% but the raise to the manufacturer on a wholesale basis is 10.25%. This increase in price was due to the requests from manufacturers of farm equipment primarily because of increased labor costs and the increased costs of materials and component parts needed to manufacture farm machinery.

Dealers' operating margin has been reduced 20% by OPA's new regulation.

THIS MEANS that your farm equipment dealers must operate from now on, on a 20% less working margin than they had before May 10, 1946.

THIS MEANS that your service dealer, even though his operating costs have mounted tremendously during this war period, must operate on a lesser margin than he had during World War II. When all other industries nationwide were demanding increases for their products, your farm equipment retailers did not ask for any increase.

THIS DECREASE MEANS that many of your farm equipment retailers will be forced to curtail the services that have made it possible for you to operate during these emergency periods with many obsolete machines even when new repair parts were not available.

THIS MEANS that many farm equipment dealers may be forced to remove from their rolls mechanics, servicemen and other employees, many of them G. I.'s, so that their operating costs will be in line with their earning margin.

THIS MEANS that many dealers, because of this "squeeze" in dealer's working margins, may be forced to close their doors and discontinue their operations.

All we ask of you, Mr. Farmer, is that you consider your welfare, and if you feel that we have done a good job for you during these "Hectic years", that you please contact your Congressman and Senators and ask them to restore to us the working margins we had before this new OPA ruling. Please bear in mind that we are not asking for any increase, but we cannot stand a reduction at the present time if we are to continue our operations. We would be pleased to have you stop in at our stores to discuss more thoroughly this program which is threatening to destroy the farm equipment retailers of America.

In the past it has not been the custom of dealers in Hereford to charge the customers with expense such as freight connected with the handling of repair parts-The OPA does allow this charge to be added to the price of parts and in order to survive during the time that the present price absorption ruling remains in effect, it will be necessary that we add this to your sales ticket or to the price of each item.

Exactly two years ago today, June 6, at 4:18 a.m.

Two years ago today the first American troops splashed up onto the beaches of . Normandy-and the Allied invasion of Western Europe had begun.

That great invasion could never have been launched, could never have succeeded, if the American people hadn't "backed the attack"—by buying millions upon millions of War Bonds:

Today, praise God, the war is over. But it's still important for you to keep on buying Bonds.

Becaause it's the easiest, safest, surest way you can back your own future.

It's the best way to set aside money for rainy days, for building a home, for sending the kids to college, or for old age.

These Bonds are now called U. S. Savings Bonds. But they're exactly like War Bonds. They're sold at the same places—banks, Post Offices, or at your place of employment. They're guaranteed by Uncle Sam personally. And in only 10 years, they'll pay you \$4 for every\$3 you put in!
