THE ART OF FRIENDSHIP

The first step in the art of friendship is to be a friend; then making friends takes care of

itself. To be a friend, a man should start by being a friend to himself, by being true to his highest and best and by aligning himself with the enduring values of human life that make for growth and progress.

To be a friend a man should strive to be "like the shadow of a great rock in a weary land", to be a source of refuge and strength to those who walk in

darkness. To be a friend a man should believe in the inherent goodness of men and in their potential greatness; he should treat men in a big spirit,

expectant of a noble response. To be a friend a man should strive to lift people up, not cast them down, to encourage, not discourage; to set an example that will be an inspiration to others.

To be a friend a man should be sensitively responsive to the dreams and aims of others and should show sincere appreciation for the contributions others make to the enrichment of his

To be a friend a man should practice the companionship of silence and th emagic of words that his speech may build and not destroy, help and not

To be a friend a man should

To be a friend a man should not attempt to reform or reprimand, but should strive only to make others happy if he

To be a friend a man should be himself, he should be done with hypocrisy, artificiality and pretense; he should meet and mingle with people in quiet simplicity and humility.

To be a friend a man should be tolerant, he should have an understanding heart and forgiving nature, knowing that all men stumble now and then, and that he who never made a mistake never accomplished

anything. To be a friend a man should join hands with all people who are working for great principles, great purposes and great causes; he should put his shoulder to the wheel to help achieve common goals.

To be a friend a man should go more than halfway in his contacts with his fellow men; he should greet others first and not wait to be greeted; he should radiate a spirit of overflowing good will.

To be a friend a man should remember that we are human magnets; that like attracts like,

and that what we give we get. The be a friend a man should recognize that the art of friendship is a lifetime study, that no man knows all the answers, and that he should add each day to his knowledge of how to live the friendly way.

Our friend, Jay Koonce, was a master at this art. We shall miss him.

Texas Oil Production Declines

DALLAS--Despite 12 months of production at 100 percent of the maximum effective recovery rate in most Texas fields, a drop of nearly 6.3 million barrels of crude oil from the state's all-time record high production

year of 1972 occurred last year. Texas production in 1973 amounted to almost 1.3 billion barrels, tops among the nation's oil producing states and representing 38.6% of total U.S. production, according to statistics compiled by Texas Mid-Continent Oil & Gas

In 84 years of recorded production, Texas oil fields have produced some 38 billion Voting delegates to the national - barrels of oil--approximately 36 percent of the U.S.total.

'The decline in production indicates the basic task of the state's oil men--the more extensive development of Texas fields", said the Association's president, Sherman Hunt, a

Dallas independent producer. "But if Congress will adopt economic policies to encourage the search for new fields, we feel this trend can be changed."

Despite the drop in production, the oil that was produced last year in 203 of the state's 254 counties was valued at some \$5 billion, an increase of approximately \$500 million over the value of oil produced in 1972. This increase partially reflects the increased prices paid for some Texas crude oil during the latter part of 1973.

In addition to larger payments to royalty owners, the highe rprices also have been reflected in the state comptroller's reports of increased severance taxes paid by the oil men of Texas.

Eastland County, which has recorded production since 1917, last year produced 269,866 barrels of oil at the rate of 739 barrels a day. Production in 1973 boosted Eastland County's production total through the end of the year to 123,396,839.

City Without Cigarettes?

Members of the city council in a midwestern community became so worried about the cigarette problem that they decided to "go all the way." They passed an ordinance forbidding the smoking of cigarettes anywhere, any time, within the city limits.

In short order, a man was arrested for smoking on a downtown sidewalk. But instead of paying the fine, he chose to make a test case out of it. And after due deliberation, the court ruled that the ordinance was unconstitutional -"an unreasonable interference with the private rights of the citi-

The decision illustrates that even in the field of public health. there are limits to the power of government. Nevertheless, more moderate regulation of cigarette smoking has been upheld re-

Thus, another court sustained a city ordinance against smoking in street cars. Finding this a reasonable approach to the cigarette problem, the court commented:

"Smoking is agreeable to those who have the habit. But it is distasteful, and sometimes hurtful, to those compelled to breathe the atmosphere impregnated with tobacco in close and confined

What about the regulation of cigarette vending machines? A city ordinance sought to ban all such machines from public places. A vending company promptly challenged the ordinance in court, arguing that it was aimed at the "lawful business" of selling ciga-

But the city replied that its purpose was simply to prevent the sale of cigarettes to minors. This was a matter of legitimate public concern, said the court, uphold-

ing the ordinance. "The automatic vendor," the court pointed out, "must sell to any and all who insert coins. It has no powers of discrimination. Hence it is condemned."

July is sale month. I have seen many signs and advertisements about great sales. Everyone wants a bargain.

They are looking for the cheapest way.

What may be true of the commercial world concerning the bargain, the big discount, the sale price, is not true of Christianity.

There is no discount chris-

There is no bragain christian-

tianity. There is no sale christianity.

It cost God His Son to purchase salvation for us. We preach and declare salvation is free to whomsoever will receive it. Thank God for this. "Come, buy and eat. . . without money and without price." God paid the price to save our souls. We must believe it and accept it for ourselves. There are no shortcuts. No

For several weeks, the theme of CHRISTIAN UNITY has been explored, because God desires it and the lack of it is harmful to the sharing of the Christian faith. The Bible emphasizes not only the necessity of UNITY among believers, but also the characteristics of such and the spirit in which it can be achieved. Ephesians 4:4-6 gives the basic elements of Christian UNITY. These are: ONE BODY (the church:, ONE SPIRIT (the Holy Spirit), ONE HOPE (redemption), ONE LORD (Jesus Christ), ONE FAITH (the teaching of Jesus and his apostles), ONE BAPTISM (in water, "unto the remission of sins"), and ONE GOD AND

FATHER OF ALL" It has been emphasized continuously in this series of articles that only by respecting fully the Bible as the revelation of God's will to the world can real Christians be formed and enabled to work together for the glory of God. The Scriptures, both the Old and New Testaments, "are inspired of God and profitable for teaching, for reproof, for correction, for instruction which is in righteousness: that the man of God may be complete, furnished completely unto every good work." (2 Timothy 3:16-17). In His wisdom, God has "granted unto us all things that pertain to life and godliness..." (2 Peter 1:3). "At the end of these days, God has spoken unto us in his Son..." (Hebrews 1:1-2). and this teaching of Jesus was carefully preserved through the apostles, led by the Holy Spirit (John 14:26; John 15:26; John 16¶13ff;, and these both taught and wrote. Control Lesser Cornstalk Borer

Agriculture Commissioner John C. White has announced.

DASANIT

insecticide/nematicide

Spray Concentrate

Just band DASANIT Spray | Concentrate as a directed basal spray on each side of peanut plants when lesser cornstalk borers infest your fields. Gives 80% reduction of

for up to 28 days. Look at these results of research conducted with Texas and Oklahoma growers:

borers within two weeks, residual control

MORE YIELD. Plots treated with DASANIT Spray Concentrate produced yield increases up to 844 pounds per acre, with most tests averaging much more than untreated check plots.

MORE INCOME. In some tests where there was no increase in yield, reduction of immature and small nuts resulted in higher grades that increased the value of the crop \$4 to \$51 an acre over untreated plots!

Make DASANIT Spray Concentrate your choice for effective, economical lesser cornstalk borer control this year! Order from your

chemical supplier now. Chemagro Division of Baychem Corporation, Box 4913, Kansas City, Missouri 64120.

Control Southern Corn Rootworm

DASANIT 15% Granular insecticide/nematicide

DASANIT 15% Granular insecticide/nematicide gives fast, long-lasting control of southern corn rootworms. Stops these underground pests that destroy peanut roots and pegs.

CONVENIENT TO USE! NO ROOT PRUNING!

You don't disturb root systems needed to produce big, healthy yields. Just apply a 12- to 18- inch band of DASANIT 15% Granular over the rows at pegging time. DASANIT goes to work fast. Stops pests that destroy young pegs; cause immature small nuts that lower grades.

Order DASANIT 15% Granular for outstanding control of southern corn rootworms from your chemical supplier.

RESPONSEability to you and nature

Safeguard peanuts and profits from seedling disease, rot and Southern Blight

erracior Soil Fungicide

Terraclor gives your peanuts a fighting chance to produce

their full yield potential ... protected from seed rot, seedling diseases and Southern Blight or stem rot.

A full season application program is recommended. Apply Terraclor when you plant for protection from early fungi-caused diseases. Then apply again at pegging time for effective control of Southern Blight.

When the disease is visible it's too late. Start your Terraclor protection

program early. Protected peanuts can stay in the ground longer to develop heavier yields with sound, mature kernels. Year-after-year experience proves that all season control of fungi with Terraclor is a sound investment. See your chemical supplier or write for

more information.

REDDY'S VACATION

Clip and save this vacation checklist.

REFRIGERATOR OR FREEZER: Change thermostat control to slightly warmer (or "Vacation") setting according to the manufacturer's recommendations.

DISHWASHER: Make sure it's empty. Shut the door, but

DISPOSER: Run and flush with cold water. ELECTRIC RANGE: Make sure all switches are in the

"Off" position. WASHERS: Turn off water supply at faucets. WATER HEATER (ELECTRIC): Turn off at circuit breaker

panel. When you return, run a small amount of water from

a hot water faucet to make sure there is water in the tank

before you turn the circuit on. TRASH COMPACTOR: Remove any accumulated trash. TELEVISION SETS: Unplug from electric outlet and dis-

connect the antenna lead-in cable. CLOCK RADIOS, ETC.: Check these and all other items with automatic "On-Off" controls. Disconnect the ones

that won't be needed. LIGHTING: Be sure that all lights are off except those needed for security, such as: 1) yard light and/or other exterior lighting with automatic controls - on at dusk, off at dawn; 2) portable lamp in living area with automatic control; 3) hall or bathroom light.

AIR CONDITIONING: Normally, air conditioning should be turned off completely while on summer vacation. However, if there is anything in your home that might suffer heat damage, the thermostat setting could be raised 5 to 10 degrees above normal operation and the unit left on. For comfort, you might have a friend or neighbor turn on the unit the day of your return.
