Number 8

GRAIN PLANT IS STARTED HERE TUESDAY

A grain elevator and a plant for handling and threshing grain sorghum heads will be added to Slaton's list of important industries within a few weeks. This became an assured fact when construction began Tuesday morning on the foundations for the buildings that will accommodate the plant. The work will probably be finished by Nov. 1, it is expected, and the elevator and the heads plant will begin operating immediately upon completion.

Organization of the Terminal Grain and Heads Handling Company, composed of several local men, was completed several days ago, the new company being capitalized at \$20,000. R. C. Ayers, of Lockney, is also to be associated with the institution, and will soon move here to become the plant's manager, it is announced. Mr. Ayers is a grain man of long experience, having been engaged in the business for a number of years at Lockney, Plainview and other places.

The new elevator and grain heads plant is being erected just west of the Slaton Grain and Coal Company's warehouses, on the site where Slaton's first cotton oil mill was located several years ago. The lot space is 100 by 250 feet, and the location affords ideal railroad trackage accommodations.

The threshing rooms and storage space for the grain sorghum heads plant will be 24 by 96 feet, and the grain elevator will have a storage capacity of 10,000 bushels. It will be situated just east of the heads plant. Capacity for handling 350 tons of grain heads daily, on an average, will be the size of the heads plant. The output will be threshed grain, together with pummies from the milo maize and other grains that will be threshed.

Grain sorghum heads, such as maize, kaffir corn, feterita, and hegers, will be bought locally and in carload lots from other points over the South Plains. Grain thus purchased will be threshed in transit. It is planned to make Slaton the centralization point for a large part of the grain crop for threshing here, besides handling the crop grown in the immediate local territory.

Machinery that has been specially designed for handling and threshing grain sorghum heads will be installed in the local plant. This machinery was designed and perfected by Mr. Ayers, who is to become the plant's manager. Only one other plant is now in operation. It is located at Lockney, where successful operation has been thoroughly proved, according to Mr. Ayers and others who have inspected and investigated.

The facilities of the plant here will eliminate all handling of the grain by hand from the time it is loaded on the farmer's wagon until it reaches the consumer in the form of commercial feeds. The farmer drives his wagon in with the load, dumps the grain and is gone in a very few minutes, Mr. Ayers explains. During threshing and loading on cars for shipping the grain will be moved by air blasts.

The threshing machinery will be operated by an oil-burning engine of 160 horsepower, the announcement said. At the peak of the season, several people will be employed by the plant. It is expected to operate during five or six months of the year. The elevator will provide storage space for wheat, besides accommodating other grains, and, it is believed, will tend to encourage production of more wheat in this section.

In choosing this city as a location point for the elevator and heads plant, Slaton's strategic position as a transportation center and as a point surrounded by an area which produces annually large volumes of grain sorghums were some of the things considered. Advantages to be enjoyed here in freight rates were declared attractive features of this location.

Commenting upon the building of the grain elevator and heads plant here, officials of the Slaton Chamber of Commerce expressed great satisfaction that the project is to be completed soon. For the last two years, they said, the Chamber of Commerce has been active in seeking the location of a grain elevator here, and with the addition of the grain head plant, the farmers have real

Dogs Wanted At Panhandle-S. P. Fair

LUBBOCK. — Four hundred and twenty-five dollars, in addition to a crowd of something over 100,000 have been hung up as inducements to owners of dogs, who will enter the racing dogs in the coursing events here October 1 to 6, inclusive, during the fifteenth annual Panhandle South Plains Fair.

"The big thing we want is dogs," A. B. Davis, manager of the fair, states in a letter to several hundred dog owners in Texas, Oklahoma, Kansas, and other states. "We will, if necessary to add these classes for a good event, arrange consolation races, just common rabbit dog races, and make arrangements to race all dogs."

Prizes offered in addition to the entry fees are: Registered all age, \$150 added money; registered futurity, \$125 added money; registered saplings, \$100 added money; cold bloods, \$50 added money; loving cup for cold bloods, with no entry fee.

Entry blanks have been mailed out by the fair association and the officials are anxious to have the entries in as soon as possible, however, the entries do not close until September 30.

The Panhandle South Plains Fair has been the outstanding regional fair in the Southwest for the past four years, making a profit, while other fairs all over the country have been losing money. Attendance last year ran over 100,000 and with the addition of a sixth day this year, the number to pass through the turnstiles are expected to be well over that figure. Racing is a new sport in this section and is expected to draw the biggest interest of anything at the fair.

Gene Wofford, of Lubbock, owner of several dogs, will attend the racing at Graham, Texas, September 19 and 20, where he will sign up entries.

Competent judging, slipping, good stables, and a veterinarian will be available for the success of the meet. The track is being put in excellent shape.

BUTTER FROM KEROSENE IS BABSON PROPHECY

The coal furnace and stove, 25 years from now, will be things of the past, Roger W. Babson, head of the Babson Statistical Organization, declares.

"All householders will be compelled by law to use either gas or electricity for heating, cooking, refrigeration, power and other industrial and household purposes."

"A quarter century hence," says Mr. Babson, gold will be made from lead; butter, milk and cheese from kerosene; tides will be harnessed and the heat of the sun will be utilized in industry.

"Office buildings, factories and apartment houses will be built without windows in order to obtain better ventilation," Mr. Babson declares. "Street intersections, where traffic policemen are now necessary, will have overhead bridges. All main streets will have two stories of sidewalks with special provision for the parking of cars anywhere on the payment of a fee. When the helicopter is perfected, every house will have a hangar on the roof."

MECHANICAL "SETTING HEN" DRIES SEED CORN

Brooder houses and incubators are ambitious articles of farm equipment, reports the research department of the National Association of Farm Equipment Manufacturers. Not satisfied to take Old Biddy's job away from her, these mechanical setting hens are now going after seed corn. Unlike Biddy, however, they do not eat the corn but dry it and store it for use the following spring.

Numerous instances of using sheet steel brooder houses to dry and store seed corn have been reported, according to the research department, while occasionally one hears of an incubator more practical for larger amounts of corn, as they provide a dry, rodent-proof shelter. The brooder stove can be used when the corn is first picked to dry the excess moisture from the ears.

Small bins of sheet steel are also constructed by manufacturers for the express purpose of storing seed corn. W. E. Olive, active vice-president of the Slaton State Bank, and J. T. Green, realtor, were in Lubbock Wednesday, attending the

Date Is Named For Clean-up Of Slaton Cemetery

Next Wednesday, Sept. 26, has been set by Mayor W. G. Reese as the date for a thorough working-out of Englewood Cemetery here.

The people of Slaton and community are urged to gather at the cemetery Wednesday morning to spend the day cutting and raking weeds and grass. Each person is requested to bring a rake or hoe.

It is desired to make the cemetery more attractive, and to remove the weeds and grass so that lots in the cemetery may be resurveyed, making it possible to establish correct lines for new burial plots.

Mayor Reese intends to issue for publication in next Tuesday's issue of this paper a proclamation which will officially call the people's attention to the cemetery working event. It is especially desired that the people will co-operate in making the clean-up day a successful event, the mayor said.

Dr. Cooper Named On Simmons Faculty

ABILENE. — The appointment of Dr. O. H. Cooper, pioneer prominent educator of the South, to a professorship of the History and Philosophy of Education at Texas University during a leave of absence from Simmons University, where he is teaching at present, has been announced.

Dr. Cooper's appointment is in line with a work which he will produce while in Austin which will survey the growth of Texas civilization in the last half century. The volume, which will be the greatest to ever cover this field, when finished, will be under the joint auspices of Simmons University and the University of Texas.

Dr. Cooper was formerly superintendent of public instruction in Texas, president of Baylor University, Simmons College and has for the past several years been head of the School of Education at Simmons.

SOUSA'S BAND WILL PLAY IN ABILENE OCTOBER 18

ABILENE.—Sousa's Band, making its first appearance in West Texas, will be heard here twice on October 18 at the Simmons University auditorium in concerts sponsored by the Cowboy Band of Simmons University. Sousa and his band have already started on the Golden Jubilee tour which is taking them across the continent.

An unusual feature of the engagement here is an afternoon matinee for children only. According to the plans of the local management this concert will be given at prices ranging around 50 cents for the benefit of children, and an audience of 2,000 youngsters is expected to take advantage of this unusual offer.

This is Sousa's fiftieth year as a band leader and he is celebrating it with the Golden Jubilee tour. He will make only a few stops in Texas.

INFANT DIES

A baby girl was born Wednesday night, Sept. 19, to Mr. and Mrs. Carl A. Lewis. It died at birth, and its body was buried Thursday afternoon in Englewood Cemetery. Numerous beautiful floral offerings adorned the infant's bier. Mrs. W. R. Steckman, of Lubbock, mother of Mrs. Lewis, is here with her daughter.

M. W. Uzzell was a business visitor to Lubbock Tuesday of this week.

Weeds Endanger Property and Health; Should Be Burned, Mayor Reese Says

Citizens of Slaton responded liberally and wholeheartedly to the recent request by the mayor and city commissioners for a cleaning up of premises in Slaton, Mayor W. G. Reese stated early this week. Load after load of cans and other refuse were hauled to the city dumping grounds during clean-up week, the mayor stated.

It is noticeable, however, Mayor Reese points out, that recently weeds

Wilson Farmer Meets Sudden Death Monday

While at work on the R. A. Kahlich farm, just south of Wilson, J. M. Munger, about 65 years of age, died suddenly, apparently, some time during the day last Monday.

Mr. Munger had gone to work in a maize field Monday morning, reports indicated, taking his lunch with him. When night came, and he didn't appear at his regular boarding place, a search was instigated. Tuesday morning his dinner pail was found, apparently untouched, then about noon Tuesday his body was discovered.

He had been dead several hours, apparently, when his body was found, excessive heat, accompanied probably by an attack of heart failure, causing his death.

His body was prepared for shipment by Foster Undertaking Company here, and sent Tuesday night to Bell, Texas, where interment was made Wednesday.

Immediate relatives surviving the deceased are two young children, a son and a daughter, both of Bell.

Juniors Select Hi A. K. as Name

The Juniors of Room Sixteen assembled for a class meeting last Friday. The purpose of the meeting was to decide on a class motto, colors, flower, etc. It was decided that "High Aim Klass" (abbreviated Hi A. K.) should be our name, and "Excelsior" our motto. Blue and white were the chosen colors, and white rose the flower.

It was decided that ten cents should be our class dues, and that these dues should be paid monthly. We hope to live up to our name and motto.

A very important class officer was, somehow, overlooked in our last report, in which we named the officers who had been elected. Joseph Brewer fills very efficiently the office of secretary and treasurer, and we feel that we made a good choice in our selection.—Class Reporter.

MISCELLANEOUS SHOWER FOR MRS. D. P. PARKER

Wednesday afternoon of this week, Mrs. Percy Minor was hostess to a miscellaneous shower at her home on West Garza Street for Mrs. Mildred Parker, young bride of Dawson P. Parker, of Slaton. Those present were Mesdames L. A. Wilson, L. R. Cypert, S. A. Peavy, Paul Owens, L. C. Odum, R. L. Tate, Gene Phillips, John T. Lokey, L. T. Garland, C. A. Porter, L. B. Wootton, R. M. Shepard, T. A. Kirby; Misses Lois Stallings, Tommie Kirby, Maggie George, Pauline Owens, Theresa Lokey, and the honoree, Mrs. D. P. Parker.

Mrs. Parker was carried to the Minor home by her aunt, Mrs. Paul Owens, and was greatly surprised to find a number of her friends there, waiting to receive her. She was the recipient of many beautiful and useful gifts, with the compliments of those present, and some items being sent by friends who were unable to attend the party.

After an hour or so of merriment and a musical program, refreshments were served to those present by the hostess, assisted by Mrs. L. C. Odum, and little Misses Doris Minor and Joretta Rogers.

Plans are being made in Big Spring to experiment with methods of oiling gravel road. If the method proves practicable on a short stretch its extensive use will be considered.

Scouting For The Pink Bollworm

Field scouting to determine if any new pink bollworm infestations have appeared in the 1928 cotton crop along the Rio Grande is now under way, according to George G. Becker, entomologist in charge, Pink Bollworm Field Service of the Plant Quarantine and Control Administration, United States Department of Agriculture.

R. W. White and two assistants are in charge of the scouting work, assisted by a corps of 27 trained men who are thoroughly familiar with the life history and habits of the pink bollworm. These men are now scouting in the Lower Rio Grande Valley and as the season advances will cover other sections in Texas and Arizona, where, in the opinion of the department, there is danger of infestation.

WORK BEGINS ON SLATON FIRE STATION

Work was started Wednesday morning on excavation and laying the foundation for Slaton's new fire station and municipal building. The building will cost \$15,000, bonds in that sum having been voted in May of this year to be used for that purpose.

Covering a space of fifty by fifty feet, the structure will stand two stories high and will be erected of brick and hollow tile. The exterior is to be made very attractive by using face brick of harmonizing colors.

The contract for construction of the building was awarded several days ago to J. B. Maxey of Lubbock. The work is to be completed within 90 working days, according to the contract.

City officials believe when the fire station is finished Slaton will have one of the best structures of its kind to be found in this section of the state. It will house all the city's fire-fighting equipment, and will have offices, clubrooms for firemen and living quarters for a fireman and his family.

The building should be finished about January 1, allowing full time as provided for in the contract.

SURPRISE PARTY

Last Tuesday evening, when Mr. and Mrs. Wray Kirby returned from their honeymoon trip, they were surprised to find gathered at their apartment at 255 South Fifteenth Street, a number of their friends.

With Mrs. Walter Tomlinson and Miss Joan Bullock acting as hostesses, a very enjoyable party was had, a picnic lunch featuring the occasion. A miscellaneous shower was given the newly married couple.

Mr. and Mrs. Kirby spent their honeymoon in Acapulco, and were met on their return at Lubbock by Harvey Austin and Miss Bullock, who escorted them to the "welslowing party."

Lubbock Caravan Of Fair Boosters Will Visit Here

Boosting the Panhandle - South Plains Fair, which will be held at Lubbock Oct. 1 to 6, inclusive, a caravan of automobiles loaded with Lubbock people will visit Slaton next Thursday morning, Sept. 27, at 7:45 o'clock. From here the group will proceed to Post, Snyder, Gail, Lamesa, and back through Tahoka and Wilson, it is announced.

Special features of the stop which the trippers will make here will include band music, a male quartet and several talks, it is stated. Everyone is invited to be out to greet the visitors, including all school children, according to word received by the Chamber of Commerce here.

TRUE CONSERVATION OF NATURAL GAS DEFINED

True conservation of natural gas is not hoarding, but the wise use of natural resources, the American Gas Association declares.

"The heart of the natural gas conservation problem is the conflict between the present and the future," the Association says. "The average land owner is interested primarily in immediate present personal returns. The public — at least the 3,500,000 natural gas consumers and the 17,500,000 people dependent on natural gas for their cooking, heating, and lighting purposes—are interested in conserving the supply and bringing about a slow, wise, and economical exhaustion, so as to insure continuing service for the future."

"Conservation, therefore, does not mean intensive rather than extensive use, but means the greatest number of uses, and means the greatest number of years."

Work is progressing on the First National Bank Building on the corner of Main and Concho Streets in San Angelo. The contract for the building was awarded to the

City Line Club will meet at the club house, Slaton, Wednesday, Sept. 26, at 2:30 p. m. Each member is urged to be present, and to bring her report.

Democratic Club Meeting Featured By Baldwin's Talk

At the Democratic rally held last Saturday afternoon on the city hall lawn, under the sponsorship of the Slaton Democratic Club, Attorney R. A. Baldwin of Slaton delivered the principal address of the occasion, this being in response to a unanimous invitation extended to him by the Slaton Democratic Club at its organization meeting a week previous to address the Slaton voters on the principles of the Democratic party. W. P. Florence, chairman of the Slaton Democratic Club, presided and opened the discussion with a brief talk. He was followed by Attorney James H. Goodman of Lubbock, who talked briefly. The meeting closed with a short talk from Hon. Pink L. Parrish of Lubbock, Democratic nominee for the State Senate from this district.

A good crowd was present and manifested much interest in the discussion. Judge Baldwin spoke for more than an hour, discussing various issues of the national campaign, and the views of the respective candidates, expounded the fundamental and distinguishing principles of the Democratic party and answered the arguments advanced by the "Hoover Democrats." His address was too long to print here in full, but we reproduce part of the speech. Among other things, Judge Baldwin said:

Human beings are so constituted that it is not possible for them always to see things alike, and it is entirely natural that citizens should be oftentimes disagreed on great questions of public policy. There is, however, much benefit to be derived from open and frank public discussion of our problems, provided such discussions are free of hatred, jealousy and prejudice. The older I grow the more convinced I am that these things have no proper place in one's life; that no possible good can come from them, and I, for one, refuse to join in any campaign of hate. I assert the right to do my own thinking and to express the product of my honest thought and concede to all others the same right, free from personal feeling and with entire good will to all hard feelings toward none.

There is no person so blind as is the individual who, having two good eyes, willfully refuses to see; and no one so deaf as is he who, having good ears, deliberately closes them to reason and refuses to hear. It is a pleasure to meet one who is earnestly seeking the facts; who has no mere ambition to be right, and is open to conviction. I like to talk that sort of folks, but I have no sense nor time to spare on the individual who is consciously prejudiced, who gets a thrill out of hating his own man. Life is too short for such things.

We are here to consider important questions of national policy, and it behooves us to lay aside all animosity, personal bias and prejudice and be guided and influenced only by the great principles which time has shown us are sound and true. One should distinguish between his like or dislike for a man, his assent to or dissent from issues that are purely political, and his convictions concerning fundamental and abiding principles. One should not throw his religion or renounce his religion because he is not in all respects in accord with the views of his neighbor, nor should he abandon and renounce his political principles because they cannot in all things agree with the views of the party's standard-bearer. Men come and go; issues arise, abide for a time and disappear; but great and fundamental principles of government and of philosophy continue from generation to generation and abide from century to century. It is principle that should be true, and much allowance should be made by each of us for ignorance and inability always to see the facts and to understand them as they actually exist.

Democrats are not fighting the rights of any individual or group of individuals. We are fighting the natural rights for all; special rights for none. Ours is the cause for liberty, the glory of our country, the betterment of all mankind, and we believe to this end that the interests of the nation, the states, the counties of our people, are best served when Democratic principles are applied to the government, and that the way to do this is to place the Democratic party in power, in this Nation, in Congress, in the executive office.

The Democratic party has always been the cause of the masses, the common people, the laboring man, the farmer, the manufacturer, the merchant, the laborer, the electrician, the party of the

people, a reasoned idealism; the Republican party adheres to a rigid, cold-blooded commercialism. The Democratic party has always devoted its energies to human betterment; the Republican party delights to serve big business, to bow down to the god of wealth and to glory in material things. The Democratic party is friendly to progress and believes in advancement; the Republican party boasts its standpatism and is hide-bound in its devotion to the old. The Democratic party seeks to justify its existence and its principles by service to every class, rank, industry and legitimate enterprise; the Republican party seeks to perpetuate itself in power by service to itself and to great and powerful selfish interests.

It is also a fundamental characteristic of a human being that he cannot travel in different directions, either physically or mentally, at the same time. One cannot be a pro-something and at the same time an anti-that same thing. One cannot be a Democrat in principle and at the same time be a Republican in principle; nor can he be one in principle and the other in practice. If one is a Democrat, in principle and from conviction, he will not vote the Republican ticket, or seek to uphold and enthrone and perpetuate Republican doctrine and practice, and thereby destroy and defeat Democratic principles. It is, to me, supremely humorous to hear one of these bolters declare that he believes in Democratic principles but that to vote his convictions he must cast his ballot for the white, black and tan Republican electors. He is just kidding himself and doesn't know it. He is playing the great American game of systematically deluding himself. He is assuming that there is such a thing as a white blackbird. I condemn no man because he is a Republican or because he votes the Republican ticket, but I do emphatically deny that one can be half one and half the other, or that he can be a Democrat and fight the Democratic party and the national standard bearer of that party.

I have never heard any bolter state in public the same reason for bolting which many, but not all, of them give in private. It is stated that prohibition is the only issue. I do not think so. The majority of those I have talked with privately give as their reasons for bolting the fact that Democracy's standard bearer is a Catholic, and but for that they would vote the ticket straight. That, of course, injects into this campaign a religious issue. I think it is a false issue and refuse to be influenced by it in my loyalty to Democratic principles; but being an issue, unfortunate and regrettable as the fact is, the issue must be met. I do not question any man's sincerity when he raises that issue, and refuse to quarrel with him over it. I respectfully request him to listen to a recitation of some of the facts of history:

We have had many presidents and other high officials, not one of whom has ever been successfully accused of practicing his religion in office, or by any official act sought to advance the interests of his church. No, only have they not attempted such a thing, but in the nature of the case they could not do so if they desired. There are too many checks and balances on their powers and public sentiment in this country is too strong. No president has ever proposed to Congress the enactment of any law on the subject of religion except to guarantee to all its free exercise, and that is Democracy. Religion, like taste in dress, is a purely private matter, and cannot possibly under our system be a political issue. My private religious views are no business or concern of Alfred E. Smith, and his are no concern of mine. If our citizenship would only recognize and practice this fact it would add much to the sum total of happiness in the world and in the individual breast.

A Protestant President appointed Edward White, a Catholic, to the U. S. supreme bench, and another Protestant President made him chief justice of the greatest tribunal on earth. A Protestant President appointed Mr. Bandels, a Jew, to the supreme bench, and Woodrow Wilson made Joseph Tumulty, a Catholic, his private secretary. Alfred E. Smith, as Governor of New York, has appointed vastly more Protestants and Jews to office than he has Catholics, and not once, during his three terms as Governor, has he ever sought to practice religion in office, or to enthrone his own or any other church in power in the state. The same is true of his entire official career of many years. Chief Justice White, while on the supreme bench, wrote some great decisions on the subject of divorce. In not a line of any of those decisions did he seek to promulgate the doctrines of his church or of any church on the subject of marriage and divorce, but ably, fearlessly, and in obedience to his official oath and without bias or prejudice, upheld and expounded the laws of the land. I

say, therefore, that no man's private religious views or church affiliation can be or ought to be any issue in any political campaign; and ought not to be any reason for barring him from office, if he is otherwise qualified, in a great and free country like ours. There is nothing in our history, or in the official career of any man in this nation, to give us occasion for any particle of fear on the question of religion.

My private view is that the liquor problem belongs to the realm of science and not to religion or to politics. For years religion and politics have been trying to solve it, by various expedients, and the situation is worse than ever before in our history, and statistics demonstrate this fact. Herbert Hoover does not promise to solve the liquor problem. He admits that prohibition is only an experiment, and calls it a noble experiment, which it is. But for twelve years that experiment has been tried and it has failed, and blinding ourselves to the facts does not change them. If a farmer, new to a certain region, tried out a certain cropping method year after year and failed, would not ordinary common sense compel him to change the form of the experiment? Assuredly it would, unless he happened to be blinded by prejudice and believed that he was practicing religion or was conforming to good morals by adhering to a method which reason told him was a failure. And if ever we can get religion and politics out of the liquor question and assume toward that problem an unpassioned, common sense and scientific attitude and bring to bear on it brains instead of prejudice, the question will be solved, and it never will

be solved in any other way. History and bitter experience proves that.

No one wants the saloon back and there is not the slightest possibility of its return. But we have liquor in abundance with us. Congressional investigation has disclosed that for every year under prohibition the quantity of liquor consumed has steadily increased. It is said that nearly one-half of the homes in America are making liquor, most of it probably poisonous, and worse than that, they are giving it to children and serving it habitually at parties. Time was when only adult men drank liquor, but now our women and boys and girls in thousands of cases are drinking it. This situation has bred a contempt and disrespect for law and constituted authority; our courts are becoming hotbeds of perjury; any man can procure liquor if he is willing to pay the price and to lie and play the hypocrite, sneak out in the dark to the back alley, and aid another in the commission of a felony. We are tutoring our people in habits of fraud, deception and hypocrisy. Individual morality is breaking down, and all this is the result at the end of twelve

years of a noble and hopeless experiment. Herbert Hoover and the Republican party make no promise to remove this situation. Indeed, no one can believe that Republican victory at the polls will cure the evils now rampant. We know that social programs are inexorably logical, and that existing conditions are the logical re-

sult of forces at work in the past. So long as the same forces continue to work, just so long will similar results come. To solve the problem we must begin at the source and change the forces—change the form of the experiment. The Republicans promise

West Texas Gas Company

By Every Test— A Superior Lubricant

EVERY batch of Conoco Amalie Motor Oil is sampled and tested in the laboratory before being packed in the drums and cans from which you get it. It must meet the most exacting requirements before we allow it to reach your motor.

Conoco Amalie is 100% Pennsylvania Oil, refined from premium Crudes.

The superiority of Pennsylvania Oils is becoming generally recognized. The superiority of motor lubricants made from premium Pennsylvania Crude is undisputed.

That's why it will pay you to use Conoco Amalie regularly. You can get it at the Conoco sign.

CONTINENTAL OIL COMPANY

Producers, Refiners and Marketers of high-grade petroleum products in Arkansas, Colorado, Idaho, Kansas, Missouri, Montana, Nebraska, New Mexico, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, and Wyoming

PREPARE NOW FOR YOUR WINTER EGG SUPPLY

Several years ago a successful poultry grower gave out this secret for getting winter eggs: Get hens fat in the fall by heavy feeding of corn, maize and other fattening feeds. I have tried out this method for years and many of my hens lay an egg every day from October until spring.

I used to hear people say, "My hens are too fat to lay," but they were not too fat. Either they were not in good health or they were not fed a balanced ration or they did not have egg-producing breeding.

If there are insects on the fowls or in the houses they must be destroyed, and if they are not in good health a poultry health tonic should be given them. There are many valuable tonics and many fakes manufactured. Any kind is good except the quick egg makers. These will certainly rush the eggs for a few weeks, but just as certainly they wreck the hen and her usefulness is over before she has paid for her raising. The active principle in these quick dopes is red pepper and ginger, and hens can be stimulated with these to lay quickly, but it is a dangerous practice that will cost much more than it pays. Fowls should be brought to good health in a natural way, by cleanliness, good care and a health tonic if it is needed.

Epsom salts is good for fowls once or twice a year and it is a good plan to give one pound to 100 grown fowls or 250 young fowls in their drinking water before the health tonic is commenced. Plenty of green stuff should be furnished, as this is a good tonic itself.

After the fowls are free of insects and in good health feed liberally on corn and maize so they will be fat enough to stand the winter cold, then feed a balanced commercial egg mash during the winter. This plan is worth trying if your fowls do not lay like they should in the winter.

The next meeting of the Panhandle-North Plains District Convention of the West Texas Chamber of Commerce will be held in Shamrock. This city sent a large delegation to the meeting recently held in Pampa.

Over a Billion Deadly Germs in a Single Drop of Water

Germs are so small that there may be as many as one billion, seven hundred million of them in a drop of water. And just a few of these tiny germs, if they get into your blood through a cut in your skin, may make you so sick you will be in bed for weeks—may cause the loss of a limb through blood poisoning—may even infect you with that most dreadful and fatal of diseases, lockjaw.

Just because you can see no dirt in a cut does not mean that it is clean. You cannot see germs. The only safe and sure thing to do, is to thoroughly wash every cut, no matter how small, with **Liquid Borosone**, to kill the germs, and then dust it with **Borosone Powder**, to hasten the healing. **Liquid Borosone** costs 30 cents, 60 cents, \$1.50 and \$1.50; **Borosone Powder**, 30 cents and 60 cents, and can be had at City Drug Store.

As we have quit wholesaling gasoline we will retail five gallons or more at one cent above wholesale price.

American Gasoline, 1 gallon at 19c or 5 gallons and more at 18c per gallon.

Sinclair lube, 5 gallons for \$2.00 and up.

33% Cord Tires, \$4.95 and up at Wholesale Price.

ESTIMATE OF FARMER'S INCOME IS MISLEADING

Figures on the cash incomes of farmers are always interesting, but sometimes we fear they are more interesting than valuable. One common source of error in most farm income studies is the practice of valuing the food consumed by the farm family at the price at which it could have been sold. When a reasonably close guess has been arrived at, the usual practice is to turn this food into dollars, not at its retail value, but the price at which it could have been sold for cash, says the Farm Journal.

Nothing could be more misleading, for the purpose of most of these studies—or at least the use to which they are commonly put—is to compare them with the incomes of village and city families. In cities all food has to be bought at retail prices, which may be, as in the case of milk, more than twice as high as the price the farmer receives. To make a real comparison, therefore, the value of the home-grown food eaten on the farm should be the retail price which a city family would have to pay for an equal amount of an equal quality.

HALF-HEARTED Never Felt Well

"I don't see why women will drag around, in a halfhearted way, never feeling well, barely able to drag, when Cardui might help put them on their feet, as it did me," says Mrs. Geo. S. Hunter, of Columbus, Ga.

"I suffered with dreadful pains in my sides. I had to go to bed and stay sometimes two weeks.

"I could not work, and just dragged around the house.

"I got very thin. I went from a hundred and twenty-six pounds down to less than a hundred.

"I sent to the store for Cardui, and before I had taken the first bottle I began to improve. My side hurt less, and I began to mend in health.

"Cardui acted as a fine tonic. I do not feel like the same person. I am well now, and still gaining."

For sale by druggists, everywhere. Give it a trial.

DID YOU EVER STOP TO THINK?

By Edson R. Waite, Shawnee, Okla.
I spent a couple of days in Oklahoma City recently. While milling around in the lobby of the Hickins Hotel, I was introduced by a mutual acquaintance to Mr. Earl R. Ernberger, president and general manager of the Southwestern Light and Power Company, whose firm serves approximately 90 cities in Southwestern Oklahoma with electricity. In a conversation which ensued, I asked Mr. Ernberger concerning the past growth and future possibilities of Southwestern Oklahoma. He responded with an almost boyish enthusiasm which was tempered only by the mature viewpoint gained in his 50 years of practical business and executive experience.

"It is an economic fact," he said, "that the three primary elements entering into the building city, state, or empire are: Men, money, and natural resources. Southwestern Oklahoma has always possessed the natural resources; it was colonized by a group of men who were builders, and it now is attracting that important third element—money. You have witnessed the remarkable growth that has come since these elements have been drawn into cohesion. You are yet to witness a still more remarkable growth.

"Agriculturally, this territory is the garden spot of Oklahoma. Coupled with this natural advantage by virtue of its natural fertility and ideal climate is the fact that farmers in the area are coming more and more to diversified farming. They are learning to apply science to the business of farming. The expansion of the dairying, poultry and livestock

industries is going to greatly increase the purchasing power of our farmers. As electrification of our farms is increased, production and profits on the farms will increase.

"Nor, should you lose sight of the fact that we have an industrial future as well. Many smaller industries already are in operation. I predict the establishment of larger factories in many lines in the near future. We have attracted the attention of industrial capital. Our natural resources, among which are granite, limestone, glass sand, fire clays, sand, gravel, oil, gas, and gypsum, offer an abundance of raw materials for a wide variety of industry. Oklahoma is second to only one state in the Union in cotton production.

"That brings us back to the element of men, or citizenship. The type and class of citizenry which has built and will continue to build Southwestern Oklahoma is progressive yet not radically visionary; it is conservative yet not reactionary. Our business men are investors but not plungers. Consider all these points and then tell me, if you can, why we

shouldn't be enthusiastic? The world has heard much of Southwestern Oklahoma in recent years, just as you say, but the world is going to hear more of Southwestern Oklahoma in the years that are just ahead!"

TUNNEY THREATENS FILM TAKER, THEN TALKS PEACE

PARIS. — Gene Tunney qualified last week as a great defensive orator. For eighteen minutes by the clock he dodged, parried and feinted with the highest class of King's English, and expressed satisfaction that he is no longer a prize fighter.

Tunney addressed 300 members of the American Club at a luncheon at the Champs Elysee Restaurant. He said:

"Economic security was my reason for taking up professional pugilism as a career. This having been achieved, I have resigned."

The retired champion eulogized the Kellogg-Briand peace pact for renunciation of war. His pacific statements were made only a few minutes after he had appeared as a very bel-

ligerently inclined young man. To the representative of a widely-known American film firm, who aimed his camera at him as he left a restaurant, he said:

"If you take another foot of film of me I may have to chastise you." Then he added, "You must understand that I wish to be left alone, and this is final." His manner indicated he would have peace even if he had to fight for it.

Tunney is going to ride the cushions of regular passenger trains around Europe instead of wearing out his No. 11 brogans on a hiking tour. He has abandoned the hiking feature of his tour because he realizes that he could not walk the roads of France without being followed and making the tour a sort of parade.

The Electric Chamber of Commerce has sponsored a road to tap the virgin trade territory in the oil district. It acquired the deed, secured the field notes and started the work on the road which will be 12 miles long.

Youthful! Fascinating!

You will always be that way if you go to . . .

The Vanity Fair Beauty Parlor

Doctor Found Women and Children Sick More Often than Men

As a family doctor at Monticello, Illinois, the whole human body, not any small part of it, was Dr. Caldwell's practice. More than half his "calls" were on women, children and babies. They are the ones most often sick. But their illnesses were usually of a minor nature—colds, fevers, headaches, biliousness—and all of them required first a thorough evacuation. They were constipated.

In the course of Dr. Caldwell's 47 years' practice (he was graduated from Rush Medical College back in 1875), he found a good deal of success in such cases with a prescription of his own containing simple laxative herbs with pepsin. In 1903 he decided to use this formula in the manufacture of a medicine to be known as Dr. Caldwell's Syrup Pepsin, and in that year his prescription was first placed on the market.

The preparation immediately had as great a success in the drug stores as it previously had in Dr. Caldwell's private practice. Now, the third generation is using it. Mothers are giving it to their children who were given it by their mothers. Every second of the working day someone somewhere is going into a drug store to buy it. Millions of bottles of Dr. Caldwell's Syrup Pepsin are being used a year.

Its great success is based on merit, on repeated buying, on one satisfied user telling another. There are thousands of homes in this country that are never without a bottle of Dr. Caldwell's Syrup Pepsin, and we have gotten many hundreds of letters from grateful people telling us that it helped them when everything else failed.

While women, children and elderly people are especially benefited by Dr.

J. B. Caldwell M.D. AT AGE 83

Caldwell's Syrup Pepsin, it is promptly effective on the most robust constitution and in the most obstinate cases. It is mild and gentle in its action and does not cause griping and strain. Containing neither opiates nor narcotics, it is safe for the tiniest baby. Children like it and take it willingly.

Every drug store sells Dr. Caldwell's Syrup Pepsin. Keep a bottle in your home, where many live someone is sure to need it quickly.

We would be glad to have you prove at our expense how much Dr. Caldwell's Syrup Pepsin can mean to you and yours. Just write "Syrup Pepsin," Monticello, Illinois, and we will send you prepaid a FREE SAMPLE BOTTLE.

The Traffic Officer

If every car owner used Champion Spark Plugs there would be fewer traffic jams due to cars stalling.

Champion is the better spark plug because it has an exclusive silimanite insulator specially treated to withstand the much higher temperatures of the modern high-compression engine. Also a new patented solid copper gasket-seal that remains absolutely gas-tight under high compression. Special analysis electrodes which assure a fixed spark-gap under all driving conditions.

Dependable for Every Engine

An Unpleasant Subject

All of the functions of life are not pleasant to consider. Perhaps this is why some mothers refuse to think that such symptoms as restless sleep, loss of flesh, lack of appetite or itching nose and fingers in their children, can be caused by round or pin worms. Many mothers have proven, however, that a few doses of White's Cream Vermifuge, that sure and harmless worm expellant, will make these symptoms disappear. You can get White's Cream Vermifuge for 35 cents per bottle from City Drug Store.

Mother!

Clean Child's Bowels with "California Fig Syrup"

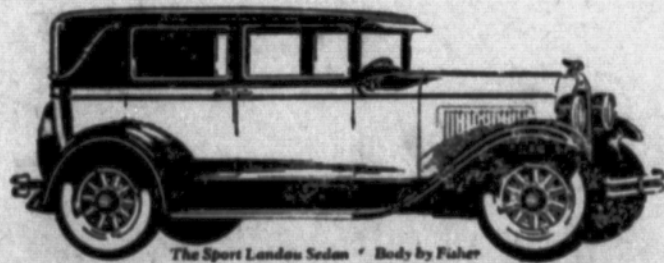

Hurry Mother! Even constipated, bilious, feverish, or sick, colic babies and children love to take genuine "California Fig Syrup." No other laxative regulates the tender little bowels so nicely. It sweetens the stomach and starts the liver and bowels without griping. Contains no narcotics or soothing drugs. Say "California" to your druggist and avoid counterfeits. Insist upon genuine "California Fig Syrup" which contains directions.

MOST people know this absolute antidote for pain, but are you careful to say Bayer when you buy it? And do you always give a glance to see Bayer on the box—and the word genuine printed in red? It isn't the genuine Bayer Aspirin without it! A druggist always has Bayer, with the proven directions tucked in every box:

Product of PRECISION CONSTRUCTION In America's Most Modern Plant

The Sport London Sedan • Body by Fisher

Today's Pontiac Six is built in America's most modern automobile plant—a vast daylight factory erected less than two years ago. Here are special machines, special processes and special methods of precision control far surpassing the accepted practice. Here are literally hundreds of inspectors enforcing the law of accuracy with an iron hand. Here every Pontiac Six is subjected to hundreds of separate inspections to make certain that every ultimate owner obtains a six which General Motors can be proud to sponsor—and which will deliver uniformly satisfactory service for many thousands of miles! See and drive today's Pontiac Six—the best built car of its price in the world!

Week after week and month after month the Bigger and Better Chevrolet has swept on to greater and greater heights of popularity—until today it stands acknowledged everywhere as first choice of the nation for 1928!

Never has any Chevrolet enjoyed such overwhelming public acceptance—for never has any low-priced car provided such an outstanding combination of distinctive beauty, thrilling performance and amazing economy!

Its beautiful bodies by Fisher—long, low and racy, and finished in colors that reveal to-day's mode for smartness and individuality—are far in advance of accepted standards in the field of low-priced cars. Inside

and out they prove anew that Fisher craftsmanship is a thing apart.

But Chevrolet performance is no less impressive than Chevrolet beauty and style. Never before was a low-priced car so easy to handle—for the steering mechanism is fitted with ball bearings throughout . . . the clutch and gear-shift lever respond to the slightest touch . . . and big non-locking 4-wheel brakes give a measure of braking control that is more than equal to every occasion.

Come in and see the car that has won the approval of more than three-quarters of a million buyers since January 1st. Learn for yourself why it is scoring the greatest success of this great automotive year!

Slaton, Texas

DEMOCRATIC CLUB
(Continued From Page 2.)

a continuation of past and present intolerable conditions. The Democratic party proposes to change the form of the experiment and to conduct it along more scientific lines. In this effort they have the backing of wisdom, history, unassailable facts and bitter experience.

Agriculture is our basic industry. When the farmer prospers the entire nation prospers. And all the farmer asks, all he wants, is his equal right and his equal opportunity. The Democratic party has definitely committed itself to the task of concentrating its efforts and its brains to a solution of the agricultural problem. There can be no mistake, after Republican failure, in giving the Democratic party a chance to work out an effective farm relief measure. The farmer's hope lies with the Democratic party. That party has always been the farmer's friend and the laboring man's friend. The prosperity and the stability of the nation depends directly upon the prosperity and stability of basic elements in our population. Agriculture is basic. The rights of the masses are basic.

It is all the more surprising that so many of our citizens are fearful this year of Democratic success and are bolting their party, when the solidest and staunchest Democrats in the nation—the best informed Democrats—are warmly and enthusiastically supporting the national ticket. Morris Sheppard, father of the prohibition amendment; Josephus Daniels, former member of Woodrow Wilson's cabinet; W. G. McAdoo, another member and a prohibitionist; Cordell Hull, the great Tennessee statesman; Dan Moody, leader of Texas Democracy and champion of the prohibition forces in the Beaumont convention; Carter Glass, who wrote the prohibition plank in the present Democratic platform; Mrs. W. J. Bryan and her daughter; Mrs. Woodrow Wilson—all these, and many, many others of equal rank, loyalty and intelligence who could be named, are supporting the Democratic ticket. Earle Mayfield, the defeated candidate, and Tom Connally, the successful candidate for U. S. senator from Texas, are both fighting the battles of the Democratic party. None of them are Catholic; all of them are dry. Are they wrong? Are they not safe guides? Is not their great example worthy of emulation by we Democrats who stand in humbler station? I think so.

I have many good friends among the bolters. I would remind them that it is not I, but they, who have changed. Ever since I have been old enough to think for myself, I have believed in and preached the fundamental principles of Democracy. They are my political religion. The Democratic party has in a small way and at different times honored me and trusted me. I shall not now turn my back on its great and beneficent principles.

Nation Not Dry Under Republican Rule, Florence Says; Is Ready for a Change

(Editor's Note—This is the fourth of a series of articles contributed to and published by this newspaper, bearing upon the present presidential campaign. Two of the articles have been favorable to the Hoover candidacy, while the other two have been favorable to Smith. Since both sides of the question have had equal showings as to the number of published articles, this newspaper does not desire to receive for publication any other articles on the subject for the time being.)

Wet or dry; let 'em lie! Our Democratic friends who are deserting our party in the face of the many strong reasons why they should remain and fight this battle with us, seem to wish that all questions be laid aside except whether we want the country wet or dry.

We say "amen" to that if they will heed the best reasoning on that question.

For argument with them, we will overlook that our country is suffering for many economic and other reforms that Al Smith would bring us if he were president, as proved by the many popular reliefs he brought the people of New York, more than any governor had ever brought them before, and consider alone the wet or dry question. Then, the first question to settle is this: Is the country wet or dry now? We know we have dry laws now, but, as a nation, are we wet or dry?

Every thorough grand jury investigation proves we are wet. An investigation of the National Lawyers' Association concluded we are wet. The grand jury of Philadelphia the other day found that there are tens of thousands of places in Philadelphia where it is as easy to get intoxicants as it ever was in saloons. We know that is the situation in all other cities, and that officials are profiting by this illegal traffic.

We also know that such intoxicants as "home brew" is made and consumed in the homes of our own neighborhood by the average men, women and children, more than was ever thought of before ten years ago. We know that our courts and jails are more burdened now with liquor cases than ever before.

When our boys and girls came back from Fort Worth they reported that everybody at the W. T. C. Co., except themselves, were drinking. And some of our own crowd reported that they themselves were drinking, except, of course, the one making the report. No such social and moral menace ever stared us so glaringly before.

Before prohibition, moral, social and scientific teachings kept the upper classes from intoxicants, and most of the drinking was in the slums. Prohibition tended to take the intoxicants

out of the reach of the slums and the poor people, but made them stylish and popular in better society. Our scientific and moral teachings have been left off with the thought that the law would take care of the situation, and the result is our neighbors and their boys and girls use more intoxicants than was ever known before. We know it, because we smell their breaths. And, the sad part is, we do not know but that our own children engage in the popular smart social pastime.

The citizen who does not know these to be facts is just too much behind the times to vote intelligently. Conditions are so unsatisfactory they are turning some prohibitionists against our present prohibition laws.

But remember, oh, remember! these deplorable conditions have grown up only under Republican administrations. They did not even begin to develop so alarmingly until the last Democratic administration, though the president, then, was an anti-

To those prohibitionists who are about to turn from prohibition because it is now a failure, we say wait, and let's try it under Democratic rule again, with a president that vows he will enforce the prohibition law as long as it is a law, and who has always done what he promised to do.

To those prohibition Democrats who sincerely desire prohibition enforced, your only reasonable course is to vote for a change in administration. You surely know that we have not effective prohibition at present, and if you vote to keep the same crowd in charge of it, your action will impunge your prohibition sincerity.

Sincerely,
W. P. Florence.

Santa Fe System, Through Employees Gives Good Service

The Plains country is fortunate in being served by the great Santa Fe railroad system, and likewise the Santa Fe is fortunate in having this leg of good, revenue-producing property, which will become a more valuable bit of property as the country develops.

An informative circular has been issued by the Santa Fe system, under the signature of W. B. Storey, president, which will no doubt prove of interest to those of us who live along the lines of this great system:

Santa Fe system lines consist of 12,350 miles of main track, 1,779 miles of second, third, and fourth main tracks, and 5,627 miles of yard tracks and sidings, or a total of 19,756 track miles.

Santa Fe main lines are ballasted, ties are creosoted, and the standard rail weighs 110 pounds a yard. Branch lines are well constructed and maintained, and are adequate to meet the requirements of the traffic.

Santa Fe roadbed is of ample width, thoroughly solidified and seasoned, well maintained, and grades and curvatures are being continually reduced.

Santa Fe office buildings, depots, eating houses, shops and roundhouses are modern, clean and attractive.

Santa Fe system lines own and use in the transportation service of 2,064 locomotive, 83,000 freight cars, 1,509 passenger train cars, and 5,465 work cars. These locomotives and cars are so diversified in character and capacity as to meet all the requirements of freight and passenger service.

But a good roadbed, ballasted tracks, creosoted ties, heavy-steel, the best of equipment, and modern up-to-date buildings, station grounds, depots and eating houses do not make the Santa Fe. Such a plant—fine as it is—requires something more to make it a live transportation agency. To make it a living vital transportation unit, it must be given life—men to operate it.

The Santa Fe is a combination of these physical units and the magnificent spirit of service of its 70,000 loyal, efficient, courteous and faithful employees.

The Santa Fe spirit in its employees is an essential and vital element in the rendering of efficient, economical, and courteous transportation service. Santa Fe employees are proud to work for the Santa Fe, and the Santa Fe is proud of its employees. The employees of each department co-operate fully with the employees of other departments in a cheerful and helpful manner.

The personnel and spirit of the Santa Fe employees cannot be obtained by the mere employment of a large number of men. It takes years to build up such personnel and spirit. Men must grow into the Santa Fe work and learn the work with their fellow employees. They must learn Santa Fe methods and become imbued with the Santa Fe spirit of public service.

The Santa Fe is a vast aggregation of men and women working together, using the track, the equipment, and the building of the company, all dedicated to the service of the public, providing a transportation plant indispensable to the producer and consumers of the company, and an important integral unit in America's transportation system.

The Santa Fe stockholders, owners of the property, must not be forgotten. There are 58,400 of them; men and women, and institutions of all kinds—business, fiduciary and benevolent—who have provided the money with which the Santa Fe was constructed and is now being extended and improved.

Five years ago they numbered 67,000. Their reduction in number is probably due to increase in price of Santa Fe stock, and the fact that some stockholders could not refuse the temptation to take a profit, forgetting for the time being the stock's investment value.

In 1927 the average number of shares owned per stockholder was 61. The average amount of dividends received per stockholder was \$504 and the amount of taxes paid per stockholder was \$240. For every dollar paid stockholders in dividends 67 cents was paid in taxes.

In 1927 the Santa Fe had 70,745 employees who were paid wages aggregating \$112,859,713, or an average wage of \$1,600 per annum.

In 1928 the Santa Fe carried 15,636,000 passengers an average distance of 140 miles; in 1927, 5,262,000 passengers an average distance of 249 miles.

In 1928 the average number of passenger cars per train mile was 31, and in 1927 only 23, although the average number of passenger cars per passenger mile was greater in 1927 than

in 1928. The Santa Fe is frequently the largest taxpayer in most of the taxing districts in which it pays taxes.

A part of the taxes which the Santa Fe pays the national government is used in deepening and improving the natural waterways and the government operation of large lines thereon. A substantial part of the taxes paid to state governments and the subdivisions thereof is used for the construction and maintenance of public highways, to which a substantial volume of traffic heretofore moving over the Santa Fe is diverted.

The Santa Fe is not quarreling with good roads or with automobiles. They are no doubt here to stay, but we feel we are justified in calling attention to conditions with which we are confronted and which we believe our patrons should consider when considering the reasonableness of our rates.

The Santa Fe took a very important part in bringing about the settlement and development of the territory which it now serves. The Santa Fe pursues this same progressive policy in connection with the making of additions and betterments to its existing properties, and extensions thereof to new territory where the prospects of settlement and development seem to justify such extensions.

Santa Fe stockholders spend many million dollars every year in the enlarging, extending and improving of Santa Fe facilities so that its patrons may have an unexcelled transportation service. In the accomplishment of this result, the Santa Fe wishes to acknowledge the hearty and helpful co-operation of its patrons and employees.

BETTER MARKETING METHODS NEEDED

What the farmers throughout the country need is a better system of marketing.

Every farmer in the Nation suffers through the antiquated marketing methods now employed.

Somewhat or other, most Easterners look upon the farm problem as remote. But, actually, the East has as much of a problem as the West.

The sixteen states on the Atlantic seaboard produce, in value, more than a fifth of all the corn grown in the United States.

They produce two-thirds of all the buckwheat; nearly half the potatoes; cabbage, celery, tomatoes and peaches; a third of the apples, and about a quarter of the carrots, lettuce, peas, onions and hay.

Their production of dairy products is nearly a third. They raise a sixth in livestock. Their output is quite large in all standard cereals.

True, these Eastern farmers live close to big markets. They are not affected by an exportable surplus.

However, the slow routing between farm and table is a tremendous handicap to them.

Look over the facts given above, then decide for yourself whether the East has a farm problem or not!

WILL ROGERS SAYS—

I was kinder disappointed in Al's speech of acceptance. I thought he was smarter than he is, I thought he would refuse.

Just think how much bigger man Al would have been if he had refused. If he gets elected he will be only one out of 30 that's held presidency. But if he had refused he'd be the first in history to do that—and probably the last.

A Democrat is naturally winder than a Republican. He is out of office more and he has more time to think up things to say. All a Republican has to say is "well I am in—y and got me out." While with a Democrat he has to say something that will get the Republican out and also that will get him in.

Al said he would take the nomination because "this is the country that had raised him from obscurity to the standard bearer of his party." New Al didn't have any monopoly on obscurity at birth. There is awful few babies very well known at weaning time.

The part of his speech that kinder hit me was where he said that if he was elected he would have our government quit mousing around down in Latin America. In other words if a Marine went sight-seeing he would have to pay his own way.

Al is honest about farm relief. He says he don't know a corn stalk from a jumpson weed and that a tractor might be a mouth wash so far as he is concerned. All in all, Al did a mighty fine job of promising. Now I think my platform is more constructive. I will make mine up after I get in. Nobody knows what they might want by next March anyhow.

—WILL ROGERS.

A few of the commodities shipped from Shamrock in 1927 were 12 carloads of wheat, 93 cars of corn, 185 cars of grain sorghums, 297 cars cattle, 79 cars hogs, 225 cars cotton oil mill products, and 28,500 bales of cotton—all grown in Wheeler county.

SPECIALS FOR SATURDAY, SEPTEMBER 22

We have a nice lot of second-hand Furniture that we are going to close out on the above date. We guarantee these pieces to be a real buy. We must have the space that these occupy for the new Furniture that we are receiving daily. We will continue to give you a good trade-in price for your old furniture but we will not put it in stock. Entered as second class mail matter
at the postoffice at Slaton, Texas.

"One of the best school openings we ever had," was heard from several recently. There was a good spirit prevailing, and if it continues, there is every reason to believe that the present term will be the best one we have ever had in Slaton.

We are reminded that with the beginning of school, motorists should give some thought to the safety of children on the way to and from school. The driver who cares little for safety should take a thought for the children's safety, and it is a fact that there is some too fast driving along the school streets in our town.

There are many kinds of advertising, most of them having some merit, others having practically none, but there is no question of the value of newspaper advertising if proper attention is paid to the preparation of copy and it is backed up with quality articles and good service. Any man whose advertising budget is limited should be careful to expend it where it will do the most good.

The \$300,000 Education Building at the West Texas State Teachers College is to have the most modern of equipment for the teaching of grade and high school students. It is to be dedicated with a special ceremony, October 19.

Work is progressing on the Olton school house, which contains eight large class rooms and a library. The building is costing \$45,000 and will be modern in every feature when completed. Twenty per cent of Olton scholastics are in high school.

Work on the Muleshoe gin is being rushed in order that all of this season's crop will be handled. New machinery is being installed and the plant will be modern in every respect.

**Courtesy Stressed
At Oakland Factory**

To expedite the work of commercial men calling on the Oakland Motor Car Company, of whom there are more than 2,000 a month (approximately one for every ten cars built), Charles O. Miller, supervisor of purchases, has installed a courtesy plan designed to eliminate so far as possible the annoying wait in the lobby.

Under this system the information clerk checks the time of arrival of all callers having business with members of the purchasing department, and the time each caller had to wait before seeing his particular party.

In the operation of the plan during the past few months, the average wait of each caller has been reduced to 3.16 minutes. The best day's average was 1.5 minutes. This is the more remarkable in view of the fact that from 100 to 200 men are interviewed every day by the Oakland buyers.

A poster in the lobby tells the aim of the courtesy plan, and a bulletin board hanging by the information desk shows the number of men interviewed the previous day and their

average waiting time. Each buyer also has posted before him, over the signature of Mr. Miller, this constant reminder of the courtesy creed:

"It is our aim to have the Purchasing Department callers delayed as little as possible in seeking an interview. It is the duty of each buyer to see salesmen promptly.

"It is also his duty to see that salesmen have the proper regard for other salesmen who may be waiting their turn.

"I wish this policy to be something more than a framed notice on the lobby wall. It is up to each buyer to see that this is the case."

Every morning Mr. Miller sends the members of his department a record of the preceding day, which shows the number of contacts each man made and the length of time he kept his callers waiting. The resultant intra-department rivalry has cut down the waiting average by a considerable margin, and has won for Oakland "good will" a new significance in the mind of the caller at the factory.

Mrs. A. M. Martin and baby are visiting with relatives at Levelland.

Slaton, - Texas

ADVENTURES IN THE KITCHEN!

MR. BALDWIN could never be sure, when he came home at night, that he wouldn't find himself going to bed in the top drawer of his dresser, or locating—with his bare shins—the piano in a place far removed from its morning location. This habit Mrs. Baldwin had of moving the furniture may have been one reason for his opposing so violently any changing or remodeling of their house. Man-like, he saw it as it had looked some years before, when they had first built it. And, though it grew shabbier, dingier and more out-of-date every day, Mr. Baldwin could see nothing wrong with it. "You're always wanting to change something," he would say. "This house is good enough for anybody!"

It was distinctly unwise, therefore, for Mr. Baldwin to give his wife money for a birthday present, just before he went away on a two-weeks' trip. For, upon his return, he was ushered into a kitchen so bright, so cheery, so exceedingly pretty, that it put the rest of the house to shame. And Mrs. Baldwin knew, before he told her, that the other rooms soon would follow the example of her lovely kitchen.

"You girls will think I've tried to be intensely patriotic," she phoned the members of the Kitchen Club. "But I want you to come and see my red, white and blue kitchen, just the same. I wasn't flag-waving, but just trying to get as far from my old brown walls and black stove and golden oak furniture as possible!"

LEAVES FROM NANCY'S KITCHEN CLUB NOTEBOOK

Mrs. Baldwin's kitchen is bright, and so pretty! Linoleum floor in dark red-brick effect; walls, light gray; tables, chairs, cabinets, refrigerator, etc., white with a stenciled design of dark blue and red; white oil range; some pots and pans red, some blue, some white. Bright blue gingham curtains stenciled in red. Shelves white lined with blue.

A Rainy Day Play Room

Mrs. Smith, who has a house full of children, adapted several of our Kitchen Club ideas to make a rainy-day play room out of her kitchen. She has the blackboard, the washable oil cloth walls (not all the way up the walls, but as high as the children can reach), the breakfast nook on which they can cut out and paste, the plain brown linoleum floor which they can mark up with chalk for their marble games, and the yellow curtains for "sunshine." She even lets them use the oil stove, she says; for it is perfectly safe. It has automatic wick stops that keep the flame from going too high or too low; it is solidly built; and it is finished in porcelain enamel, so that if they get it dirty, it can be easily cleaned.

Mrs. Smith keeps some of the children's games and books put away for rainy day use. Old magazines are kept for the "paper dolls" and brought out only on rainy days.

New Table Finish

Jane brought us a good idea from a tea shop she patronizes in town. She had noticed that the tables were richer and much more interesting in color than ordinary ones. And upon investigation she saw that bright-colored linoleum in a beautiful pattern had been fastened down on them. (This can be done either with tacks or with cement.) Plain white or solid-colored doilies were used.

A New Way To Make French Dressing

Use tomato juice instead of lemon or vinegar in your French dressing, for a new, delightful flavor. Measurements as follows:

- 1/4 cup of olive oil
- 1/4 cup of strained tomato juice
- 1/2 teaspoon of salt
- Pepper and paprika to taste
- 1/4 teaspoon of sugar added is pleasing to most tastes.

Mix dry ingredients. Put into bowl with tomato juice and oil. Beat vigorously. If allowed to stand, beat again before serving.

Snowballs

Bake yellow cup cakes. (Almost any cake recipe can be used for this, putting in a little less flour than is called for.) Slice out the tops and fill with custard. Put two together, top to top. Coat with soft icing and fresh coconut.

BUSINESS IS IN GOOD SHAPE, SAYS MELLON

WASHINGTON.—Secretary of the Treasury Mellon has reported to President Coolidge that the business situation in the United States "is very satisfactory."

Mellon said late last week that he had advised the President that the general business outlook is encouraging without booms and appears to be fundamentally sound.

"It is not true that a campaign year is a bad business year," Mellon said. "The country as a whole is prosperous, but there are still some spotty industries, such as coal and textile."

"There is nothing unfavorable on the horizon to agriculture and the year 1928 should be a good one for farmers."

"Of course there are farmers who make money every year and others who never show a profit."

"As far as I can see into the future, there is no sign of a business slump or depression. I can not forecast the effect of the many economic laws of the world, but at present there certainly is no cause for worry."

Mellon said high money rates have not hurt prosperity, but might do so if they continue indefinitely.

He said the coal industry now is recovering from its recent depression.

"Cost of production is being lowered and mine operators are producing better coal by elimination of slate and other unburnable waste," he explained, adding that the closing down of small mines operated uneconomically has also worked improvement in the industry.

Mellon refused to comment on

Budget Director Lord's recent statement that the Treasury would have a deficit this year instead of a surplus. He indicated, however, that the Government's finances may be balanced next June, as revenues are exceeding expectations.

THE INCREASING NON-VOTING CLASS

Organizations on political party lines called "get-out-the-vote" clubs, are being pushed for the November election.

In six states the last chance to register is already past and in 37 states

registry rights expire 90 days before election.

In a few states there is permanent registration for property owners whose taxes are paid—Indiana has repealed its registration laws.

In many states registered voters lose their rights if they omit voting a certain number of times in each biennial period.

The enormous volume of state and federal laws relating to naturalization, registration, primaries and elec-

tions proper, have all tended to increase the non-voting class.

Doing away with manhood suffrage and increasing the obstacles, difficulties and voting requirements cause uncertainty and chaos with the result that in many instances a minority of voters control election results.

James C. Ashbury has been employed as secretary of the Baird Chamber of Commerce to succeed H. O. Tatum, who resigned to take the position of city manager at Eastland. Mr. Ashbury has been active in chamber of commerce work for many years.

NO DEBTS TO PAY

The farmer who rotates his crops, Who sells before the market drops, Who has some hens and milks some cows And keeps a few good shoats and sows, Will have no store debts to pay For he has found a better way. His cows and sows and faithful hens Have kept up all his odds and ends. The First State Bank is frank to say His note is good for he's good pay.

Dangerous Business
Our stomach and digestive systems are lined with membrane which is delicate, sensitive and easily injured. It is dangerous business, then, to use medicines containing harsh drugs, salts or minerals, when we are constipated. In addition to the possibility of injuring the linings of our digestive system, these medicines give only temporary relief and may prove habit forming. The safe way to relieve constipation is with Herbine, the cathartic that is made from herbs, and acts in the way nature intended. You can get Herbine at City Drug Store.

News From Nearby Texas Towns
Clipped From Other Newspapers and Boiled Down for Busy Readers.

While repairing a boot in an automobile casing, M. E. Stout, hotel proprietor, of Portales, N. M., recently stabbed himself in the stomach with a large pocket knife. His condition is reported to be serious.

Claude Nichols, tailor, of Floydada, was seriously injured last week, when his car got from under his control while driving along a highway. His face and head were severely cut.

Striking a match to test the depth of fuel in a 30,000-gallon storage tank of the Texas Utilities Company at Lubbock, J. A. Burns, 2, of that city was seriously injured last Friday night. Burns was blown from the opening of the underground storage vat to a place of safety before the main explosion occurred. He is expected to recover, though was reported to be in a serious condition.

Henry Strawn and his family, of Southland, were injured Wednesday of last week when their car overturned as a result of a tire blowout. None of the occupants of the car were seriously injured, however.

Garza county's first bale of 1928 cotton was ginned at Post Monday of last week. W. J. Short, of Justiceburg raised the cotton, and received a premium.

John D. Bird has resigned as secretary of the Rails Chamber of Commerce. No successor had been named late last week.

Gill Whitman, junior in the Happy High School, suffered a broken leg last week in a football practice game.

One man was killed and nine injured when a 43-foot center section of a concrete bridge under construction near Colorado City collapsed Tuesday of last week, tons of wet concrete falling 30 feet to the creekbed. The construction of the bridge was a federal, state and county project, with David M. Buchanan, of Temple, as contractor.

The 4-H club boys of Garza county have received 25 of the finest Hereford steers of the O. S. Ranch. The steers will be fed by the boys, and exhibited at fairs this fall and winter.

An airplane is being used to advertise the Scurry County fair, which will be held at Snyder next Thursday, Friday and Saturday. Literature is being dropped by the aviator in all communities surrounding Snyder.

Building of compresses at Floydada and Quitaque is now under way by the Texas Compress and Warehouse Company. The presses will be ready to operate during the coming cotton harvest.

McLean, in Gray County, has received a bale of 1928 cotton. A premium of \$120 was paid to the grower by McLean business men. The cotton sold at 20c per pound.

The Retail Merchants' Association, of Floydada, is soliciting and collecting from Floydada business firms a premium to be awarded to the farmer of Floyd county bringing in to Floydada the first bale of 1928 cotton.

Ducks are rapidly populating the lakes near Littlefield, in Lamb county, promising good fall sport for hunters.

A young man, Thomas A. Edwards, who resided in the Hodges community just northeast of Levelland, committed suicide by drinking carbolic acid. No reason for the act was given. He took his life at the home of his mother near Lamesa.

The first shipment of supplies for the South Plains Pipe Line Company reached Wilson last week, and construction work is expected to begin soon. The town of Wilson hopes to be supplied with natural gas, by the West Texas Gas Company, by the middle of October.

A "Home Beautiful" contest was recently conducted at Crosbyton by the Civic League, of that city. It was pronounced a success.

Enrollment at Wayland College exceeds that of last year, according to the Plainview Herald. Prospects for a good school year for the college are said to be flattering.

A charter to do business has been granted by the State Banking Board to the First State Bank, of Levelland, according to the Hockley County Herald. No public statement has been made as to who the new bank's officials will be.

Vic C. Nelson, major, and now rear, has been nominated by the republican party as candidate for Congress from the 18th district. He will oppose Marvin Jents, democrat, and present incumbent.

According to a bulletin issued recently by Lions International, the Dalhart, Dallam County, Lions Club is second in the United States in the number of members sponsored in the organization of new clubs in July.

From June 1 to September 11 building permits for Lamesa totaled \$214,925, according to the Dawson County Journal.

A Lamesa gin ginned Dawson county's first bale of 1928 cotton Monday, Sept. 10. S. L. Forrest, son of Mr. and Mrs. S. S. Forrest, of Slaton, who is manager of a lumber yard at Lamesa, bought the cotton at auction, paying 25c per pound. A premium of \$198.80 was paid to the grower by Lamesa merchants.

Four young men in a stolen car held up and robbed Virgil Bennett, of

Lockney, Friday night of last week. Though Bennett was knocked unconscious by the bandits, he managed, at first, to get their car number. They were arrested later at Tulla.

REV. WHITE ACCEPTS

WACO.—Rev. W. R. White of Lubbock has accepted the chairmanship of the Lubbock association to promote the Greater Baylor University

campaign for \$2,000,000 in the state at large. He, in turn, will appoint city and church chairmen to perfect organization in that section.

Carr P. Collins of Dallas, outstanding Baptist layman and campaign worker, declared here that the Greater Baylor campaign was the most outstanding and significant effort ever put forth by Texas Baptists. He is chairman of an important committee of the campaign.

**"The House of Service"
Slaton, Texas**

**Topics of the Town
—and—
News of its People**

Mrs. Henry Jarman and little daughter are at Anton, visiting with her parents, Mr. and Mrs. W. W. Stone, and family. Lee Stone and family, of near Slaton, accompanied them there Monday.

Mr. Laney, of Abernathy, visited here this week with his grandson, Henry Jarman.

Jack Yeager, of Okemah, Texas, has accepted a position as assistant manager for the Acorn Store here.

An item appearing in Tuesday's issue of The Slatonite, stated J. W. Ostwright, Jr., of Bomarton, was visiting his sister here. Initials of his sister, who is Mrs. W. Payne, were quoted wrong.

Rev. B. G. Holloway is conducting a revival at Abernathy. The meeting began last Sunday and is to extend over a period of two weeks.

Theo Lane and family of Brownwood spent the weekend here visiting with Mrs. Lane's parents, Mr. and Mrs. W. P. Florence. Mr. Lane's parents, Dr. and Mrs. Lane, of Comanche, accompanied them and visited with Mrs. Lane's brother, J. W. Hood, and family.

Mr. and Mrs. F. C. Jackson, accompanied by Mr. Jackson's mother, who had been visiting here, and Mrs. M. L. McNutt, drove to Crosbyton Tuesday. From there Mr. and Mrs. Jackson, accompanied by his brother, went to Chillicothe on business.

Carl W. George, cashier of the Slaton State Bank, and L. R. Cypert, manager for Cypert Dry Goods, were in Crosbyton Thursday on business.

Mr. and Mrs. M. L. Cobb and their son, Attorney Milton Cobb, are visiting with relatives at Edna, Texas.

B. B. Hoekscher, who lives on Route 6 out of Lubbock, has ordered The Slatonite sent to his address.

H. D. Talley has returned from Devine, Texas, where he visited with his family.

**Low Prices Boom
Whippet Sales, Said**

When the Whippet six was introduced by the Willys-Overland Company in the early summer in a price range that made it the lowest priced six-cylinder car in the world, equipped with a seven-bearing crankshaft and other features usually found only in the higher priced cars, there was an instant response from the buying public. This demand has resulted in a sales volume that exceeded the original estimates of company sales executives.

Since its introduction, however, the performance of the Whippet six has been as important a factor as the notably low prices of the various models in increasing the demand for the car.

Thousands of Whippet six owners in all parts of the nation already have piled up high mileage on their cars, and report that they have gained an entirely new conception of riding and driving comfort in addition to outstanding speed and power performance and economical operation.

The Whippet four, the companion car to the Whippet six line, also is said to be maintaining its record breaking sales volume which has set new high marks since John N. Willys, president of the company, early in January reduced the Whippet prices to a level that made them directly competitive with the world's lowest priced cars.

Despite the fact that the Whippet fours are now well onto their third year of production, no major changes in chassis or body have been necessary. This is attributed to the distinct advancement of the car over other competitors in the low price field, with the Whippet setting a distinct trend in many features which later were adopted by other low-priced cars.

Willys-Overland executives declare no indications point to a continued sales volume in both Whippet lines during the closing months of the year.

CLASSIFIED ADS

WE HAVE received a car of new furniture consisting of dining room, bedroom and breakfast room suites. O. D. McClintock Furniture. 1c

FOR RENT—Three-room apartment at 220 South Tenth Street. See Paul P. Murray. Phone 164. 1p

KNOW TEXAS

The Rio Grande Valley claims the four largest mixed vegetable farms in the United States.

Texas is the fifth or sixth ranking state in minerals produced. Customarily Texas contributes six or seven per cent of the total minerals mined in the United States.

Since 1880 the annual value of mineral production in Texas has increased from about \$1,000,000 to some \$200,000,000 today.

Kaolin is the most valuable of clays for the manufacture of porcelain pottery. Kaolin exists in large quantities in several Texas counties.

Every hostess owes it to her guests to see that their names appear in the local paper. The Slatonite is anxious to print the social news along with the other news of the community, but must depend upon being told of the happenings of the community, where a representative is not invited. People sometimes have a right to complain when their names do not appear in the paper, but the paper is in no wise to blame. This also holds true for churches and clubs. Every society should have a publicity reporter whose duty it will be to see that The Slatonite is kept posted.

**Zone Warehouses
Being Built For
Parts Department**

The parts and service division of Chevrolet Motor Company, for the purpose of bringing the consumer closer to the point of distribution, has been since the first of the year quietly carrying on a building program amounting to hundreds of thousands of dollars. This has added to the company's numerous plants five zone warehouses, now in use, and calls for construction of three more before January 1. In addition, major supply depots in Atlanta and Kansas City have been built and put into operation this year.

Los Angeles, Houston, Omaha, Philadelphia and Cleveland are the centers which have seen warehouses already built and opened for use. Work is to begin this fall on others in New Orleans, Fargo and Indianapolis. The New Orleans warehouse is scheduled to open in November, the Fargo warehouse in December and the Indianapolis warehouse in January.

J. P. Little, manager of the parts and service division, in a statement issued last week pointed out that the 1928 building program when completed will increase the storage facilities of his division by 30 per cent. It will mean, he said, an addition of 210,000 additional feet of floor space.

"Chevrolet parts warehouses and major supply depots constitute an added service that the company offers in order that every authorized service station and repair depot will have genuine Chevrolet parts available promptly for Chevrolet owners," Mr. Little said.

The warehouses and depots carry several hundreds of thousands of dollars worth of stock, and represent, therefore, a very important factor in the commercial life of the communities in which they are located, Mr. Little said.

Aside from the building activity, the divisional program for 1928, as outlined by Mr. Little, is also concerned with Boston and Denver, cities where now existent warehouses will be vacated this fall for new quarters because present facilities have proven inadequate. Thus before the year closes the parts and service division will have new warehouses in each of ten cities.

In every instance between 5,000 and 6,000 square feet of space has been set aside in these warehouses for use of the zone sales schools. The warehouses also house the offices of the zone sales managers and their staffs. All of the new buildings have been built according to plans and specifications of Chevrolet Motor Company.

With this year's additions the total number of Chevrolet zone warehouses will be increased to 20. Other cities in which they are located are Buffalo, Pittsburgh, Charlotte, S. C.; Jacksonville, Fla.; Des Moines, Ia.; Minneapolis, Minn.; Memphis, Tenn.; Dallas, Texas; Oklahoma City; Denver; Portland, Ore.

Texas has about 450 incorporated cities and towns.

**Thief Gets Car
And Sleeping Baby**

While a man and his wife were at church at Fairfax, Oklahoma, a thief swiped the car. Not only that—he was taking the baby the parents had left asleep in the car. Hearing the motor start attracted the attention of the man and he rushed out to rescue the baby, but was shot by the thief, who afterward abandoned the car and the child for another car. The story is but another phase of the seemingly unceasing crime wave that has been their children. No man would think of leaving a purse containing a large, or even a small amount of money, in the car while he attended church or any other function. No woman would think of leaving a bag of costly jewels in the car while she was at church, or any other place. But a baby is quite another thing and is left asleep in the car regardless of the fact that cars are stolen and children are not safe. An accident to the car might mean the death of the child or children left alone in the car. There are few parents who would knowingly put their children in the path of danger, but do not stop to think of danger when they thus leave little ones asleep in the car while the parents are away from the car. That the thief seriously wounded the Fairfax man goes to show that men will do most anything when they are making a getaway with a car and there are instances where children are taken away by men who are wanting a big reward for their return to the parents who are frantic because of the kidnaping of the little ones. If people are careless or thoughtless and leave the children in the car, then they should come alive to the danger and turn over a new leaf.

**GUN PLAY WITH BURGLAR
DANGEROUS—INSURANCE MEN**

"Never go gunning for a burglar." The advantage is all with him and he is a killer. This is the advice given by F. C. Rector, local representative for the Standard Accident Insurance Company of Detroit, an organization which has had a great deal of experience in writing insurance on this type of risk and in dealing with cases involving this type of criminal.

In giving a few simple rules for dealing with burglars, Mr. Rector says:

"Do not admit professed gas, electric light or other inspectors to your home unless you are sure of their identity. They may be imposters.

"Fight no duels with burglars. He has the drop on you.

"Be quick to obey his commands.

"Talk to him; Talk fast, but don't get fresh.

"If you have a chance, flash on all possible lights. But be sure he isn't covering you with his gun.

"A small noisy dog is a good protection.

"Unless the burglar is in the same room with you, make a loud noise. Hurl something through a window pane. Fire several shots into the air. A police whistle is a good thing.

"If he enters your room, stay where he finds you, in bed, in your chair.

It may sound valiant to fight, but he has you covered — and what price glory?

"But if you come upon him absorbed in his work and if you are sure you are making no mistake, shoot. Shoot to kill. But be sure you don't miss.

"If you are awakened at night by the sound of a prowler, remain where you are—much better to save your

own life and let your insurance take care of the stolen valuables."

The first issue of the Panhandle Plains Historical Review, published by the Panhandle-Plains Historical Society at Plainview, has been issued and distributed to the members of the association. Many interesting articles fill the book.

It is more essential to have to eat quality food than to have correct dress. We have the quality—and the saving will buy the dress.
