A COMPLAINT

The Earth News feels this should be passed on to you. A fellow came into the News office Wednesday and said he wished to register a complaint. I ask him what he had on his mind and he replied, well "I was driving down the street, here in Earth, and drove off into one of those holes, the water got into my headlights and burned them out."

He went on to say, "I think we have fooled around long enough getting these streets fixed." To which I whole heartedly agree. There have been several men in town trying to get something done about this. There have been easements drawn up to be signed by the property owners to get this situation corrected. But Earth not being as awfully much different from any other American City has a few who just can't bring themselves to sign them.

The Highway Department has agreed to do the paving of the Main street all the way through Earth. So it seems to me that Earth should get behind this thing and get their part of the job done.

Plans are to contact everyone in Earth and surrounding areas within the next two weeks. So if YOU have not been contacted and wish to buy stock, or wish to donate to the hospital, see one of the following men:

Marcus Messer, Marvin Ellis, Buddy Adrian, A. D. Taylor, Delma McCarty, Bill Beasley, Jarvis Anzeley, Ross Middleton, Paul Wood, Herahell Patterson, Pat McCord and Bob Armstrong.

These will be a combined meeting of the Earth Business Enterprise Inc. and the Earth Telephone Association next Monday night at 8:00 p.m.

Mrs. Raby Kellog Suffers Second Degree Burns

Mr. and Mrs. Raby Kellog and family were visiting in Gatesville, Texas, Friday, May 6, when Mrs. Kellog received second degree steam burns.

Mrs. Kellog was sterilizing baby bottles in a pressure cooker when she received the burns. She had left a crack between the lid and the cooker, but somehow the lid was placed tight, causing steam to accumulate. When she removed the lid, she was burned from the scalding steam. Also her hands were very badly burned.

She is in the Gatesville Hospital and wont be able to return home for at least a week after she is released from the hospital. As yet they don't know when that will be.

Cards and letters can be sent to Mrs. Kellog in care of her brother-in-law, Mr. V. R. Lee. He is a postal clerk there and will see that she receives all mail.

Nail Down THE TOP SOIL!

You can do it with the modern soil conservation practices which have been developed to help control the damaging effects of raging waters and destructive winds. Irrigation, too, plays its part in soil conservation. Winter irrigation, for example, lets the ground store up water for summer use without excess loss by evaporation. In addition, more weeds are dormant in winter and so do not have a chance to multiply. Get the facts from your soil conservation office or any Public Service manager. Winter irrigation pays!

DOES YOUR SOIL STAND THE MOISTURE TEST?
That's the title of a pamphlet recently printed by this company which gives an insight into simple and effective soil moisture testing methods. If you haven't yet seen a copy drop by your Public Service office... your Public Service manager has a copy for you. No obligation, of course!
