lettermen, the Memphis Cyclone football team prepared today to take the field for their initial workouts before opening the 1939 grid season at Cyclone stadium September 15.

The Cyclone has received orders by remote control from Coach A. B. (Red) Murphy, who is scheduled to perform Monday at the Cotton Bowl in Dallas in the annual "dream game," to report for practice at 8 o'clock Friday morning. Assistant Coach W. B. Dees will be on hand at the high school gymnasium at that time to ssue equipment and conduct the first drill of the season.

Murphy plans to arrive in Memphis next Tuesday following the all-star game at Dallas to take control of his charges. Together with Dees, he will inaugurate an intensive training campaign in an attempt to whip the squad into shape in time for their season's opener against Mobeetie here on

Despite a suicide schedule, the outlook for the 1939 edition of the Cyclone is far from dark, and the Memphis lads are expected to make a strong bid for the title in the new Class A district. Coach Dees refused to make any rash predictions at this early date, said that head coach Murphy appeared well-pleased with the outlook, and son. finally admitted that the pre-sea-

# he Safety Sensation of 1939! restone CHAMPION

The Only Tire Made with the NEW SAFETY-LOCK CORD BODY and NEW GEAR-GRIP TREAD ...

NEVER before in our experience has a tire met with such instant and unanimous approval as the new Firestone Champion Tire. It's the Safety Sensation of 1939! Our customers have

started a word-of-mouth campaign that is making this the biggest selling tire we've ever had. Motor car manufacturers have been so impressed by its superior performance that they have adopted it for their 1939 models.

Why? Because the Firestone Champion Tire is an entirely new achievement in safety engineering.

Stronger Cord Body. This is accomplished first, by the use of a completely new type of tire cord called "Safety-Lock," in which the cotton fibers are more compactly interwoven to assure cooler running and provide greater strength. Then, the fibers in each individual cord, the cords in each ply and the plies themselves, are all securely locked together by a new and advanced Firestone process of Gum-Dipping which provides amazingly greater strength. And greater strength means greater safety.

More Non-Skid Mileage. The new Safety-Lock cord construction provides the extra strength needed for the use of the new, thicker, tougher, deeper Firestone Gear-Grip tread which delivers remarkably longer non-skid mileage. This sensational new tread is called "Gear-Grip" because of its unique design - it has more than 3,000 sharp-edged angles which grip the road with a sure-footed hold to protect against skidding and assure a safe stop:

Drive in today and equip your car with a new set of Firestone Champion Tires - the only tires made that are safety-proved on the speedway for your protection on the highway.

Firestone LIFE PROTECTOR This amazing new Firestone development makes blowout as

harmless as a slow

Should a blowout Firestone Safety-Valve holds sufficient air in the inner compartment to it is brought to a safe stop.

KEEP DEMOCRACY SAFE

DRESIDENT ROOSEVELT HAS PLEDGED to the American people that his administration will make every effort to keep this nation out of the conflict that is threatening to engulf all of Europe, and by his very words has recognized a startling fact that all Americans must realize . . . that there is danger that the United States may be drawn in.

For many months floods of propaganda have been pouring into the country, and already tales of alleged German atrocities on the battle fronts are being spread. If the war continues, these stories . . . calculated to rouse the fighting ire of every true American .. may be expected to increase an hundred-fold. The

parallel between 1914 and 1939 is too startling for comfort.

Many who recall the early days of the last war ... remembering how swiftly public opinion may change and war hysteria be aroused by the insiduous forces of propaganda . . . may feel a premonitory shudder as the president makes his proclamation to assure the American people that they will be kept free from the horrors of another foreign war. Roosevelt's pledge, undoubtedly made in all sincerity, seems but the echo of another pledge made by another president twenty-five years ago!

If there is any security for America today, any immunity from foreign entanglement, it must lie, not! with the president or with congress or with the diplomats in Washington, but in a sane and thoughtful balance of public opinion throughout the United returned from a trip to Amarillo, States. The minute that public opinion begins to sway too far toward either side, this nation is in immediate!

danger of war.

In viewing the events which will occur in Europe during the next few months, Americans should take into consideration the radical differences between the fundamental concepts of life in Europe and in Cecil Adams Friday night. The ideals of freedom and democracy which are an integral part of the American heritage do not exist in Europe and never have existed there. The weight of public opinion alone in a democratic nation can swing the balance to war or peace.

The best way for America to make the World safe for Democracy is to keep this Democracy safe for the World!
