Three Charged In Liquor Sales; \$500 Bonds Set

Three Hereford negroes were arrested on warrants Monday alleging the sale of intoxicating beverages in a dry area following a check of the Deaf Smith County area by Texas Liquor Control Board agents.

'Arrested on the charge were George W. Creer, 36; Lonnie D. Prince, 47, and Robert Welden Mercer, 19, all of Hereford. Bond of \$500 was set in each case by Deaf Smith County Judge H. C. Williams.

The three men were picked up by the Hereford Police Department and a control board agent as the warrants were issued Monday. All three were charged with the offenses in county court and requested jury trials.

Around Town

If you think a large part of this column is going to be about our vacation, you're so right. First, it was as hot as I ever want to see it during our tour through Abilene, Dallas and Wichita Falls. It was above 100 every day and hit Wichita Falls.

We would be remiss if we failed to say some good words about Six Flags Over Texas, the giant - sized entertainment of the Hereford City limits Sunday injured an eight-year-old girl and heavily damaged two between Fort Worth and Dallas. There are literally thousands of college students working there and they were wonderful. They maintain their poise and cheerfulness in the face of stifling heat and endless questions. Six Flags is the cleanest such place we've ever seen with hundreds of boys constantly picking up any bit of trash. Most of the visitors quickly sense this and deposit litter in the trash containers. Another thing that impressed us was that you get fair value for your money. We liked the idea of driving a 1954 model sedan one ticket covering all the rides. Any food, drink or souvenirs purchased are well worth the price. You don't feel like you are being hijacked just because you're a captive customer.

But it is Wichita Falls that really gets our applause. Every person we met in the by the investigating officer. Estimates place damage to the Cowsert and Earnest Langley, eemed to notice our (Continued on page 6)

\$3,500 Goal For **County CROP Drive Announced**

A goal of \$3,500 in cash and commodities was set for Deaf Smith County by officers of the county CROP campaign.

The goal and several other details for the annual fall campaign were outlined during a planning session at the Western Wheel Inn Wednesday morning. County chairman Ira Scott called a meeting of all community chairmen and their workers for 8 p.m. Thursday, Sept. 20. The meeting tentatively is set for the Hereford Community Center. At that time, the canvassers will be given a briefing on their job and the

importance of the drive. The Christian-Overseas Rural Program is sponsored by a number of churches to provide food commodities and agricultural assistance for needy areas in other countries.

New Sewing Patterns Are Easier, Better This Fall

By Argen Draper

Have you used a new pattern, hand on pattern, this fall? You'll be pleased with more, better, and plainer instructions. The one I have shows places to pin and the cutting line is shown with open scissors. At first it looked like the direction of cutting was

shown but it isn't. While cutting out the pieces, hold your other

Last week I talked to the District Manager of the Social Security Administration in Amarillo. This question had come up; "Does the issuing of a social security card to a woman interfere with such woman's right to receive social security benefits on the record of her husband?"

The answer from the district manager was: "Any woman may apply for a social security card without effecting her right to qualify for benefits based on her husband's record. A woman may work long enough at work covered by social security to entitle herself to benefits based on her own record; however, if she fails to qualify on her own record she may still qualify for wife's benefits on he record of her husband. The fact that a wife has her own social security card does not affect her right to draw social security benefits as a wife."

If you haven't yet met Heather Gordon from Johannesburg, South Africa, by all means, do so! Heather, an upcoming senior, is living with the Leroy Avens Carolyn. She is a delightfully personable young lady who literally radiates charm.

As for other contrasts: in Nuremberg there are no drugstores, no drive-in restaurants or drive-in movies. German teenagers are not so flippant as we American teens, he thinks, and they are more conservative in dress. And — there is no such thing as a slumber party in his country.

German students are taught 'school English' so our casual 'accent" is peculiar, to say the least! Frank has yet to eat Spanish food, but he has, for the first time, drunk iced tea.

One thing our new exchange student does appreciate is our informal way of life! We hope that you, Frank and Heather, will feel at home here and will enjoy this experience to the fullest measure.

WE MADE IT!

Whew! Telstar made it.

I couldn't be prouder if I'd pushed the button that sent the satellite into orbit.

As you probably know, Jelstar is the Bell System's new communications satellite. It acts as a sort of moving microwave relay tower in space. Signals

from the earth are received by the satellite, amplified within it, and then transmitred back to the ground. Everyone here at the

elephone company had is fingers crossed that Teltar would be successful. After all, that little 170pound ball opens a whole new world of communications possibilities. Voices, television pictures and data messages can now leap thousands of miles in a new

and exciting way.

IT WASN'T EASY

Sitting back and reflecting on the many developments that made Telstar possible, three things come to mind: 1. Since the end of World War II, the Bell System

has spent over one billion dollars for research and development in fields pertinent to satellite communications development.

2. Communications by satellite would be impossible without six Bell System contributions - the Transistor, the Solar Battery, the traveling wave tube, ruby masers, the waveguide, and new antennas for the ground sta-

3. The Bell System paid the National Aeronautics and Space Administration for the launching of Telstar. No one got a free ride.

I could go on and on about Telstar, but I'll just make one more comment: I am convinced that if there's ever a better way of

providing communications — we'll do it.
ATTENTION DOVE HUNTERS

Many dove hunters will hit the field Saturday, September 1, at noon or shortly thereafter and I hope each

of you success in getting your limits during the season. I would like to request that you don't squeeze the trigger while that big fat dove is setting on a telephone line or cable. Each year, as a result of a shot at a bird on our lines, many telephones are put out of order. Shots from guns cause lines or cables to be broken, therefore, putting telephones out of order. This can be very serious business because an emergency call might be delayed to a doctor.

Remember this is your telephone service that is being hampered, and even though the cables are built to withstand natural wear and tear, they are just as sesceptible to gun shot as a man.

Call by number. It's twice as fast.

able job of editing, usually just a job of picking representative stories and tossing them together with a foreword. But Knight carefully initiates his readers with an introduction to the whole field of science fiction, then leads them gently by the hand through the various types, Patiently, he points out that

'A science fiction story is a story built around human beings, with a human problem, and a human solution, which would not have happened at all without its scientific content."

For years dismissed as "Buck Rogers stuff" or "pseudo science", science fiction has come of age during the past decade and now, indeed, is looked upon with awe by many for its amazingly close predictions in science and space exploration.

Having explained what is and what is not science fiction, Knight proceeds to lead the sioning reeremonies at Texas Wallace Ida., are visiting in the reader through the various ba-Tech in Lubbock Saturday, Aug. home of his parents, Mr. and sic types of science fiction with 25. STRAIT
is the
GATE

"Enter Ye In

at the strait gate ... because strait is the gate ... which leadeth unto life, and few there he that find it." Matt 7:13-14.

strait means narrow, compressed, limited. Americans don't like that. We want the abundant. We like it high, wide and handsome. But God doesn't run the universe just to suit popular nations. The Bible warns us that God doesn't think as we do.

The gate is narrow because there is only one Cross, only one Savior. Iesus said, "I am the way ... no one cometh unto the Father but by me.

The gate is wide because whosoever will may pass through it. God welcomes one and all, and promised not to cast out those who come.

Just inside the strait gate stands the church ... the fostering mother of all other channels of human well-heing. Have you entered the "strait gate?" Have you discovered the church?

This novel centers around Dr. Andrew Lorimer and his sister, Sally, as they migrate to the torn country. Refugees from the reconstruction of the South after the Civil War, they soon find themselves involved in the struggle between Emperor Maximilian von Hapsburg and his Empress, Carlota.

Through Dr. Lorimer's professional skill, the two are admitted into the inner circle of court life, Andrew as one of the many doctors who tried to straighten the disturbed mind of the beautiful Carlota, Sally as the Empress' occasional friend and confidante.

Sally, little more than a girl, finds herself drawn to the battle-worn, yet attractive, Sgt. Pierre Franchet, a soldier in the French Expeditionary Corps and a member of the Foreign Legion. Dr. Lorimer finds himself ir. love with an attractive Mexican girl, whose wealthy father has promised her to anoth-
