

THE SLATON SLATONITE

DONALD, Publisher and Owner. \$2.00 Per Year.

SLATON, LUBBOCK COUNTY, TEXAS.

VOL. 11. NO. 38. JUNE 9, 1922

Chamber of Commerce Notes and Activities Briefly Told

The secretary this week mailed out board photographs of the Slaton Cultural Exhibit at the Abilene to many farmers. The idea is we want to take first prize at this coming fall, and in order to we will need a big variety of and orchard products. Keep matter in mind and help out all can. Dates of the fair will be published later.

Slaton is now experiencing more than at any time since the was organized. From now on will be a steady and increasing and for homes in Slaton and for land. We want to be ready to care of the people that will come. Lack of East Texas and the atting growth of West Texas is atting all eyes this way. People where are waking up to the fact the Plains country is not only the fertile and productive in the but living conditions are ideal.

Many trees have been set out this in Slaton and the yards planting grass. We want to follow up good work by building sidewalks over town. A big live town like with lights, water and sewer-must not neglect the sidewalks. are useful and very attractive. the work going.

The healthiest sign in Slaton is that who have lived here a long time the ones that are building the. They have made their money and have the FAITH. May they use to prosper.

Do you think the write-up in the Worth Record on May 28th was anything to Slaton? If so, mail Chamber of Commerce \$1 to help for the advertisement. Two and people ought to respond to all and thereby place the Cham-ber of Commerce on a solid financial

ambition of the Chamber of merce is to keep Slaton alive, vigorous and thriving. This organ-izes to help the entire commu-nity. In all advertising special at-tention is given to the farming inter-est and attractiveness of both the and country.

It is the accepted time for all miles to get behind the town and try and PUSH. The country has SUNDAY CLOTHES and the looks as good as an oasis in the

good to the place that is good

Despite the over-abundance of ure in the Slaton region, farm is progressing to the satisfac-tion of the growers. While there has some hail reported some miles at this immediate territory has been exempt.

Slaton's program of building has exceeded the expectations of the ardent boosters. Late last week bids and contracts were signed for erection of more than forty resi-dence in various parts of the city. A magnificent two-story building occupied by the Slaton State will be ready for use within the few weeks.

The School Board is advertising for bids for the ward school in Southeast Slaton and for additions and repairs to the present high school and central ward buildings. Bonds in the amount of \$50,000 were voted for the use of the district in buildings for the year.

Contract for the building of a magnificent \$25,000.00 City Hall will also be entered into at an early date. This has been held up pending the outcome of negotiations with the federal government relative to use of a portion of same for the post office.

The West Texas Compress and Storage Company's plant is rapidly assuming shape. The machinery is set and the lumber and concrete is on the ground. They will be ready to start the season by Oct. 1st.

The building has been completed, machinery installed and the Slaton Steam Laundry will make its first run next week.

The water and sewer mains were tested out early this week, found in perfect condition, and both are now available for use. Approximately 7½ miles of each are in operation.

S. E. STAGGS ELECTED SECRETARY-MANAGER OF THE CHAMBER OF COMMERCE

S. E. Staggs was elected Secretary-Manager of the Slaton Chamber of Commerce at a meeting of the board of directors held last Monday.

Mr. Staggs has been connected with the Santa Fe offices in Slaton for the past two years and knows the local conditions. He is well qualified for the place he has accepted, and we feel sure that the board made no mistake in their choice out of a large number of applications.

The success of the Slaton Chamber of Commerce depends upon the individuals composing its membership. You must give your hearty co-operation to the board of directors and the secretary-manager if you expect to accomplish anything. Put aside personal grievances and work in harmony for the upbuilding of Slaton and the territory surrounding.

Today Slaton has the advantage of any town in West Texas. Its natural resources and established industries assure its success, and the citizenship certainly ought to put a little effort and money into an institution that is helping to build the community.

BASEBALL.

The Slaton Santa Fe Monograms took a game from the Amarillo Monograms Sunday afternoon here by a score of 6 to 5.

REVIVAL MEETING WILL BEGIN AT CHURCH OF CHRIST HERE

Announcement is made that a series of revival meetings will begin at the Church of Christ here on July 16th. Eld. Joe S. Warlick of Dallas will do the preaching.

Eld. Sam Ribble of Lubbock will preach at this church on next Sunday.

Better Be Safe Now Than Sorry Later

In line with the article in the last issue of this paper relative to the growing number of propositions—stock and otherwise, that are being sold or offered to the citizens of this community, the Slaton Chamber of Commerce, through its directors at a meeting early in the week decided this was an opportune time to offer the full service of the organization towards the investigation of any company seeking to dispose of its stock among our citizens. This service is free to every individual, whether or not they are affiliated with the organization.

Especially do we ask that the persons residing in the rural districts avail themselves thereof.

If the stock offered is a good proposition it will be better after investigation. If you purchase it now and it is worthless, an investigation will be useless.

Beware of the solicitor who uses the prestige of a fellow townsman as a means to further his end.

We are informed by a well known citizen that he has recently been offered a commission of 15 per cent on sales of a particular stock, if he would drive the country with a solicitor.

Contracts for stock sold prior to this offer have been discounted here in Slaton.

The name of a man connected with one of our leading banks has been used as a possible officer of the company when formed. This was not authorized by him.

Again we say, INVESTIGATE.
CHAMBER OF COMMERCE.

I AM

I AM the latest sucker on the trunk of the human race. My head is solid mahogany, my feet are driftwood on the sea of "jazz" and my mind is the most complete vacuum known to science. I am just as useful to the human race as a corkscrew is to a cat fish. My only trait of character is a well-developed weakness for the waspy waisted, carmine daubed flapper whose dream of a hero is the original of the collar in the advertisements. Mentally I am a melancholy fluke, it hurts my head to think and I could not figure a two per cent discount without closing up the office. Compared to the hard rock drillers of O. Henry's time, who hewed habitations from virgin forests, used corn for food instead of drink and believed that a woman who could make a cooking stove break the speed limit was disqualified, I glisten like a mail-order diamond in a Tiffany sunburst. I am the Beau Brummel of the barber shop, the sweet baby of the beauty parlor and the meal ticket of the manicurist. Hide me not for my soft dome, it has been soaked in the wood alcohol concoctions of every hair tonic grafter from the heads of the rivers to the end of the earth. I am a parasite, a cumberer of the ground. I am the defective child of a degenerate race—

I Am the Jellybean

WILSON.

Since the last writing there has been much damage to crops because of hail, most of the fields will have to be replanted.

Mrs. L. Lumsden returned last week from Mineral Wells, where she had been taking treatment.

Johnnie Williams and Lawrence Lumsden went to the singing at New Hope Sunday.

Mrs. T. E. Dawson returned Thursday from Wichita Falls. She was accompanied home by her granddaughter, Miss Hazel Hobbs, who will spend the summer here.

Miss Obera Forrester visited Miss Clara Russell of Idalou last week. Mrs. Homer Scott and daughter, Zada Mae, spent Saturday night visiting in Tahoka.

Mrs. Adelia Forrester and daughters of Snyder, visited at the home of R. C. Forrester last week end.

A number from here attended church in Slaton Sunday night. H. G. Crosby, rural mail carrier, left first of the week for South Texas

Opportunity Means Nothing to the Man With Empty Pockets

—DID YOU EVER CONSIDER THAT?

—The individual who goes through life without a little cash salted away

—and consequently without credit or the means of getting it—can tell you of many splendid opportunities passed along to some one more fortunate because he had not the wherewithal to "plank down." Why not place yourself in a position to take advantage of opportunity?

—Start an account at this bank today. It is not a difficult matter to squeeze out a little deposit now and then—and it's marvelous how quickly it grows.

"And They Shall Beat Their Swords Into Plowshares"

—It's a prophecy which has already come to pass. Already the mighty forces of this great nation have been turned from the destructive unto constructive pathways and works of peace.

—For "they have beaten their swords into plowshares" and the plowshares are turning the fertile fields and valleys of America into garden spots that will yield up an abundance of food and feed.

—To the farmers of this community we extend our earnest well wishes for a successful year, and a desire to help in every way that lies within our power.

Chamber of Commerce Notes and Activities Briefly Told

By R. J. Murray, Acting Secretary.

The Plainview trip was a howling success. Slaton will derive good from such business ventures all through the years to come. Let's stay with the HOME TOWN.

The write-up in Sunday's Ft. Worth Record on Slaton and surrounding country is worth a cool million to the Slaton country. Many inquiries are coming in. If you haven't seen the Record procure a copy by all means. Slaton is the coming town on the Plains. All the citizenship has to do is to exploit the wonderful opportunities here. An investigation will christianize anyone into a Slaton believer.

To illustrate what we mean: A Lubbock citizen called at the secretary's office. He said he had lived in Lubbock ten years and he couldn't realize the growth of Slaton and that both towns were al right. We made his soul happy by selling him a couple of lots. Residence doesn't cut any ice—after looking over Slaton they fall. Every letter going out of Slaton should carry literature telling the world that Slaton is not only the fastest growing town between Amarillo and Fort Worth, but that we bid for supremacy of the Plains in every line.

Neighbors, thirty new residences are starting and under construction in Slaton, a two-story bank building, brick filling station, cotton compress, two gins, and a lot of talk about a big 50-room hotel.

Hats off to the new City Administration. They are working the streets and announce the new water and sewer system is about ready to turn over to the people. Everybody hook up with the sewer.

John the Commercial Club. It is the backbone of the community.

75,000 bales of cotton will be compressed at Slaton this season. Not so bad for a town and country just ten years old.

IT IS OUR HOME.

Want Locations.

The following people and firms want to locate in Slaton and wish to get in touch with owners of businesses named below, who wish to sell:

W. A. Bennett, Granbury, Texas, wants to buy bakery or meat market.

W. T. Wheat, Pecos, Texas, wants to buy hotel or transfer business.

Will Smith, Granger, Tex., wants to get in touch with gin man.

J. T. Grigsby, Navasota, Texas, wants position with cotton compress.

note was sold for \$500, and half of that \$500 was absorbed in promotion expenses, how much would your \$1,000 stock be worth? It would be worth no more than one-fourth what you gave for it, and very likely not that much.

We read in the daily press almost every day where some person or group of persons have been sent to the federal penitentiary for violation of the law in stock promotion schemes. Just a few short months ago several men connected with the "Little Motor Kar Co." of Dallas, were convicted in federal court for defrauding the people of Texas and other States out of hundreds of thousands of dollars.

Beware of these stock selling schemes. Before you invest a dollar have them examined with an X-ray. Be sure they are good before you put money or notes into the hands of their slick-tongued agents. If you want to invest in a stock company it would be far better to promote one here at home—one that would be of some service to the community, one that would furnish labor for home people and that would consume some of the products of the country.

About two years ago, when the Industrial Transportation Co. had their out-of-town agents working among the farmers of this section the Slatonite published similar warnings, yet they sold stock in amounts ranging to \$2,000 to an individual, quite a number buying \$1,000 and \$500 worth, most of them giving notes in payment. These agents, just as soon as they got a signature to a note beat it to town to get the cash, discounting them heavily. Just as fast as the money was deposited in the local banks it was drawn out by the head office in another state. Many of you remember what became of the Industrial Transportation Co. It was insolvent even when they were working here. The promoters in another state were converting the money into their own pockets, and pretty soon were in the hands of Uncle Sam, facing charges of fraud in the federal courts. The business of the company went through a liquidation process. Ask some of the stockholders in the Slaton community and find out what they realized for the money they had invested.

In many instances stock salesmen will come into the community and get one or two local people sufficiently interested to boost for their proposition. Usually these local men are honest—they believe the proposition good, or they would not boost it. Even if your neighbor thinks it good it pays to investigate for yourself.

If you have money put it in a local bank, if you want to spend it buy from the home merchant, if you want to invest it put it into local industries.

W. B. MONTAGUE RETURNS FROM BIG CONVENTION

W. B. Montague, Santa Fe conductor, has returned from a month's visit to Cleveland, Ohio, where he attended the sessions of the international convention of the Order of Railway Conductors. This convention was composed of delegates from the United States, Canada and Mexico. Mr. Montague represented the Slaton division of the Santa Fe.

This big assembly was composed of 732 delegates, and was purely a legislative body, not taking any action on strike problems. A national legislative committee was appointed, which will work in conjunction with the state legislative committees in an effort to elect suitable men to all offices in the United States. The work of this committee will be strictly along non-partisan lines.

Mr. Montague stated that many courtesies were extended the visitors during their stay in Cleveland. The New York Central railroad furnished a special train for the delegates on a trip to Niagara Falls. Newton A. Baker, ex-secretary of war and president of the Cleveland Chamber of Commerce, addressed the convention, as well as ex-governor Ben D. Hooper, chairman of the Federal Labor Board.

RURAL LETTER CARRIERS FORM ASSOCIATION HERE

The rural letter carriers of Lubbock, Lynn and Garza counties met at the Club House in Slaton Tuesday afternoon and formed a Rural Letter Carriers' Association.

Officers were elected as follows: Mark Burns, Wilson, President. Geo. DeShazo, Lubbock, Vice Pres. Foster Carroll, Slaton, Secretary-Treasurer.

Discussions were held and the session was a most profitable and enjoyable one for all present.

Hon. R. A. Baldwin Announces Re-election State Representative

HON. R. A. BALDWIN.

The Slatonite is authorized to announce Hon. R. A. Baldwin of this city as a candidate for re-election as State Representative in the Texas Legislature for the 119th District.

Mr. Baldwin was first elected to fill an unexpired term, and two years ago was re-elected. During that time the Legislature has had one remarkable session and several called sessions to dispose of some very important matters pertaining to State legislation. He has always been on the job at each session, and made a remarkably good record. First, last and all the time he was for everything his dis-

trict needed, and in matters affecting the whole State he was always found to be on the right side.

Judge Baldwin, as he is familiarly known in this section, is one of the best attorneys in Northwest Texas, on the right side of every moral issue, a fighter for what he believes is right and never acknowledges defeat. His friends love him and his enemies hate him, but the latter are so few that they are a negligible quantity.

Judge Baldwin will soon begin an active campaign over his district. Further announcement will also be made in future issues of this paper as well as all other papers in the district.

BEWARE!

With the prospect for another bumper crop in the Plains country, various promotion companies are flooding this section with literature, offering stock for sale. Others are sending their agents here to fleece the people, working principally among the farmers and wage earners. Some of these companies are offering to take notes of farmers, payable next fall in exchange for their stock.

During the past two weeks agents selling stock have been working among the farmers of this section and have secured the notes of several. We are also reliably informed that they have

offered to discount these notes as much as fifty per cent. If you had given your note for \$1,000 for stock in a company that was not even operating, and you should learn that they company had offered to sell your note for fifty cents on the dollar, how much would you consider the stock worth?

Also bear in mind that it costs about fifty per cent of the stock sales to promote these foreign companies. This expense is absorbed in agents' commissions, advertising, office and traveling expenses and officers' salaries. Then suppose that your \$1,000

CLASSIFIED ADVERTISING PAYS

THE TOWN GOSSIP.

A few days ago
A farmer drove his big six
Up in the shade of
The Slaton State Bank
And withdrawing his gloves
In a most precise
And leisurely manner
Walked up to
B. M. Holland
And made application
For a liberal loan
Holland looked him over
And sniffed the perfume
That emitted from his person
And carefully replied:
"Sorry, but we can't
"Accommodate you."
"Why! Why!"
Sputtered the farmer
"You don't smell right"
Replied Mr. Holland
"What! What!"
Echoed the farmer
You smell wrong
Too much like
A dry cleaning plant
And not enough like a mule barn
Too much like a gas tank
And not enough like a hog lot
Too much like a benzine wagon
And not enough like a dairy lot
Sorry, but we go by scent
These days
And not per cent or sight.

STATEMENT OF FACTS.

Statement of facts about me buying lots 6 and 7 in block 110, West Park Addition to Slaton, Texas. There has been considerable talk on the streets about me buying those lots after I had information that Mrs. Mollie Hill had contracted for them. This is not true. At the time that I contracted for the lots through Mr. Levey I did not know that Mrs. Hill wanted the lots, and I have since offered her the lots for just the same price that I was paying for them, and any other statements contrary to this are not true, and I respectfully refer you to Mr. Levey for the facts in this matter.

W. R. WILSON.

Mr. Levey's Statement.

I want to state as the agent who sold Mr. W. R. Wilson the lots mentioned in his statement above that I did not tell him that Mrs. Hill had looked at these lots or wanted these lots. As a matter of fact Mrs. Hill told me not to hold the lots for her, and it had been several days since I had any talk with her relative to these lots, and the last time I talked with her relative to these lots and the last time I talked with her about this matter she told me not to hold the lots for her. She was going to wait until her sons arrived and I did not have any further conversation with her.

J. G. LEVEY.

NOTICE TO CONTRACTORS.

Sealed bids will be received by Slaton Independent School District at Slaton, Texas, until 6:00 p. m. June 26, 1922, for the erection and completion of a school building, for the enlargement of present High School building, repairs to present ward school building, for said independent school district, in accordance with plans and specifications drawn by J. C. Teague, architect at Lubbock, Tex. Plans and specifications may be secured from Mrs. R. L. Smith, Secretary School Board, Slaton, Texas, or from architect at Lubbock, Texas, after June 10th.

A deposit of \$15.00 will be required as a guarantee that contractor will return plans and specifications with bid on the date set for opening same, to either architect or secretary of the School Board.

The School Board reserves the right to reject any and all bids.

Surety bond will be required for 50 per cent of the contract price. Each bid shall be accompanied by a certified check for \$1,000.00 made payable to Mrs. R. L. Smith, Secy. Board of Trustees, Slaton Independent School District, as a guarantee that such contractor will, in good faith, furnish such bond and enter into contract with Slaton Independent School District, for the erection and completion of said work in strict accord with said plans and specifications.

Separate bids will be made of each of the three pieces of work as per separate plans and specifications.

All work to be completed and turned over to said school district by September 1st, 1922.

W. H. MCKIRAHAN, President.
MRS. R. L. SMITH, Secy.
Slaton Independent School District.

J. S. SLOVER ANNOUNCES FOR COUNTY TREASURER

J. S. Slover of Lubbock authorizes the Slatonite to announce him as a candidate for the office of County Treasurer of Lubbock county. Mr. Slover is an "old timer" on the Plains of Texas. He came to the Plains in 1901, and settled in Lubbock county. He has always been ready, willing and capable of developing his county. Mr. Slover has served on various important boards of development and at one time was County Commissioner from his precinct. After the resignation of Mrs. Hinton the Commissioners' Court recognized his ability, and elected him to fill the unexpired term.

Mr. Slover states that if elected he will always be found in the office when his duty calls him. He believes in staying on the job at all times. He will very much appreciate your vote and influence.

A Competent Chiropractor

A competent Chiropractor is, first of all, honest, and no honest person will practice that in which he does not believe. There are three things fundamental to Chiropractic: First, that there is an intelligent power within that coordinates the physical, mental and spiritual functions; second, that this power uses the brain and nerve system to coordinate the physical functions, by means of mental impulses which it sends over the nerves; and third, that dis-ease is caused by a pressure on, or a pinching of, the nerves at the point where they leave the spine by a misaligned (out of place) vertebra (small bone of spine), thereby interrupting the flow of mental impulses to an organ or part of the body.

If this be true it can be demonstrated to the entire satisfaction of any reasonable mind. Chiropractors have studied and demonstrated the truth of these fundamental facts, and having proved them, no HONEST chiropractor will do anything that will leave a doubt in the patient's mind as to the absolute truth of these basic principles of the science.

A competent Chiropractor is trained to find the misaligned vertebrae (small bones of the spine) impinging (pinching) the nerves leading to the dis-eased organ, part, or tissue and proceeds with his analysis of the spine as though he knew his business. One can always tell a mechanic from a bungler.

A competent Chiropractor adjusts the vertebrae (small bones of the spine) CAUSING THE TROUBLE, and doesn't beat and pound the patient's spine from one end to the other in a BLIND effort to get the causative subluxation. One who knows his business is always positive and definite. Do not trust your health to one who doesn't know his business.

A competent Chiropractor is the graduate of a reputable resident school, for no person of character is satisfied with a second, or worse, rate of education when dealing with human health and life, and as an evidence of his qualification you will find a diploma from such a school hanging in his reception room.

A competent Chiropractor uses nothing but his hands and does nothing but adjust the misaligned (out of place) vertebrae (small bones of the spine). One who does not adjust the vertebrae (small bones of the spine) is not a Chiropractor, and one who does more than adjust the vertebrae (small bones of the spine) demonstrates thereby that he does not know the cause of dis-ease. He is more intent on getting your money than in rendering you a service and thereby discredits the entire profession.

Chiropractic stands or falls upon the proposition that dis-ease is caused by misaligned (out of place) vertebrae (small bones of the spine) impinging (pinching) the nerves and stopping the flow of nerve force to a part of the body.

FOSTER'S WEATHER BULLETIN.

(Copyrighted by W. T. Foster)

Washington, June 6.—About June 10 one of the two most severe storms of June will be in operation near meridian 90 with high temperatures on Pacific slope and in southwest, including New Orleans; low temperatures northern sections east of Rockies. During the five days centering on June 10 frosts and a few hail storms have been expected east of Rockies' crests and north of latitude 40. From June 10 to 17 storms and rains will decrease, good cropweather will prevail with only a few exceptions. That week is expected to bring best cropweather of the month, particularly where the harvests are in progress.

A very important severe storm period will prevail during the week centering on June 24 and I advise to put all harvest work and the other outdoor affairs in condition for that bad weather. It will be good cropweather except a few small hail storms, some injury to cotton and where grain harvests are in progress. From June 12 to 20, not much rain on the continent, temperatures will average lower than usual for all north of latitude 37 and that line. Cotton cropweather will improve and grain cropweather will continue good.

The great European drouth of 1922 is beginning to have effects; intense heat has been general in that country. European people do not realize that it is the beginning of their destruction unless they help each other instead of trying to destroy. It will require all the surplus crops of America to save southern Europe from a famine equal to that of Russia. Don't forget that I gave a long advance warning of the Russian drouth of 1921.

Now I will give a warning to North America. One-half of it will make a total failure in the Winter grain harvests of 1924. I have already told you that Australia, the East Indies, Oceania west of meridian 180, will fail in the crops to be harvested in January, February, March, 1923. Those countries make their crops during our Winter. These coming events are almost as sure as the sunrise. There is no possibility of mistake. I am permanently located at Washington and always ready to defend these drouth forecasts. In a general way they are perfect and are the only weather forecasts that will ever be perfect. South American Winter grain has just been sown. It will fail in the harvests of January to March 1923.

These are exceedingly important warnings, given for the benefit of North American peoples. The real friends of my work will benefit by the warning. They will follow the advice because they know that it will be better than mere guessing. With me the people of this continent come first but I really hope that Europeans may be benefited.

The American friends of Europeans and Australians should call the latter's attention to these expected events; it would save at least a few from disasters.

The hurricane season is coming. A tropical storm is expected last days of June. It may interest Hawaii, possibly the Philippines. Not a hurricane but a tropical storm is expected in West Indies last days of July; also last days of August. About November 25 another West India storm. Hurricanes do not seriously threaten for coming season.

She Compromised in a Pinch.

"The man who wins my regard," she said as she reached for another olive, "must be tall and dark, with raven hair tossed back from an alabaster brow. He must be brave, yet gentle. I would have him a Chesterfield as to manners. He must be strong and manly. He must be a chivalrous gentleman, and don't you forget it!"

That evening a red-headed boy wearing striped flannels and smoking a bulldog pipe stopped at the front gate and whistled. She upset the four flower pots running to meet him.

Are you keeping up with the Wilselma Theatre program each week in the Slatonite. If not, you are missing something. Read it.

LUBBOCK, TEXAS UPSTAIRS RUSSELL BLD'G

Sodeberg-Loyd.
John Sodeberg and Mrs. Mamie E. Loyd surprised their many friends in Slaton Sunday when they motored to Lubbock and were quietly married, Rev. J. T. Griswold, pastor of the Methodist church there officiating. Their only attendant was Mrs. Berta Brook, a friend of Mrs. Loyd, of Duncan, Oklahoma, who arrived here Saturday to be present at the marriage. Mrs. Sodeberg before her marriage was engaged in the millinery business, connected with the Gates Dry Goods Co. Inc., coming here about four months ago from Duncan, Okla. She is also an accomplished musician. The groom was a dispatcher for the Santa Fe Railway Co. They have gone to Ralls where they will make their future home.

League benediction.
We give all a cordial invitation to come and visit us and join our League. We also wish each one on the program to report.

Richards-Johnson.
Erwin S. Richards of Lubbock and Miss Roberta Dell Johnson of the Union community, were united in marriage at the home of the bride's father, F. P. Johnson, at 5 o'clock Wednesday afternoon. Rev. Jno. P. Hardesty, pastor of the First Baptist church of Slaton, officiated in a very impressive manner. The wedding was unusual, in that the groom was convalescing after an attack of illness at the home of Mr. Johnson, where he had gone a few days before to claim his bride, and he was still confined to his bed when the ceremony was performed. The bride is a charming young wo-

man and has many friends in Slaton, she having attended school here the past year. The groom is employed as bookkeeper for the West Texas Gin Co. at Lubbock, coming there from Waco. The newly-weds expect to leave soon for Waco on a visit to relatives of the groom, after which they will return to Lubbock to make their future home.

Conner-Reed.
H. H. (Aught) Conner and Miss Edith Reed were united in marriage on last Sunday morning at 8:30, at the home of Rev. Phillips of near Union, who officiated at the wedding. The bride and groom were attended by Guy Reed, brother of the bride, and Mr. and Mrs. Otho Owens, the latter named being a sister of the groom. The bride is a daughter of Mr. and Mrs. W. H. Reed, residing one and a half miles west of town, and was a 1922 graduate of Slaton high school. The groom is a son of Mr. and Mrs. J. F. Conner, living in this city. The couple made a brief honeymoon trip to Lamesa, after which they returned to Slaton and are now at home to their friends.

Senior B. Y. P. U.
The Senior B. Y. P. U. met in large attendance Sunday and had an interesting meeting. Mrs. Hardesty, quiz leader, gave an interesting talk on the daily Bible readings for last week. She particularly urges that more of the members prepare their daily Bible readings. They are very interesting and helpful. The lesson subject, "Others," was very ably and interestingly discussed by J. W. Hood, who gave personal examples, thus adding even more enthusiasm to all members of the meeting. After the program was completed, the organization went into a business session, during which time election of new officers was taken up, this being the regular semi-annual election day.

"Orange Blossoms"
(Inadvertently delayed from last week.)
A wedding of more than usual interest occurred Saturday evening of the 27 ult. at the beautiful country home of the bride's parents, Mr. and Mrs. W. H. May, near Wilson, when their beautiful and charming daughter, Celia, was united in holy wedlock to Mr. B. W. Baker of Lorenzo. The bridal room was beautifully and tastefully decorated with delicate hangings of tapestry and fragrant flowers, in keeping with the properties of the occasion. The guests included only a few of the relatives and intimate friends of

the contracting parties. The ring ceremony was used, being performed by Rev. Jno. P. Hardesty, pastor of the First Baptist church of Slaton. Mr. Baker is in the employ of the Santa Fe at Lorenzo, and is a splendid Christian gentleman with high ideals of life. The bride is a full graduate of Simmons College, a modest, Christian, and has all the graces of womanhood which fit her for the highest service in life. A host of friends bid this splendid young couple bon voyage over the uncertain sea of life. The happy pair will make their home at Lorenzo.

Entertained Camp Fire Girls.
Miss Iris Donald was hostess to the Bon Songee Camp Fire Girls Thursday afternoon at the home of her parents, Mr. and Mrs. W. Donald, from 4 to 5 o'clock. The house was tastefully decorated, appropriate to the occasion. After the business session the girls enjoyed a delightful hour at "42," and before their departure were served refreshments of ice cream and cake. The occasion was an enjoyable one for the girls and their guardian, Mrs. C. F. Anderson.

Junior B. Y. P. U. Program

Sword drill.
Closing prayer.
All Juniors bring your Bibles.

Edwards-Rhodes.
A. B. Edwards and Miss Clara Rhodes, both of this city, went to Lubbock Thursday of last week and were married, Rev. Junior performing the ceremony. The bride in this happy event is a daughter of Mr. and Mrs. A. J. Rhodes, and until her marriage was an employe of the Santa Fe offices. The groom, who is a son of Mr. and Mrs. J. E. Edwards of Munday, Texas, is a carpenter and followed his trade in Slaton during his residence here. The newly-weds will leave soon for California to make their home.

Junior Camp Fire Girls
The Camp Fire girls met June first,

at the home of Frances Adams for their regular business meeting. Only nine members were present. A delicious course of refreshments were served consisting of salad, sandwiches and ice tea. The next meeting will be held at the home of Pauline Shelby, June 16. Every member is requested to be present. REPORTER.

H. D. TALLEY, Slaton.
Public Weigher, Justice Pre. 2:
T. W. COVINGTON, Slaton.
SAM SELMON.

SLATON'S COMPRESS PLANT IS MAKING GOOD PROGRESS
The plant of the West Texas Compress and Storage Company is progressing at a satisfactory rate, according to R. H. McCurdy, superintendent of the construction and who will have charge of the plant after it is completed. This is a Class B compress, and the largest in West Texas west of Abilene. It required seven railroad cars

to move the machinery, 15 cars of lumber, 2 cars corrugated iron, 3 cars common brick, 1 car cement, and when finished the platform willshar when finished will have a shed 200 by 240 ft. with a large platform outside, trackage capacity of ten cars, 70,000 gallon water tank on a tower 105 feet high, with nine standard fire hydrants. This plant will employ about fifty men when put in operation, and it will be running by next cotton season.

The Slatonite and Progressive Farmer, one year each, only \$2.00.

Planters and Merchants Mills

Brady Building San Antonio, Texas

INVESTMENT POSSIBILITIES

From statements of existing Texas mills and available information from Eastern mills it is fair to assume that the earnings of our mills should be as large or larger than most of these mills for the following reasons:

1. Our mill will be up-to-date in every particular, cost of manufacture being reduced to the minimum.
2. We have an advantage of about 30 per cent lower cost on labor than Northern and Eastern mills.
3. Textile experts estimate that Texas mills, due to the elimination of brokerage charges, handling, shrinking, and warehouse cost, save approximately 15 per cent.
4. The saving due to water power is estimated by engineers at about \$24,000.00 every year for our New Braunfels mill.
5. Freight charges alone give a great advantage to Texas mills. To ship cotton from San Antonio or Austin to Boston or common New England points, by water through Galveston, and to return the finished goods by the same route costs \$4.22 per hundred pounds. This is about one cent on each yard of gingham cloth. The product of our first mill is estimated when running two shifts, at 9,000,000 yards annually. Selling this product at the same price Eastern mills sell, gives us the advantage of one cent a yard, or \$90,000.00 annually.
6. The product of our first mill, gingham, offers the opportunity of a

larger margin of profits than lower grade goods, as duck, denim and canvas. Mill No. 1 at New Braunfels will be the only mill in Texas manufacturing gingham. In view of the past records of similar textile mills throughout the United States (most of them operating without the many advantages we will have), the future prospects for the industry in Texas, and the crying need of cotton goods in Europe and America, we feel certain that we are offering a most desirable investment in the capital stock of the Planters and Merchants Mills. The United States Board of Trade, in its annual report, found as a result of a close investigation that the average income of all textile mills in the United States for the year of 1920 was 124 per cent. Even a cursory review of the present economic and industrial conditions will convince you of the tremendous possibilities of the enterprise. You cannot afford to permit such an opportunity to pass unheeded. It is poor economy which does not plan for the future. Lay your plans well by investing in a safe and sound business enterprise as we offer, and an abundant return on your investment is practically assured.

81c A POUND FOR COTTON

DO YOU KNOW—

- That the PLANTERS AND MERCHANTS MILLS are building the first cotton mill in Texas to make Gingham, at NEW BRAUNFELS, TEXAS?
- That with cotton mills paying 20 cents a pound for cotton, gingham cloth sells for at least 12½ cents a yard at the mill?
- That one pound of cotton makes 6½ yards of gingham cloth?
- That cotton when made into gingham sells at the mill for over 81 cents per pound?
- That cotton manufacturers have made greater profits than the planters?
- WHY NOT SHARE IN THESE PROFITS?
- That many cotton mills have paid for themselves the first few years of operation?
- That only 1 per cent of the cotton grown in Texas is manufactured here?
- That more cotton mills in Texas means better prices for cotton?
- That the Textile industry is one of the oldest and most reliable industries paying regular dividends?
- That there are Texas cotton mills earning today as much or more than in 1920?
- That there are single mills in the North as large as all the mills in Texas combined?

YOU KNOW—

- You don't send your cotton North to have it ginned, then why send it North to be made into cloth?
- That it is costly to ship your cotton North and to foreign countries to have it manufactured into cloth and then buy it back in the "SOUTH" by the yard?
- You are well pleased if your farm or business pays you from 10 to 15 percent each year. Many cotton mills pay larger returns.
- WE ARE OFFERING YOU THE FIRST OPPORTUNITY TO INVEST IN A COTTON MILL.
- IF INTERESTED IN MAKING A SAFE AND SOUND INVESTMENT IN A MANUFACTURING INDUSTRY WHICH USES TEXAS COTTON AND TEXAS LABOR AND MAKES A PRODUCT USED IN EVERY TEXAS HOME, MAIL ATTACHED COUPON TODAY.

I am interested in the Cotton-mill now being erected at New Braunfels, Texas. Please send me full details.

Name.....

Postoffice..... State.....

TEXAS SHOULD BE A GREAT MANUFACTURING STATE—Should have 500 cotton mills—let's all help. Many cotton mills without the advantages of our mill No. 1 at New Braunfels, Texas, have paid for themselves the first few years operation.

**FELIX HOOD CALLED TO HIS
REWARD YESTERDAY P. M.**

Yesterday afternoon the news quickly spread over the city that Felix, 10-year-old son of Mr. and Mrs. J. W. Hood, had died at 3:55 o'clock, and caused sadness to many hearts.
Felix had been sick for about six weeks, suffering from Diabetes, but his condition did not become serious until last Sunday. Felix was in the high fifth grade in school, and was a studious, manly little fellow. He is survived by his parents and two smaller brothers.
Mrs. J. W. Mathis of Lockney, mother of Mrs. Hood, was present at the little fellow's bedside when the end came. Other relatives from a distance are en route and expect to arrive here in time for the funeral, which will be held from the Methodist church at 2 o'clock Friday afternoon, conducted by Rev. Jno. P. Hardesty, pastor of the Baptist church. Burial will follow in Englewood cemetery. Funeral arrangements are under the direction of the undertaking department of Slaton Furniture Co.
The Slatonite joins a host of friends in extending sincere sympathy to the grief-stricken parents and other relatives in their sad bereavement.

**MR. AND MRS. A. M. WATSON
CELEBRATED SILVER WED-
DING ANNIVERSARY**

Mr. and Mrs. A. M. Watson received a surprise last Tuesday evening that surpassed any since the time that Mr. Watson "popped the question" to Miss Navarro Uvalde Dyer at Lipan, Hood county, twenty-five years ago.

Their daughter, Miss Cleffie Watson, assisted by her aunt, Mrs. Robert Dyer, planned a surprise for them on their silver wedding anniversary, from 7 to 8 o'clock. Rev. Jno. P. Hardesty, Baptist minister, was let into the secret, and he decoyed Mr. and Mrs. Watson away from home about 6 o'clock, telling them that he had a matter of vital importance to discuss with them. They went for a drive and the most important things discussed were the weather and Slaton's smooth streets. With perfect confidence in their pastor's truthfulness and honesty, they drove about the city until 7 o'clock, returning home. Entering they were surprised to find a large crowd assembled, all togged out in their Sunday clothes. Mr. Watson said "what's all this about?" Some one replied, "we are going to have a wedding." Mr. Watson turned red in the face, looked at his daughter and said, "well, she hasn't told me anything about it."

Some one then suggested that Mr. Watson tell what he was doing twenty-five years ago, but he couldn't remember much about it until Mrs. Watson prompted him. Others were also asked to tell experiences of their courtship and wedding, and in nearly every instance the good wives had to furnish the dates and other information.

Pretty soon a mock wedding was announced. Each person was requested to pull a string hanging on the piano. Attached to the cords were handpainted silver bells bearing inscriptions such as "groom, bride, best man, maid of honor, ring bearer, guest," etc. Rev. Jno. P. Hardesty was the groom, Mrs. E. M. Lott the bride, Mrs. J. W. Short ring bearer, and W. P. Florence the marrying parson. He did a good job, too.

Then the wedding cake was presented to Mrs. Watson to cut, after which it, with fruit cake and ice cream were served.

The house was decorated with hand painted wedding bells and flowers. On the library table was an enlarged picture of Mr. and Mrs. Watson, taken on their wedding day. Beside it were two dolls dressed as a bride and groom.

The honorees were the recipients of many useful and pretty gifts in silver. The guest list was composed as follows: Rev. and Mrs. Jno. P. Hardesty, Mr. and Mrs. W. P. Florence, Mr. and Mrs. J. W. Short, Mr. and Mrs. C. A. Smith, Mr. and Mrs. Paul Owens, Mr. and Mrs. E. M. Lott, Mr. and Mrs. Robert Dyer, Mr. and Mrs. W. Donald, Mrs. M. A. Evans, Mrs. L. F. Craft, and Miss Erma Mae Hardesty.

**FIRST STATE BANK
BRIGHTENING INTERIOR**

The interior of the First State Bank building has been thoroughly refinished, as have also the fixtures. This adds much to the attractiveness of the bank.

SPECIAL NOTICE.

We will keep open from 8 to 10 o'clock on Sunday mornings to accommodate those wishing to buy ice. Please observe these hours and it will be appreciated. We appreciate your business and will be on the job Sundays at the time named.

SLATON GRAIN & COAL CO.

**CO-OPERATIVE REVIVAL
CONTINUES WITH INTEREST**

The co-operative revival that has been in progress at the methodist church for almost two weeks, is growing in interest every day. Rev. Jno. P. Hardesty, pastor of the Baptist church, who is conducting the services, is delivering some strong straight-from-the-Bible sermons, and at almost every meeting there are being souls saved. The meeting so far, has been a success from every viewpoint.

On last Friday night he chose as his text, "On the Fence," while on Saturday night his subject was "Safety First."

Three services were conducted Sunday. The morning service hour was devoted to "Father's Day." At 3 in the afternoon a large crowd of people, young and old, were gathered at the church for the mass meeting of young people. Before a splendid sermon by Rev. Hardesty Messrs. E. M. Holland and J. W. Hood delivered very effective addresses on "What Christ Has Meant to My Life." Sunday night the subject was, "Is the Young Man Safe?" It was about to be a great sermon but was interfered with by the entrance of eight white robed men wearing the regalia of the Ku Klux Klan, and by threatening weather. The audience was dismissed before the sermon was finished.

Monday night the preacher's text was, "Eventually, Why Not Now?" Tuesday night it was "The Gospel Triangle." Wednesday, "The Court of the Last Resort." Thursday night, a special service for the old people. Cars were provided and every old person who wished to go was furnished a conveyance both ways.

The day services have all been full of interest, and great good is being accomplished.

**CITY WATER AND SEWER
SYSTEM IN OPERATION**

The city water and sewer system is now in operation and running good. The water rate has been set at a minimum of \$1.50 per month for 2,000 gallons, 50c for the next 1,000, 40c for the next, 30c for the next, and 25c per thousand gallons for all over five thousand. The city will sell meters to the customers direct, or rent them at 25c per month. A service deposit of \$10.00 will be required from all water consumers.

The sewer rate was fixed by an ordinance published some time ago. It is \$1.00 per month for everybody except hotels, boarding houses and other large users, which rate will be \$2.50 per month.

If you want water and sewerage see W. E. Olive, City Secretary, and get permits for connections.

PERSONAL MENTION.

Rev. and Mrs. L. W. Williamson of Plainview were visiting friends here Thursday.

Bring us your cream. We pay the highest market price. BLUE FRONT GROCERY.

Mrs. W. A. Tucker has returned home from a visit to relatives at Sulphur Springs.

Judge P. F. Brown of Lubbock was mingling among the voters here last Saturday.

Hon. R. A. Baldwin was in Post City Monday attending to legal business before the Garza county courts.

TEAGUE'S Confectionery is the place to get your drugs, drug sundries cold drinks and confections.

W. R. Wilson left Saturday night for a business trip to Dallas and Longview.

Mr. and Mrs. R. G. Shankle are on an extended visit to relatives in Oklahoma.

Mrs. Ben L. White returned this week from Cooper, where she spent several weeks with relatives.

TEAGUE'S is the place to get your drug sundries, toilet articles, drinks, cigars and tobaccos. North side Sq.

Ruth Whittaker of Post, is here for an extended visit with her grandparents, Mr. and Mrs. G. H. Whittaker.

Willie Maud Sanford and uncle, Tom Sanford, of Garnado, Texas, are here on an extended visit at the H. G. Whittaker farm home.

Wanted: Frying chickens. We can use all the fryers you will bring us, at a good price. BLUE FRONT GROCERY.

Miss Louise Whittaker of Houston, has arrived here to spend the summer with her grandparents, Mr. and Mrs. G. H. Whittaker.

Buy a can of Gold Plume Coffee. The flavor is different. Guaranteed to please. Get it at the BLUE FRONT GROCERY.

Mr. and Mrs. N. J. Whipple have returned from an extended visit to Canada and various points of interest in the United States.

If you buy your laundry soap here we will sell you 40 bars Star Soap for \$1.00 while it lasts. THE BLUE FRONT GROCERY.

Mills H. Foreman of Clemmens, Texas, left for home Monday, after a visit here with his mother, Mrs. M. A. Foreman.

J. L. Thorp of Hockley county was here this week visiting R. L. Harkle-road and family, and reports crop conditions good in his section.

Miss Pauline Lokey arrived home Sunday from Denton where she has been attending the College of Industrial Arts during the past term.

T. J. Head, one of the most substantial farmers living between Southland and Post City, was among the visitors in Slaton yesterday.

Mr. and Mrs. S. G. Wilson and little daughter Janette, have returned to their home in Sherman after a visit to the former's parents, Mr. and Mrs. W. R. Wilson.

Don't forget when you need flour we handle that good old American Beauty for biscuits. "Forget Me Not" for light bread. BLUE FRONT GROCERY.

Mr. and Mrs. Leo Hubbard, little son, and Mrs. H. D. Talley and son Gidney, have returned from a month's auto trip to various points in South Texas and the Gulf coast country.

Prof. and Mrs. C. L. Sone and daughter, Miss Ollie, of Canyon, arrived here Friday to make their future home. Mr. Sone has bought the residence of S. S. Forrest.

Miss Zelma Livingston of Talpa, Texas, visited Misses Irene and Dorothy Levey last week. She was en route to Canyon to attend summer school.

Mr. and Mrs. S. E. Staggs have returned from a several weeks' visit to relatives at Logansport, Ind. and other sections of the North. They report a very enjoyable visit.

Jno. Adams and family of Rogers, N. M., are here visiting R. L. Harkle-road and family and looking for a location. Mr. Adams has recently sold his ranch in New Mexico.

Burns and Jim Bob McAtee, who have been attending St. Edwards College at Austin, have arrived home to spend the summer vacation with their parents, Mrs. and Mrs. J. R. McAtee.

James Morgan of Big Spring is here for a brief visit to his father, J. M. Morgan, who has charge of the construction work on the Slaton State Bank building.

Mrs. C. E. Anderson, son Rowland, and daughter Claudia, have returned from Denton where they spent several days visiting Mrs. Anderson's parents, Mr. and Mrs. R. L. Rowland.

J. G. Hampton returned to his home at Goree, Knox county, last Saturday after a visit to his sons J. S. and Sam Hampton here.

Oscar Branch of Lubbock was a business visitor in Slaton Wednesday.

POINTED PARAGRAPHS.

Some of the hen eggs this Spring are nearly as large as the hail stones of Lynn county.

Misery never did love company when it's company that makes the misery.

The union growers of Texas have organized. In union there is strength.

About the only way a fellow can tell what the weather is going to be on the South Plains is to subscribe for the Slatonite and then wait and see.

Girls in Faro, N. D. have been instructed by school authorities to wear dresses to their shoe tops. Nobody has noticed any excursions to Faro.

If a law and order league is a good know it is—how about a small sized law and order league in the home.

W. T. FOSTER DISCUSSES THE GREAT EUROPEAN DROUTH

A more destructive drouth in Europe than has occurred in 100 years is now on, and will reach its greatest in June, July and August, and will be so destructive that not more than one-third of the usual average crops will survive in that vast country covering all Europe from Portugal to Constantinople and all south of the British Channel and the Baltic Sea.

Six months ago I sent the above forecasts of the great coming catastrophe to 100 prominent citizens of America and Canada, charging them to tell no one. My purpose was that they might be witnesses to the forecasts. I now release them from privacy and ask them to inform all their neighbors, friends and the newspapers about the facts of that forecast. That drouth will end during the fifteen days centering on October 8, 1922.

Another most disastrous drouth will begin in all of Australia during the fifteen days centering on Oct. 30, 1922 and at least two-thirds of the crops of Australia will be destroyed during December, January and February, 1922-23. Their cropseason is during our winter. From one-third to one-half of the crops in all the East Indies and all of Oceania west of meridian 180 will be destroyed by this great drouth.

My purpose in all this is to give the friends of my work an opportunity. I advise that wheat will go above \$2 a bushel and other grain in proportion, by end of September; that North America must feed Europe. That country, including southern Russia, will need double the amount of help that Russia has needed on account of its recent drouth.

Now let the critics howl. They can find me in Washington at any time, ready to defend my weather forecasts before the public and this is the time for them to put me out of business. Many years ago they were loud in their denunciations, but of recent years I have only heard an occasional mouse squeal from them.

I correctly predicted every drouth that has occurred in any part of the world during the past five years, long in advance. The recent disastrous Russian drouth forecast was published six months in advance. America will come next. A succession of continental drouths lies before us and there is no reason why the people should not be better informed than ever before on this subject.

W. T. FOSTER.

WORLD'S CHAMPION TYPIST VISITED TYLER COMMERCIAL COLLEGE, TYLER, TEXAS

Mr. Geo. L. Hossfeld of New York City, the world's champion typist visited Tyler Commercial College, Tyler, Texas, April 18, 1922, and demonstrated to the student body his ability and accuracy as a typist. Mr. Hossfeld has a record of one hundred and thirty-six words per minute net for one hour.

After the demonstration, Mr. Hossfeld spent the entire day in conversation with the faculty and students of Tyler Commercial College, giving them special instructions as to how to develop speed and accuracy on the typewriter as well as other information that will make the student a more efficient office assistant. The Tyler Commercial College never loses an opportunity of having men of Mr. Hossfeld's type and other successful men visit the school often, thereby giving the students and faculty inspiration and modern business ideas. Among these visitors are many ex-students of the school.

Mr. Hossfeld says in a letter to the College:

New York, N. Y., April 18, 1922.
Tyler Commercial College,
Tyler, Texas.
Gentlemen:—

In reference to the demonstration given at the Tyler Commercial College, I would say that it was a source of great pleasure to talk to the student body. The demonstration itself was one that I really enjoy giving, and as I noticed, received great attention. This makes a demonstration.

After the demonstration, in walking through the College, I received many pleasant surprises. I could never perceive of such an institute and the wonderful systems as portrayed in this college. Its equipment as I noticed, is second to none, and the attention given in the class rooms certainly did impress me. To my mind, a person who contemplates getting a complete business education, could never select a better school.

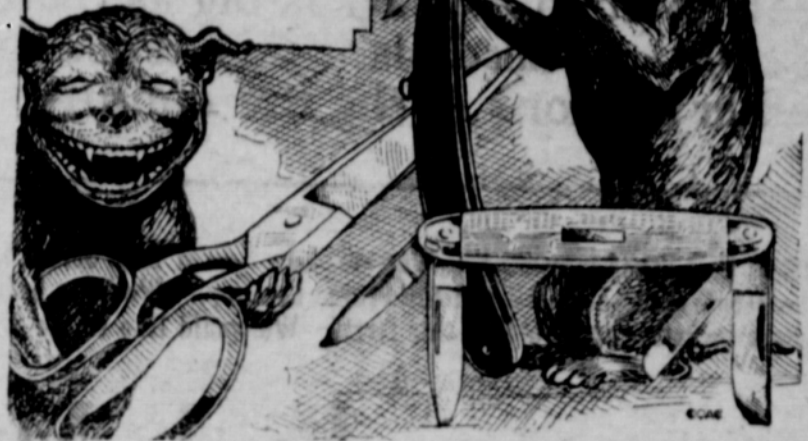

I shall always remember the courteous treatment accorded me and should the occasion arise, will certainly be pleased to again visit the College.
Yours respectfully,
Geo. L. Hossfeld.

Young people who wish to secure the very best training possible where they will receive more for their money should write Tyler Commercial College at once for full information concerning their courses of general business, general railroad, general banking, bookkeeping, shorthand, business administration and finance, cotton classing, telegraphy penmanship wireless telegraphy and telephony. These courses may be had in one-third less time than at any other school. Tyler being located in the fruit and truck growing sections of the State, enables young people to secure board at less cost than other cities. You should enter now. Fill in and mail for large free catalogue.

RADIO

THINGS BEGINNERS MUST LEARN FIRST

Explanation of Terms Used in Radio and of Its Basic Principles.

Due to the great interest taken in radio since broadcasting stations have been started, many radio terms are seen and heard that may be unfamiliar to the novice. Some of the most commonly used terms are explained and defined below.

Like light, heat and sound, radio energy is propagated in the form of a wave motion. Every one is familiar with the wave motion set up on the surface of a still body of water by the dropping of a stone into it.

Every time a point on the surface of the waves goes through a complete set of motions and starts to repeat those motions the wave is said to have gone through a cycle.

The number of complete cycles gone through per second is the frequency.

The human ear is responsive to sound frequencies up to a few thousand cycles per second but is not capable of responding to the higher frequencies encountered in radio. Arbitrarily a frequency of less than 10,000 cycles has been called an audible frequency—one which can be heard—and frequencies above 10,000 cycles, radio or inaudible frequencies—because they cannot be heard by the human ear.

The particular type of wave which propagates radio energy is an electromagnetic wave. All of us have seen bits of iron and steel attracted by the little toy magnets made up in the form of horseshoes. This attraction of the magnet for the bits of iron and steel showed the existence of a magnetic

of 835,000 cycles.

FUNDAMENTAL PRINCIPLES

In a radiophone transmitter there are two requirements that must be fulfilled. First, there must be a source of high-frequency current, say, between 15,000 and 1,500,000 cycles so connected to an antenna and ground system that energy in the form of electromagnetic waves will be radiated. Second, there must be some method of controlling this high frequency current by modulating it so that the variations in amplitude of the high-frequency current be directly proportional to the music to be transmitted.

The high-frequency current is known as the carrier-wave and its function is to radiate into space in the form of electromagnetic waves and by its variation in amplitude carry with it the variation in the tone at the transmitting station.

It is the frequency of the carrier-wave that determines the wave-length on which a radiophone station is transmitted. By experiment it has been found that electro-magnetic waves travel at the same velocity that light waves travel, that is, 186,000 miles per second. Wave-length is the distance between any two similar points on two successive waves; for example, the distance from crest to crest of any two successive waves in the same direction, measured in meters, a unit of length equal approximately to one and one-tenth yards. Converting 186,000 miles to meters, the equivalent is 300,000,000 meters. The length of an electro-magnetic wave is equal then to 300,000,000 divided by the frequency. Suppose a station was transmitting on a wave-length of 360 meters. The frequency of the carrier-wave would be approximately 835,000 cycles.

Just as a violinist tunes his instrument, that is, makes a certain string emit a note of higher or lower pitch, or, technically speaking, a sound wave of higher or lower frequency, by adjusting the tension on the string, so may the electrical constants of the antenna circuit of a radiophone transmitter be changed in order to have the station emit a carrier-wave of a different frequency.

If a tuning fork having a natural

the telephone receiver were connected directly to the tuner the high-frequency current would not operate the diaphragm of the receiver and even if the diaphragm were set in motion it would be too fast a motion to be picked up by the human ear.

In a simple receiver the detector, usually consists of two pieces of mineral in contact or a piece of mineral in contact with a metallic spring. Either combination is known as a crystal detector. A detector of this type is nothing more than a rectifier; that is, when an alternating current is applied at the terminals the current is allowed to flow only in one direction.

How One Editor Uses Radio.

The editor of a paper in an isolated town in the northwest is using the radio in a most ingenious and effective way. An amateur radio friend in a big city 50 miles away, buys the latest editions of the city papers as soon as they are off the press, reads the best news into his transmitter, and a typist in the country office copies the news as it comes in over the office receiver. The editor, through this ingenious plan, is always "First With the Latest" in his home town.

Notice of Intention to Incorporate a Partnership.

To Whom it May Concern:

Notice is hereby given that R. H. Tudor and F. B. Tudor, composing the partnership of "Slaton Grain & Coal Company," of Slaton, in the County of Lubbock, State of Texas, intend to incorporate without change of the firm name, after publication of this notice of such intention for the period of time provided by law.

R. H. TUDOR.

Amateur Radio Operators Erecting Aerial on the Roof.

field about the tips of the magnet and this is the kind of a field propagates electromagnetic force, except that with the toy magnet, its power comes off in the form of wavy motions. This electro-magnetic force propagates radio energy in all directions.

The medium that transmits the electro-magnetic waves is the same medium that transmits light—the ether. This medium is supposed to fill all space, even that occupied by fluids and solids. Little is known about its properties.

In radio it is more common to speak of wave length than frequency. The wave length of any wave motion is the distance between any two successive crests in the same direction. The wave length depends upon the frequency. If the frequency is high the wave length is short. On the other hand if the frequency is low the wave length is long. Numerically the wave length is equal to the distance traveled by the wave in one second divided by the frequency. Suppose, for example, that it were desired to know the wave length of an electro-magnetic wave having a frequency of 835,000 cycles. Electro-magnetic waves travel at the same speed as do light waves, that is, 186,000 miles per second. Dividing the 186,000 by 835,000 the wave length would be .223 miles or 396 yards. In radio work it is measured in meters. A meter is equal to approximately 1.1 yards. Converting 396 yards into meters the wave length would be 360 divided by 1.1 or 360 meters. This is the wave length on which KDKA operates. It also means that the electro-magnetic waves sent out from this station have a frequency

period corresponding to middle C be placed near a violinist who is playing, the fork will vibrate when the musician plays middle C, but all other times it will remain quiescent. This phenomenon of the tuning fork vibrating whenever the musician plays the corresponding note on the violin is known as mechanical resonance. If a radio receiver be adjusted so that electrically its natural period of vibration will be 835,000 cycles (360 meters wave-length) every time a station transmits on a wave-length of 360 meters, current will be set up in the receiver by electrical resonance. Stations transmitting on any wave-length other than 360 meters will not cause a current to be set up in the receiver.

The portion of a radio receiver that changes the wave-length at which it is electrically resonant is called a tuner. Suppose that "A" station transmits on a wave-length of 200 meters and "B" on a wave-length of 360 meters. By adjusting the tuner until the constants of the receiver make it electrically resonant to a 200-meter wave or a 360-meter wave, either of the two stations can be picked up, but both stations cannot be picked up simultaneously. This is the reason that more than one transmitter can be operating at one time and yet only one can be heard on a receiver without interference from the others.

The other necessary part of a radio receiver is the detector. The function of this portion of the receiver is to utilize the small currents in the tuner that are set up by a transmitting station and make them audible through the medium of a telephone receiver. If

When the Verdict is, "Dead Plates"

The Car Owner knows that it means a New Battery

To get the best battery, it is first necessary to choose the best plates—the longest lived plates.

What the thoroughbred is to commonbred, Prest-O-Plates are to ordinary plates. They reveal their two-fold value in heat-resisting, non-buckling strength in hottest summer, and a ready reserve power in coldest winter.

Car owners may well select Prest-O-Lite Batteries on account of Prest-O-Plates

alone. But they may choose them, confident that every other part of the battery is par with Prest-O-Plates.

Secure in the certainty of quality and uniform product, Prest-O-Lite underwrites every Prest-O-Lite Battery with a liberal guaranty. This is a specifically stated obligation, plus a policy that says the car owner must be pleased.

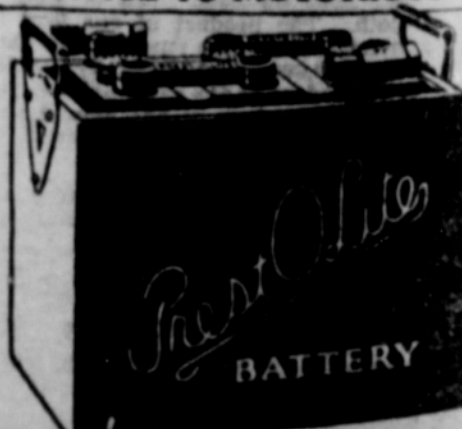

Drive around and let us inspect the health of your battery.

GREEN'S GARAGE

THE OLDEST SERVICE TO MOTORISTS

Prest-O-Lite Factory Control Guarantees Quality.

IF YOU HAVE SOMETHING YOU WANT TO SELL ADVERTISE IT
