Dedicated to Informing the Citizens of West Texas

OIC Sponsors Citizenship Seminars

Opportunities Industrialization Centers of America (OIC) has taken the lead in sponsoring a series of Citizenship Seminars which describe programs that show corporate social responsibility.

The OIC purpose is to encourage businesses and industries to renew their obligations to the communities in which they do business.

Rev. Leon Sullivan, President and founder of the successful manpower training organization, announced the first pilot seminar held in Philadelphia in February was such a success it would be repeated at the OIC National Convocation in Washington, D.C., June 10-14.

Rev. Sullivan said, "There are numerous examples of major corporations which have not neglected their responsibility to the community. Many of the companies that support OIC have marvelous community relations programs. What we're trying to do is stop the trend in companies which seem to be neglecting this obligation while engaging in a variety of public affairs activities which provide no payback to the community."

Rev. Sullivan said the pilot seminar in Philadelphia was organized by members of his National Technical Advisory Committee (NTAC) which represent some of the more than several hundred businesses, which support OIC with financial contributions and executive volunteered time and expertise.

"One of our NTAC people remembered a challenge that Secretary of Commerce Juanita Krepps had sounded at an OIC national convocation," explained Sullivan. "Ms. Krepps thought some group should take the lead in reminding industries that a fundamental part of public relations is to return some of their earnings and profits to their own communities.

"We knew many of our NTAC companies had innovative community projects and we asked five of them to tell other Philadelphia area firms and community leaders about them," declared Sullivan. "The interest in Philadelphia

was high. On a cold, snowy morning nearly 100 people attended and participated."

They heard Campbell Soup Company explain how "A Corporate Neighbor Gets a Job Done" in Camden, N.J., a rundown of numerous projects including day care and health care.

Gulf Oil Corporation representatives talked about the evolution of Minority Relations programs and featured a plan to reduce high school dropouts. Dr. Daisy Richardson, Principal of Simon Gratz High School in Philadelphia, supplemented the Gulf presentation.

The Sun Company described its programs to stimulate employees to channel their voluntary energies toward the betterment of their communities.

International Business Machines related its experiences with "Junior Achievement" which featured programs to help inner city youth to become entrepreneurs.

General Electric Company described its "Town Meeting on Tomorrow" program which prepared young leaders for decision-making in tomorrow's free enterprise system.

There also was a presentation by Philadelphia Regional Introduction For Minorities to Engineering (PRIME), a Philadelphia area program which prepares minority youth for engineering and related fields.

Rev. Sullivan revealed that the seminar would be adapted for his national Convocation, with Pfizer Incorporated replacing the PRIME segment.

OIC employees and Washington, D.C. area community leaders will be invited to the seminar on Tuesday, June 12, from 10:30 a.m. to 12:30 p.m. in the Sheraton-Park Hotel. It will be one of many events of the five-day Convocation which will be attended by major black leaders such as NAACP Executive Director Benjamin Hooks, Andrew Young and numerous government officials and industrial leaders.

Rev. Sullivan said, "It is

OIC CITIZENSHIP SEMINARS are being planned for various major cities. (Top) The pilot project in Philadelphia included, left to right, Frank Moore, Campbell Soup Co.; Frank Hess, Gulf Oil Corporation; Matthew Moore, OIC advisor; Richard Jackman, The Sun Co.; and Roy Kohler, Gulf. (Bottom, left) Rev. Leon Sullivan, OIC founder, at press conference. (Bottom, right) Sarah Smith, General Electric Co., was aided in the GE presentation by a "leader of tomorrow." The seminar will occur next at the OIC national convocation in Washington, D.C., June 12. It stresses corporate programs that show social responsibility."

Southwestern Bell to Present New Science Demonstration

Bill Haehnel is proving that a good show keeps people coming back for more.

Haehnel, Southwestern Bell's science demonstrator for three years, is scheduled to show recent Bell System innovations in his new science presentation before six Lubbock groups during the next two weeks. These groups include the Data Processing Management Association, West Texas Chapter of Associated General Contractors, South Plains Lions Club, Lubbock National Bank, Cooper Lions Club and the Downtown Kiwanis Club.

The new show is titled "Through the Looking Glass—Lightly." Haehnel expects to carry it 35,000 miles and present it to more than 300 groups in Texas.

"More than 2,500 changes have been made in the basic telephone over the past 25 years," Haehnel said. "In fact, virtually every component has been changed in the past six years to increase efficiency and fidelity as sound waves are converted to electrical waves and reconverted into the sound of a voice."

The Bell System handles 500 million calls a day, Haehnel said.

"Ten years from now, we'll double that to a billion calls a day. That's why new technologies are being developed to handle those calls without investing huge additional sums of money in new equipment."

Using a century-old device invented by Alexander Graham Bell, Haehnel demonstrates in his show the practicality of converting sound waves into electrical waves and transmitting them over lightwaves.

The device is called a

"photophone," and it was one of Bell's most exciting inventions—but one that never saw the light of day.

"Mr. Bell based his photophone on sunlight—using a nonmetallic element called selenium—and he actually transmitted soundwaves through the refracted light across a room. That was in 1880, and he never really had the time or encouragement to perfect his photophone," Haehnel noted.

He said both the selenium

Bill Haehnel, Southwestern Bell's science demonstrator, displays some of the equipment he uses in his new science presentation titled, "Through the Looking Glass—Lightly." The program offers a look at the latest developments from Bell Labs in the field of telephone communications.

YWCA Woman Of the Month

The Lubbock YWCA has selected Carol Escue as their Woman of the Month for June.

Carol is the mother of three children and a member of St. Paul's Episcopal Church. She is a volunteer worker for the Rape Crisis Center and a Y-Teen sponsor at Estacado High School. Carol served as membership drive committee member in 1978 for the Lubbock Civic Theater.

In double duty as a teacher in the LISD since 1972, Carol is also a realtor with Joe Ireland Realtors. She has a BA degree and an MED from Texas Tech University.

Carol Escue

JACK ANDERSON WITH JOE SPEAR WEEKLY SPECIAL

Where's Idi Amin? Libya a Good Guess

Copyright, 1979, United Feature Syndicate, Inc.

WASHINGTON—For the past several weeks, American intelligence agencies have been playing a new guessing game: Where's Idi Amin?

The deposed Ugandan dictator has been hiding out since his government was overthrown last month. The new rulers would like to get their hands on him. They hold him responsible for the senseless deaths of hundreds of thousands of Ugandans during his reign of terror.

We have checked our intelligence sources to find out what has happened to Amin. One report claims he is in Libya under the protection of Libyan strongman Muammar Qaddafi. This report warns that Amin may be plotting a comeback.

Another report contends that the new Ugandan rulers would like to make a deal with Qaddafi to swap 40 Libyans captured in the recent fighting for Idi Amin.

Yet another intelligence source told us that Amin is "laying low" and that he is believed to be in Libya.

Our best intelligence source, always highly reliable, told us he had received "independent corroboration" that Amin is Qaddafi's guest in Libya and is actively planning a terrorist campaign against the new Ugandan government.

Amin has the secret support, according to this analyst, of the Palestine Liberation Organization. Both Amin and the PLO are close to Qaddafi. And, our source said, the PLO has agreed to help Amin with his terrorist plot.

The aim is to destabilize the Ugandan government and demoralize the Ugandan people. Then the terrible Amin would attempt a comeback.

More on Marston: Vice President Walter Mondale is the latest high official to become entangled in what has become known as the "Marston scandal."

David Marston used to be the U.S. attorney in Philadelphia, where he investigated some powerful Pennsylvania Democrats. One of them, former Rep. Joshua Eilberg, placed a telephone call to President Carter to complain about Marston. Not long afterward, Attorney General Griffin Bell abruptly fired Marston.

Now we have learned that another subject of the investigation, state senator Henry Cianfrani, met with Vice President Mondale. A knowledgeable source has reported to the FBI that Cianfrani spoke to the vice president about Marston.

This was denied by Mondale's office. A spokesman admitted there

was a Mondale-Cianfrani meeting but claimed it was strictly routine. He disputed that the Marston investigation was discussed and denied that Mondale had anything to do with firing Marston.

Nevertheless, Marston was summarily fired. He took advantage of the publicity to run for governor of Pennsylvania. He lost and is now running for mayor of Philadelphia. He won the Republican nomination several days ago.

Both Eilberg and Cianfrani were drummed out of office. Eilberg was fined and received probation; Cianfrani was convicted and jailed for corruption.

The FBI, which investigated the phone call between Eilberg and President Carter, is now looking into the contact between Cianfrani and Vice President Mondale.

Pentagon Pipeline: Inflation is eating its way into the kitchens and dining halls of the nation's armed forces. Because of spiraling food prices, the Pentagon plans to limit its purchases of high-priced food items. The brass hats say the troops will have to eat less beef and more poultry, pork and cheese. The Army alone is planning to cut its beef purchases by 25 percent and increase the use of soy-extended ground beef. Red salmon will be eliminated completely from the soldiers' diet and they will also have to make do with a million pounds less of raisins.

•More than \$500 worth of fuel was burned up recently to bring amonstrous 92-ton front-end loader up the James River from Fort Eustis to Fort Lee, Va., so Army generals would watch the machine work. But when the machine was rolled onto the pavement where the generals were to view it, the asphalt buckled. The demonstration never took place and another \$500 worth of fuel was consumed to ship the machine back down-river.

Watch on Waste: The antelope are leaving New Mexico and the taxpayers are going to pay through the nose to find out why.

This state was the home where thousands of antelope roamed, but now there are only a few hundred left. They are not in danger of extinction, but the federal government wants to know why they don't like New Mexico.

So \$311,000 in public funds will be spent for a four-year study of the foods antelope eat and the types of fences they manage to pass through. The scientific community already knows, of course, that antelope like broad-leaved plants and would prefer, if given their druthers, to negotiate woven wire fences rather than the barbed kind.

But there has never been a long-term antelope-in-New Mexico study. Four years from now, that vacuum will be filled.

Tourist Tip: Those who hope someday to visit the White House or the Washington monument should bear in mind that both landmarks were built on what was once swampland and are sinking one-quarter of an inch every 30 years. They will drop out of sight in something less than 111,000 years.

Church News

Mt. Gilead Baptist Church
"We enter to worship, we depart to serve; the church where everybody is somebody." The church is located at 2512 Fir Ave.

Pastor's Corner THE JOY OF LIVING

Time is not measured
By the years that we live,
But by the deeds that we do
And the joy that you give.

And each day as it comes,
Brings a chance to each one,
To love to the fullest,
Leaving nothing undone.

That would brighten the life
Or lighten the load,
Of some weary traveler
Lost on life's road.

So what does it matter
How long we may live,
If as long as we live,
We unselfishly give.

Rising Star Baptist Church
"Seperation in Time" was our Sunday morning message that Rev. Phillips gave to us. Our services were well attended with several guests.

Rising Star would like to extend an invitation to everyone to our 34th annual BTU Congress.

Our BTU Congress will be June 5-8. Our first day will start everything with a musical June 5th. There will also be a parade for the Congress Youth at Action on Thursday the 7th. Our theme this year is "Bold Mission Thrust."

New Mt. Olive Baptist Church to Sell Dinners June 2

Hot nourishing dinners will be sold at New Mt. Olive Baptist Church, 1610 Vanda Ave., next door to Posey Clinic, pastor B.F. Roberts, Jr. The sale will begin at

10 a.m. June 2, 1979.
"Come early, last Saturday was a sell-out." Menu: Country Fried Chicken, Mashed Potatoes, Green Beans, Homemade Gravy, Southern Style Cook Rolls, Peach Cobbler, Lemon Ice Tea.
"Yes, all of this at a reasonable price. Also while you are eating stop long enough to look over our garage sale, and pick up on things like record players, T.V. sets, drums, suits, etc. Don't miss out

on this at give-away prices."
For information contact Sis. Grimes at 763-8871 or Sis. Harris at 747-1592.

So, don't forget June 2, 1979 at 10 a.m. at New Mount Olive Baptist Church. Pastor phone 744-0166.

A wise man knows just how far to go and when to stop.

Experts are like ordinary people—they seldom agree.

When in doubt about a controversial subject, keep quiet.

STATE CAPITAL HIGHLIGHTS
By Lyndell Williams
TEXAS PRESS ASSOCIATION

AUSTIN—For awhile some thought they were hiding out in a Winnebago Mobile Home. Not a likely place to find a state senator with only a week left in the session.

And some people had the sneaking suspicion that the 12 missing senators were spread from Mexico to Las Vegas, from Houston to five minutes driving time from the State Capitol Building.

But wherever they were, 12 senators were not in the Texas Senate last week—at least four and a half days of that week.

What that meant, of course, is that the Senate, left without a quorum, had to close its doors and put a halt to the business. The 12 missing senators had set out to do just that.

"Spoiled Children"

The 19 remaining senators described their absent colleagues as "deserters," and accused them of being "on strike." Even Gov. Bill Clements threw in his two cents worth by saying they were acting like spoiled children and needed a good spanking.

The whole episode, charged Sen. ~~Cat~~ Parker of Port Arthur, had been caused by Lt. Gov. Bill Hobby and his parliamentary slight of hand in an attempt to get SB 1149—basically an election bill—passed by the Senate. The bill was labeled a "Trojan Horse" by Sen. Lloyd Doggett and few disagreed.

Hobby's plan was to get SB 1149 (that would have put the secretary of state in charge of funds now ruled over by county party chairmen) out of the Senate and into the House where it could be substituted. The substitute, so the plan would go, would be a measure providing for a split presidential primary. That primary, in March and separte from the regular state primaries, would cost the taxpayers \$5 to \$7 million. But besides that, backers of the idea were quick to point out, it would give Texas one of the earliest presidential primaries and would enable the state to have more clout over critical national issues such as energy. Not so, said the absent senators.

And when Hobby announced that he would abandon the traditional order of business, it was obvious, the missing senators charged, that

what was at stake was political hides and not the influence of the state on national matters.

Help Connally

Who the split presidential primary would help and who it would hurt is a complicated story. Most agree that a split primary, non-binding as to party, would enhance the presidential hopes of John Connally. Others say a presidential primary on the same day as the regular state primaries would probably endanger the seats of some incumbent conservative Democrats.

What some called a "desperation move" on Hobby's part meant that it would take only a majority vote to bring up a bill in the Senate, instead of the traditional two-thirds. It was the first time Hobby had ever used such a tactic since becoming lieutenant governor in 1973. The last time anyone could remember the Senate going to a majority vote was in 1961.

When the 12 senators learned of Hobby's intentions, they decided the only thing left to do—the filibuster, which they had tried against SB 1149, had proven to be ineffective—was to abandon the Senate chamber.

Call on Senate

Hobby retaliated by putting a call on the Senate—the first since 1969. The Senate Sgt.-at-Arms, the Department of Public Safety and the Texas Rangers were called in to locate and return the truant senators.

Understandably, Hobby had started calling the group, "The Killer Bees." And when a statewide search failed to turn up even one of the hiding senators, almost every newspaper sang out with the same refrain: "Where are the Killer Bees?"

Hobby was more than just irritated that state police couldn't locate "12 prominent citizens of the state." Those 12—The Killer Bees—were Sens. Doggett, Babe Schwartz, Ron Clower, Parker, Bob Vale, Raul Longoria, Gene Jones, Chet Brooks, Glenn Kothmann, Oscar Mauzy, Bill Patman and Carlos Truan.

At one point during the search for the senators, the DPS nabbed a man they thought was Gene Jones at his home in Houston. Only after the man had been helicoptered back to Austin, did troopers learn that they had grabbed the wrong man—Gene Jones' brother, Clayton Jones.

Clayton said, innocently of course, he went along just to get to ride on a helicopter. But it was later learned, that while one Jones (the right one) was slipping out the back door, another Jones (the wrong one) was being escorted out the front door by the DPS.

Deal Finally Struck

While the police chased Senators and the news media chased the police, Hobby and the Killer Bees quietly began negotiations. When the senators returned (to a packed senate gallery and chamber, to some boos and many cheers), it was clear what deal had been struck. The Killer Bees had forced Hobby to return to the two-thirds rule.

As soon as the Killer Bees took their seats, the Senate rushed back into action and passed more than 20 bills in one afternoon and evening. One of those bills was SB 1149. The measure was approved on second reading 17-14, meaning that if the 'nos' stood pat on the third and final reading of the bill, Hobby wouldn't even have enough votes to bring the legislation up for consideration.

Later, the Killer Bees admitted that nine of them had hidden out in a cramped garage apartment not more than five miles from the Capitol Building. Jones (Gene) had left the "bunker," as the Killer Bees alled it, because of claustrophobia. Brooks offered the excuse that bad weather had kept him away from the Capitol (but, yes, he did agree with the Killer Bees' position on a split presidential primary), and Longoria had stayed in seclusion somewhere in South Texas.

Unfortunately, the Killer Bees may need to hide out again. Speaker of the House Billy Clayton says there are already some senate bills in the House that could be amended to include a presidential primary. Hobby's agreement with the Killer Bees did not include a promise that some other senate bill might not come back from the House with a split presidential primary proposal attached. If that happens, Hobby would need only a majority vote for the Senate to concur in House amendments.

WEST TEXAS TIMES

Vol. 18, No. 22

Wednesday, May 30, 1979

The West Texas Times is an independent, privately owned newspaper published weekly, on Wednesday, in Lubbock, Lubbock County, Texas. Second Class Postage is paid in Lubbock, Texas 79408. Publication Number 676340.

Any erroneous reflection upon the character of anyone by this newspaper will be corrected immediately when called to the attention of the editor.

Kelly's Heroes

by Joe Kelly

It's a good thing to go to church once in a while. It's not only good for the spirit, it's also good because you see so many friends and neighbors. One of the friends is Ed Irons, superintendent of schools, former great Texas Tech center and father of a pretty fair country player, Dan.

We bumped into Ed as he was wending his way to the sanctuary and asked about Dan.

"He's doing fine," he replied. "He's back in town and working on his knee, which is coming along fine. He just finished mini camp and it was pretty tough. He'll be going to the big camp July 14.

"He's got a tough fight on his hands," Ed declared. "They have 18 offensive linemen, including Dan, and they'll keep only eight.

"They fitted him with a knee brace and it's working out fine. He says that he doesn't have any pain and there's no swelling in the knee after he works out. It looks pretty good to him."

The mail the other day brought a letter from Frank Benites, former WT-NM League catcher and, later, Lubbock Hubber manager. Frank still is in Amarillo, blowing and going strong.

The letter brought word that we had been anticipating. The annual WT-NM Old Timer's Baseball Reunion will be held in that northern city Aug. 3-5. That's a weekend to put down in your futures schedule.

According to the information from Frank, check-in will be Friday night and, if past schedules are followed, there will be an informal "lie telling" session in some room that night.

There will be golf Saturday morning, a luncheon for the ladies at noon and a 5 p.m. dinner for everyone. That will be followed by a three inning Old Timers game just before the Gold Sox play a Texas League game. An after-the-game party until ...?... will follow.

You don't have to have been a former WT-NM League player to take part. Just let Frank know at 3402 Moss Lane, Amarillo, 79109, and he'll take it from there. Come and listen to the lies, or tell your own. You can't miss either way and you'll have a great time.

When you remember that it has been almost a quarter of a century since we had pro ball in Lubbock, you'll appreciate even more when they say it is an old timer's session. The gray may show more, but much of the ability is still there.

A year ago Billy Martin, frustrated and driven to rage by the antics of the Yankees, exploded and was put on the shelf. Bob Lemon, who hadn't set the world on fire, was hired to succeed Martin, with the Yanks some 12 or 13 games off the pace.

Okay, Lemon performed a miracle, helped with an amazing El Foldo by the Boston Red Sox. The Yankees straightened their tailspin, caught the Bosox, won a playoff game, beat Kansas City and then won the World Series after being down 3 games to 1.

Now the Yankees apparently are following last year's script, only this time it is Baltimore with a solid lead and Lemon in charge all the way. With the New Yorkers slipping badly, it wouldn't be surprising to see Lemon exit the helm and someone else take over.

George Steinbrenner, the owner, isn't making it any easier by patting Marton on the back and saying that he'll manage the club in 1980. Lemon is, or was, depending on what happens, destined for the front office. It's only May, of course, but the Yanks have been slipping steadily.

Actually, it would be good for the game if either Baltimore or Boston headed up the parade. It's never good for any sport when one team dominates year after year, and the Yankees are the prime example. They have the best team money can buy and should win.

It's always refreshing to see the underdogs come out on top. Thus, the cheering in the SWC when Texas failed to return to the Cotton Bowl after five straight appearances. Unfortunately, the Steers have been back the last two years and fates indicate a third appearance Jan. 1, 1980.

You've got to feel sorry for Corky Oglesby. Here he is, trying to build Texas Tech track up to respectability and he loses a 7-foot high jumper. That's too bad, of course, but it's even worse when it is a boy from Lubbock. Could you imagine Texas losing him if he lived in Austin?

Great track performers don't come along with great regularity in this dust-blessed climate and when they do, you've got to latch onto them. So, Corky baited the trap and came up empty, making the job of creating a respectable Tech track squad that much tougher.

No one has to tell me what inflation has done, or is doing. You see and feel it every day. But when some wet-behind-the-ears college star gets well over \$1 million a year to sign a pro contract, everyone who spent four years in college must ask if it was worth it.

Sure, pro athletes have short lives, but with that kind of income, they don't have to worry about the future. Look what it did for Donny Anderson—and he was a piker compared to today's standards. One of these days the owners are going to call a halt to the proceedings—and none too soon.

That time of year is almost here. A week from today the Better Half, our oldest son and I will be headed for Washington and the conference of NFIB, followed by fishing and camping at Saranac Lake, N.Y.

Jim Whitelaw says that everything is in order. Now, if he'll have the fish cooperate, all will be fine.

Pearls were once thought to be raindrops swallowed by oysters.

RSVP Council Holds Organizational Meet

Wildring Edwards, associate professor of the Home and Family Life Department of Texas Tech University, was elected chairperson of the Advisory Council of the Retired Senior Volunteer Program (RSVP) Thursday. Selected as vice-chairperson was H.P. Clemons, an active senior volunteer. Mrs. D.C. Fair, Sr., 2007 Date, is a member of the Council.

During the organizational meeting, subcommittees on recruitment, recognition, public information, evaluation, transportation and financial support were formed.

RSVP is an affiliate of ACTION, the federal volunteer agency. The City of Lubbock is the grantee, and Betty Anderson serves as director.

Offices for the Retired Senior Volunteer Program have been relocated from 2600 Avenue P to Godeke Library. Seniors interested in volunteering may call 744-1433 for information.

Afro-American Club Plans Music Session

The Afro-American Cultural Society of Reese Air Force Base, will be holding its second easy listening and jazz session, Sunday June 3, at 3 p.m. in the NCO clubs ballroom on base.

The music for the session will consist mostly of jazz and easy listening music. If you have any favorite cuts that fit the occasion, mark them and bring them along.

The club will be asking a \$1 donation at the door. A portion of the proceeds will go towards building up the cultural clubs scholarship funds offered to local schools this coming school session.

Volunteers Needed at Community Hospital

Volunteers are needed at Community Hospital, 5301 University, to work in patient care or the newly opened gift shop. If you can spend a couple of hours a week helping others, come and join in Volunteers Services at Community Hospital. Contact Louise Stokes, Director of Volunteers, at 795-9301. She will give you a tour of the hospital and train you in the area you choose to work.

OIC...

Continued from page one

especially appropriate for the Citizenship Seminar to be held at the OIC National Convocation because it contains a number of strong examples of the corporate social responsibility to the youth of our nation."

The OIC head said that during the convocation he planned to present President Carter with numerous signatures petitioning stronger national legislation to aid youth training programs such as OIC and others.

The Citizenship seminars will continue after the Convocation with a number of different corporate presentations. New York City will be the site of one in November. Others are being planned for Atlanta, Houston, Pittsburgh, Chicago, Boston and San Francisco.

Linda Kaye Randles

Engagement Announced

Ms. Margaret Jenkins of 3307 E. Colgate, wishes to announce the engagement of her daughter, Linda Kaye Randles, to Rev. John W. Williams, son of Mr. and Mrs. Langston Williams of 203 N. 12th, Floydada, Texas.

The couple plans to be married in a double ring ceremony June 16, 1979, in Ford Memorial Church of God in Christ with Bishop J.E. Alexander officiating.

The bride-elect is a 1975 graduate of Estacado High School and a member of Ford Memorial Church of God in Christ, and is active in the senior choir at Ford Memorial. The future bridegroom attended high school in Floydada, Texas, and is a minister of the Church of God in Christ.

Petal Pushers Garden Club Luncheon Held

Petal Pushers Garden Club had a salad luncheon for their final meeting in Mrs. Therell Hodges garden.

Mrs. John Darby installed new officers as follows: Mrs. Jodie Howard, president; Mrs. Orville Wilmington, vice-president; Mrs. Charles E. Shields, secretary; Mrs. V.A. Hedlund, treasurer.

Guests were Mrs. Delta Loney, A.R. Naylor, Merle Gill, Charles Howard, Tom Anderson and Maurice Howell. The latter two became new members.

This club furnished roses and containers for the Green Thumb Junior Garden Club members to make floral arrangements for their Mother's Day gifts.

Reese Honors Vietnam Veterans

The 64th Flying Training Wing at Reese Air Force Base will conduct a combined, formal retreat-memorial ceremony at 4:42 p.m. on Wednesday, May 30, 1979 in front of the Wing Headquarters building.

The ceremony will combine the monthly retreat-awards ceremony with a memorial service to honor both Memorial Day and Vietnam Veterans' Week, May 28-June 3, 1979.

The ceremony will begin with troops marching into place and the presentation of awards. Then the Installation Chaplain, Lieutenant Colonel Arnold G. Johnson, will present a few brief remarks in honor of all those who served in the Armed Forces during the Vietnam conflict.

The ceremony will proceed with a three volley rifle salute by the Reese Air Force Base Honor Guard's Firing Squad, and the playing of taps. During this time a four ship flight of Reese T-38's will fly over the ceremony. The daily retreat ceremony will conclude the memorial service.

The ceremony is open to the public.

Parks, Recreation Dept. Sponsors Summer Programs

The Lubbock Parks and Recreation Department is providing free recreation within biking distance of children throughout Lubbock at sixteen "Fun in the Sun" playground sites and six "Summer Fun" Community Centers. Special events and team sports will be planned and provided by Recreation Specialists daily.

The summer program will provide opportunities for children of all ages to participate in regional and city-wide competition in a Little Miss Parks and Recreation Pageant, talent acts, and team sports throughout the city.

A City-wide craft display of art work made by children at recreation sites is also on the summer agenda. Sack lunches, free of charge, will be provided Monday through Friday at all Lubbock Community Centers and at designated playground sites.

Schedules of the summer events can be picked up at all Lubbock Community Centers and any additional information can be provided by the Parks and Recreation office at 762-6411, ext. 2678 or 2679.

Census Shows Child's Progress in School Affected By Poverty, Language, and Parents Education

A child's ability to keep up with his or her age group in school is greatly affected by poverty, proficiency in the English language, and the educational level of the child's parents. A report by the Bureau of the Census, U.S. Department of Commerce documents these and other facts analyzing school progress among children and describing changes since 1950.

Children from poor families are more likely to be behind in school, especially at the older ages of 14 to 17, the statistics show. In this age and income group, about 20 percent of the white children and 23 percent of the black children were behind in school in the spring of 1976. For children age 14 to 17 in all income groups, the

figures were 9 percent for whites and 17 percent for blacks.

Children of Spanish origin appear to have a harder time keeping up in school, regardless of income level. Some of the problem may be due to difficulty in speaking or understanding English. About 3 percent of all children aged 8 to 17 lived in households where the main language was Spanish and about 20 percent of these children were enrolled in a grade below normal for their age group, compared to 8 percent for the total population in this age group.

The report indicates that children whose parents did not

graduate from high school also had more trouble keeping up in school. Among 14 to 17 year olds, 15 percent of the whites, 20 percent of the blacks, and 26 percent of the children of Spanish origin in such families were behind in school. If the parent had completed one or more years of college, the figures dropped to 5 percent for whites, 8 percent for blacks, and 14 percent for children of Spanish origin.

As in all sample surveys, the data in this report are subject to sampling variability and errors of response, including underreporting and nonreporting. A detailed explanation appears in the report.

Math and Reading Workshop Offered by Texas Tech University

High school 1979 graduates planning to attend any college in the fall are provided an opportunity to do better in their future studies by participating in the Reading Study and Math Improvement Workshop offered by Texas Tech University July 30-Aug. 17.

The workshop, sponsored by the Texas Tech Division of Continuing Education, is designed for high school seniors although others may enroll, according to Dr. Michael Mezack III, division director.

In reading, students will receive instruction in comprehension skills, reading in different subject areas, basic speed reading techniques and vocabulary enrichment. Note-taking, outlining, highlighting, research and test-taking techniques will be emphasized, and students can learn new and review old methods of using libraries. English composition will be touched upon.

In mathematics there will be a review of basic skills, algebra, calculations involving geometric forms, interpretation of graphs, interpretation and analysis of statement problems, negative numbers and significant figures.

Participants will meet from 9-11:30 a.m. in Building X-15 on the Texas Tech campus, across the street from the Municipal Auditorium parking lot.

At the end of the workshop

each student will receive an evaluation of his or her strengths and weaknesses as well as suggestions for improvement or maintenance of skills.

Mezack said that enrollment will be limited to 30 persons so that students can work in small groups and individually.

"The workshop is designed to assist students in achieving academic success in college," he said. "No grades will be given, but any who successfully complete the workshop will receive a certificate."

The registration fee is \$60. To pre-register, a student should send his or her name, home address and phone number and social security number, along with the registration fee to Dr. Mezack, Division of Continuing Education, 104 Administration Building, Texas Tech University, Lubbock, Texas 79409.

Persons may register as late as July 30, providing the workshop has not already been filled, he said.

Workshop instructors will be Ellen Harris, who holds the master's degree from Texas Tech, and Shirley Rekers, who earned the bachelor's degree at the University of Colorado.

Adult Summer Workshops Offered by LISD

The Lubbock Public Schools Vocational Home Economics department offers an adult summer program for 1979. These workshops have been planned for adults during the month of June. Surveys have been run to determine what topics would be interesting to adults in the Lubbock community.

The classes meet for one day for approximately three hours at different locales about the city. No fees will be charged outside of any money necessary for supplies or materials. Interested persons should contact any secondary school homemaking teacher or the Vocational Homemaking office of the Lubbock Public Schools, telephone 747-2641.

Classes include such items as canning, vegetable gardening physical fitness, indoor plants, microwave cooking, holiday ideas, quilting, and many other topics.

CONSTIPATION Doctor proven ingredient requires no prescription

Doctors find a special laxative ingredient to be highly effective in relieving even severe constipation overnight. Don't let irregularity or constipation become a problem. This medical ingredient is now available in the exclusive EX-LAX formula. Use only as directed. Chocolate Tablets or Unflavored Pills. **EX-LAX**

Sheridan's Ride

by Jack Sheridan

You will, perhaps, remember the fine "disaster" movie (it wasn't that long ago) called "The Poseidon Adventure"? It did extremely well at the box offices and it has now been seen in the usual cut form of movies on television. It concerned, as you know, a luxury liner, caught in a particularly violent storm at sea on a New Year's Eve. A giant, almost tidal wave strikes the big ship, turns it upside down and an all-star cast battles to find their way to the open world through a maze of marvelously depicted, upside down sets of the ship's interiors.

Some died on that upward trek to the keel of the ship still above water. Some made it to the top, not without harrowing sequences. The acting was superb and Irwin Allen, whose name has become identified with all-star disaster films ("The Towering Inferno" et al), did a thoroughly top-rate job. "The Poseidon Adventure," based on a book by Paul Gallico, took its place as the best of the genre and remains so.

Now, to write and produce a sequel to such an achievement is a task that is both risky and formidable. Hollywood has fallen into a habit of issuing sequels of IIs and even IIIs ("Jaws," "Rocky") and, more often than not, the results are somewhat dismal, pale shadowings of the parent idea.

Gallico, Allen and company decided to try one last shot at their baby. They have come up with "Beyond the Poseidon Adventure," which is in its initial week at the big Winchester Theatre on 50th Street. To say that the film has not been anticipated by those of us who loved the original to the point of repeated screenings would be a crass lie. It certainly was anticipated by me (a repeater on Number One), though my anticipation, I'll admit, was colored by misgivings and doubts about the ultimate success of Poseidon II. Besides, what more on earth could you tell about this New Year's Eve casualty? It'd be like tacking on that one-too-much ornament on a perfect, glittering Christmas tree!

Well, author Gallico whipped up a pretty good solution to the dilemma. The time is the next day after the maritime disaster. In a still raging (same storm, wild sea) a lonely tug boat, captained by a determined, if broke, skipper, with the old man who had raised him from a pup as his crew and an added hand in an inept girl from dubious beginnings, a babble-mouth kind of waffle brain, battles for life against odds. The storm finally fails and the waters still. A cruising French cast guard plain guides them to the hulk of the overturned liner.

The captain, anxious to save his boat and an opportunist, decides to board the stricken ship, to seek out the purser's office where money and jewels have been stored. He claims salvage rights. He enters the torn-up innerds of the great ship, now frequently rocked and damaged by horrendous explosions. Before the three descend below, they are joined by another craft, this time masquerading as medical relief, headed by an alleged "doctor" and his crew. They all go below. It's painstaking and frightening as they prowl. They find other survivors below, a blind man and his wife, a young girl and her martinet father, an alcoholic Texan cradling a champagne bottle, a nurse, a young man, a slinky mysterious brunette. They continue, but without the "doctor" and his crew, who hie off to the other side of the ship, intent on their own devious devices.

Now, we are back with the original Poseidon caper. The purser's office yields its loot in plenty and the return to topside (or bottomside) is indicated. You know what THAT means. Flooding, fire, perilous climbing, murder, loss of party members, all that made the original the spine-tingler it was, are somewhat effective here, too. We identify with the struggling group, are held in thrall by the dirty machinations of the "doctor" and his murderous assistants, and watch as the frequent, powerful explosions continue their destructive assaults against the doomed ship.

There is a neat twist in this film as true identities become known, a little scuba diving exercise to free the "good guys" from the ship, a bravura summation of the conflict between the two now diametrically opposed below-deck parties and a resolution against the still sea, climaxed in a dramatic and bombastic finale.

That's it. It's no "Poseidon Adventure" No. 1, but the film, "Beyond the Poseidon Adventure," has its moments and is an absorbing, tense follow-up. The captain is Michael Caine, the leader. Telly Savalas is the "doctor." Sally Field is the sometimes very annoying nit-wit young woman. Shirley Jones is there and so are Peter Boyle, Jack Warden superb as the martinet father, Shirley Knight and Slim Pickens as the Texan. Karl Malden is his usual impeccable self as the doomed "old man" and a core of the show.

It's all handled very well and I think the rank and file of "Poseidon Adventure" buffs will accept this one, too. There won't be a Poseidon III; there's a very good reason. See and find out.

Only one thing puzzled me throughout the film. Though the big ship is a disaster area in every way, giant and heavy-toned pieces being blown to bits, shaken loose from moorings, crashing through multiple decks, unstoppable, the lights in the corridors, in the staterooms, and all else, never go out! They burn brightly; some dynamos on that ship! But, then, how'd you film it without lights?

Doc Severinsen, the Johnny Carson longtime satellite on the night show, announced as the guest artist for the annual Summer Pops with the Lubbock Symphony Orchestra on June 23 at the Civic Center, has chickened out, as they say, and elected to cancel, barely a month before the date. No reason given but, if you'll remember his last visit here with his boss, Carson, for a Carson Show at the August inferno evening some years back, and the resultant national broadsides about the city by Carson in the national media, all nasty, the cancellation is not too surprising, Carson's retaliation, no doubt.

In Severinsen's place, we'll have a South Plains Fair standout attraction returning. It's Danny Davis and his Nashville Brass. That's an ideal choice for the informal, have-fun Pops Nite, summer-style.

Severinsen doesn't, apparently, need us. Well, we don't need him. Frankly, too, he's not that good. Just the tube has made him seem so, the old TV illusion.

Ticket information for the Summer Pops can be gained by calling a special line, 762-0339. Or, you can send your reservations by mail to P.O. Box 64132, Lubbock, Tx. 79464.

Happiness is a thing called circus and so that will be the key when Ringling Bros. and Barnum and Bailey return to the fold after a season or two absence, moving into the big Coliseum for three days in July. It opens its run with an 8 p.m. show Friday, July 13, and has three shows at 11 a.m., 3 p.m. and 8 p.m. Saturday the 14th, and closes with two performances at 1:30 and 5:30 p.m. Sunday the 15th.

The show by-passed Lubbock recently, but the silver train went through here last summer enroute to Albuquerque or El Paso, I saw it pass. But, it'll be nice having the big train at dock in the Santa Fe yards again come mid-June, no?

SW Bell . . .

Continued from page one

device and modern-day solar cells developed by Bell Labs are solid-state, light-sensitive components that have almost infinite telecommunications capabilities.

Bell's early efforts are being developed by the Bell System in more sophisticated ways. Haehnel said lightwaves from lasers are being transmitted through flexible glass fibers, carrying telephone, data and video transmissions.

"The success of a lightwave communications trial in Chicago is perhaps one of the major breakthroughs toward the way we'll be communicating in the near future," he said.

"But right now, a variety of telephones and services are available or on the horizon," Haehnel said. "One new instrument," he said, "is the Touch-a-Matic automatic dialing telephone."

Haehnel said, the Touch-a-Matic is available with 16 or 32 buttons. It allows a customer to dial frequently called local or long distance numbers at the touch of one button. The last button will automatically dial the previous number dialed by the customer.

"Innovations that have resulted from Bell System teamwork are stepping stones to the next plateau of equipment and services that today are but a gleam in the eyes of scientists and engineers," Haehnel said.

Solar Energy Seminars Set

Did you know that every home, including yours, is a passive solar home? It is! Some are good passive homes, others are not.

A good passive home reacts very well to local climatic and environmental conditions and thereby uses little energy for heating and cooling.

A home designed and built without regard for the natural setting is a poor passive home and could require large amounts of energy for heating and cooling.

Passive solar does not necessarily require any add-ons to your home such as collectors, heat exchangers or pumps.

A free educational program on

"Solar Energy For Your Home" with speakers and exhibits will be held on May 29th, 6:30 to 10:00 p.m., Hodges Center, 41st and University. For a free publication or more information about Solar Energy, please contact Mrs. Jane W. Cohen, Extension Agent, Home Energy Program, Texas Agricultural Extension Service, 4232 Boston Avenue, Lubbock, Texas 79413, telephone 792-4780.

Educational program conducted by the Texas Agricultural Extension Service serve people of all ages, regardless of socio-economic level, race, color, sex, religion, or national origin.

To keep your kitchen clear of the smell of cooking cabbage, cover the pot lid with a cloth wrung out in vinegar.

Clarence Darrow, the famed lawyer, went to law school for only one year. He finished his education on his own.

Notices

Notice is hereby given that on May 5, 1979 one 1952 Chevrolet Deluxe 2-door VIN #8866922, with accessories, was seized at Lubbock, Texas, for violation of 21 USC 881. Any person desiring to place the matter in U.S. District Court in order to contest the probable cause for such seizure, must file with the Special Agent in Charge, Drug Enforcement Administration, 4110 Rio Bravo, El Paso, Texas a claim and cost bond of \$250.00 with approved sureties, on or before June 12, 1979. Otherwise, the property will be administratively forfeited pursuant to 19 USC 1608, and will be disposed of according to law. Interested parties may file petitions for remission or mitigation of forfeiture with the Special Agent in Charge pursuant to 19 USC 1618 and 21 CFR 1316.79-1316.81 and 28 CFR 9.1-9.7 without filing Claim and Cost Bond. Case No. MB-79-X039. Special Agent in Charge Henry H. Washington.

THE STATE OF TEXAS

TO: Mary Helen Rosalez

Greeting:

You are commanded to appear by filing a written answer to the Petitioners petition at or before 10 o'clock A.M. of the first Monday after the expiration of 42 days from the date of issuance of this Citation, the same being Monday the 25th day of June, A.D. 1979 at or before 10 o'clock A.M., before the Honorable 99th Court of Lubbock County, at the Court House in Lubbock, Texas. Said Petitioners petition was filed on the 8th day of May, 1979.

The file number of said suit being No. 94,808.

The names of the parties in said suit are:

IN THE MATTER OF THE MARRIAGE OF

Johnny Rosalez as Petitioner and Mary Helen Rosalez as Respondent.

The nature of said suit being substantially as follows, to wit: Petitioner request the Court to order a division of the estate of Petitioner & Respondent in a manner that the Court deems just and right. Petitioner should be appointed Managing Conservator and Respondent should be ordered to make payments for

support of the child. Petitioner prays that the Court grant a divorce and decree.

If this Citation is not served within 90 days after the date of its issuance, it shall be returned unserved.

Issued this the 8th day of May 1979.

Given under my hand and seal of said Court, at office in Lubbock, Texas this the 8th day of May A.D., 1979.

Verna Boyd, District Clerk
Court Lubbock County,
Texas.

Lubbock

LUBBOCK CHAMBER OF COMMERCE AND BOARD OF CITY DEVELOPMENT

The Mayor has proclaimed June "CLEAN-UP, FIX-UP and PAINT-UP" time in Lubbock and Saturday is kick off day. Call the Marine Corps Reserve 8 a.m. till noon at 762-7613. They and Lubbock Explorer Scouts will haul away the litter that's making your property and your neighborhood look bad.

Keep Cool When Hot Days Hit

Throughout the nation Citizens Band radio operators have earned a reputation for passing on helpful information that has helped reduce traffic congestion and frequently has saved lives.

Looking toward a sudden hot spell that will bring on a rash of boiling radiators, Automotive Cooling System Institute offers some advice that might be disseminated via C.B. radio. If you're stuck on a limited access highway clogged with overheated cars, don't add to the confusion by causing your own car to boil over. Turn off your air conditioner! It can be worth the discomfort.

According to the Institute, some hot weather traffic tie-ups are self-perpetuating—one stalled car begets another. A marginal cooling system will overheat when it is subjected to abnormal periods of idling, especially when the added burden of an air conditioner is placed on the engine. CB'ers could help alleviate the situation by

advising fellow CB'ers to keep their cool through the "parking lot" (CB lingo for traffic jam).

To further reduce the burden on your cooling system, put your car in neutral while you're stopped and run the engine at slightly more than a fast idle so that the fan can pull extra air through the radiator.

And if your car does overheat, pull it off the road as quickly as possible and do not attempt to remove the radiator cap until the temperature has dropped. When you do remove the cap, do it with extreme caution, protecting yourself with a wad of rags. Scalding water could spew into your face.

Whether or not you have a CB radio in your car, the following advice from ACSI

can help you avoid engine overheating:

1. Give your car a good cooling system check-up before the hot weather hits. This should include a pressure test of the system plus a careful inspection of all belts, hoses, connections and the radiator pressure cap.

2. Have the cooling system flushed and install new antifreeze coolant if you have not had this done during the past year. Be sure you use the correct fifty-fifty solution of antifreeze and water. It's just as important in the summer as it is in the winter.

Your automotive service dealer can check these important cooling system components for you. Or, if you're a do-it-yourselfer, write to AUTOMOTIVE COOLING SYSTEM INSTITUTE for their new booklet, "A QUICK COURSE IN CAR CARE." Send a stamped, self-addressed number 10 envelope to the Institute at 222 Cedar Lane, Teaneck, N.J. 07666.

Roses Can Add Beauty Without Undue Effort

Sooner or later, everyone who has a garden thinks about growing roses. Unfortunately, many people don't ever get beyond the dreaming stage because they are overwhelmed by the thought that growing roses is beyond their ability.

Hogwash! Certainly, there are the usual sorts of demands made by a living plant—proper soil conditions, regular fertilizing, sufficient water, good drainage, occasional pruning, a regular program of insect and disease control. And certain varieties do require special pampering. There are, however, hundreds of different varieties of roses, and you can easily find several that will suit your needs, tastes and maintenance requirements.

According to the American Association of Nurserymen, this is an excellent time to add fragrant, colorful rose bushes to your

landscape. The nursery association is cooperating with other horticultural organizations in a nationwide "Year of the Rose" campaign in 1979, saluting that flower as a symbol of love, friendship and peace.

Although there are many varieties of roses, most can be placed into six basic classes. *Hybrid Teas* are hardy plants with long pointed buds whose blooms are noted for their fragrance and delicate color. *Floribunda* roses are known for their abundant flowers and adaptability to most any landscape purpose. *Grandiflora* roses combine the beauty of the Hybrid Tea with the free-flowering form

of the Floribunda. They are generally taller and harder than the Hybrid Tea. *Climbing* roses are not a type of rose per se but include all varieties which have long shoots or canes that can be trained to many forms and

purposes. *Miniature* roses are plants dwarfed in every respect, hardy, ever-blooming and used as potted plants both indoors and out. Finally, *Shrub* roses are a species of wild roses, extremely hardy, vigorous and easy to maintain.

Not only are there many kinds of roses, they may also be used in many different ways—to brighten a dull entryway, as a colorful border, climbing on a fence or privacy screen, growing in tubs to beautify a city garden, as a colorful foreground for an evergreen hedge, in a rock garden. Consult your local nursery garden center for the type of rose most appropriate to your particular needs and locations.

Don't let the fear of growing roses keep you from enjoying their beauty and fragrant odor. A plant that has survived the rigors and perils of this world for 60 million years is far tougher than you would believe. Take advantage of this "Year of the Rose" and add the "Queen of the Garden" to your garden.

Jeff raced around the flower bed, past the oak tree and caught it on his fingertips just as he reached the driveway.

A Great Pair of Hands.

I watched my son Tom throw the football in a long, clean spiral to his brother Jeff. Jeff raced around the flower bed, past the oak tree, and caught it on his fingertips just as he reached the driveway. What a pair of hands that kid had. If he tried, he could get a college football scholarship easily, I thought. Yes, he had a great pair of hands.

His mother had noticed that years ago. When he was just a baby she'd say, "Look at those long, sensitive fingers. He's going to be a great pianist someday." It was right around that time she insisted I join the Payroll Savings Plan and buy some U.S. Savings Bonds for the kids' education.

Well, I never tried to stop him from playing the piano. And his mother never kept him away from football, even though I'm sure she worried about those sensitive fingers. We let him make up his own mind about what he'd do with his life.

Later that same day, I could hear Jeff playing some complicated classical piece on the piano. And I knew I'd

better dig out those Bonds. They don't give football scholarships at those fancy music schools. And I had to admit that even though he was great at football, he could play the piano even better.

When Jeff left for school his mother said, "Well it'll cost a lot, but it'll be worth it." I nodded in agreement, but I really felt a lot better when young Tom said, "Don't worry, Dad, I'm going to State, and they give out a lot of football scholarships."

Then, I remembered. *That kid had a great arm.*

U.S. Savings Bonds can help you reach the goals in your life. So join the Payroll Savings Plan or buy Bonds where you bank. Then start saving for that education. New car. House. Or whatever makes you happy.

A Touch Of Mystery

Perfume isn't simply dabbed at pulse-spots anymore. Parfums Rochas—creators of *Mystere de Rochas*—suggest wearing the sophisticated, slightly naughty new fragrance as an invisible fashion accessory, letting it emphasize each aspect of your total look.

For instance, the perfume will add romantic contrast to a streamlined linen jacket when misted on a square of silk tucked rakishly in the pocket. To scent a little straw hat delightfully, flirt a bit of fragrance over the brim. At night, whooshed on the hem of your dancing dress and bare, sandalled ankles, you'll leave clouds of romance in your wake.

After the first beguiling whiff, *Mystere de Rochas* will invent daring new ways to add a touch of mystery to your life.
