FATHER AND SON BANQUET HELD

The Ropes Chapter of the Future Farmers of America held its annual Father and Son Banquet at the school cafeteria last Friday, Apr. 5.

David Burks gave the invocation and the officers of the chapter recited the parts in the opening ceremony. The welcome speech was delivered by Billy Price. Bobby Jeffcoat introduced the special guests and told what each represented.

The highlights of 1962-63 was described by members of each class. Virgil Wright for Agriculture 1, Mike Timmons for Agriculture 2, and H. T. Abston for Agriculture 3. C. T. McCormick mentioned the outstanding members in the last year. He stated that without the help and cooperation of the parents, teachers, school officials, board members, business people, and the community in general, the superior rating given the chapter and its accomplishments would not have been possible. He gave the following awards:

Donald Glenn, Star Greenhand; Benny Redman, Star Chapter Farmer; Jerry Morrow, Farm Mechanics; John Bain, Livestock Farming; David Cain, Crop Farming; Gerald Smith, DeKalb award—

The DeKalb award is given to the outstanding senior in the chapter.

Dr. Marvin Baker, President of South Plains College gave the main speech. Dr. Baker presented the fact that the world is growing more technical with each passing day. He said that an education was more necessary as time goes on. He made many points to prove that this is true.

David Pinkert responded and the officers closed the meeting.

NEWS NOTES

Farm and Ranch girls and boys of Texas, belonging to 4-H and FFA clubs, high school classes, Boy Scouts and other organized groups, who plan sight-seeing trips to the Lower Rio Grande Valley this spring and summer, will get free guide service and a free meeting hall at McAllen.

Some McAllen motels have agreed to cut their rates more than half for the youth groups. By walking three blocks across the McAllen bridge, over the Rio Grande, they can make a round trip to Reynosa, Mexico for 13 cents. The Texas youths can go from McAllen to South Padre Island for a swim in the Gulf of Mexico, in a drive of about an hour and a half.

Green Easter eggs are being laid daily by a black hen in the Lower Rio Grande Valley.

Mrs. Joe Cleaner of Elsa, a prosperous farming town 23 miles from McAllen, says her bantam hen gets no special feed. She thinks the green eggs may be the result of a pre-natal influence as the Valley is as green as grass, or the proverbial gourd.

SCHOOL BOND ELECTION APRIL 20

This past week the school board was presented with a petition with 80 signatures asking for the election and acting on that petition the election was called for April 20, 1963.

There will be two propositions on the ballot on which you will vote. Both of these propositions must carry for the bond issue to be valid.

The first proposition will say in substance:

For Senate Bill 116, which will set the limit for \$1.50 for maintenance and enough to meet the bond requirements in the interest and sinking fund.

Then below this Against Senate Bill No. 116, etc.

The second proposition will be for the issuance of \$485,000 in bonds.

Senate Bill No. 116 does not turn the school board loose to level any amount of taxes needed, but the interest of the tax payer is safeguarded in the bill, and in the case of the Ropes school district the tax will not be above \$1.50, and perhaps, less. The reason it is necessary for the Senate bill to be approved is because it will enable the school to sell the bonds for a smaller interest rate.

It is to be expected that voting for Senate Bill 116 would cause some confusion unless it was explained. Most schools that have voted bonds since 1955 have approved this bill.

O. V. Fuller told the Plainsman, "If the bond issue carries not more than \$1.50 on the hundred dollar valuation will be needed to take care of the bond issue and all school expenses, and even a lesser amount may do it. However, we are setting the \$1.50 so that there can be no question if it does take that much."

The thing we want to impress on those who vote is if you are for the proposition you vote for both propositions—it makes them legal.

Next week the election order will be published in full and further information will be given, with a picture of the proposed new building.

WHEN A MAN HAS BEEN RESCUED

When a man has been rescued And brought to the fold, His heart has been cleansed, He has peace in his soul. Then the Lord will be with him, And His presence he'll feel. Because he found out That salvation is real.

Old things have passed away, And all things became new, So he makes a new effort, And puts on a new zeal, Because he has found out That salvation is real.

Though despised and rejected, Refused, and abused; But you may imagine How such a one feels— He shouts Hallelujah! Salvation is real!

News Report From Rep. Olen Petty

With the passage of House Bill 386, by Representative Slack, of Pecos, this week, the inequity in the law concerning fertilizer trailers was corrected. Rep. Slack's bill exempted the ammonia fertilizer trailers from regular commercial registration rates and put them on the same basis as cotton trailers. We were successful in amending this bill by also including cotton seed trailers. When this bill passes the Senate, exemptions concerning Agricultural trailers in our area, will probably be straightened out. There has been quite a bit of confusion over which agricultural trailers were exempt and which were not. I believe this bill will establish these exemptions.

The House put into law some of the recommendations of the Special House Committee investigating the Slant Oil Drilling. The committee Chairman is Billy Hollowell, who has House Bill 38, which regulates the drilling of oil and gas wells and prohibits unknown slanting of wells. This is the results of the investigation by Rep. Hollowell when it was first brought to light last summer. The House passed this bill.

House Bill 738, by Adams, Quilliam and Parsley, of Lubbock, should be of interest to the people in our district. This bill creates an industrial training school district in certain counties. The bill will affect counties other than Lubbock County but it is primarily drawn up to serve Lubbock County. Industrial Training Schools will serve Lubbock County as a highly specialized training school to teach people special trades such as auto-mechanics, carpentry, etc. It is felt that this school will fill a vacancy that exists in Texas today by establishing a place where unskilled people may establish themselves in a vocation.

The bill, which proved to be most evenly divided this session was House Bill 462, by Hughes of Dallas. This bill provides for the issuance of occupational drivers' licenses for people convicted of driving while intoxicated.

The bill was engrossed Monday by a tie vote and the Speaker, Byron Tunnell of Tyler, voted to pass the bill on to the second reading. Then, on Tuesday of this week, the Speaker voted to make a tie in order to keep the bill from being killed. The bill was passed for the last time by a vote of 70 to 69. This bill would change the present law so that there would be an appeal from the drivers license suspension of a person convicted of driving while intoxicated provided that his occupation depended upon driving a motor vehicle.

This is the first time in any report I have stated my opinion on any bill, however, I feel that it is an extremely bad thing whenever this legislation takes any move to liberalize the driving while intoxicated laws with the increased rate of higher deaths due to drunken drivers. It is my opinion that we should do everything possible to make the driving while intoxicated laws more severe.

As this type of legislation comes up as well as all other legislation, I hope you realize how important your views are to me and certainly we hope that you will hear our request and contact us concerning your views. I hope we hear from YOU soon.

NITROGEN FERTILIZER

AMOUNT The profitable management of a modern farm takes the same kind of astute judgment as that required for any other business. The farmer is under the same pressure to get maximum return on his capital investment, raw materials and labor if he is to keep his farm profitable.

Most farmers are quick to realize that an unwise economy can be very expensive. No area of farming is more susceptible to unwise economy than that of fertilization. The investment in money and labor that goes into preparing a seed bed, planting, cultivating, irrigating and harvesting is great enough that the difference in the cost of doing a *get-by* job of fertilizing and doing an adequate job is negligible. But the difference in results, the dollar value of the harvest, can be 15, 20 or even 25 per cent. The only additional cost in applying *enough* fertilizer rather than *nearly* enough is the comparatively small cost of the fertilizer itself, yet it has a significant effect on the return from the whole farming operation including the big investment in the land.

Let's consider a hypothetical case:

If 100 lbs. of anhydrous ammonia per acre produces 5,000 lbs. of grain sorghum with a given level of crop management, we can safely say that an additional 50 lbs. of anhydrous ammonia will add 500 lbs. to the yield. At 6 3/4 cents per pound applied, the additional fertilizer costs \$3.37. At \$2.00 per hundred, the increase in yield is worth \$10.00 or an increase in net profit of \$6.62 per acre.

But what about wasting fertilizer? No one will question the fact that you can apply more fertilizer than the crop will use. There is a safety factor, however. Generally speaking, once the anhydrous ammonia goes into the ground, its nitrogen stays there until it is used by a plant. The nitrogen left over from this year's crop is there to aid in the decomposition of the residue and is still there at planting time next spring.

Your Nitromite dealer is ready now to put this profit maker to work in your fields. Call him right away. He has all the information on the Shamrock Farm Credit Plan.

SPECIAL NOTE TO CATTLE FEEDERS Nitrogen causes an increase in the protein content as well as an increase in yield of grain sorghum. Consequently, both the added protein and added yield must be taken into account in calculating the most profitable rates of nitrogen to apply.
