Results Of County Water Ballot Announced

Jimmy Ross, Public Relations Manager for the High Plains Underground Water Conservation District No. 1, announced Wednesday the results of the annual election of the board of directors and County Committeemen which was held Tuesday.

1,300 voters in the over-all Water District went to the poll with the following unofficial results for this area. For district directors in the three county area consisting of Lamb, Cochran, and Hockley Counties, S. H. Schoenrock of Levelland received 88 votes; Roy Hickman of Morton, 68 votes; W. B. Jones of Anton, 48 votes; and K. B. Parish of Springlake, 45 votes.

County Committeemen in Lamb County are: Precinct 1: Jack Thomas of Olton.

Precinct 4: Lee Roy Fisher of Sudan.

The nominations for these elected District Directors and County Committeemen were made by the respective County Committees or by a petition signed by twenty-five qualified voters in the area involved.

All qualified voters living within the District were eligible to vote for the District Directors and County Committeemen. A qualified voter is one who has a valid Voter Registration Certificate for 1969, and resides within the District. However, due to a lack of information about the election, which was

to be supplied to the News-Sun by the Conservation District, a general confusion resulted with only 25 out of the areas qualified voters casting ballots in the election.

Ralph Rudd Undergoing Blood Changing Process

Ralph Rudd, Springlake Community resident, was in need of a large quantity of blood to replace his own, but due to the action by the Springlake Lions Club and ten local residents this problem has been eliminated for the present time.

Rudd entered John Sealy Hospital, Galveston Monday, January 5, and underwent surgery Friday morning. Doctors there found a condition necessitating the blood replacing process he is currently undergoing.

Should the need for more blood arise, persons may donate blood to Rudd at the Lubbock Blood Bank, specifying that the blood is to be donated to Ralph Rudd.

In the case that more than sufficient amounts of blood are obtained for Rudd, donors should request that the blood be put on reserve for their respective community, should the need for it arise at a later date.

County Demo Agent Defines Functions Of Day Care Centre

Editor: This is the first of a series of articles on Day Care Center to be submitted by Lady

Clare Phillips, Co. Home Demonstration Agent.

Considerations in the establishment of a non profit Day Care Center first of all, is a responsible governing body. This governing body is to determine the readiness of the community to accept and support (financially and otherwise) the new service. To determine the need of the community for the planned service, to set up a sound structure, including a strong representative governing body which will formulate policies for the service.

The term "day care" is generally used to cover a wide range of resources, or the facilities in which children spend a whole or part of the day away from their own homes when parents are obliged or wish to delegate responsibility of their care to someone else. It refers to the social service which supplements for the child, in accord-

Day care services should help children to develop as individuals who can enjoy and make their contribution to a democratic society.

The day care service, wherever it may be offered, should assume responsibility (1) For helping parents make a plan which meets the need of the particular child. (2) For supporting and strengthening the ability of the parents to fulfill their parental role and (3) For seeing that children have the conditions and experience which promote healthy development.

1970 Feed Grain Program Outlined

According to Lamar Aten at the Lamb County Agricultural Stabilization and Conservation Service (ASCS), producers in Lamb County will receive later this month the notice of their feed grain bases and explanation leaflet on the 1970 Feed Grain Program.

February 2 through March 20 is the sign-up period for the voluntary farm programs, including cotton, feed grains and wheat.

County farmers can figure approximate diversion payments by multiplying their yield times 48 cents a bushel (approximate, depending on rail rates.)

By multiplying 30 cents a bushel times the yield approximate price support figures can be determined.

Farmers will receive their notices before the sign-up starts.

This '70 Feed Grain Program will be much like the 1969 program, Aten said. Provisions of the '70 wheat and cotton programs were announced earlier. Details on the grain program were released December 29.

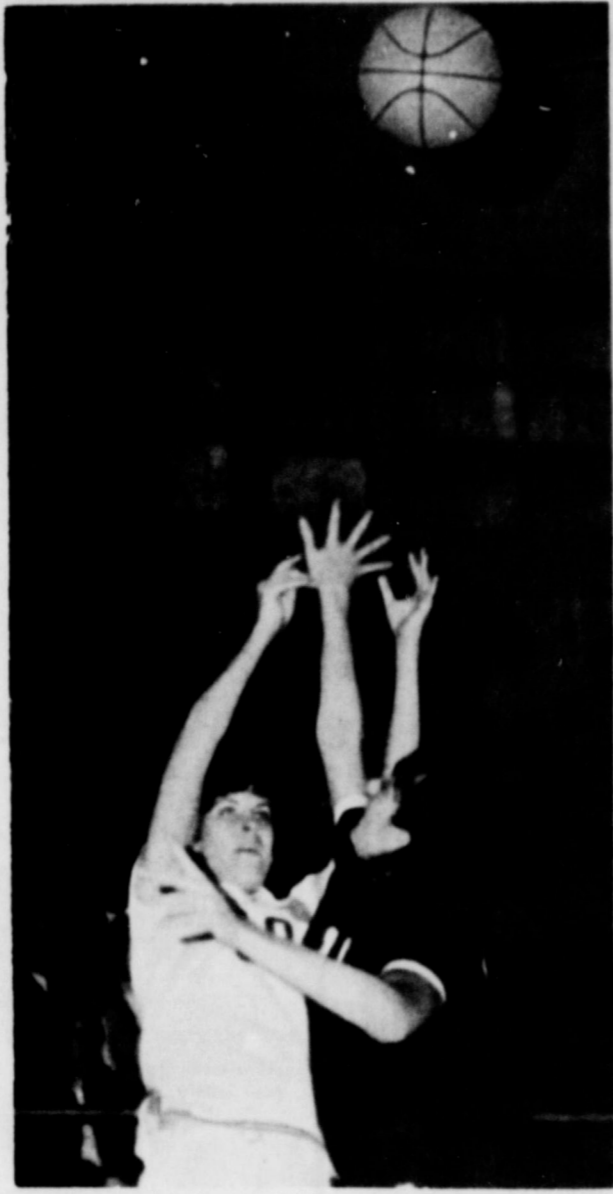

A minimum diversion at 20 per cent of a farm's feed grain base acreage will be required for program participation. No payment, except for small farms, will be made for this first 20 per cent diversion.

Maximum acreage that can be diverted for payment will be the larger of 30 per cent for a farm's feed grain base or 25 acres less the qualifying 20 per cent diversion. Payments will be made for additional diversion of corn, grain sorghum, and barley. Payment rate for additional diversion will be based on 40 per cent of the total county price support times the farms projected yield of the crops involved.

Upper limits will be established on the per-bushel rate which will be paid for the additional voluntary diversion of feed grain acres. The maximum payment for grain sorghum is 55 cent per bushel (not hundred weight); for corn, 60 cents per bushel; and for barley, 40 cents per bushel.

The national average price-support loan rates on feed grains will be the same as 1969, however, corn loan rates will be at \$1.08 per bushel, "No. 2" basis—which is equal to the 1969 level of \$1.05 for average quality.

The National average loan levels of the other feed grains will be: grain sorghum \$1.61 per hundred weight, barley, 83 cents per bushel; oats 63 cents per bushel; rye \$1.02 per bushel. Price-support payment rates will be corn at 30 cents per bushel.

Financial Facts

By Nolan Dudley

Do you anxiously look for errors in any paper money you get?

If you do, you're almost certainly wasting your time. Although error and freak notes and bills are extremely valuable to collectors, the chance of your finding one in circulation is negligible.

The Bureau of Engraving and Printing will occasionally make an error in printing a bill, but it'll probably never get past their strict inspection.

In case you're wondering about any mistakes that may have gotten through inspection and are now in collections, here are a few of the types:

Some bills have been printed without the seal or the seal only partly showing. Serial numbers have been missing, incomplete or different on the same notes. Seals have been printed upside

down and different denominations have appeared on the same note.

hel. This payment is arrived at by multiplying the per bushel price-support payment times the farms projected yield, times, the smaller of the planted acreage of 50 per cent of the farms feed grain base.

Farms with a feed grain base of 25 acres or less will be able to qualify for payment on the first 20 per cent of it's diverted acreage, with the payment rates times projected yield. Producers with feed grain bases of up to 125 acres have the option of temporarily reducing their base to 25 acres to become eligible for the small farm provisions. In cases of this nature, no corn, grain sorghum, or barley is to be planted for harvest on the farm and the temporary 25 acre feed grain base must be put to conserving uses.

Announcement will be made prior to sign-up time on production of substitute crops in diverted acres.

SOAP and ELECTRICITY

Blackouts and Outages

■ There's a difference between soap and electricity. There's a difference between blackouts and outages. The famous soap prides itself on being 99 and 44/100% pure. That's pretty close to perfect. isn't it. But does it surprise you when we tell you that electricity—the electricity we provide for you—that you use here has a reliability record of 99.997% . . . which is almost 100% pure. That's the difference between soap and the electricity you use. But, you say, what about blackouts? Well, it's this way. We define a blackout as a shortage of power. A situation when you, as a group of people, are using more electricity than the equipment that generates, transmits and distributes it can provide.

■ We don't have that here. We will not have that in 1970 here. Sure, there might be some isolated service interruptions which we call outages. Despite our 99.997% reliability record, there still may be some lightning strikes on a transformer, or a squirrel getting confused in a substation, or a careless driver knocking down some of our equipment, and, yes . . . we may have an equipment failure or a human failure . . . we're still not perfect . . . even though we try to be. In most cases we'll have your power back within the hour.

■ We're concerned with reliability and with the cost of our service. That's why we've averaged spending \$20 million a year on new, modern and more efficient equipment. This year we'll invest another \$25 million. We expect to give you all the electric power you need with more purity than the famous soap and at the lowest possible cost. That's our pledge for 1970.

The Town and Country Study Club met in the M.E. Kelley home Thursday evening to observe the 20th Anniversary of the Club.

She told of how she drove to Lubbock after working hours, to buy a hat for the first meeting held in September 1950 when the Club was entertaining as their guest Mrs. J. W. Walker of Plainview. Everyone wore hats and gloves in those days that is, if they were properly dressed, she said.

The projects of the Club have been numerous over the span of years. Most outstanding in the field of education, is the fact that each year the group gives a \$250 scholarship to a deserving senior boy or girl from Springlake-Earth High School. They also present trophies for valedictorian and salutatorian of Junior High School. The Club has aided the local Boy Scouts and have currently expanded their program to include the Girl Scouts. sent to the State Mental Hospital, Wichita Falls. The Club's District Project is Girlstown U.S.A. Whiteface. They have presented various canned goods to Girlstown and have also planted a tree there. State Projects contributed to are Pennies for Art, Latin American and Musical Penny Scholarship funds, Care and F. T. W. C. Headquarters.

The programs for the meetings of the Club are outstanding and educational, much research goes into their preparation. Each year, programs on "Texas Americanism, Education and Federation", are given. These programs are required by the Texas Federation. Other programs are based on Departments of Education, Conservation, Fine Arts, "Home Life," Public and International Affairs and Texas Heritage. These are presented in various ways such as panels, round table, guest speakers, playlets, book reviews, skits, and films.

The local Club meets the second and fourth Thursdays, September through May, at 7:30 p.m. The meetings are conducted in members homes unless special meetings are held. Charter members of the Club are Mrs. J. L. Hinson, Mrs. N. Ray Kelley, and Mrs. M. E. Kelley.

MEATS FOR THE 70's--One of the major problems to be overcome in the merchandizing of frozen meats, says Frank Orts, Extension meats specialist, is acceptance of the product by American homemakers. Products already on the market have after trial usage shown substantial growth in sales, he says. The marketing of frozen meats can lead to economies for everyone, he believes.

This God—his way is perfect.—(II Sam. 22:30).

Life is lived moment by moment. The secret of getting the most out of this particular moment lies in our viewpoint. In doing first things first, and important tasks that should be done, we feel a sense of progress and purpose. This moment blesses us as we look for the blessing in it, as we relate it to the whole of our day, realizing it is important, for it is the moment we are living.

It, Rash Developes

San Mateo, California - As more and more men smell love-ly, some develop rashes in the beard area.

A dermatologist, Dr. Ernst Epstein of the San Mateo Medical Clinic, says the two facts are definitely linked. Whatever the label, whether pre-shave lotion, after-shave lotion, all-purpose lotion or cologne, they all contain perfumes which bring out the rash in some allergic men, particularly after shaving has irritated and sensitized their skin.

Even men who swear they've sworn off shaving lotions on doctor's orders are suspect, Dr. Epstein says. One patient "observed" the ban by applying the pre-shave lotion to his electric razor instead of directly to his skin. Another stopped buying lotions but continued to use a free sample!

Two Farmers To Serve On Anti-Hail Board

W. B. (Bill) Jones and W. E. (Ed) Mitchell, two Lamb County farmers, were elected to the board of directors for a temporary organization to get a test pilot hail suppression research program underway for a 3,000 square mile High Plains area.

The main purpose of the directors will be to see if there is sufficient interest in the county to go into the test pilot phase of the program.

Steps may later be taken to make the organization permanent if the search for funds and

other developments prove to be successful.

The pilot research program will cost approximately \$14,000 annually over a three-year period, according to Donald W. Duckering, executive assistant of Atmospheric Inc., Fresno, who was present at a meeting held in Plainview to go deeper into the mechanics of the cloud seeding program that can prevent 50 to 70 per cent of the damaging hail storms that occur in this area each year.

Both men elected to the board of directors for this organization are farmers in the Spade Community.

NOTICE TO PARENTS Of School Age Children

The school census is being taken during the month of January this year. All children who are six years old on or before Sept. 1, 1970 but will not be 18 or older on or before that same date should be counted in this census. It is very important that all children six to 18 years be counted in this census. The child should be counted even though he may not be in school and even though he or she may be married. If you, as a parent, have not received and filled out a school census blank on or before January 31 you are being overlooked and should do one of the following:
1. Phone the school office and ask for a census blank.
2. Call in person at the School Tax Office and get a census blank and fill it out. Remember, if your child will be six years old next September 1, he should be counted in the census now, even though he is not in school now. If he is six but not 18 or older next September 1 he should be counted now. All children from six to 18 should be counted. The six year olds who start next September to school are the ones most overlooked in the census. Failure to count them costs the school and taxpayers extra money. Please help us not to overlook anyone.

Don't Wait 'Till Feb. 1st To Turn Your Blanks In - As That Will Be Too Late
