PROBE PORPOISE FOOD HABITS

Indications are scientific research will disprove a contention which has long been made up and down the Texas coast—that porpoises should be killed out because they eat millions of desirable fish such as trout, redfish and salt water drum. Investigation of porpoises by the Texas Game, Fish and Oyster Commission's marine biologists have been carried on some weeks at Freeport. They will be continued a year.

The biologist has found no evidence of porpoises eating game fish. He has examined the stomach contents of sixteen of these mammals which were killed by the owners of Mills Wharf. Examinations to date show that the porpoises eat mostly mullet and gizzard shad. A puffer and needle gar were also discovered, but no trout, reds, drum or other game fish.

Very little is known of the porpoise and the Game Department will carry on a comprehensive study. The size of baby porpoises may be surprising to many people. One newly-born porpoise was five feet, seven inches in length. This large size for babies is common with members of the whale group. The porpoise is a small toothed whale.

WOMAN OUTFISHES MEN

It took a woman to carry off the first prize in a fishing contest held at Lake Kemp recently. Crapfishermen have been struggling through ten annual Wichita Valley Fishing derbies with a three-pound crappie as their goal. Mrs. Elwood Hackney of Knox City, Texas, shattered the male ego of that section when she came in with a three pound, twelve ounce crappie. Many bass weighing five, six and seven pounds were caught during the contest.

The bride wore a white organdy gown over bridal satin, with short puffed sleeves and full lace-trimmed skirt with a deep train. After the wedding a breakfast for the immediate members of the families and the bridal party was given at the home of the bride's parents. The Irish linen cloth that covered the table was a wedding gift of the bride's mother. The centerpiece was the three tiered wedding cake topped by a miniature bridal couple and encircled by a wreath of tiny pink rosebuds. White tapers burned at each end of the table. The place cards were hand decorated and favors were small pink and white baskets filled with pink and white candies.

Out-of-town guests included A. C. Stelzer, Muenster, Mr. and Mrs. Joe Bernaur and son, L. J. Bernaur of Panhandle, Miss Evelyn Bernaur of Panhandle, Rev. Father Stanley Lubbock, Miss Mildred Schneider and Mr. and Mrs. L. E. Schneider of Amarillo.

Date Set For Flower Show

September 20, has been set as the date for the annual Fall Flower Show sponsored by the Hereford Garden Club.

At a meeting held by the club Friday afternoon at the home of the president, Mrs. N. E. Gass, members discussed plans for the show and told of individual plans for show flowers. All Hereford gardeners are urged to plan now for the show by planting and cultivating flowers with that in mind. Every Hereford yard or garden should have a bed of petunias, this year's club flower, and every flower lover should plan to enter at least one type or group of flower.

Two subjects were discussed at the meeting. Mrs. Mark Hanna talked on biennials, pointing out that the time to plant biennials is in the fall, preferably in October.

Seedlings were discussed by Mrs. C. C. Cox who said stocky plants grow better than the tall spindling type. She advocated the transplanting of seedlings

Fishing Season To Open June 1 At Buffalo Lake

Quite a celebration is planned for the day with members of the State Game and Oyster Commission and Federal agencies invited to attend. A sunrise breakfast or Fish Fry is being planned.

Old Tack, Amarillo Globe-News publisher, has offered \$75 in cash prizes for the opening day. He offers \$25 for the largest Bass; \$25 for the largest Crappie and \$25 for the largest Catfish caught on that day.

A maximum of 20 fish in aggregate species may be taken daily during the trial period. One may catch 10-bass with a minimum size of 11 inches; 10 Bream of 8 inch minimum; 5 Crappie of 7 inch minimum; 5 Catfish of 10 inch minimum and five of any other species of 7 inch minimum in one day. Only one pole or rod per person will be allowed and no trot or throw lines. All bait must be inspected before it will be allowed for use to prevent use of goldfish, German Carp or game species.

Winning Of Second Place In State Band Meet Highlights Successful Year For Hereford's Junior Band Organization

Above are pictured regular members of the Junior Band which made such an enviable record this year. Barbara Ann LeGrand is not in the picture.

Ending its year of activities with a picnic last week, the Junior Band of Hereford today can look back with satisfaction upon one of the most successful seasons a junior band has ever experienced.

In the face of many difficulties and with many of its players just starting their musical careers, the band nevertheless has won unusual honors, most of which have gone almost unheralded.

Through oversight, its outstanding accomplishment, the winning of second place in its class in the State Band Festival at Plainview, went almost unnoticed and is now given belated, but well-deserved publicity. Its win at Plainview is amazing in view of the fact that, through error, the band prepared a junior high school selection for its selected piece instead of the junior selection.

Composed of students in the sixth grade or under, the band is directed by Ralph Smith. This year 14 of them graduate to the

seventh grade and next year will be in the regular Whiteface band.

At the State Festival, Meyers Hudson won 2nd place on his cornet, Wayne Newsom, second on his bass horn and Elaine Taylor won 2nd on her trombone.

Members of the band who contributed to the success of the band this year include 44 musicians and two twirlers and a majorette. They are: Saxophones, Marcella Blue, V. C. Hopson, Ouida Hudson, Louis Bell, Virginia Lyons, Barbara Ann LeGrand, Juanita Beauford, and Georgia Faye McConnell; Clarinets, Jack Brumley, Jessie Ann Buckner, Billy Ray Johnson, Wanda Jean Smith, Jimmy Whitaker, Ann Morgan, Irving Robinson, Jearon Sowell, Paul Hagar, Jeannine Singletary and Bobby Lee Witherpoon; Cornets, Meyers Hudson, Duane Williams, George Wood, Glenn Russell, Eugene Matthews, Bobby Neal Millard, Gilbert Carlyle and Delbert Conklin; Trombones, Elaine Taylor, Robert Jackson, Lloyd Manjoet, Leroy Boyer, Harold Conklin, and May Jackson; Drums, J. W. Robinson, Dianne Jowell, and John Samuel Coombes; Bass Horn, Wayne Newsom, Delmo Williams; Flute, Joan Smith, Marie Williams; Alto, Ben R. Plummer; Cymbal, J. B. Sowell; Bells, Maydelle Beavers; Twirlers, Peggy Bernard, Bobby Hamilton; Baritone, Edward Roberson; Majorette, Kathleen Miller.

Those graduating to the seventh grade and who will be eligible for the Whiteface band next fall include Barbara Ann LeGrand, Leroy Boyer, Juanita Beauford, Eugene Matthews, Harold Conklin, Paul Hagar, J. W. Robinson, V. C. Hopson, Myers Hudson, Marcella Blue, Delmo Williams, Robert Jackson, Edward Roberson and Lloyd Manjoet.

Bryant, to Mr. Lester Taylor of Abilene, was announced Tuesday afternoon at a seated-tea given by Mrs. Cawthon Bryant at the home of Mrs. L. Z. Oldham. The couple will be married Sunday, June 2, at the Methodist Church.

An appropriate program entertained the guests. Mrs. B. Y. Crosthwait played "Garden of Roses" and "Sunshine of Your Smile." Thompson, accompanied by Mrs. Crosthwait, played two violin selections, "O Promise Me" and Cadman's "At Dawning."

A toast to the bride-elect was given by Mrs. Bryant.

The refreshment table was laid with a cluny lace cloth over yellow satin and was centered with an arrangement of pink roses and tall pink tapers. A two tiered bride's cake topped by a miniature bride and groom was cut by the bride-elect, Mrs. L. Z. Oldham presided at the punch bowl, assisted by Mrs. Cawthon Bryant and Mrs. John Jacobsen Jr.

Other rooms were attractive with bouquets of summer blossoms.

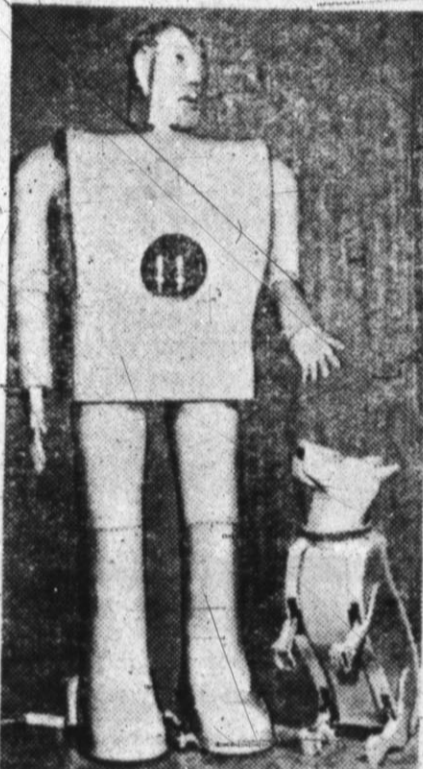

Guests included Mesdames Jack Roberson, C. B. Williams, A. C. Thompson, Will S. Kerr, Clay Ridgway, Altus Higgins, L. W. Carlyle, L. W. Carlyle Jr., John Jacobsen, J. P. Slaton, D. H. Bryant, M. B. Adjustments On Wheat Losses Are Being Made

Rapid progress is being made in the adjustment of crop losses suffered by Deaf Smith county farmers who insured their 1940 wheat under the Federal Crop Insurance Corporation program, according to J. A. Pitman, chairman of the county AAA committee. Adjustments have been made on 14 farms, and indemnity payments have already been received by 14 of these wheat growers.

Adjustment work thus far has been confined to total or "substantially total" losses, where the crop was entirely destroyed or so badly damaged that there was no chance of it producing a yield that would justify harvesting, he said. Where total or "substantially total" losses

Mechanical Mutt

Elektro, the mechanical man, and Sparko, the mechanical dog, get together in New York, where they are on display at the fair. Sparko barks, wags his tail and sits up. Elektro is equally versatile.

...es have been determined, farmers have the use of the land for other crops. Altogether, 1775 acres of insured wheat land in the county have been released for other uses, the chairman reported.

All of the claims of losses reported thus far have resulted from wind erosion and drought.

"The settlement of 1940 crop losses demonstrates the manner in which wheat crop insurance is stabilizing wheat growers' incomes," Pitman declared. "The indemnities that farmers are receiving represent income that they otherwise would have lost. More losses may occur between now and harvest, but every insured grower is sure of income from at least 75 per cent of his average yield."

High School Building To Be Inspected

Rittenberry, an architect of the Amarillo firm which constructed the building, has been in Hereford to inspect the damage, and Fred Horn, director of School Plant Division of the Dept. of Education, Austin, is expected soon for another inspection.

Damage appears confined to the area where the plaster fell on the balcony, May 22, Mr. Kinard said, but added that a thorough inspection of the building would be made and that all work necessary to insure safety of the building would be done.

Deck Wells Stresses Faith In America

Pointing out the great horizons which lie before the youth today, Deskins Wells, Wellington editor, again stressed faith in America as a land of opportunity when he addressed the graduating class of Hereford high school Friday evening, May 23.

Mr. Wells confronted frankly the many problems which face the young graduates of today, and after touching on the foreign situation and comparing the lot of boys and girls of this nation with that of the youth of many other nations, he turned to the home situation. Only one third of the high school graduates are finding work, he said, but only one fourth of them are prepared to do anything definite.

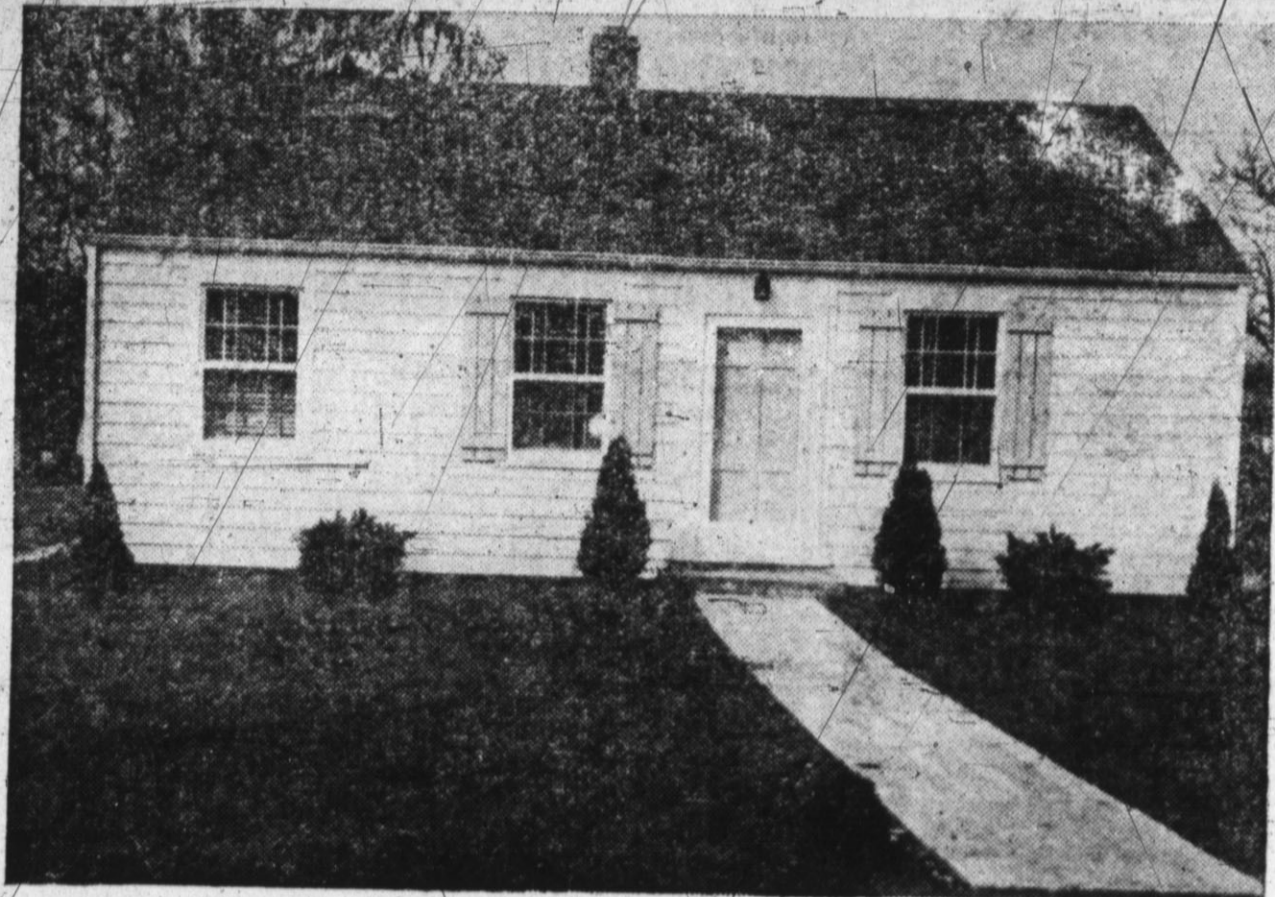

"On one hand stands the army of jobless, but on the other there are many jobs begging for trained applicants they cannot secure. With millions of our people out of work, the United States is facing the greatest shortage of trained laborers in its history," he said.

"The chance of easy success will in all probability be denied you when you finish school," Mr. Wells added, turning from the limitations and dangers confronting the boys and girls to the possibilities and advantages. "Great obstacles have brought forth great achievements. The day of pioneering is not done.

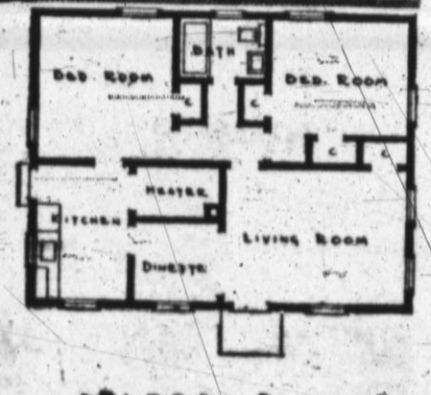

"Before you are greater horizons than your fathers ever knew. I am willing to defend the premise that we live in the best governed land in the world, but we are only in our infancy in developing a good government. The free land is gone, but we are only learning how to make the land produce according to its capacity. As a people we have only touched the edges of scientific development. As a nation, we, as well as the rest of the world, are simply helpless tottering babes as far as working out a perfect economic and social scheme is concerned.

"Find a place in life by preparing yourself for it. Find out those fields in which the shortage of laborers lie and prepare your self for one of these jobs. Don't let a sense of false pride keep you from honest work if

Good Example Of a New Trend

This example of modern architecture illustrates the trend toward the low-cost home and what has been accomplished in this field in so short a period. Free from most of the defects of architecture in transition, this home is simply designed to solve a special living problem. Good homes for income groups not adequately cared for in the past are the recognized need in the building industry today. Homes like this will help fill that need. Valued at \$2,345, the Federal Housing Administration insured a mortgage on the property of \$2,100. A mortgage of this amount under the maximum terms of the F. H. A. plan may be paid off over a period of 25 years with average monthly payments of approximately \$12, exclusive of local taxes and hazard insurance. This home has no basement but has a heating-utility room.

Since then he has been connected with the drug business for several years at Amarillo, seven years at Waxahachie, and for the past two years has been at Plainview.

TEXAS OUT-O-DOORS

DEMANDS FOR FISH HEAVIER Austin.—With new, huge lakes being built in Texas constantly, the demand for fish raised by the State Game Department in its ten hatcheries increases monthly. The latest lake to be stocked is Possum Kingdom. Bass numbering 71,000 were planted in it recently, it was announced today by the Executive Secre-

tary of the Department. That was the first of many shipments which will be placed in the lake. All the new lakes being stocked by the Game Department are being studied by aquatic biologists to determine the amount of fish food the various bodies of water will produce. Too, they are determining the species of fish most suitable for each lake. The state hatcheries produced more than 5,000,000 fish last year, but by using improved Game Department aquatic biological methods of fertilization, some of them developed by Texas biologists, and by making use of other recently-discovered meth-

CAUGHT THREE FISH AT ONCE

L. D. Flowers of Uvalde, Texas, was plenty satisfied recently when he caught a sixteen-inch bass, but he wasn't amazed until he cut into the fish and found a four-inch bass in its stomach, according to a report to the Game Department. Investigating further, Mr. Flowers opened the smaller bass and discovered a two-inch perch. Both the four and two-inch fish were whole. Maybe catching two bass and one perch on a single hook is a record.

HAUL IN 1,100-POUND TURTLE

The waters off the Texas Gulf coast often give up monsters. The most recent reported to the Game Department was a 1,100 pound turtle which was lassoed and finally hauled in by four men. The turtle had been grazed by a tanker a few minutes earlier in the Sabine Channel. The marine Gargantuan broke the first rope with which he was lassoed and undoubtedly would have escaped had he not been injured by the tanker.

Spanish Motif Is Featured At Bridge Party

Included in this week's social calendar was the contract bridge party given for members and guests of the Tuesday Afternoon Bridge Club at the home of Mrs. Travis Dameron. Red and white colors were combined in decorations with American Beauty roses, sweet peas and mock orange blossoms. All appointments for the games reflected a Spanish theme and refreshments repeated the colors in the lovely pottery table service.

THE JOHN DEERE IS SO SIMPLE I can make most adjustments myself. For instance, I can tighten the Clutch in 5 Minutes. Reline it in 15 Minutes.

NO OTHER TRACTOR IS SO SIMPLE AND SO EASY TO SERVICE AS A JOHN DEERE TRACTOR

YOU don't have to be a skilled automotive mechanic to service a John Deere General Purpose Tractor—it's that simple. You can inspect and adjust practically all working parts from a standing position. Brakes and clutch can be adjusted in less than 5 minutes. Valves and tappets are located in the cylinder head—they're easy to get at. Everything is simpler—easier to understand in the John Deere. That's why the average owner does 75% of his own servicing without any outside help.

SOCIETY

MRS. JOHN McLEAN, Society Editor Phone 181

Hospitality depends a great deal on the heart but a variety of canned foods on the shelf and a few failure-proof quick recipes at your finger tips go a long way in enabling a housewife to dispense food in an easy, friendly fashion when a husband brings all unannounced, some associate in for a home cooked meal.

Making blueberry muffins might be any cook's prize achievement but it can also be an emergency accomplishment, for with a can of blueberries on the pantry shelf a top notch product can be ready in a few moments. Of course it is much better to use fresh berries but no one will fail to put away his share of the muffins when the fruit comes out of a can.

The following recipe belongs to Mrs. John H. Olson. She got it from her mother-in-law, Mrs. John H. Olson of Two-Harbors, Minnesota, who is a native of Norway. The recipe has been handed down in the Olson family for years and Mrs. John Olson of Hereford who was a home economics major in the University of Minnesota, knows just how to handle it. Here's the recipe:

And It's Good BLUEBERRY MUFFINS

- Butter-size of an egg
- 1/2 cup sugar
- 2 eggs
- 3/4 cup sweet milk
- 2 1/2 cups flour
- 3 teaspoons baking powder
- 1/2 teaspoon salt
- 1 cup blueberries

Cream butter and sugar and add well beaten eggs. Sift flour and measure. Reserve 1/4 cup of the already measured flour, to be mixed with the berries, and sift the remainder with the baking powder and salt. Add this mixture to the butter and sugar mixture alternately with the milk. Drain the berries, sprinkle with lemon juice, roll in the 1/4 cup of flour and add to the whole mixture.

Bake in a 425 degree F. oven for 15 or 20 minutes.

This makes about 16 small muffins. Mrs. Olson who has the knack of doing things easily and quickly, can stir the ingredients for whole wheat bread together, put it in the oven and pretty soon out it comes—all done to a turn. It's always just the same for like most home economic students, guesswork has no part in her plans. She is always sure to measure the ingredients accurately. This bread is good hot or cold and for all sorts of occasions—family luncheons, Sunday night suppers, and informal company get-togethers. Try slicing it real thin and making sandwiches, using your favorite cream cheese as a filler. Here's the recipe. It makes two loaves.

WHOLE WHEAT BREAD

- 1/2 cup sugar
- 1/2 cup sorghum molasses
- 2 cups buttermilk
- Mix together and add to
- 2 cups whole wheat flour
- 2 cups white flour
- 1 teaspoon baking powder.
- 2 teaspoons soda
- 1 teaspoon salt
- which has been sifted together. Add 1 cup raisins and 1 cup nuts. Pour into two greased (ordinary size) bread pans and bake one hour in a 350 degree F. oven.

784 Football Teams To Be In Fall Scramble

Austin.—By the first kick-off whistle next fall 784 interscholastic League football teams, 170 more than three years ago will be scrambling across Tex-

as gridirons. R. J. Kidd, University of Texas League director, has announced.

In 1937 the state grid picture was: A class, 105 teams; B, 388; C, 121, total 614. Following this year's re-classification of teams according to strength parities, the breakdown reads: AA, 104; A, 290; B, 255, and the small school's 6 man football, 135; total 784.

The 30-year old organization has fostered football competition since 1921 when less than 100 schools had organized schedules, when eligibility rules were unheard of and coaches themselves played, Kidd recalls.

Kidd attributed the 170-school League membership pick up in the last three years principally to two factors: Six-man football, the answer to small school prayers for a sport they could support; and the re-classification program which has matched strong teams with strong teams to prevent hogging of championships by large schools.

BULL

By Jimmie Gilentine

Could Hitler's spies and fifth column worker's land here in parachutes, provided the Nazi forces should decide to invade the United States through Mexico?

Preparedness being a keynote in the present American plan, it looks like Hereford is again going to be first to join in the national program. Rufus Sewell and Ernest Medkief have ordered 1,000 balloons, which will be inflated with gas and turned loose for target practice next Sunday afternoon. Every one interested is invited to join in the target practice, which will be held at 2:30 o'clock Sunday afternoon on the old skeet shoot location south of the crossing in State Park. Only .22 rifles may be used in the shoot and all participants must obey ground rules which will be outlined before the shooting starts. Women were also invited to take part in the target practice. The only expense will be payment for the balloons, which will run around one cent each. Participants will furnish their own ammunition.

Hereford, with its cattle, potatoes and wheat, should be protected, the promoters declared—and we just want to be sure that no live Nazi will come sailing down to disturb this community.

The subject of cattle calls to mind the fact that the Hereford Breeder's Association is long over-due a bouquet. This organization is responsible for the large "Welcome" signs which have been erected at each entrance to Hereford. Naturally, the signs give a background for fine Hereford cattle, but such enterprise is worthy of high praise. Led by their secretary, S. P. Rosson, the Association with considerable trouble secured the signs, which greet the eyes of every tourist who passes through our town.

Knox Knard, local superintendent, used to be a fine fellow and all of that stuff until last Friday. Confidently (in front of a large crowd) he said: "Jimmie, I especially wanted to get Deskins Wells out here so the people of this community would know that a fellow can be an editor, and at the same time be a halfway smart man."

I always said that Knox Knard knew more about human nature and had more common old horse sense than any school teacher I ever saw, but I didn't expect the tables to turn on

MEMORIAL DAY

Abraham Lincoln, at Gettysburg, spoke words to which he attached no world-stirring significance. They were merely an expression of thoughts which, to him, were a creed. They were nothing new to him. Yet students and practitioners of liberty took up those words and showed them to the world as America's own expression and interpretation of belief. Lincoln's simple statement of what he considered as known facts thus became a flaming pennant that proclaims the spirit of the Stars and Stripes! With such a creed for our land it leads us to resolve more firmly that these priceless possessions shall not perish from the earth!

me like that. Anyway, a lot of folks met and heard my old boss, Deck Wells, and I know lots and lots of them are going to vote for him in his race for Congress. Several people have even mentioned organizing a "Deck Wells for Congress Club" here in Hereford. I worked on Deck's paper for six years and I pledge you that he is honest, sincere, and fair; I also think that he's one of the best versed young men in the entire Panhandle, and undoubtedly the smartest editor. I wish everyone around here could know him like the folks in his home territory, where they tell me he is going to get around 99 and 99-100 per cent of the votes. The farmers there had a big meeting and they're really working for him. It looks like he has an excellent chance to be elected—and the folks on the farm and in small towns over the entire district will surely have a real friend in Congress.

Here I am writing about politics, while scores and scores of folks think that I should be writing about flower and bees. Grant Fuller even thinks I should be writing about softball.

However, there is real merit in the theme of beautification, as recently pointed out by E. R. Hollingshead, a visitor who came here from Hollywood, Calif. Mr. Hollingshead is a close friend of Miss Mattie Mae Swisher and holds the title of Artist's Manager in Hollywood. He is very accomplished, and was very surprised upon his first visit in Hereford. He praised Hereford as a town of beautiful churches, spacious lawns, majestic trees, nice homes, an enterprising business district and a community long known for its musical achievements and excellent citizenship. Then he added: "But had I been an uninterested tourist, I should never have known these wonderful accomplishments."

Mr. Hollingshead's point was that our community looks terrible when viewed from the highway and that if Miss Swisher had not lived here he would not have troubled to pull off the road and see the main part of town.

His constructive criticism is well founded. Hereford could do nicely with some trees along the highway and our progressive Garden Club could do the community a worthwhile service by planting flowers at spaces along the road near Hereford. As J. W.

Spradley pointed out not long ago, the Dump Ground is an eye-sore of no small proportions. Canyon moved its dump ground and today boasts instead an attractive wayside park; that's what one alert city did to attract visitors and tourists within its portals. Dimmitt also has some beautiful trees which introduce travelers along Highway 51 to its enterprising citizenship. There are lots and lots of little things that wouldn't cost much. Miss Swisher says once she visited Indiana and that folks on the rural routes had planted Hollyhocks beside their mail boxes. A pail of water was carried each time they went after the mail and the country looked like a garden of Paradise.

As soon as my wife reads this you can find me on the end of a hoe handle, and I know that I am making a mistake. However, Mrs. C. F. Moore will look across the street and see me, and that will give her a good excuse to put C. F. to work—and the first thing you know

people will be working all up and down Third Street. It might even spread all over town. I hope so. Misery loves company.

Here's one Glenn Weir tells on himself. When Glenn was a little boy he went to a party and wore a new wrist watch. He also got into his mother's cologne and doused his new linen handkerchief. He arrived at the party, sat down and awaited for the exclamations from the girls. Glenn kept holding the watch to his ear and at intervals would take out his handkerchief and mop his brow. Nothing happened, so finally he burst out and said: "Say, if any of you hear anything or smell anything, it's me."

He ought to send that one to Bob Burns. It sounds so much like Arkansas that I wouldn't be surprised to walk into the store someday and find Grandpa Snazy on the sodapop case frying an egg.

Most Panhandle Towns Show Loss In Population

If Hereford's population shows a substantial gain in the 1940 census over the 1930 figures, this town will be among a comparative few in the Panhandle to do so.

No comparative figures on towns in this district have been released but over in the Panhandle census district 26 out of 31 towns showed losses. Borger, Canadian, Gruver, Matador and Roaring Springs showed gains, as did Pampa, which was not listed.

goes credit for helping to build a great nation

Someone recently defined democracy as being "liberty and groceries" — and the more you think about it the truer it becomes.

Thus are the farmer and rancher the producers of our food, among the bulwarks of our great democracy. Working hand in hand with them are banks all over the land, helping to produce and market the products so that we might go on living in a free and prosperous country.

Poppy Sales Total \$80.62

Expressing gratitude for the generous response to Poppy Day, held Saturday, Mrs. Glenn Weir, chairman of the committee, said today that sales were better than they ever had been, \$80.62 being the amount raised here. "On behalf of the committee, I wish to thank everyone who helped us in the sales," she said. "The funds raised will be of infinite aid to the disabled war veterans who made the poppies."
