Dean Dunlap, who was sta-tioned in England during the war, has brought a copy of Lord Beaverbrook's famous London Express dated Nov. 26, 1944, which featured a story about Deaf Smith county, Texas, under a caption "Story that has nothing to do with the war," to the local Chamber of Commerce.

The story, as you've probably guessed by now, dealt with "the town without a toothache" and decorated page one of the Sunday Express. "Do we have any-thing like this in Great Britain," asks the Express, editorially. "Yes . . . in 1943 Dn. Robert Weaver, carrying out a survey of teeth of 1000 12-year-olds in North and South Shields, villages located on opposite banks of the River Tyne, found the decay rate 50 percent less in South Shields than in its twin village across the river."

The Express goes on to point out that fluorine content of water in North Shields is less than 25 parts per million, while in South Shields, it is 1.4 parts, comparable to the water in Deaf Smith area; and that the water supply in South Shields comes from the same transfer area. from the same type of deep limestone formation that is found in this Texas county.

Lions Club Io Sponsor Group

Members of the Hereford Lions Club Wednesday were asked to sponsor the "Teen Town" organization for boys and girls of this community. The request followed an outline of plans and duties by each of the student officers and chairmen of the organization.

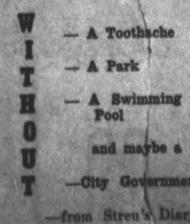

The group outlined the need of "teen" age recreational advantages and pointed to crowds which are thronging the U. S. O. location each day, pointing out the urgent need for a building, for adequate finances and for adult supervision for each of the meetings. Mrs. A. L. Manjeot, who has been supervising the group from 4 to 6 o'clock each afternoon and from 2 to 6 o'clock on Saturdays, expressed appreciation for the behavior of the "teeners" and said that she was thoroughly sold on the advantages offered through the organiza-

No advance announcement will be made of support prices for grades below U. S. No. 1. The Department of Agriculture will support the prices of lower grade potatoes, exclusive of culls, according to the support obligations; but the details of the program will be announced when the need arises.

Another new feature of the 1946 program is the fact that the stated support prices are base prices, effective when the crop, in bulk, is loaded on trucks at the farmer's gate.

Prices for early and intermediate potatoes will be supported by direct purchases. If it is necessary, the government will divert the potatoes into trade channels, food, industrial, and export outlets. The late crop will be supported by loans.

City Election

the election will be April 2.

A city-wide clean-up campaign has been ordered by Mayor E. S. Ireland to begin on Saturday, March 9, continuing through the following Saturday. In a proclamation issued from the mayor's office yesterday, Mayor Ireland asked that "every citizen collect and assemble at some convenient place all trash, rubbish, junk, or other refuse, so that it may be picked up by the City trucks without delay.' It is important that the collection of refuse should start immediately," the mayor said, so that when the trucks start out it will be ready, eliminating the necessity for extra trips. The cooperation of all is urgently requested, and this campaign cannot be successful with-

out it." C. A. Purcell, city sanitarian, met with the Deaf Smith County Commissioners court Monday, and enlisted county aid in the clean-up drive. Our main high-pressure transmission line originates at our Turkey Creek Compressor Station 30 miles northeast of Amarillo and goes to Canyon, Plainview, Lubbock, Midland and Odessa and other intervening cities. At Canyon, a line connects from this main trunk to Farwell, near the New Mexico line, and thence to Lubbock, forming a big triangle and serving a number of cities. More branch lines from this triangle and from the main trunk serve other cities and towns-a total of 44 in all. The pipe line system contains about 855 miles of pipe.

At or near each city served is a Town Border Station, which consists of a small building housing metering and pressure-regulating equipment. Now that the gas has almost reached its destination, high-pressure is no longer needed, so the pressure is reduced to what we call "Intermediate Pressure," after which it enters the city distribution system which consists of a network of lines carrying gas to homes, stores, offices and businesses in your city. There are about 548 miles of pipe in our city plants. The Intermediate Pressure is sufficient to carry the gas to the small District Regulator Station nearest you. Here the pressure is further reduced for delivery

through distributing mains and service lines to your meter at predetermined proper pressure for your use.

From the District Regulator Station the gas flows through a low-pressure line to your meter, where it becomes your property; thence through your yard and house piping to your familiar household servants, your range, your water heater, your refrigerator, and your home-heating equipment. Responding instantly to your every wish, it contributes greatly to carefree, healthful living, at a cost within the reach of all.

Our story until now has dealt with natural gas and some of the equipment used in bringing it to you. However, despite our large investment in physical property, our greatest asset is the group of loyal, hard-working, courteous employees who operate the properties 24 hours a day and 365 days a year, to render you a high type of service. Natural gas itself, without the services of these many men and women, would be worth little. Each and every employee has his own special type of work which is vital to the proper functioning of the group as a whole.

While you, our customer, are dependent on us for service, we are actually more dependent on you. Without you we could not exist. Therefore we are going to do everything we can to give you good service. The natural gas that we have to sell has been proven a perfect fuel: each and every employee will strive to render you a personal service of equally high quality.

Mary Hensley Is Chosen Among 1946 College Beauties

CANYON,-Mary Henslee of Hereford has been chosen as one of the 1946 beauties of West Texas State College by John Robert Powers of New York City. Tyenty-four photographs were submitted to Mr. Powers by the year book staff after students had picked the candidates. From these, Mr. Powers selected fourteen, whose pictures will appear in the beauty section of LeMir-

age, the college annual.

Miss Hepslee was presented at the traditional crowning of West Photos by Alec Thompson Texas State's personality king and queen on February 16. She land the thirteen other beauties formed the royal court.

Miss Henslee, a senior, won great acclaim recently in the title role of the play "Jane Eyre," which was staged by the Campus Theatre. She also has played in many other college dramatic productions.

DUAL INSTRUCTION

Twenty-two years ago this month A. H. Streu purchased the C. O. Lee Hardware in Hereford. He was a comparatively young man at the time—full of ambition and the ideals of serving the community. He adopted the slogan "Service and Qual-ity" as the guide for everything that Streu Hardware might do or sell. That motive has been the guiding principle of the company for all this time. It has seen the company through good times and bad—through expansion, de-pression, war, and now, reconversion. It will continue to be our guide in the trying days to come. Remember those things, "SER-VICE and QUALITY".

We had hoped to hold a celebration this year on our birthday-with decorations, favors, and special offerings of merchandise-instead, we find ourselves fighting tooth and nail to maintain an adequate stock to serve our trade. We promise you that one of these years we will really throw a big party for all our friends and customers.

Just received - large shipment of Chadwick China - vases, book ends, etc. More stepladders -

two burner electric hot plates tennis nets, balls, and rackets a dozen nice bread boxes and a goodly quantity of metal cannister sets — Ferry's garden seed and Mandeville King flower seed.

A few garden plows left — and we have an excellent assortment of garden tools including hoes, rakes, cultivators, spading forks, shovels, Handi-carts, trowels. Also a few lawn sprinklers, Soil-Soakers, hose couplings and menders, Vigoro, and other gardening needs.

Almost forgot to mention we received that Stromberg-Carlson radio-phonograph combination job. It is available for demonstration to anyone who has transportation. We haven't been able to buy a pick-up as yet. It is truly one swell machine—the radio-not the pickup.

The weather last week made me think how badly Hereford needs a swimming pool.

It's not the dealer's fault. We don't think it's our fault. Maybe it's nobody's fault. But here's what happened:

Here's how fast G. E. and its affiliated companies were making and shipping things for you: NOV. DEC. OCT. On hand Dec. 31, 1945 85,968 67,564 IRONS 60,440 2½ days' production 256,038 177,681 181,998 **CLOCKS** 2½ days' production 17,577 28,432 12,755 REFRIGERATORS 4 days' production 6,874 4,672 WASHERS 3,068 4½ days' production 8,996 8,973 3,056 RANGES days' production 9,401 5,129 RADIOS 85 1½ days' production 2,386 312 **TOASTERS**

Out of the 2,485, 138 appliances manufactured in 1944 and 1945, General Electric shipped 98%.

AFTER the war ended, we weren't able to get back into production of some appliances as soon as we had hoped, and production rates weren't as high as we had hoped. A number of unforeseen things like material shortages made the job harder.

But there were only 120 days between V-J Day and December 31, 1945, and in those 120 days we partly reconverted our factories from war to peacetime goods and got production started. During the year we turned out 2,313,791 electrical appliances.

We shipped these appliances out practically as fast as made-so fast that at the end of the year more than

reconversion began were out of our factories. Most of them were in the hands of users.

Then, on January 15, 1946, our plants were closed by the strike. Not a single electric home appliance has been built or assembled there since. And, because our warehouses are practically empty. your dealer won't be able to obtain any more until we can get back to making them.

We want to get back to producing as fast as possible. The manufacturing organization is set up; the machines are ready, waiting to be set in motion. These factors will help us to do an

98 per cent of those we'd built since even faster job then we did in the months before the strike.

But we can't pick up production quito where we left off. Production lines are too complicated for that. A great many things have been dislocated by the strike.

When the strike is over, and the refrigerators and toasters and radios you've been waiting for begin to come off the lines again, we'll get them into hands of our dealers just as fast as we can. They'll be competitive in price. They'll be General Electric quality.

So, please don't be impatient with your dealer-or with us.

Dusting of rat runs and habitats with DDT will start Monday, Purcell said. The prpose of the dusting is to kill all lice, mites, and fleas which are car-ned by rats. It is these insects that transmit to humans and warm blooded animals such diseases as typhus, which is

on the increase in Texas now. "It is vital that all busines establishments be serviced if the campaign is to be 100 per cent

effective," the sanitarian said, "for if one building is missed, that place will soon furnish rats to re-infest neighboring build-

Immediately following the rat extermination, all buildings may be rat-proofed under the supervision of an official of the U.S.

Public Health service. By this method, every business institution in the city will be free of rats and future infestation. This will stop all economic losses from rats, as well as the spread of diseases and such illnesses as diarrhea and food poisoning to which

Joe A. Stanley, regional engi-neer for the State Department of Health, and James H. Harris, district supervisor of Typhus Control from the U.S. Public Health Service were in Hereford Monday and Tuesday conferring with city officials in regard to the coming campaign.

Red Cross

(Continued from Page 1)

the Red Cross work did not end with the war, but goes on, as it always has, year after year in relieving sufferers from disas-ter, both at home and abroad, in serving members of the armed forces still in service, and in its great program of first aid training and safety precautions.

Texas suffered more disasters than any other state in the Union in 1945, according to re-cords recently published by the ARC. Two floods, two tornadoes, poliomyelitis, a fire, a hurricane, and a windstorm took a high toll of life and property. The Red Cross was on the job in every we're not Dumb either.

Its service with the armed forces overseas won high praise. Ex-serviceman John Harris states that he was given a Red Cross comfort kit when going overseas in 1943, and also re-ceived one each time he was in the hospital.
