TALLAHASSEE, Fla. (AP) — A convict trying to escape from prison road gangs in Florida have to outrun fellow inmates as well as prison guards.

Every man in a road gang is given 18 days off their sentences for every six month period in which there are no escapes.

After one recent escape, Pompano Beach Prison Warden J.J. Albritton said he thought one escapee "would have gotten hurt if he'd come back here."

Other inmates, the warden said, were furious.

In another camp recently, a road gang member broke to run, but other prisoners collared him before he got far.

plying of half - pints of milk for the 1960 - 61 school year. The bids were the same, and were tabled, pending further consideration.

Scully pointed out that there are three approaches to determining value in rural and urban areas on every property, which include: comparable market sales; reproduction costs, less depreciation and obsolescence; and income capitaliza-

tion. In urban residential areas, he said, lot valuations would be based on location, topography, paved streets, utilities available, sewer, and sales prices of neighborhood lots, if known.

Rural area factors in determining valuation would include a study of farm land sales for the past several years, relating the sales to property sold, an analysis made through the Soil Conservation Service, yield capabilities for tested soil in this area, an analysis of key farms, and the company would make an analysis of farms of cooperative owners to determine yield received from known soil types.

The company would obtain a complete aerial map of this county through the Deaf Smith County Agricultural Stabilization and Conservation office.

Yield potential sets the value, and is compared with known sales prices, he commented. Scully said upkeep of a program would include charging of a flat fee per year, based on specifications of work to be done, and the company would meet with tax equalization boards, if the boards so desired.

He said upkeep amounts to examination of new construction and land value changes. "Success or failure of the program lies in the public acceptance of the appraisal," Scully said.

The New Revolutionary Way To Harvest Row Crops

The McEachern "ROW HARVESTER" will put more grain in the bin than any device ever tried.

It will give years of service without any repairs to speak of. It is mounted entirely on self-aligning, pre lubricated ball bearings, thus eliminating any need for lubrication and assuring long life.

The "ROW HARVESTER" will practically clean the field of all milo heads, including the leaning stalks, the low and high heads. It prevents the loss of heads from the combine by means of shields behind the cylinders. All this means more grain saved and less volunteer maize in the field next spring.

The "Row Harvester" can be installed on any combine and is available 2, 3 or 4 rows.

Tastes and demands of the American people are constantly changing, and this is probably reflected most decisively in the modern trend of home building. I was talking with a contractor recently who said that he is seriously planning on building some moderately priced, four-bedroom homes. Already a good many houses of this type are finding general acceptance in the cities - and the demand seems to be growing.

The three-bedroom home has consistently been replacing the two-bedroom job in which most of us were reared, just as the old fashioned No. 4 wash tub has been replaced by two bath rooms and an automatic washer-dryer setup. Confucius might well come up with a salty remark, especially when you stop to consider that the size of our family unit has dwindled sharply (now slightly more than three persons) during this tremendous household expansion. No question, it is different from the early days when settlers reared a family of six to 12 children in a log cabin, a

two-room sod house or a dug-out.

Plumbing has probably made the greatest strides of all. Most of our grandmothers pumped their water from a well, then carried the pails into the house. I always figured, maybe they had those large families so one of the youngsters would always be the right age to bring in the water; anyway, that's usually what happened.

Meanwhile, a lot of Hereford businessmen are worrying about what they will do when high school and college classes get underway. This is due to the large number of students who have summer jobs. Francis Hardwick says he will have to reorganize the theatres, and Carl McCaslin was telling me that his lumber yard will lose six employees. The same is pretty well true all over town. We even have three at The Brand office who will be taking off soon.

This situation will not affect the post office that I know, but I was quite surprised this week to learn that the Hereford office has 26 employees. Next to the school system, this is one of the largest number of employees in town.

Marshall Formby was visiting here Monday, and seemed to be impressed with the industry and growth of the community. Despite his recent chairmanship of the Texas Highway Commission and potentiality as a candidate for governor, Marshall is still the same congenial old boy many of us knew as a friend and neighbor a few years back when he was active in management of KPAN. He is still definitely interested in the community, and thinks the proposed beet sugar plant is one of the best projects this area has ever discussed.

Frank Bezner may be a gentleman and a scholar, but Mrs. Bezner is my friend in that family. Frank came in the other day with a sack of the prettiest potatoes you ever saw. I was out of the office, so Frank left the following message:

"Tell him my wife picked them out! Personally, I would have given him some peewees - and that's more than he deserves."

Mrs. Anna Brashear was slowed down to a soft whisper this week as the result of a laryngitis attack, and reluctantly admitted, "It's tough on me - but my husband and the four children seem to be enjoying the situation a lot."

Sometimes you just can't win. Dr. Carter Halcomb of Wellington was through Hereford Monday and I took him to lunch. When we got back, we ran into Dr. Ansel McDowell, Jr., of Bakersfield, Calif., and were doing some visiting. There I sat with two doctors, both far enough away from home that neither would have hesitated to give me some free medical advice - and there I sat disgustingly healthy. Not even a mild ache or pain. Can you think of a more revolting development?

I hear a lot of talk about the up-coming cattle tour scheduled for Aug. 22. This was a tremendous success in 1960, drawing visitors from all over the Southwest, and it bids to once again hold spotlight interest among North American Hereford breeders.

The "dry run" on Christmas decorations likewise seems to have created no little discussion as folks viewed the display hung across Main at the intersection of Fourth. Urlin Streu finally broke down and washed the Brand windows, but wouldn't clean the inside. He says we are undoubtedly the most slovenly people in town. He is now talking about sanitation codes, but I keep telling him that our trouble is "too many chiefs and no Indians."

I do believe that Wheeler Sears has the most tolerant, appealing grin of any young man I ever saw. It is bound to be natural, and it should take him a long, long way.

Vacations are pretty well over, it seems to me. Curtis Roach has already taken his annual trip to Colorado - and he usually winds up the parade. Leon Bell, just back from Cal's in New Mexico, says a lot of peo-

Golden Speaks On County Laboratory

O. Z. Golden, director of the Deaf Smith County Research Laboratory, spoke to the Rotary Club Monday, Aug. 15 concerning the research carried on in the laboratory.

The laboratory, built in 1958, is a non-profit organization. There are no share holders, and it is independent from the Hereford Clinic, he said.

The laboratory is divided into four branches. They include the medical research, clinical analysis, livestock research and agriculture research.

In the field of medical research, the laboratory will begin a world wide survey of bone under certain conditions. This was the purpose of starting the laboratory in the first place, Golden explained.

In the clinical division, the laboratory does analysis for the surrounding towns and for the Hereford clinic also. The clinic

analysis requires special equipment, he said.

In livestock research, the laboratory is working on a preventive for wheat poison. This soil is high in calcium and minerals which could combine with phosphate to make a hard substance which plants could not use, Golden said.

In trying to increase the efficiency of phosphate, the laboratory decided to try adding sulphuric acid to the soil. The first year it was tried, the increased net income was \$35.52 after the fertilizer cost was subtracted, he explained.

This year the sulphuric acid was added to plots of wheat and barley. The best results were in the plots where the super phosphate and sulphuric acid were added. The yield was 88.8 bushels per acre, Golden said.

Local Residents Attend Reunion

Mr. and Mrs. N. B. Hood of Hereford and their two daughters and families, Mr. and Mrs. Roy Howell and Eldon and Mr. and Mrs. Lloyd Shultz and Joe of Hereford attended the Falkner family reunion held at Craterville Park near Alton Saturday, Aug. 13. About 75 attended the reunion and spent the day boating and water skiing.

On Sunday Aug. 14, the Hood family went to Plainview Community for the homecoming. There was a picnic, and an old fashioned singing was held in the Baptist Church.

The Hood family stopped in Erick, Okla. on the way home to visit Hood's sister, Mr. and Mrs. J. H. McGuffin and ate supper with them.

ON VACATION

Mr. and Mrs. H. A. Tuck and their two sons, Terry and Tommy, have been on vacation since Wednesday, Aug. 3. They first attended the West Texas Press Association in Pecos from Thursday through Saturday, Aug. 4-6. They stayed in Lubbock Saturday night with Mr. and Mrs. E. E. Corcoran. Next they went to Red River, N. M., and returned to Hereford for a few days before going to Dumas to visit Tuck's father and mother, Mr. and Mrs. Henry Tuck.

AUSTIN HIGHLIGHTS

Shake-up In Membership Of Legislative Committee

By VERN SANFORD

AUSTIN — Election year upheavals plus Texas' "lame duck law" are playing havoc with the work of interim legislative committees.

Atty. Gen. Will Wilson ruled that, except in special cases, interim committee members not re-elected to the Legislature may not continue to serve on the committees. This brings a shake-up in the membership of a number of study groups now in the midst of their work.

Biggest change will be in the make-up of the House General Investigating Committee which has been asked to look into several politically touchy questions. Going off the five-member committee are the chairman, Rep. H. J. Blanchard of Lubbock, and Reps. Joe Burkett of Kerrville and Carl Conley, Raymondville.

Nine other legislative committees lost one or more members who either did not run again or were defeated.

Not affected were members of the Commission on State and Local Tax Policy. Attorney General noted that this group was set up under a law which specifically provided its members should serve a two-year term. Also continuing to serve, whether re-elected or not, will be those members of the Legislative Council and Legislative Budget Board who — like the Speaker of the House — are members because of the jobs

they hold. In the appointment of committees on which "lame ducks" may not continue to serve, next year's speaker and lieutenant governor face a problem. Only way to prevent vacancies would be to second-guess the political future of each appointee.

Juvenile delinquency in Texas will get worse before it gets better, the Texas Youth Council director predicted.

Dr. James Turman presented to the Legislative Budget Board the Council's request for an appropriation of \$1,225,470 for the coming biennium. This is an increase over the present two-year allocation of \$3,487,442.

A part of this increase is to build for future needs. Turman noted that the Gatesville Training School for Boys had 463 boys

SCHOLARSHIP — Mrs. Clint Formby, left, president of the Women's Missionary Union of the First Baptist Church, is shown presenting a \$200 scholarship given by the WMU to Sue Minor, daughter of Mr. and Mrs. Bud Minor, of Hereford, for one year of study at Hardin-Simmons University. Miss Minor was selected by a committee of six on her record of outstanding work in high school and youth organizations of the church. The boy and girl who receives the scholarship must also qualify in character, personal attitudes, leadership and definite desire to further his or her education. Miss Minor will be a first-year student in preparation for a laboratory technician field. Members of the committee on selection of the student include Mesdames Jimmie Allred, chairman, Dean Herring, J. B. Sneed, Rex Lee, J. D. REP. WALTER ROGERS WRITES:

Distinguished War Hero Will Be Honored Sept. 13

To the people of the 18th District:

The Congress on June 1 approved a joint resolution calling for the celebration of John J. Pershing Centennial Day, the 100th anniversary of the great World War I General's birth. A Presidential proclamation has established Sept. 13 as the day to honor this distinguished war hero.

As the man who led the United States into freedom's first world-wide military conflict with the forces of totalitarianism and dictatorship, General Pershing was leader of the two million man force which helped bring victory for the Allied cause. He holds honors from 15 different foreign nations, and during a 66-year military career he became one of America's greatest advocates of democracy all over the world.

The example which General Pershing set is perhaps more instructive today than it was a generation ago. Once again the free world seeks men of his determination and dedication to principle, and once again the

free world seeks leadership sufficiently dynamic to overcome all the forces of evil which run rampant.

General Pershing was born in the state of Missouri just after the guns at Fort Sumter announced the beginning of Civil War. He graduated from the United States Military Academy in 1886 and was assigned to three different Army posts in New Mexico where he participated in campaigns against the Sioux Indians until the early 1890's.

Then he returned to West Point for a brief tour as Assistant Instructor of Tactics and in 1898 General Pershing began a long series of military assignments which took him to many of the spots which are troublesome even today: Cuba, Japan, and Eastern Europe. Altogether, he saw duty in virtually every corner of the globe.

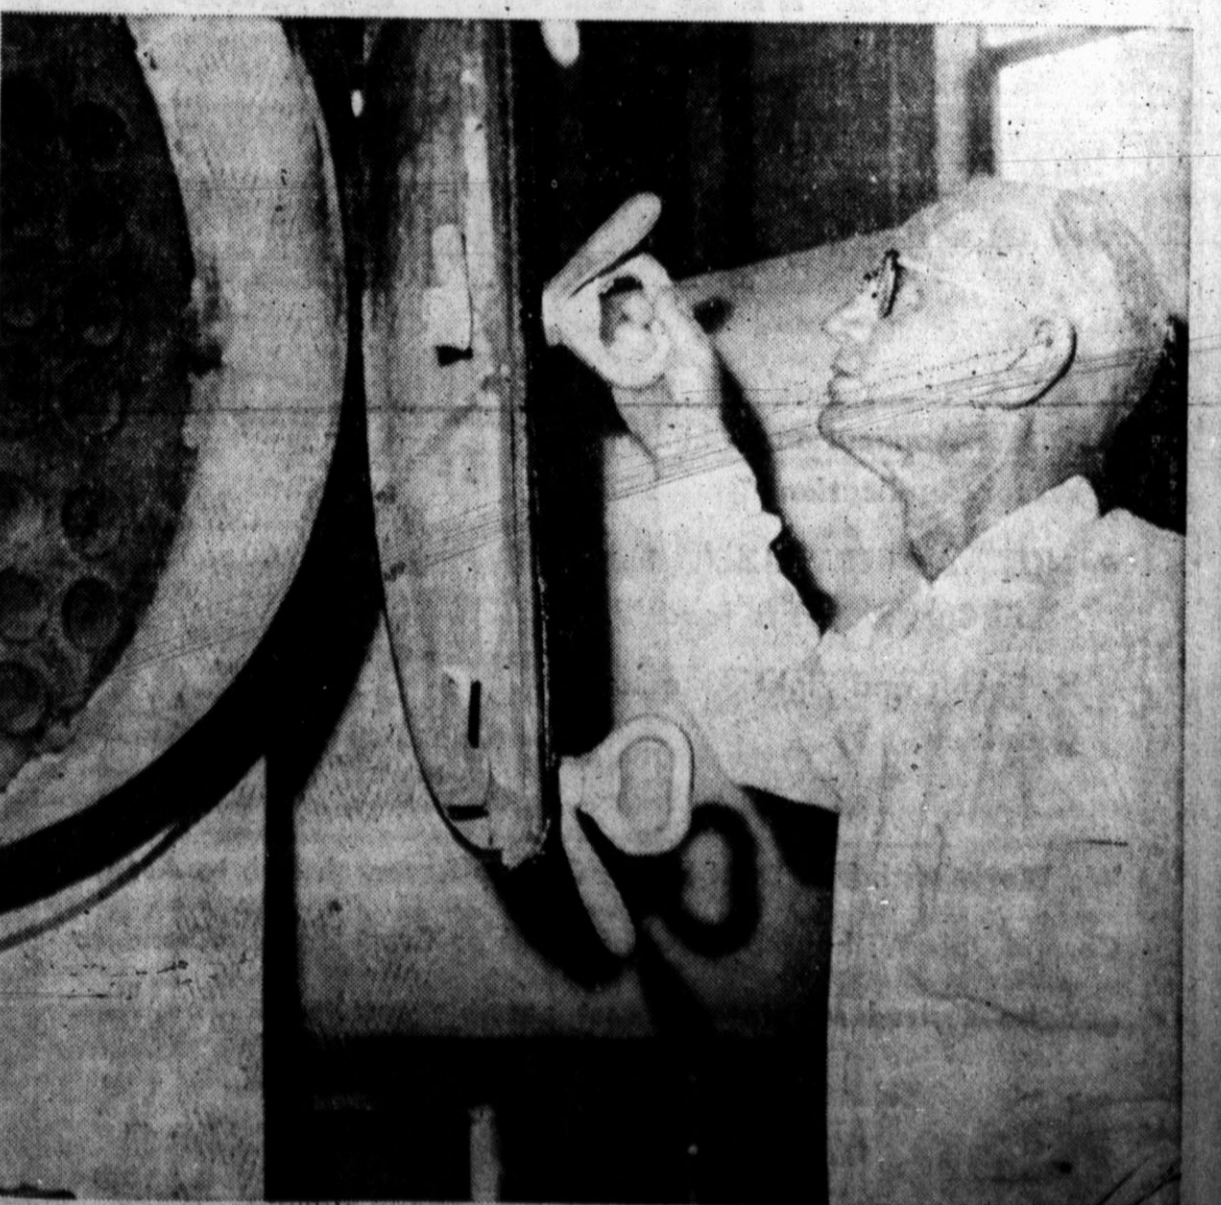

But his greatest hour came with the American Expeditionary Force which began to sail for France in 1917 to "make the world safe for democracy."

President Wilson told him to "keep always in mind the underlying idea that his forces in France are a separate and distinct component of the combined forces, the identity of which must be preserved." The remark made by him upon landing in France has become famous.

"Lafayette, we are here," was uttered in grateful remembrance of the French Commander's valiant service to the struggling American colonists in the Revolutionary war.

Throughout the long and difficult months of warfare in France, General Pershing worked closely with the chief commander, French Marshal Foch, and when the victory was won over the Kaiser's generals in the famous railway car in Compiègne, the American soldiers and their commander had as much a part of the victory as any other.

A grateful nation showered him with honor after honor. Universities from Oxford in England to Arizona in the United

States awarded him degrees. The Congress passed a resolution thinking him "for his highly distinguished services as commander-in-chief... and... for... devotion and heroic valor throughout the war."

After the war, General Pershing continued to serve the nation. He took charge of many commissions, and was President Roosevelt's representative to the 1937 coronation of King George VI. He died on July 15, 1948 in special quarters where he had lived some years in the Walter Reed Hospital. His body lay in state at the Capitol for 24 hours and was finally laid to rest in the Arlington National Cemetery.

The legacy handed to all of us by General Pershing is a great one, and as the nation honors him next month we will do well to recall and attempt to duplicate his loyalty and support of the nation. The General's 100th birthday on Sept. 13 will be still another demonstration that the need for his characteristics does not fade with the years.

VISITORS

Visiting the Nation's Capital from the 18th Congressional District last week were Mr. Alfred Dziuk from Hereford; Mr. Dan Archer of Perryton; and Mayor and Mrs. Sol Blonstein from Shamrock, along with their son, Mark Blonstein and Miss Judy Mundy.

CARD OF THANKS

To the good people of Hereford we personally want to thank each and everyone who were so nice during the illness, sorrow, and death of our sister and sister-in-law, Bertie Hume. She was loved by so many. Anna and Murphy Back 645 N. Union Street Shawnee, Oklahoma.

in 1950 compared to its present average of 1,300. He predicted an average population of 1,700 during the coming two years and 2,959 by the end of the sixties.

Turman also urged the setting up of a system of paid parole supervisors "to keep some of these kids from coming back." He said that some of the boys had been to Gatesville as many as five times and that up to one-third were repeaters.

A citizens committee is being formed to work for approval of a constitutional amendment to give the legislature more regulatory power over the small loan industry. Abner V. McCall, executive vice president of Baylor University, is chairman, and Tom Reavley, Austin attorney and former secretary of state, is vice chairman.

Proposed amendment will be Number Four on the general election ballot in November. It would give the Legislature power to license and regulate lenders and set maximum rates of interest. Until and unless the Legislature set a new rate, the present constitutional maximum of 10 per cent would apply.

Adoption of Amendment Four is an essential first step, said McCall, to wiping out Texas' reputation as "the lone shark state." He said that Gov. Price Daniel, Lt. Gov. Ben Ramsey and Atty. Gen Will Wilson favored the amendment and were honorary members of the committee.

Texas Employment Commission has filed complaints against some 100 persons accused of drawing unemployment compensation pay while actually working.

As a result of a widespread investigation, TEC has filed several score suits against persons it declared were receiving benefits and salaries at the same time.

Some of the defendants have already been tried, fined and ordered to repay the money received from TEC. Most of the cases involve workers in Houston and Brownsville.

Law provides that workers who lose their jobs through no fault of their own and cannot get other jobs may receive \$28 a week for up to 26 weeks, while unemployed. Violators can receive up to a \$50 fine and 30-day jail sentence.

Department of Public Safety report shows that one of the fastest growing statistics in Texas is the number of

for crimes committed -- up 10.3 per cent for the first half of 1960.

For the first six months of this year DPS estimates 96,681 major crimes were committed during the same period in 1959.

One of the brighter spots in the report is that murders and homicides decreased by 15.1 per cent. Burglaries, however, rose 19.2 per cent.

Biggest crime increase was in urban areas -- up 12.5 per cent. In rural sections the rate was down a little -- less than one per cent.

Texas is one of the safer states as far as paralytic polio is concerned, but its seventh in the nation in number of whooping cough cases, ninth in diphtheria and scarlet fever.

All these rates could be cut, said a State Health Department spokesman, if there were fewer people who can't be bothered with getting protective shots.

Late August and September are the usual season for polio epidemics, the Department warned.

Texas range conditions showed a bigger mid-summer improvement this year than in any summer for 37 years, reports the U. S. Dept. of Ag.

iculture. Range conditions usually grow less favorable from July to August in Texas, but this year they got substantially better. Though some areas of the state were reported very dry, 85 per cent was rated 12 points above the 10-year average.

SHORT SNORTS -- Parents of children who will enter school for the first time this fall are urged to get the children's birth certificates immediately. State Health Department noted that requests pile up at school opening time and can delay the child's entrance into school.

Texas' general revenue fund went \$6,000,000 deeper into the red last month. This brought the fund's deficit up to \$59,061,860.

that there are 418,000 farms that have rural electricity. There are 155,000 miles of lines in Texas, which has more lines than any other state. Also, 97.8 per cent of the farms in Texas have electricity.

C of C SCOUT 'Deaf' Smith Says

TO: THE SPIRIT OF GENERAL SAM HOUSTON FROM: THE SPIRIT OF SCOUT ERASTUS "DEAF" SMITH

SUBJECT: MY CHAMBER OF COMMERCE IN COMPARISON

Sam, I saw in the Chamber of Commerce office a copy of the "1960 SURVEY OF LOCAL CHAMBERS OF COMMERCE," a research report prepared periodically by the Local Chamber of Commerce Service Department of the Chamber of Commerce of the United States.

It was real interesting to me to compare my Chamber of Commerce with Chambers of Commerce all over the country. The SURVEY is broken down by population categories and our Chamber hits right in the middle of the 5,000 to 10,000 bracket. A total of 242 Chambers of Commerce from all over the country are represented in the figures.

Let me show you some comparisons.

Income from dues, 1959 - national average, \$8,858; Deaf Smith County Chamber of Commerce, \$17,000; high 1/3 national average, \$15,510; middle 1/3 national average, \$11,226; low 1/3 national average, \$5,133.

National average high range, \$22,730; and low, \$1,000.

Per cent of income expended for activities expenses - national average, 47.8 per cent; Deaf Smith County C of C, 52 per cent.

Income from sustaining fund in 1959 - national average \$3,723.

Income from other sources in 1959 - national average, \$2,649; County C of C, \$1,800.

Total operating fund income for 1959 - national average, \$3,337; County C of C, \$4,250.

Amounts received from special funds:

Christmas lighting - national, \$1,199; County C of C, \$2,200.

Dining room - national, \$776; Industrial promotional - national, \$2,731.

Retail activity - national, \$1,356.

Convention promotion - national, \$630; County C of C, \$1,350.

Livestock - County C of C, \$700.

An interesting report contained in the survey showed that 77 Chambers of Commerce in our population bracket receive tax money; 33 under \$250; 8 - \$25 to \$500; 12 - \$501 to \$1,000; 7 - \$1,001 to \$2,000; 6 - \$2,001 to \$4,000; and 10 received amounts from \$1,001 to \$10,000 while one received a sum in excess of that.

The Deaf Smith County Chamber of Commerce receives no tax money at all. The Chambers of Commerce receiving tax money reported that the tax funds received were committed as follows: to industrial development - 10; to tourist and conventions - 24; to Christmas activities - 18; while 23 reported that the tax funds were used for general expenses.

In general the Survey showed that the Deaf Smith County Chamber of Commerce, both financially and activity-wise, is far above the average for communities in its size bracket across the country. Anybody interested in studying the report in detail would be very surprised at the favorable comparison. In spite of this favorable comparison the Directors are continuously faced with the problem of saying no to very worthwhile projects simply because there are not enough funds available to do all of the things that the organization could and should do.

There is no question but what there are a number of business firms and farmers and ranchers who have not been asked to support the Chamber of Commerce, and who would be glad to if they were asked. All additional funds from dues, or any

**Jack Teddlie
Teddlie Explains
Small Business**

Jack Teddlie, manager of the Lubbock branch of the Small Business Administration, spoke to the Lions Club Wednesday, Aug. 10 concerning the operation of the Small Business Administration.

"A small business is one that is independently owned and operated and is not dominant in its field," Teddlie said.

Small Business Administration is able to offer long term finance at reasonable rates of interest. Out of the 4,600,000 businesses, 95 per cent are small businesses, Teddlie said.

"We try to make large businesses out of small businesses. Small business and big business depend on each other, and any attempt to separate them is not logical," he said.

Credit is given to businessmen who are of good character, who have evidence that they can operate a business successfully and who have capital in their business, he said.

Loans will be given for business construction, conversion or expansion and for equipment, he said.

"Small business is confronted with many problems. The businessman must keep up with the time," Teddlie said.

"The role of the Small Business Administration is not to provide funds to failing business but to small sound businesses," he said.

**This NEW ^{low profile} GATES Tire
Gives 25% Bonus in Mileage**

"Toughest tire test this side of Hades!" Six days a week, month after month, year after year, the Gates Test Fleet travels sixteen hours a day at maximum legal speeds in searing heat as it makes 900 miles daily in round trips between Phoenix and Tucson.

Gates new low profile nylon tire, tested extensively on Gates Arizona Test Fleet, proved its long tread life by giving 25% longer mileage than conventional tires.

Test fleet, driving 900 miles per day in desert heat, proves you get thousands more miles from this tire!

Revolutionary low profile shape increases tire mileage! A conventional tire running on the road, bulges, flattens, scuffs the tread, generates heat in tire body to shorten life. But Gates new low profile tire is built in a revolutionary new shape — actually the running shape of a tire! Reduces flexing that causes heat build-up and tread scuffing. Gives you fully 25% more mileage!

Grips the road silently! Deep cold rubber tread has more than 8,000 gripping edges; new design increases area of contact with road. This combination reduces slippage — gives you superb, silent, safe traction.

Gives you more miles per gallon! Actually saves gas, because low profile tire has less slippage; rolls more freely. So — you really go farther on every cup of gas; an extra saving you'll notice in the long run!

Unconditional Road-Hazard GUARANTEE

against BLOWOUTS, BRUISES, RIM-CUTS, etc., no time or mileage limit. Made with more than 2 miles of tempered nylon cord, this tire is so tough it is virtually blow-out proof! Guaranteed against any failure for full tread life. Should tire fail, you get a new tire, with full credit for unused mileage, based on Gates standard adjustment schedule.

Special DEMONSTRATOR price!

To introduce this extra long-wearing tire to more people we are offering it at a *demonstrator price for a limited time on pairs and sets only*. This means you can now get this 1st line low profile NYLON tire at the same price you would pay for ordinary new car rayon tires! Other sizes, tubeless and whitewalls similarly low.

Comfort

YOU IN THE CHURCH
THE CHURCH IN YOU

Character is a by-product of the church. It is here that young and old alike are showered with benedictions stronger democracy. In the church the ministerial are the affairs of state in these perilous times. Then we form a combination for good. Be a regular CHURCH GOER and a daily BIBLE READER.

Daily we drag about us every physical comfort of this age. Even our architecture reflects comfort. Yet, how many of us indulge in the Supreme Comfort... the comfort of religion? *Folded hands reflect a soul in fellowship with the Almighty.* See what aids he has summoned in his hour of need! When your nerves are worn from daily routine, when crisis tear at your soul, when tragedy overwhelms you... do you ever stop to experience the Comfort of Divine Presence? Compare the harried, cross, impatient faces you meet on the street with the crowd you see going to church each Sunday... *that should be enough.* The strain of modern life is too much. Psychiatrists are stamped and mental institutions are overflowing. Our nerves simply can't take it. Why not try this man's remedy? *Light a candle, open The Book, fold your hands and get in company with noble souls.*

Beauty At Home

Q. Do you advocate the use of rouge by middle-aged, or older, women?

A. By all means! But they should lean to apply it expertly and in a soft, blush shade. They should never wear their rouge in disc blobs — it should be applied and blended carefully over the area where the natural blush comes. Start the rouge directly beneath the pupil of each eye, and blend it outward toward the hairline. A speck the size of a dime should be enough for the coloring of each cheek.

Q. What can I do if perspiration odor still clings to washable garments after they have been laundered?

A. Soak them for an hour or more in warm water containing three or four tablespoons of salt for each quart. Or, sponge the stained areas with warm water containing a little vinegar, apply powdered pepsin, and work this into the cloth. Let it stand for an hour or two, keeping the spot moist, then brush off the pepsin, and rinse by sponging with clear, warm water.

Q. Which are better in the summer — hot or cold baths?

A. Take hot baths, for if you bathe in water that is warmer than the air, you feel much cooler when you emerge. Use cologne after the bath, talcum

on the soles of your feet to lessen the friction between the feet and your shoes.

Q. How can I get some paint spots out of my hair?

A. This will usually come out readily by use of a little warm vinegar on a cloth. Then you'd better shampoo hair to rid yourself of that pickle-like aroma.

"These trails would shake the cab off an ordinary truck...but not our Chevy"

Few trucks are subjected to the body-wracking beatings that are part of a day's work for this Chevrolet Series 60 pulpwood hauler. It's owned by J. E. Fox, North Carolina logging contractor. As Bobby Fox, a partner in the business says, "Loaded with pulpwood, we drive over stumps and potholes you'd think would tear the truck to pieces. These trails would shake the cab off an ordinary truck, but not our Chevy. We can average an extra load a day . . . make \$45 to \$54 a day more with this Chevy than we can with the others."

In every weight class these Chevies are doing more work at less expense than trucks have ever done before. Drive one at your Chevrolet dealer's. It's an experience that could pay you big dividends.

◀ "That 6-cylinder engine really performs," says Bobby Fox. "It's got the lugging power we need in the woods and walks right along with a full load on the highway."
