## Ammendments Do Not Carry Area

The proposed ammendments failed to carry the local area in Tuesday's election. Ammmendment #1 was a proposal to authorize the state to increase its contributions to the teachers and state employee retirement funds from 6 to 10 per cent. Ammmendment #2 would increase legislator's base salaries from \$400 to \$600 a month, increase daily personal expense

allowance during legislative sessions from \$12 to \$30 a day, and raise travel allowance from 10 to 16 cents a mile. There were 153 votes cast in Earth. Ammmendment #1-For 73 Against-79. Ammmendment #2-For 61 and Against-89. In Springlake, 28 votes were cast. Ammmendment #1-For 10 Against-18. Ammmendment #2-For 10, Against-18.

There were 25 votes cast in the Pleasant Valley area. Ammmendment #1-For 7, Against-18. Ammmendment #2-For 8, Against 17. The ammendments did carry state wide. Approximately 70% of the small number of voters who went to the polls approved the retirement benefits increase while nearly 60 per cent approved of the pay raise for legislators.

Demand for quality cotton continues to increase. Not only is the use of natural fiber rebounding, but the by-product market is also expanding. Since average cottonseed meal is at least 41 percent protein, it is becoming increasingly important as a primary feed for cattle, sheep and horses.

Expeller, Hydraulic and Solvent are processes used to produce meal or cake from raw cottonseed. Expeller and Hydraulic processes leave about 5 percent fat content in processed meal while the Solvent process leaves less than 1-1/2 percent.

Research now underway may result in an economically feasible method of limiting Gossypol (a cottonseed toxin) content to low enough levels to make cottonseed meal a primary protein supplement for swine and poultry. Success could significantly increase this by-product demand.
