HALL COUNTY COMES BACK

NINETEEN HUNDRED THIRTY-SEVEN - the

of the year 1937 a few years hence.

We were talking to a man Sunday who had not been in this country in some time. But he used to live in Memphis and was a successful ginner, almost coining the money in the boom days of the late '20's. And this man, after riding around over the country hereabouts and looking at the crops, predicted that this fall will see a return of good times. "This is the only country I ever saw that could be broke for several years and then 'make back' in a single year," he said. And he is right. For one good crop at a fair price and the Hall sector can wipe off the debts of several hard years.

the debts of several hard years.

And we, too, believe that this fall will ree a return ton, of good times, with Hall County fields running over with cotton and feed. We took a trip over a good part of the county last week-end, and we say without hesitation that prospects look more promising than they have in years.

Hall County is a beautiful county at almost any time of the year, but at this time it looks especially good. Large fields of green cotton, with white and red blooms showing low in the foliage, and wide areas of maturing grain speak promise. And a country lives on hope. Farm houses and buildings at this time are "run down" a little from the depression years, but good crops and good prices will see a building boom 1910; G. L. Reach 1910; L.A. Messer, 1905; J. J. H. EASY ON THE EDITORIAL WRITERS

F RECKLESS AND DRUNKEN DRIVING has a good point it is the fact that it furnishes editorial writers with a world of material with which to write scathing editorials.

For Instance, we can always point out that:

Four out of every five automobile accidents occur on dry roads in clear weather. Four out of every five automobile accidents involve cars driving straight ahead.

Here is the proof of the disregard for every rule of courtesy and safety that characterizes the reckless or incompetent driver. He overestimates the "safety factors" of good roads and modern cars. A straight highway and a clear day act as bait to make him "open her up"-with the result that the undertakers get about 37,000 new accounts each year.

Here is a fact you might think over the next time you feel the urge to step on it: At 20 miles per hour, one accident in 61 is fatal, while at 50 or more miles per hour, one accident in every 11 produces a corpse.

PANHANDLE HERALD HAS SPECIAL

THE PANHANDLE HERALD published a special edition last week in observance of the 50th birthday aniversary of the Herald. There were 48 pages in the edition, which was the largest ever published in Panhandle. Much praise is due David M. Warren, publisher, and his able co-workers.

Perfect understanding of the requirements of thoughtful direction, coupled with an earnest desire to do our work in the best possible manner results in distinctive, beautiful service.

We realize that the sentiment involved in a funeral service is precious and our every act is guided by that thought.
