A heart shaped cake was decorated with an orchid border and roses, which was given as a door prize to Mrs. Hardesty.

Other helpful hints were given on baking, frosting and decorating.

The ice cream cone treats were served as refreshments to nine members, and one new member, Mrs. Bill Alspaugh, and two guests, Mrs. Lena Eynans and Mrs. Sue Caywood.

Bicentennial Bandwagon Starts Rolling For '76

Is Slaton making plans for its celebration in July, 1976, of the 200th anniversary of the American Revolution? This is the question currently being asked in Austin by The American Revolution Bicentennial Commission of Texas.

The Commission's goal is to have all Texas citizens participate in the 200th Anniversary of the nation's founding, and toward that end, the Com-

mission has been hard at work for two years planning and developing guidelines for Texas cities and towns to use in establishing their Bicentennial programs.

Copies of the Guidelines were mailed to mayors, Chambers of Commerce, and Councils of Government throughout the state last September and October. They call for the formulation of a Bicentennial com-

mittee in each city and town.

Programs selected by the committee should reflect one or more of the three themes of the Bicentennial Celebration. These are "Heritage," projects having to do with history; "Open House, USA," projects designed to attract visitors to the community; and "Horizons," those projects that will provide for the future. In each community one project

should be permanent. Something that will be of lasting benefit to the community and that will enrich the state and the nation.

After these local committees have decided on the projects they want to develop, plans should be submitted to the State Bicentennial Commission in Austin for endorsement. The commission is interested in any community with

worthwhile projects, and is ready and willing to offer advice and suggestions to city and town committees.

The Bicentennial Bandwagon is rolling. A growing list of Texas cities and towns are well along in their preparations for the big birthday celebration in 1976.

Lubbock's Texas Tech Ranch Museum is one of many projects in that city, and Temple is de-

veloping an impressive number of projects, among them a railroad museum, restoration of Scott House on the grounds of Scott and White Hospital and an early American music program for their boys' choir.

Smaller towns are also becoming active. Seguin's Bicentennial committee is planning an enlargement of their traditional Freedom Fiesta and Belton and Killeen now have work-

ing committees.

The number and types of Bicentennial programs for a city or town is only limited by the imagination and energy of the people living there. What may be possible for a large city may not be possible for a small town, and what may be right for a rural farming town may not be proper for a large urban area, but regardless of the scope or size of a project, the

important thing

involved in the necessary celebration. Don't be a watermelon. Ideas on July planning and your committee to celebrate and lasting anniversary of our great nation.

What To Do With Cotton ? Eat It

Texas -- The idea of using the world's fiber crop, can become a real source of income for the state. The utilization of cotton has already paved the way for a Lubbock plant, soon to be operational, for its commercial production.

Led by nutrition scientists at Texas Tech University, these research efforts have even encompassed the development of an extensive variety of recipes for using the flour in human diets -- a variety ranging from breads to desserts.

Current research is being made possible by a joint grant

from Plains Cooperative Oil Mill at Lubbock and by Texas Tech's International Center for Arid and Semi-Arid Land Studies. The grant is aimed at helping finance a continuing research project centered on cottonseed flour by the Department of Food and Nutrition in Tech's College of Home Economics.

Results of research studies conducted thus far indicate that

flour from cottonseed is promising not only as a valuable and largely untapped source of nutritious food but also as a potentially valuable new economic boost for the cotton producing industry.

According to a just released progress report on the research at Tech, still more nutritious and acceptable food products have been prepared using vary-

ing percentages of cottonseed flour to replace wheat flour in many food items.

A third set of cottonseed flour recipes has been compiled for such foods as cheese crisps, choco cottonseed candy, sandwich spread for cottonseed bread, nut butter cookies, nutty praline bars and many others.

The progress report said earlier testing of cottonseed flour yeast breads has also been continued by varying the levels of cottonseed flour with additions of grain sorghum flour and another additive known as emplex.

Breads made with part grain sorghum flour, however, were not found to be palatable, and other recipe formulations will be needed to develop a more acceptable product, the report said.

In addition, snack crackers with cottonseed nut filling have been prepared, rated by a small taste panel and stored for future testing to determine storage qualities and consumer acceptability.

Mrs. Margarette Harden, food and nutrition instructor and research associate at Tech who is closely with the cotton - seed flour project, pointed out that

the flour is an abundant source of protein.

She added that the addition of liquid cyclone processed cottonseed flour "significantly increases the nutritional value of the proteins in white wheat flour," according to results of extensive rat - growth studies which have been conducted.

With each 100 pounds of fiber, the cotton plant yields approximately 170 pounds of cottonseed. Seed production averages approximately 850 pounds per acre in West Texas, of which only about 15 per cent is needed for replanting.

The remaining 85 per cent

is the basis for the cottonseed processing industry which previously has produced -- as primary products -- lint, oil for food, and hulls for livestock feeds.

Post Women's Club Wins State Award

WIN \$400 AWARD--Receiving the first place state Environmental Responsibility Award are, from left, Mrs. Bailey Mayo, Co-Chairman of Conservation, of the Woman's Culture Club of Post, Warren Robbins, sales supervisor, Shell Oil Company's Dallas Marketing District, presented the award with assistance from Mrs. E. L. Soyars, State Conservation Chairman of the Texas Federation of Women's Clubs. The Woman's Culture Club also won a Special Youth Involvement Award.

The Woman's Culture Club of Post, Texas, has won the first place state award of \$400 in the General Federation of Women's Clubs - Shell Oil Company Environmental Responsibility Program. This award was given in recognition of the club's outstanding work for a better environment.

In addition, this club earned the Special Youth Involvement Award of \$300, which is part of the same program.

The awards were presented by Shell Oil Company at the Texas Federation of Women's Clubs Annual State Convention in Dallas this week. The first place award is one of four on the state level totaling \$1,000. The Woman's Culture Club will now compete with first place winners from the other states for national grants of \$2,000, \$1,000, and \$500. These grants will be awarded at the GFWC national convention in Denver, Colorado, on June 6.

By winning the Special Youth Involvement Award, one of which is offered in each state, this club becomes eligible for an additional award. Two prizes -- \$1,000 and \$500 -- are to be offered in this category nationally.

The Woman's Culture Club won its dual award by involving nine youth groups in the environmental action efforts. These youth groups represent a majority of the young people in Garza County.

Phase one of the program was a county-wide clean-up campaign. Vacant lots in both downtown and rural areas, highways and roads throughout the county were cleaned of tons of trash and debris. Youth groups assisting in the project included Boy Scouts, Girl Scouts, Future Homemakers, 4-H Clubs, Cub Scouts, Brownies, Future Farmers of America, Johnny Horizon Clubs, and various school organizations.

The second phase of the program is a beautification program now underway to develop a pocket park in downtown Post. Trees and bushes are being planted, the land is being graded, and flower gardens and benches will be added.

These projects and hundreds of others like them are encouraged by the GFWC - Shell Environmental Responsibility Program throughout the country. The Program, which was launched in 1971, will continue this year. It replaces a Shell-sponsored education program conducted by the two organizations from 1963 through 1970.

This new Program awards a total of \$55,000 to state and national winners. It is designed to foster an interest in initiating and executing projects that will improve the environment. The money will be used by the winning clubs to expand their environmental efforts.

Second and third place awards of \$200 and \$100 respectively were won by the Fine Arts Club of Weslaco and the Clover Club of Kaufman.

Mrs. Arrants Gives WSCS Program

The meeting was opened with altar prayer followed by the singing of the hymn "Love to Tell the Story." Mrs. Max Arrants presented the program on "The Black and White of Women's Liberation". Mrs. Nan Tudor gave the benediction.

Revival

Revival services began Wednesday evening at the Pentecostal Holiness Church, 8th and Knox, Slaton. Rev. C. E. Neukirchner of Antioch, Calif. is the evangelist.
 Services are being held at 7:30 each evening. No services are scheduled for Saturday.
 Sunday morning services include Sunday School at 10:00 and worship at 11:00 o'clock. The last revival service will be Sunday night, beginning at 7:00 o'clock.
 The public is invited, a spokesman for the church said.

How, then, do you fulfill the responsibility of getting the child to "take the proper road"? The best way is to be the leader on the road to a righteous and good life - to set the proper example. Parents who say one thing and do the other are bound to find that their children are doing as they do, not as they say. The responsibilities of being a parent include giving a child the proper concepts of religion, brotherhood and fair play.
 It is so easy to say what is right and wrong. What is difficult is trying to follow up on what you say. Setting a good example is the best way.

Letters to the Editor

The Slatonite:
 Here is for The Slatonite another year, after so many years of pleasure, reading of so many friends I have there. Would be lost without it. You see, I have been a reader since June 22nd 1915. Shall be on my way back east any day now. Will let you know - I would like to know why I do not get the paper - until Saturday. Sometimes until Monday - sometime as in Iowa or Virginia. I shall be 86 years young! August 24th enjoy everything each day.
 Sincerely
 Mrs. L. E. Brasfield

The American's Creed

The American's Creed was written in 1918 by William Tyler Page, as the winning nationwide contest entry. The then Mayor of Baltimore, James H. Preston, donated the \$1,000 award.

"I believe in the United States of America as a Government of the people, by the people, for the people; whose just powers are derived from the consent of the governed; a democracy in a republic; a sovereign Nation of many sovereign States; a perfect union, one and inseparable, established upon those principles of freedom, equality, justice and humanity for which American patriots sacrificed their lives and fortunes. I therefore believe it is my duty to my country to love it; to support its Constitution; to obey its laws; to respect its flag; and to defend it against all enemies."

Effectiveness of Phase Two Underestimated, NAM Says

The charge that the wage-price stabilization program is biased in favor of business and is ineffective in checking inflation at this point is like filing a murder charge when there is no corpus delicti, according to W. P. Gullander, president of the National Association of Manufacturers.

"The present system of wage and price controls has been subjected to a barrage of criticism in recent weeks," Mr. Gullander told the Joint Economic Committee of Congress. But he said such criticisms have been supported mainly by "prejudiced rhetoric, rather than by objective analysis."

"The chief threat to the success of the wage-price stabilization effort is not its own internal shortcomings, real though these may be," he said. "It is rather the tide of ill-informed and prejudiced criticism to which the program has been subjected."

Mr. Gullander told the committee that an attempt to reconstruct the program in wholesale fashion, in mid-stream, would be fatal to its chances for ultimate success.

"A shift to a program which would be punitive toward business would stop the present rising economic trend dead in its tracks," he said. "Despite the histrionics of labor union leaders, the charge that the control system has favored business as against labor is completely contrary to the facts."

The NAM president said that, with all the difficulties under which the wage-price control system has been laboring, one might have expected its record in restraining price increases to be unimpressive. "Instead, we find there has been a very striking reduction in the rate of rise in the cost of living since last August," he said.

He pointed out that from August, 1971, to February, 1972, the Consumer Price Index rose at an annual rate of only 2.8 percent, compared with 5.6 percent for the year ended August, 1970, and 4.4 percent for the year ended August, 1971.

Mr. Gullander said the major problem in restraining inflation is the increase in employee compensation.

"There is no margin to impose a further squeeze on profits as a contribution to the stabilization program," he said. "The public should be more aware of these facts

in drawing conclusions as to the relative severity of price restraints as against wage restraints."

Research Pays

Victor Comptometer Corporation is successfully competing with Japanese manufacturers in the sale of electronic calculators to the U.S. market, according to the company's annual report.

The Chicago manufacturer's research team has wiped out the Japanese cost-of-labor advantage through the development of advanced designs in conjunction with American semi-conductor chip manufacturers, enabling the units to be priced competitively.

Consumers Want to Know

by MARGARET SPADER
Director of Consumer Affairs
National Association of Manufacturers

I'd like to buy a room air conditioner but I don't know what to look for. Please give me some suggestions.

Appliance experts advise that you assemble facts such as the size of the room to be cooled—the height, length and width, the direction the room faces, the type of window—such as casement, double-hung, etc., and the electrical voltage in your home. This information will help the salesman determine the cooling capacity you need and the best unit to do the job. Then you should ask about noise level, temperature controls, and filter. You should also find out how to clean and replace the air deflection features. Also consult use-and-care instructions.

Are accessories such as variable fan speeds and directional controls worth the extra price on room air conditioners?

Most air conditioner owners like a choice of fan speeds because low speed offers quieter nighttime cooling and higher speeds are useful for daytime cooling during very hot weather. Air directional controls allow you to direct the airflow up, down or to either side, thus preventing drafts. A thermostat may contribute toward more economical operation because it allows setting a temperature range that the unit maintains automatically. These accessories are no longer extra on many air conditioners.

Firefighter Awards Announced for 1972

Ward LaFrance Truck Corporation, Elmira, N.Y., has announced the "Annual Ward LaFrance Fire Industry Awards" for heroism, to be made next October.

A total of \$5,000 in prizes will be made, and on-or-off duty firemen of all ranks are eligible.

The first award will be for \$3,000 and a plaque commemorating the achievement. Second prize will be \$1,000 and third and fourth prizes will be \$500 each.

Mobile Laboratory Is Seeking New Ozone Data

The ozone layer, the gas that absorbs the sun's deadly radiation high in the sky and makes life possible on earth, is being studied by the National Aeronautics and Space Administration (NASA).

From the truck-mounted Satellite Photometric Observatory built by Goodyear Aerospace Corporation, NASA scientists in Yuma, Ariz., are determining ozone height and volume density by measuring reflections from a 100-foot diameter, balloon-type satellite called Pigeos. This measurement may give scientists insight into the effect high-altitude air pollution has on the environment.

Data are recorded on tape and by an oscillograph, both being fed by a detection system on the mobile observatory's 24-inch diameter telescope.

Young drivers under 25 years of age make up less than 22 per cent of the driver population but accounted for more than 36 per cent of the 1.6 million motorists involved in crashes last year, the Insurance Information Institute reports.

"Education is a funny thing. At eighteen we knew all the answers—forty years later even the questions confuse us!"—Robert G. Campbell, The Lititz (Pa.) Record-Express.

"Another explanation of the modern child's manners is that too many woodsheds have been converted into garages."—Harold S. May, The Florence (Ala.) Herald.

New Museum Features Eggs and Seashells

Over 100,000 sets comprising the largest egg collection in the world, are housed in the newly opened multi-million-dollar Delaware Museum of Natural History in Greenville, near Wilmington, Del.

Conceived by John E. du Pont in 1957, the museum is a repository for eggs accumulated from older collections around the world. It also features collections of rare seashells, birds and mammals.

The museum's research collection comprises one million seashells, and 40,000 specimens of birds, including many extinct and vanishing species, besides the egg collection.

Mr. du Pont said that the work of the museum's researchers in the past two years has shed new light on how man has harmed his natural resources and what he must do in order to preserve them.

Only one hundred years have elapsed between the first transcontinental railroad and the landing of men on the moon.

One word you'll be hearing more often is "ombudsman." Although sometimes referred to as "a smorgasbord of syllables," it may be defined more explicitly as "one who comforts the afflicted and afflicts the comfortable."

Back in 1809 the Swedes provided for an ombudsman in their Constitution. Usually appointed by the legislature,

the ombudsman is considered a public defender. His job in Sweden and other countries is to protect citizens against government or bureaucratic commission or omission.

For almost a year now, the U.S. government has had an ombudsman for business. Our constitutional right to petition the government is actually advanced by this special assistant to the Secretary of Commerce. His office also provides a better communication bridge between government and business.

Ombudsmen, sometimes given other titles, are also

appearing in the U.S. Postal Service and state and local governments as well as private industry. This "good offices" approach has led to clarification of many difficulties between private firms and government bureaus.

Inquiries range through such subjects as imports, wage and price freeze, product standards, technology transfer, trade with China, how to keep informed on government procurement, as well as the whole gamut of government programs. In the first six months of the new office, some 1700 cases were

handled besides a large number of routine inquiries not requiring research, reference or extensive service, according to Thomas E. Drumm Jr., the new U.S. ombudsman. The general public benefits because jobs are created here as the result of increased business overseas.

The estimated gross Federal debt by 1973 will be \$493 billion, up about \$84 billion since the end of the fiscal year 1971. Payments for interest this year are estimated at \$320 per household, according to the Tax Foundation.

Class of '72 Reunion Held

By Ron Bartley and Terry Mize

The Slaton High School Class of 1972 held their first class reunion today, May 26, 1982, at Panther Island; and the entire class was in attendance.

RANDY DAVIS, former SHS Student Body president, was there with his wife, the former CYNTHIA AKIN, and their 13 kids. RANDY is presently employed by Pedro's Service Station in Juarez. RANDY'S assistant is DARRELL EASTMAN, who graduated from Harvard with a degree in flat fixing and windshield wiping. We see them talking to BOBBY and BRENDA HOPPER, who now reside in Los Angeles, where BOBBY owns a Men's Hair Dressing Salon and Boutique. BOBBY'S chief hair stylist is GENE CARPENTER, who does manicures as well. Also, in the group we see TONY and D-WAYNE BUXKEMPER, who are co-owners of Ford Motor Company.

Just arriving in their private plane, we see TOM and MARSHA ROCHE. They are the famous celebrities who took over where Sonny and Cher left off. Also, arriving in the plane from California were GARY and NEDRA DILLARD. GARY is

president of Height - Asbury University, and NEDRA is Dean of Men. GARY comments that his students are always on the highest level.

We see at the campfire RANDY BARKLEY, who is director of NASA in Houston. Some of the astronauts under RANDY are JIMMY BRISENO, J. B. JOHNSTON, and LARRY WITT.

Another ex - graduate is GORLA GASS MELCHER, who is the first woman mayor of Wilson. She is married to LESLIE MELCHER, who is the Wilson girls' basketball coach. LLOYD KITTEN is now the highest paid basketball player today in the NBA. He plans for the New York Knicks, also, on the Knicks are STANLEY HEINRICH and JIM MELTON, both of whom are averaging .003 points a game.

CINDY HENDRIX recently broke the world's record in the pole vault in Germany last month by clearing 19 feet. She commented that her record was due to the new cat-a-pole designed by FREDDIE RAINWATER and JOE ARGUELLO.

RODNEY SIMMONS, the great cornerback for Slaton, is now playing for the Dallas Cowboys. He is coached by former teammate, DENNIS HAMMER, who was voted "Coach of the Year" in the NFL last year.

JAY BURKS, following in the footsteps of his dad, M. W. Kerr, is now principal of SHS. JAY states that long hair, pierced ears, and fondling will not be

tolerated in the cherished halls of SHS.

STEVE MOSSER, a protestant evangelist who is now touring the U.S., stopped off at the reunion. Also touring with him are his staff members, TOMMY JACK TAYLOR, song leader; GLENNA JONES, pianist; CLYDE (FINGER) KITTEN, organist; and soloist, CYNARA GIPSON.

DAN DAVIS is the leader of Dan's Devils, a notorious motorcycle gang. Other exes riding in his gang with him were STEVE COLBERT, JESSE FLORES, PATSY GAMBLE, JOYCE HEINRICH, VICKI (THE MOOSE) HILL, and MARY HERRERA.

Rancher DON KENDRICK and his wife, the former SHER HONDA PERDUE, were in attendance. Mrs. Kendrick says that getting up at 6 a.m. and milking the cows and feeding the chickens is more fun than she thought. Some of their ranch hands coming with them were ROBERT RATLIFF, STANLEY ROBERTS, RAUL SANCHEZ, and ROGER KIRBY.

STANLEY JAYNES is now a Royal Canadian Mountie. The most fun STANLEY states is, "Taking rum to snowbound victims."

RANDY JONES, who is president of Happy Pigeon Birdseed Company, and his associates, DAVID SOLIS, RAYMOND NOYOLA, and RAUL TAMEZ, were also there.

Finding time from their strict

training for the Olympics were BRAD LAMB and BRAD WINCHESTER. LAMB runs the 5 mile race in the contest, and WINCHESTER is the official USA javelin catcher.

We were deeply honored at the reunion with the eminent presence of the first black President of the United States, WILLIE FREEMAN. WILLIE was dressed in his complete western outfit including his purple and pink cowboy boots. Accompanying him were Secretary of State BRAD POWELL and Secretary of War SUSAN GREEN.

Stopping for her busy schedule on the Women's tour was D'ANN CARNES, who is preparing for the Tom Jones Desert Classic. She also brought her caddy, BARBARA MC-CAIN.

Also in attendance were U.S. Ping Pong champs, VINCENT SALAZAR and ANPARRA AVILA, who just recently defeated the Chinese team.

MARK NESBITT is now owner of the Slaton Slatonite. He and his reporters, NITA LATHAM and FRANCES RESPONDEK, attended.

TOM LONGTIN was able to attend when she was appearing in a play at the Hayloft Dinner Theater. She took time out to come to the reunion. The play she is appearing in is the old hit musical, "Hair!" The director of that play is FLOYD KITTEN, also an ex-graduate.

Woman wrestler, LYNNE McCORMICK, was present with her manager, TONY MARTIN, and tag team partner, ELLYN McALISTER.

Also finding time from their busy T.V. appearances were GWENDOLYN QUALLS, ELNORA MOORE, and GEORGIA PETTIE, who are the famous Super Soulettes.

CONNIE RINNE, is now croqueting the farm of CANDY TOWNSEND, a millionaire who owns 5,000 acres of land.

BECKY RUDD and CHARLOTTE SAMMONS are now fashion designers for "Popular Mechanics." As we look around we see the three famous country and western singers who sometimes back up Merle Haggard, TERRI CONNER, LINDA SHAFER, and JANIE NOYOLA.

ELENA PASCHALL, is now the team "trainer" for the Los Angeles Rams. She states that the one person who inspired her to be a trainer was "Doc" Mize.

And now as several begin to leave, we see the groundkeepers of Panther Island, SHARON TOMLIN and CLARA WAUGH, who are beginning to clean up. We look forward to reporting on the class of '72 again when they hold their Silver Anniversary of their graduation in 1997.

Water Pollution Control Measure Is Submitted

Slaton city officials have submitted to the Texas Water Quality Board a municipal water pollution control and abatement proposal, as required by the Legislature in Senate Bill 835 passed last year. Deadline for receipt of the proposals by cities of 5,000 population and more, was May 1. The law affects 230 cities in the state, though only 150 made the May 1 deadline.

The legislation requires all cities in the 5,000 or more population bracket to form their own water pollution control and abatement programs, and to be responsible for the surveillance and enhancement of water quality problems within their city limits. Programs also may extend to a city's extra territorial jurisdiction, though the latter is not a requirement. In addition, the law gives all cities, regardless of size, the right to monitor, inspect and sample possible water pollution discharges, as well as the right to enforce penalties associated with violations, though smaller cities are not required to do so.

The TWQB is charged, by the legislation, with the responsibility of assisting and advising the cities in the implementation of the program. Sam Slaughter, program director for the TWQB, during March and April, met with representatives of the cities concerned, through the state's 24 Councils of Government to explain the program, and to offer the TWQB.

In essence, the TWQB simply requires water pollution control and powers already carried out on a local basis, and which are considered standard TWQB technical assistance are required to inventory of all significant discharges, including industrial and municipal effluents, and to develop a plan for such sources as streets, parking lots, urban facilities.

For And About Teenagers

THIS WEEK'S LETTER: I am 10 years old. Whenever I babysit I get frightened. Once it was the

heater. Another time I thought somebody was scratching at the back door. I always try to tell myself that I'm not afraid, but it just doesn't work. What can I do so I won't be afraid when I am babysitting?

ANSWER: In our opinion you are too young to be babysitting. In your letter you didn't mention whether you babysit for just your younger sisters and brothers, or if you babysit for other people. In either case, we still feel that you are too young. To be a babysitter you must be able to handle the responsibilities of that position. It is serious business. You deal with the health and safety of a young child or young children. You must be able to know what to do if an emergency should arise. If you are constantly frightened, you are in a state of mind that could lead to tragedy if you were needed to react swiftly and calmly to an emergency situation. We feel that a 13 year-old who is mature can babysit for older children. You should be at least 15 or 16 years old if you are going to babysit with an infant.

CONSUMERS' CORNER

You can keep your grocery bills in line. Although food prices have been high recently, you can keep your grocery bill in line by being a careful shopper - a bargain shopper.

You can be a bargain shopper when you read the food ads in your local newspaper. Look for the "loss leaders." "Loss leaders" usually are the weekend specials at high savings to you (and no profit to the stores). Take advantage of the specials.

If possible - and if you have the time - bypass prepared foods. Frozen dinners, fancy vegetables, ready-made desserts or easy-to-fix casserole items may be convenient, but you have to pay for the convenience. By preparing these items, you can save on your food bill.

Where possible, try to buy by using unit pricing and try to buy in bulk quantities. Both measures can help you save money at the grocery.

One of the most important things you can do to keep that grocery bill in line is to buy what you need, not what you want. Go shopping with a well thought out list and stick to it. Buying on impulse can ruin your budget.

Know dwelling dangers before buying or renting
Whether you're looking for a home to rent or buy, there are several safety factors you should keep in mind.

Among dangers in older houses, inadequate electrical systems get top billing. The number of appliances needed to live modernly has brought about this power problem. Houses wired twenty or thirty years ago were adequate at that time, but today they are usually inadequate.

Nutrient Value Of Hay Effects Quality

Livestock men can estimate or know the exact feeding values of the hays they use. They can rely on time-honored hay judging techniques to estimate hay quality. Or they can know their hay's real worth by having it tested chemically, says Associate County Agricultural Agent Tom Hemphill.

A major factor affecting hay quality is the stage of maturity when the plants were cut. No mature seed should be present. Coastal bermudagrass should be no more than 14 to 16 inches tall.

Since plant leaves have the highest nutrient quality, high quality hay should contain a high proportion of leaves to stem, notes Hemphill. A bright green color indicates a minimum of bleaching and leaching losses of vitamins and other nutrients.

Good, clean hay crops have an aroma or fragrance, not a moldy, dusty smell, adds the agent. Large and numerous stems mean hay with low acceptability and quality. Good, clean hays are also those with a minimum of stubble, weeds and foreign matter.

Having hay chemically tested is the only sure way to know its actual feed value, points

out Hemphill. The Texas A&M University Forage Testing Program is available to forage and livestock producers. Information on sampling is available at the county Extension office, adds Hemphill.

Nursing Home News

by Bobbie Hogue

The past week has been wonderful. Everyone seemed to enjoy the Mother's Day weekend. Folks from all around came out to visit, bringing flowers for their loved ones. The City Floral sent us nine beautiful corsages. These were given to residents who's folks could not be with them on Mothers Day.

Mrs. Mary Lou Gebert came by the home and brought us a big turkey, which was given to her by Leftwich Food, of Lubbock. Our residents had a wonderful dinner Sunday - enjoying the turkey and all the trimmings. Mrs. Gebert is the daughter of Mrs. Fleeman, who resides in our home.

Mrs. Lottie Shelton brought us the other records of the Bible. This makes a complete set of Bible Records that she has given to our home.

Rose Lee Brown donated some egg cartons for crafts. To these wonderful persons, we say Thank You!

Returning home from the Mercy Hospital the past week, were Joe Neiland, Susie Bradshaw, and Lula Reed. Charlie Biggs still remains in the hospital. We wish him a speedy recovery.

Friday, our residents gathered in the lobby to hear a group of children from Steven F. Austin school. The fourth grade, Mrs. Harlan's room came and sang several songs. They were accompanied by Mrs. Mullins on the piano. Everyone was really blessed by these children's songs. Each child brought an egg carton waste basket which they had made, and gave one to each resident.

The Ladies Aux. sponsored Black-out bingo last Wednesday. Vada Hurst was the lucky one winning a beautiful bouquet of yellow miniature roses.

I leave you this "thought" . . . "It's a great task of the church today to get sinners into Heaven, and Saints out of bed!"

Read Romans 6:14-18

Restore unto me the joy of thy salvation; and uphold me with thy free spirit. (Psalm 51:12)

A woman who had served as an army nurse during the war was often depressed and unhappy. A badly wounded soldier in her ward had asked her for a drink of water. Being busy at the time, she had curtly refused him. Within the hour the man had died. In spite of all her friends could do to reassure her, she carried the weight of that refusal back with her into civilian life.

Then on vacation one summer she met a pastor who did not try to argue with her or advise her to stop worrying. Telling her to kneel, he placed his hands on her head and said: "In the name of Jesus Christ, I declare that He has forgiven you." The weight of guilt was removed, and she knew that she was free.

Sin puts on us a weight of guilt because we realize that when an evil has been done it cannot be undone. But when we confess that we are sorry for our sin, Christ has the power to remove the weight of sin.

PRAYER: O God, You tell us to cast our burdens on You. Since we cannot of ourselves set right the wrong we have done, but only confess our wrongdoing, remove from us the weight of a guilty conscience and restore us; through Jesus Christ, Thy Son. Amen.

THOUGHT FOR THE DAY

Why suffer feelings of guilt? Christ can give release and bring joy.

Attend The Church of Your Choice Sunday

a weekly message relating the world of today to the lessons of Faith and Church . . .

The things which are seen are temporal; but the things which are not seen are eternal.

—2 Corinthians IV, 18

The strongest house may fall before the wind, go up in smoke, or crumble with the passing of time. The visible monuments to man's ingenuity and industry are not so permanent as the sea, nor so strong as the mighty mountain. God is eternal and the source of man's hope for now and for all time.
