

# The Memphis Democrat

Section One

MEMPHIS, HALL COUNTY, TEXAS, THURSDAY, DEC. 8, 1927

NUMBER 24

## ROLL SPURS MEMBERS TOWARD VICTORY IN BIG RACE. SECOND LAP ENDS 9 P. M. MONDAY

Now on For Best Remaining Offer  
Credits of Entire Campaign. All  
Members on Toes for Honors and  
Credits.

glory, and EXTRA CREDITS, by the hundreds  
what the vital second period of the big race holds  
wide-awake members of the Democrat's Opportun-

portunity to pile up extra credits by hundreds of  
to top the roll of honor each day or at least  
it, which in itself means extra bonus credits of  
amount, is the feature of the second lap of the big  
comes to a close promptly on the stroke of 9  
day night, December 12.

best remaining offer  
of the entire cam-  
for each and every  
of subscriptions  
9 p. m. Monday.

will subscriptions  
such as they do now  
of 9 on next  
You have seen one  
extra credits pass into  
close of the first  
Monday night and again  
Monday night you  
second largest offer  
also become his-

this second best of-  
history without drag-  
to pile up all the  
humanly possible.  
subscriptions which  
for the effort in this  
someone else when  
much to you, RIGHT

if you are working  
credits have already  
ing and they will  
going DOWN, Down,  
Remember that never again will  
subscriptions count as they do  
RIGHT NOW and that the secret  
of winning is—PLUG Plug, plug  
and then get out and PLUG some  
more.

Hard work today will cinch for  
you the top of the honor roll and  
a report of your very best ef-  
forts will assure you a place on it  
and at the same time you are  
piling up extra credits at the rate  
of 100,000 for each \$20 club you  
turn in up to 9 p. m. Monday

Club headquarters are open  
from 9 a. m. to 8 p. m. every day  
and if you are too busy getting  
em to get down until after supper  
to make your report—make it  
then—but—  
MAKE IT AND MAKE IT  
EVERY DAY.

DEMOCRAT SUBSCRIPTION  
CAMPAIGN PRIZES HAVE  
ALL BEEN PAID FOR

The dealers, from whom the  
Democrat purchased the prizes to  
be given in the subscription cam-  
paign, have been given certified  
checks in payment of the prizes.  
If in doubt, ask the dealers.

MEMPHIS MERCHANT  
WEDS IN FORT WORTH

Mr. O. N. Womack, of the  
Handy-Army store of this city, and  
Miss Mary Agnes Harmon of  
Lampasas, were united in marriage  
Saturday, December 3, at 3 p. m.  
This splendid young couple will  
make their home in this city.

THE CLOSE OF THE SECOND LAP

will be found in alphabetical order, the names of  
Opportunity Club members together with all credits  
anted for publication up to and including Wed-  
nesday 30.

DISTRICT NO. 1

	Credits
Gottingham	250,900
Stuckey	954,750
and Leslie	800,000
ins	955,000

DISTRICT NO. 2

	Credits
Brocroft, Alaska	225,950

Wolf, Webster	790,900

shows just who is working and who really means  
your favorite NOW as subscriptions count more  
they ever will again during the race.  
WILL YOU BE IN THE NEXT LIST?  
ONLY FOUR MORE DAYS  
\$10,000 Extra Credit Offer for Each \$20.00 Club  
Monday Night is the Last Call for These Clubs!

## TWO LYCEUM NUMBERS HERE IN FEW DAYS

Two lyceum numbers are com-  
ing close together at this time.  
The first comes this Thursday  
night and is the mystery show  
given by C. W. Kringsberg, as-  
sisted by Miss Esmerelda Martin,  
in which he reproduces the myster-  
ies of the seance room and exposes  
the tricks of the most famous  
mediums.

The next number will be Thurs-  
day night of next week and will  
be a dramatic attraction, "Three  
Wise Fools." This promises also  
to be a real treat.

The Lyceum course is sponsored  
by the Delphin Club and the  
numbers thus far have been ex-  
ceptionally good.

## MEMPHIS' FIRST COTTON MILL ON DISPLAY

The Postex Cotton Mill of  
Post, Texas, is shown in miniature  
form in the show window of the  
Memphis Mercantile Co. and is at-  
tracting much attention. It very  
vividly portrays the different  
stages of manufacturing cotton  
into cloth, taking it step by step,  
and one gets a good idea how cloth  
is made by watching the pictures  
as they appear. It shows how the  
raw cotton is taken into the mill,  
and at the end of the display is  
shown the finished product of  
Garza sheets and pillow tubes.

This model has been shown all  
over the United States and is now  
on an extensive tour of Texas.  
The Postex Mills demonstrate very  
thoroughly that Texas can have  
mills and successfully compete  
with any other state of the East  
or South.

## ZINCK BUYS CRAWFORD SERVICE STATION

H. L. Zinck, formerly owner of  
the Texas Station, Main and Tenth,  
has purchased Crawford's Ser-  
vice Station from Hugh Crawford.  
M. R. Moore is the new owner of  
the Texas Station.

## LOCAL THEATRE REMODELING BUILDING

Extensive improvements are be-  
ing made to the Palace Theatre  
from front door to back and this  
modern movie house will present  
even a more distinct metropolitan  
appearance in a few days.

The entire front is being re-  
painted and French doors have  
replaced the old swinging doors.  
Inside an entirely different color  
scheme is being carried out in  
variegated stipple effect. Spanish  
designs will predominate in the  
foyer and polychrome light fix-  
tures will grace the walls. In the  
main auditorium the stippled de-  
signs are centered in large panels  
on both side walls. Indirect light-  
ing fixtures that will furnish  
ample illumination yet not inter-  
fere with the projection of pic-  
tures will be installed.

The screen will be set back  
several feet toward the rear of  
the stage, with heavy draperies on  
either side. Heavy new carpets  
will be put down in the aisles.  
Elaborate improvements, which  
Manager L. R. Adams estimates  
will cost \$5,000, include the thor-  
ough remodeling of the balcony,  
also, King Scenic Company of  
Dallas is in charge of the work.

## GOOSE HUNT DEVELOPS INTO "WILD GOOSE CHASE"

Joe Haas, C. E. Jameson and  
Herbert Estes left Monday for  
Briscoe county on their annual  
goose hunt. They returned Wed-  
nesday and reported geese were  
conspicuous by their absence but  
they dealt misery to a few ducks.

## NO. 2 ELEVEN HOURS LATE

South bound Denver train No.  
2, due in Memphis at 7:10 a. m.,  
did not arrive Wednesday until  
6:20 p. m. on account of a burn-  
ed out bridge near Trinidad.  
The late train broke records be-  
tween Amarillo and Memphis,  
making the 90 miles in 2 hours.

## COLD WEATHER HITS THIS SECTION

A gripping blizzard, as some  
would call it, came Tuesday night  
breazing out of the home of the  
Aurora Borealis on the Arctic  
Ocean, picking up loose sand and  
dust as it came, struck with the  
ferocity of a tiger and fastened  
its frozen fangs upon everything  
that had warmth, catching many  
off guard and as a result many  
water pipes were frozen and the  
plumbers have been very busy  
bringing order out of chaos.

The temperature dropped to  
about 10 degrees above zero—the  
coldest by far of any spell of the  
season. All day Wednesday and  
night and to this Thursday the  
cold continued with unrelenting  
grasp. Wednesday night was  
colder than the night before, but  
no wind was blowing.

No one has any kick coming,  
for the weather throughout the  
Fall was very mild and dry, giv-  
ing crops plenty of time to ma-  
ture and the farmers time to  
gather the great bulk of their  
crops.

## PARENT TEACHERS TO HAVE MEETING NEXT THURSDAY

The next meeting of the Parent-  
Teachers Association will be held  
next Thursday at 3 p. m. at the  
high school auditorium. Miss  
Griggs will present a Christmas  
program at that time. Mrs. M. J.  
Draper, president of the associa-  
tion requests the presence of  
every member and all others who  
are interested in the school.

## ROTARIAN OF CHILDRESS WAS SPEAKER HERE

J. M. Crawford, past president  
of the Childress Rotary Club,  
spoke at the luncheon here Tues-  
day on the important phases of  
Rotary. His speech was well pre-  
sented and highly enjoyed by all  
present. He certainly has grasped  
the ideals of Rotary and pre-  
sents them in a masterly way.

Childress and Memphis Rotary  
clubs are exchanging speakers  
every few weeks. Dr. J. A. Odum  
spoke to the Childress club Wed-  
nesday of last week. These ex-  
changes will doubtless result in  
friendship between the two clubs.

Mrs. Bill Howard presented a  
short program at the luncheon in  
which five of her pupils appeared  
in music, song and readings and  
greatly enjoyed by those present.

## TWO THOUSAND VISIT PARKER MOTOR CO.

Two thousand people visited  
the Parker Motor Co. last Fri-  
day and Saturday, according to  
Mr. Earl Parker, and all were  
anxious to learn something of the  
New Ford. While no car was on  
display the dealers had pictures  
and particulars of the car, which  
they showed to all.

Mr. Parker believes they will  
have a car on display in the next  
few days. He says he has never  
seen as much interest manifested  
in any car as is being manifested  
in the New Ford, which is yet  
to be seen by local citizens, but  
has been seen in the larger cities.

## Santa Claus Urges Children to Write Him In Care of The Democrat Not Later Than December 10th

Mr. J. C. Wells,  
Memphis Democrat,  
Memphis, Texas.

Dear Editor:  
Please tell Hall County children that they must  
write me in your care by Saturday, December 10  
in order that I may have ample time to bring every-  
thing they want. I understand you are planning to  
forward the letters to me by air mail as well as  
publish them in The Democrat.

This has certainly been a busy season for me.  
I have never in all my life seen so many letters from  
children who declare they've been good all year  
and never cause their parents any trouble. So far I  
don't know of a single child to whom I'll have to  
take switches and ashes.

Accept my thanks for your co-operation, which  
has been a wonderful help to me this year. I have  
already packed a box of fine cigars in my bag for  
you.

Yours for a Merry Christmas,  
*Santa Claus*

## HALL COUNTY HOPES TO TAKE FIRST PRIZE WITH POULTRY EXHIBIT AT TRI-STATE SHOW

Placed Second Last Year but Won First Two  
Preceding Years; Dozen Poultry Raisers  
Will Exhibit Fine Birds.

## VOTE BONDS IN WHEELER FOR PAVED ROADS

Wheeler county voted nearly a  
million dollars worth of road bonds  
last week, and with the aid of  
the State and Federal govern-  
ments, will be building some hard  
surfaced roads through the county.

Childress, Collingsworth and  
Donley counties are planning to  
vote bonds in the near future,  
which will make this section of  
the Panhandle the leading sec-  
tion in the matter of hard sur-  
faced roads.

## NEW OFFICERS NAMED BY WELLINGTON CHAMBER

Wellington, Dec. 7.—New of-  
ficers and directors of the Wel-  
lington chamber of commerce  
were installed Monday in the reg-  
ular monthly meeting. The new  
officers are: S. R. Pinkston, presi-  
dent; M. M. Kern, vice president;  
W. H. Lynn, H. Deskins Wells,  
Chas. D. Slay, Lee C. O'Neil, T.  
E. Benge, Henry Covke and J. D.  
Wilson, directors. Mr. Pinkston  
was elected to serve his second  
term as president.

## OFFICIALS SPEAK AT COLORED FOLKS MEETING SUNDAY

Judge A. C. Hoffman and May-  
or F. N. Foxhall were invited to  
Sunshine Addition last Sunday  
afternoon when the colored citi-  
zens of that section of town held  
union services. Both were called  
upon for talks and responded.  
From accounts received their talks  
were well received and will likely  
prove beneficial.

## CENTER FOUND DEAD AT HOME

I. B. Center, 73, was found  
dead at his home in the east part  
of town Monday evening at 5:30.  
Death was due to natural causes,  
according to the coroner's ver-  
dict, and the aged man had ap-  
parently been dead about 24  
hours. He was living alone and  
was evidently reading when death  
struck him.

A note found in Center's pocket  
contained instructions to notify  
A. J. Weatherly of Parnell in  
case of any accident.

## JUDGE MOSS BUYS DOWN TOWN PROPERTY

Judge A. S. Moss has pur-  
chased the two corner lots at Fifth  
and Noel streets from Cicero Smith  
Lumber Company.  
Several frame buildings now oc-  
cupy the property, but Mr. Moss  
plans to erect a modern building  
on this choice site within the next  
few months. He has not com-  
pleted plans and no details as to  
the type of structure he will build  
are yet available.

## McNALLY'S MOTHER DIES AT GODLEY

M. E. McNally's mother, age 74  
years, passed away at her home  
at Godley, Texas, Wednesday  
morning. She leaves a husband  
and eight children, all of whom  
were present at the funeral.  
Mr. McNally received a mes-  
sage Tuesday to the effect that  
his mother was very low. He and  
Mrs. McNally and their son M.  
E. Jr. left that night for Godley.  
He has the sympathy of his many  
friends here in the loss of his  
mother.

## MRS. B. F. MCKELVY DIES IN OKLAHOMA

Mrs. B. F. McKelvy, aged 80  
years, died at the home of her  
daughter in Pauls Valley, Okla-  
homa, last Sunday at 12:15 p. m.,  
and the funeral was held Tues-  
day afternoon with burial at Ada,  
Okla. She leaves a husband, one  
daughter, Mrs. Ethel Bottoms of  
Pauls Valley, and a son, J. M.  
McKelvy of this city.

Mr. and Mrs. McKelvy and son  
George left immediately upon re-  
ceipt of the death message for  
Pauls Valley to attend the fune-  
ral. His many friends here sym-  
pathize with him in the loss of  
his dearest friend.

## YOUNG MEMPHIS MAN MAY LOSE EYESIGHT

Leonard Wilson, 23, who lives  
one mile southwest of town, may  
lose his left eye as the result of  
an accident Wednesday evening.  
Wilson had tied a mule to a  
post and was injured when the  
animal jerked loose, swinging the  
knotted end of the rope against  
his eye. He was taken to Dallas  
on the 8:12 train last night and  
telegraphic advice Thursday  
noon stated there was yet some  
hope of saving his eye. Local doc-  
tors, however, were of the opinion  
that the injured eyeball will have  
to be removed.

## RETURNS FROM VISIT WITH RELATIVES IN KANSAS AND MISSOURI

Mrs. W. B. Quigley returned  
Wednesday of last week from a  
visit with relatives in Kansas City  
and Eureka, Kansas. Mrs. Quig-  
ley and daughter, Mrs. Horace  
Tarver, who attended the foot-  
ball game between S. M. U. and  
T. C. U. at Fort Worth drove to  
Eureka and Mrs. Quigley returned  
ohme with them.

## QUARTETTE AND ORCHESTRA IS COMING HERE

The Stamps Quartet and String-  
ed Orchestra will give a concert  
at the high school auditorium  
Tuesday evening, December 13,  
at 7:30, sponsored by the Miz-  
pah Auxiliary of the Presbyterian  
church.  
This quartet comes highly rec-  
ommended by the Singers Confer-  
ence just held at Childress. The  
quartet presents a class of music  
that everybody will enjoy, includ-  
ing sacred, classical, and popular  
songs, while the orchestra will  
feature the compositions of the  
Owens Brothers. Humorous read-  
ings and other stunts by the re-  
nowned comedian, Hub Owens,  
will be worth the price of ad-  
mission.

Tickets can be secured from  
Mrs. L. D. Pierce Jr., president,  
Miss Justine Keeling, press re-  
porter, and the following com-  
mittee: Mesdames Thos. E. Noel,  
James E. Bass and John P.  
at 25 and 35 cents. The  
party is very fortunate in  
these high class musicians.

# WIN

## Honors, Glory and Extra Credits!

### GET ON THE ROLL OF HONOR

100,000 Extra Credits

will be issued on each club of \$20.00 worth of subscriptions (either new or old, or both) turned in up to 9 p. m., Monday, December 12.

"A Club a Day"

will keep the blues away on prize day.

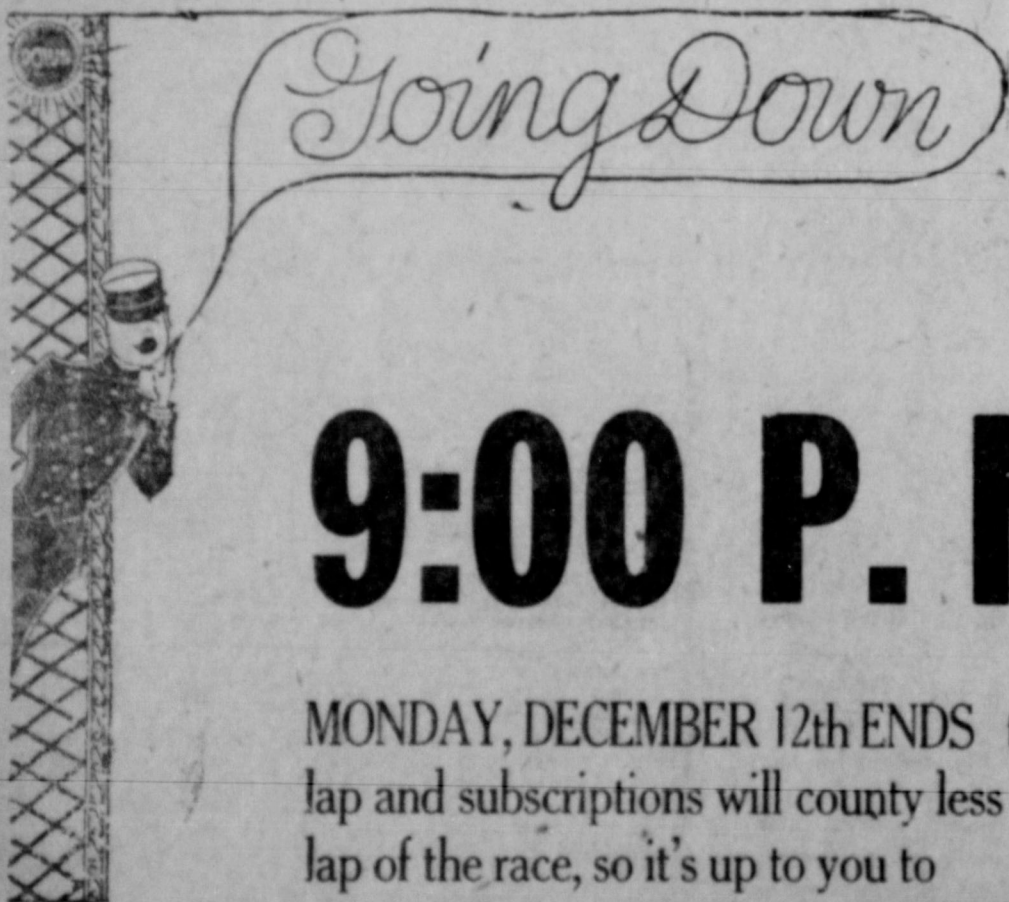

10,000 Extra Credits

will be issued to the club member topping the Honor Roll each day with the largest report of subscription sales.

5,000 Extra Credits

will be issued to each club member making a daily report of sales, and their name on the Honor Roll

**CREDITS ARE**

# FORD CAR TOPIC DAY

Six months ago announced the production of a "new" car in design and price, any now available, light-car priced, outside the first time outside of a group of men and correspondents saw the new car as the beauty of the day, and with every eye turned to it. They saw the new car as the beauty of the day, and with every eye turned to it. They saw the new car as the beauty of the day, and with every eye turned to it.

mobile of the day—speed, pick-up, flexibility, power. What they did not see, however, was the six months of preparation back of that car, which in magnitude and accomplishment is unique in world industry.

When Mr. Ford announced to the public that he was to introduce a new car he had not only conceived this car, but it was already well on the way to materialization. In the years that the Model T had been produced many inventions, ideas, improvements had presented themselves which did not fit into the scheme of the Model T. Many of these things were retained, against the day when new ideas of automotive efficiency would pave the way for a new car. The formal announcement, last May, was principally significant because it marked the end of production of the Model T as a complete unit.

Cessation of production of the Model T did, however, turn the full force of the vast organization of the Ford company to the problem of creating and producing a new car, with the exception of that part of the facilities necessary for the production of

Model T replacement parts. This meant opportunity for the reconstruction of not one plant, but many. Thirty-three assembly plants in the United States, the Ford Motor company of Canada, and twelve plants in foreign countries had to be considered. A greater problem still, the foundation of the parts to feed the branch plants had to be rebuilt almost from the ground—the great Ford industries at Highland Park, at Fordson, and along the River Rouge.

Impressive figures almost without end could be quoted to illustrate the magnitude of this task. There have been estimates that the job cost as high as \$250,000,000 to accomplish. This figure is to high—how much so, Ford officials will not say. But it was a staggering total of millions, unquestionably.

Strange as it may seem, however, Henry Ford did not figure in terms of millions. He was building a new car—a car which would be as much an improvement of its day, as the Model T was back in 1908. Engineers took certain basic principles and built around them a new car. When it was completed it was very close to the car that Mr. Ford had visualized. It was then that Mr. Ford gave voice to a statement that has been frequently quoted since:

"I will represent the public." Even his engineers did not sense the full significance of this simple statement at the time. The plants were being re-tooled. Re-tooling an automobile plant designed to produce thousands of automobiles in a day is no simple matter. Giant machines weighing many tons and costing thousands of dollars had to be designed and built. Countless thousands of smaller tools and precision instruments had to be manufactured. Orders were placed with machinery manufacturers for many of these machines. Others were built in the Ford plants. But Mr. Ford was "representing the public." A small change meant the reconstruction of great machines which required four months to build. But if this change meant a slightly greater gasoline mileage, or a trifle more of acceleration in traffic, the machines were built. And so the story went. Mr. Ford stated again and again that he was not building a model to meet a specific date or a predetermined price. His aim was fixed on an automobile that would be as revolutionary in 1927 as the Model T was in 1908.

These are some of the reasons, in the opinion of members of the Ford organization, why cost figures of the transition from the Model T to the Model A mean little. In the final analysis, they say, most of this expense will be absorbed in greater production and in higher plant efficiency. The maximum production in the days of the Model T was 8,400 per day. The reconstructed Ford industries will have a capacity even greater than that. This will not be reached for some time, but the capacity is there, to be ap-

## Ford's New Roadster Model

The new Ford roadster is officially pictured here. This model comes with a rumble seat.

proached as market demands indicate.

Mr. Ford has stated that the coal and iron mines, the glass plant and other "feeder" industries of the Ford Motor company exact no profit—that the only source of profit is the Ford car. But these "feeder" industries have been enlarged and strengthened during the period of transition.

The assembly at the Fordson plant today is creeping slowly as compared with the normal production, but each day sees increasing speed. Back of that assembly line, in the units where the parts are made which feed the assembly, a more impressive idea of what has taken place in the Ford industries may be had.

Working limits which would do credit to some of the finest automobiles of today are being im-

posed in many departments. Variations of more than ten-thousandths of an inch are not permitted in many parts. The speed that characterized production of the model T is being attained, but it is speed with almost uncanny accuracy. Henry Ford is demonstrating that his mass-production methods can be applied to the manufacture of any type of car, without sacrificing the mechanical accuracy which is essential to maximum performance of the finished automobile.

He is demonstrating something else, at which engineers are marveling—he is utilizing methods which had been pronounced impractical. Electrical welding of essential parts, such as the rear-end assembly, is being employed, with a consequent strengthening of the car, and elimination of sources of noise and trouble. Spun

steel forgings are being used in a way that is new to the automotive industry. New features of four-cylinder motor design have resulted in greater power and flexibility than had been anticipated. And so the story goes—a story of methods, revolutionary principles of manufacture, of design.

This is some of the background of the new Ford car which is to be encountered by those who dig into

the story of the happenings of the last six months. It is a story which will be many more months in unfolding, as the American and foreign assembly plants swing into line for the reproduction of complete cars.

WELLS & WELLS, Owners and Publishers  
Memphis, Hall County, Texas.  
J. CLAUDE WELLS, Editor

**SUBSCRIPTION RATE**  
In Memphis Trade Territory, per year \$1.50  
Outside Memphis Trade Territory, year \$2.00

Entered at the post-office at Memphis, Texas as second-class matter, under Act of March 3, 1879.

**NOTICE TO THE PUBLIC**  
Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation, which may appear in the columns of this paper, will be gladly corrected upon due notice of same being given to the editor personally at the office at 417 Main Street, Memphis, Texas.

### MANY NEW SUBSCRIBERS

**D**URING the first period of the Democrat subscription campaign 900 new names were added to the subscription list, and they keep coming. The workers are all good and capable canvassers and are selling the paper on its merits. They claim that it is easy to sell a Memphis Democrat subscription because those who have been taking the paper heretofore know it is worth the money, while those who haven't been subscribers have heard from others as to the paper's worth.

With a large list of quality readers the Democrat will be able to serve the city and county in a greater and more efficient way and it will be an incentive for every one connected with the paper to do his level best for each issue.

### GIVE BOOKS

**T**HE PRESENT somewhat run-down condition of the Carnegie Memorial Library can be remedied if every lover of literature will "say it with books." If those of us who say we believe in supporting institutions that form the very bed rock of Memphis' foundation will make a few simple sacrifices, new shelves will soon be needed at the library.

No doubt many of us have in our private collections books that have been read and re-read. True, anyone dislikes parting with good books, but if we have absorbed their contents can't we pass them on to the other fellow? Many cities are wishing they had libraries. Are we thankful enough for our good fortune?

Let's put the library on our Christmas lists and remember it with liberal gifts of books.

### TRY WRITING A LETTER EACH WEEK

**Y**OUR home paper is really a tireless letter writer if nothing more. Week after week this printed letter is prepared for those living here and for those who have moved to some other locality, telling of marriages, births, deaths, the coming and going of people, of business efforts and progress, of farm success and failure, accidents, improvements, meetings and so on. In fact, everything of interest and importance. If you should undertake to write a letter to an absent friend every week telling him all the news, you would get a faint idea of the task of preparing a newspaper. Many people realize this and take pleasure in giving us items of news. It helps the paper and is appreciated.

### CASH IN ADVANCE

**K**EEP in mind that from henceforth the Memphis Democrat is strictly a cash in advance paper and will stop when your subscription expires. Several names were dropped last week, and The Democrat's telephone was kept busy all the next day by people wanting to know why they failed to receive their copy of the paper. Some difference in that and the way some others have bawled us out for not stopping the paper when their subscriptions expired, and refused to pay for the arrearage. Practically all, who have expressed themselves concerning the cash in advance system, say it is the only fair and just way. Watch your expiration date. If dating isn't correct on your paper, we will appreciate your calling our attention to it.

### MEMPHIS NEEDS THIS

**Q**UITE OFTEN some local incident emphasizes Memphis' need of organized charities. Just recently an old man, ill and unable to work, was in dire need. But for the interest of a local minister who succeeded in having him placed in the hospital, the unfortunate fellow might have died.

Other cities and towns have found it is best to care for the needy in a systematic manner. Christian relief is the purpose of all charitable organizations and if uniting their forces will enable them to be of greater service it is certainly a wise move. A growing town can hardly afford to neglect a matter of such importance.

### FULL VALUE

**O**UR ADVERTISERS are paying real money for the use of our columns to call your attention to their goods. If they did not believe you would be pleased with them they would not advertise, for a dissatisfied customer is worse than none at all. If you are not getting the benefits of their efforts to interest you, you are not getting the full value of your Democrat. Look them over each week and save money. You will find the advertiser a reliable business man, with an honest message, truthfully told, else he could not buy our space.

### WE GOT IT ALL

**R**EAL COLD weather is with us now. A headline in one of the daily papers Wednesday stated "The Tail End of a Blizzard Hits the Panhandle." The whole body, head, shoulders, sides, feet and tail must have hit in Memphis.

## The Great American Home

CHRISTMAS CANDY-

### MAY HIKE PRICE OF TURTLE SOUP

Realizing the great magnitude of the project, landowners around the site of the Amalgamated Soft Shell Turtle Corporation's soup factory are going up on their leasings. They are holding out for more money for turtles secured on their property along Turtle Creek.

"This recent development may necessitate an increase in the price of Byrle's Turtle Soup," Byrle L. Beach, president of the concern declared yesterday. "However, our product will be of such high quality a higher price will be of little concern."

Following formal announcement of the formation of the new company in last week's Democrat, hundreds of people phoned this newspaper asking for further particulars. Many expressed a desire to buy stock at once before the full amount was subscribed.

Work on the new factory is being pushed forward at a rapid pace, but already turtle soup is being manufactured in crowded temporary quarters.

It is rumored that Mr. Beach instructed his publicity director, George A. Sager, to withhold all advertising and other promotion until the factory is completed. Only 100,000 cases of soup are now in the warehouse and many thousands more will be required to fill orders already received.

The Amalgamated Soft Shell Turtle Corporation of America has probably set new records in financial and manufacturing circles. One week ago organization of the new company was announced. Today the stock is fully subscribed and 100,000 cases of turtle soup are in the warehouse!

### Local and Personal

Mrs. John Owens and daughter and Mrs. Milo Dodson and daughter and Mrs. C. R. Webster were visitors in Childress Tuesday.

The officers of the B. Y. P. U. met Monday evening at the home of Mr. and Mrs. Sam Hamilton. After a business session refreshments were served.

C. G. McCleery spent Wednesday and Thursday in Memphis on business. Mr. McCleery is putting in a lumber yard at Monroe La., where he will make his home.

Speaking of the cold spell J. W. Wells said, "I watched my thermometer until it dropped to 15 and then took it in the house for fear it would freeze."

G. H. Hattenbach has accepted a position with the Moore Furniture Co., during the fall and winter season and will be glad to meet his friends there.

Bazaar, Christmas gifts, hand-embroidered articles, Japanese art goods, cakes, pies, chickens, and candy, at McKelvey's Furniture store, Friday and Saturday, December 9 and 10. Ladies of Christian Church.

Apparently nothing short of a World War creates such a sensation as the new Ford. Parker Motor Company may not have a car to display until the first of next week, but 2,000 people made it their business to see first pictures of the new car last Friday and Saturday. Earl Parker says he expects to show the "real thing" by next Monday or Tuesday.

### JOTS IN JEST

When Mayor Thompson of Chicago took that delegation to Washington in the interests of flood relief, he probably was only trying to make a splash.

Perhaps companionate marriage isn't what this country needs at all, but a few friendly ones.

Jug not that ye be not jugged.

An old maid is an unmarried person who advises girls how to marry happily and tells mothers how to raise children.

"Boy Improves After He is Struck by Truck," says a headline. That may be on way to raise children, but isn't it pretty rough?

Saxophone players could learn a lot from Demosthenes. He practiced down by the seashore.

Mrs. J. A. Whaley and Miss Biffie Adkisson are visiting their brother at Tulsa this week.

Mrs. J. R. Johnston and baby of McNary, Arizona, who has been visiting her aunt, Mrs. R. H. Wherry, left Sunday night for a visit with relatives at Grapeland.

Mrs. A. H. Miller and son Jack and Mrs. B. L. Beach returned Friday from a visit with their sister, Mrs. Sid Wells at Plainview.

James E. Bass and Mr. and Mrs. Edgar Cudd returned Saturday from a business trip to Dallas.

## COMMUNITY CLUB IS ORGANIZED HULVER; PLANS ARE MADE TO WISH THAT GOOD COMMUNITY

Community west of Es...  
school auditorium on...  
December 1. The...  
the gathering was to...  
for the school library...  
purchase athletic equip...  
to organize a rural...  
club. The school pre...  
cedent program con...  
sisting of a dialogue...  
throughout the evening...  
on the piano, violin...  
by three young men...  
The receipts for the first week...  
Christmas Seal sale are larger this...  
year than for several years, but...  
Mrs. T. C. Delaney, local chair...  
man, points out there is yet a long...  
way to go in Texas if \$100,000 is...  
raised.  
Mrs. Delaney further states...  
that last year the money raised...  
by these penny seals paid for the...  
health work done in Texas by the...  
Texas Public Health Association.  
This work included teaching...  
health to school children, school...  
nursing, child health training...  
course in the University, health...  
surveys and other health activi...  
ties, reaching nearly 200,000 per...  
sons.  
"There is yet a great deal to do...  
in Texas before tuberculosis is...  
eliminated as a menace to its citi...  
zens and the effort against this...  
menace, financed solely by the...  
sale of seals, must be continued...  
with unabated energy," stated...  
Mrs. Delaney. The death rate...  
from tuberculosis has declined...  
from 200 per 100,000 of popula...  
tion to 86.6 in the last 20 years...  
in the registration area. Texas...  
is not included in that area but...  
comparing these figures to Texas...  
it would mean that the state loses...

## BELGIUM MAY HAVE SLAYERS WEATHERBYS

Clarendon, Dec. 1.—Have Shelly and Annie Dozier, negro man and woman wanted here in connection with the noted Weatherby murder in the northern part of Donley county several months ago, crossed the Atlantic ocean in their efforts to elude officers who have combed America for them constantly since the tragedy was enacted?

Local officers are giving that question much consideration since the receipt of a letter by Sheriff W. A. Pierce from the Palace of Justice in Brussels, Belgium, stating that Brussels authorities had apprehended a negro man and woman who gave their address as Dallas, Texas.

Sheriff Pierce, who has been in touch with the Belgian authorities, declares that it is quite possible that the negroes held are the Doziers. He is more inclined to think, however, that the negroes are still in America.

Substantial rewards are being made up for the solving of this murder mystery by citizens of Memphis, Hedley, McLean and Clarendon. This, added to the amount already posted by Governor Dan Moody and others interested in unravelling the case, will swell the total to \$2,000, it is believed.

Sheriff Pierce will make every effort to determine whether the negroes at Brussels are the Doziers, he said.

## HORSES HAVE BUSY TIME ON DAIRY FARMS

In a study of the number of hours of work done by horses the United States department of agriculture found that there were wide differences in the work required of horses in a year in typical farming regions. In north Carolina on farms where tobacco and livestock were produced horses averaged 1,167 hours of work per year. In southern Ohio with diversified crops and livestock but a shorter growing season horses worked only 636 hours on the average. In the black land belt of Texas horses averaged 914 hours, and on dairy farms in Wisconsin the horses had a comparatively easy time with an average of 710 hours of work per year.

Do you get as much use as possible out of your sewing machine attachments? Practically 90 per cent of all women replying to a questionnaire on sewing have machines, but about 40 per cent failed to answer the question on attachments, which might signify that a large number of these women did not use them. The hemmer was most used by those who replied in the affirmative.

## TURKEY MAKING FAST PROGRESS INTO REAL CITY

Undoubtedly Hall county is to have another city, for Turkey is rapidly building itself out of the "town" class.

Development has been steady since the Burlington System was granted permission to extend its lines in Texas, and now that rails are actually laid through Turkey business is booming and construction is going forward with renewed enthusiasm.

In order to move fall crops and relieve congestion, freight trains are being operated over the new line every day. Although railroad officials do not expect to reach Plainview before late spring, passenger service as far as Quitaque is promised as soon as the track is ballasted.

Foundation for the Fort Worth & Denver South Plains station is completed and brick has been unloaded. The most modern features of efficient railroad station construction will be embodied in the depot, which will be 30x120 feet.

Construction will begin at once on four new brick business buildings, material for which is already on the ground.

Hotel Turkey, a thoroughly modern two-story brick building erected by J. N. Jordan of Plainview, has just opened with B. L. Knowles of Vernon as manager. Accommodations include a coffee shop efficiently equipped.

A water works system costing \$45,000 has recently been completed. Improvements include a new well water tower, mains and fire pipes.

The Turkey Enterprise, published by Willis Walker, is installing new equipment costing \$4,000. The paper is changing its page size from 5 to 6 columns.

Turkey Masons are planning to build and will likely announce their plans the first of the year. They have purchased property from C. R. Hamilton on Second street and propose a two-story temple.

Wm. Cameron & Co. have opened their new yard, stocked with a large and complete line of lumber.

The West Texas Utilities Company is extending its lines to various sections of town in order to take care of increased business. Construction on their new substation will begin shortly after January 1.

W. Wynn, superintendent of construction for the Turkey Compress Company, left last week for Denison to oversee loading of machinery for the new plant. Work on the building is well under way and Turkey is promised compress facilities soon.

## TURKEY FORMS A FARM LOAN ASSOCIATION

Organization of the Turkey National Farm Loan Association, through which farmers will be enabled to secure loans at 5 per cent interest, was perfected here last Saturday.

Officers elected are as follows: A. B. Crump, president; G. O. Coker, vice president; directors: W. V. Chandler, J. Russell, and Alga Turner. John Sharp, president of the First National Bank, was named secretary-treasurer.

The new organization, which is affiliated with the Federal Land Bank at Houston, is a cooperative association chartered under the federal government to facilitate farm loans. Capital stock is owned and controlled by the Houston bank. The branch association's charter grants operation in Hall, Motley, Floyd, and Briscoe counties.

## BRICE BREEZES

Steve Payne, who has been working at the gin here, left for home last Wednesday.

Miss Jessie Lee Poole was called home last Thursday afternoon, as one of her aunts died suddenly.

Ples Harper spent the week end with his sister, Mrs. Milam, at Sudan.

Miss Rosa Rhodes who is teaching at Gamage, spent the week end with her brother, Mr. John Rhodes of Brice.

Mr. and Mrs. John Rhodes and family spent Sunday at Leslie.

Miss Virgie Brock spent a very pleasant week end at home.

Mr. and Mrs. Howard Rhodes visited in Clarendon Sunday.

## SOURCE OF SEED

The chances are that when you plant your gardens next spring your lettuce, radish and onion seeds will either have been imported or else grown in a small area in the southern end of the Santa Clara valley in California.

Only about a thousand acres are devoted to the growing of garden seed in the Gilroy district, but they provide about 95 per cent of the lettuce seed, practically all of the radish seed, and 75 per cent of the onion seed produced in the United States. The seeds are usually grown under contract with seed firms by Japanese farmers who are paid by the pound for the seed.

In the four minutes required to play Rubenstein's "Staccato Etude," a Chicago pianist found that he exerted a force of 14,700 pounds on the keyboard.

on the building is well under way and Turkey is promised compress facilities soon.

## SALISBURY ENTERS RANKS OF PROGRESSIVE COMMUNITIES BY ORGANIZING A COMMUNITY CLUB

### BE SURE OF YOUR SIGNALS

Signaling from a motor car ought to be universal. Signals should be the same everywhere and should mean exactly the same under all conditions. If there is any factor of doubt, the value of the signal is completely lost. Furthermore, just one person, the driver, should indicate the course that the car is about to take, because he is the only one who knows with complete certainty just what he is going to do.

It seems almost impossible that there be any doubt as to the proper signals to use in indicating the various movements of a car in traffic. The generally used system of hand wigwagging has come into being because it comes naturally to most drivers. It has been evolved and not invented, in other words.

Intention of making a left turn is usually indicated by the driver's extending his hand, the left of course, with the index finger pointing in the direction he is about to take. Nothing could be more natural than this gesture and any moron who could miss its significance should have his driving license revoked instantly.

In signaling for a right turn, the ordinary method is to extend the hand out from the car, making a circular motion. This amounts to a call to the driver behind to come on, on the left, informing him that the car ahead is about to make a turn to the right.

Both these signals are obvious, yet any day on a fair road, where cars pass, and repass, you can find some oaf, thrusting out his flabby hand, without the finger extended yet apparently about to swing left and then have him turn right across your bow without the slightest compunction.

Motor car traffic in these United States has reached a condition, where seemingly minor matters of motoring deportment have become of real importance. With moving cars massed as they are on any main thoroughfare during the active motoring seasons, a very slight failure in caution may cause a serious accident.

### HOG CHOLERA CONTROL

Hog cholera is still a persistent and annoying disease, but its control is on a practical basis. The increasing use of concentrated, clear serum promises to be an important help in controlling the disease. In addition to its other desirable qualities, clear serum keeps for about three years as compared with two years for the ordinary whole-blood serum, which is an advantage in storing the product for use in emergency outbreaks.

## DEMONSTRATION CLUB WOMEN ISSUE THE WELLINGTON LEADER

BY PHEBE K. WARNER

Blessed be the MAN who once had a vision for all the farm WOMEN of our Nation. And it was only a few short years ago that that man dreamed his dream. About fifteen years ago. And as an example of his dream coming true just look what has happened in Collingsworth county, Texas, in only FIVE YEARS.

And what is going on in Collingsworth county, Texas, is going on in a greater or less degree in eighty-nine other Texas counties. And in hundreds of other counties all over this big land of ours. It actually seems almost unbelievable.

Have you seen the Home Demonstration Club issue of the Wellington Leader, of November 29? Well, you ought to see it. I wish that copy could find its way into every farm home in Texas and America. Yes, and more. It would wake up a lot of our town folks if they could only see what is going on in the country in one county in this state.

And what would it mean if some of our great municipal newspapers would catch the idea of turning their great plant over one day in the year to the really big constructive things the rural clubs

The second rural community club organized this week in Hall county was at Salisbury school on Saturday night. It was organized in connection with a school program and a pie supper, box social. The Harrell Chapel Community band was present and furnished music for the occasion under the direction of Paul James, director of the Memphis and Harrell Chapel bands.

The first thing on the program was an entertainment given by the school, consisting of several recitations, one song, one pantomime, three plays. Then H. D. Cuykendall, field director and educational worker for the cotton oil mills of Childress, Memphis, Quanah and Chillicothe and the Gate City Creamery of Quanah, took charge of the evening's program.

He first explained the proposition of a community club and called for a vote on whether or not Salisbury wished to organize. Getting an affirmative decision, he appointed the following nominating committee to select the officers and a meeting night: Mrs. Clifton Todd, Mrs. G. W. Wright, Charley Williams, Miss Minnie Vicars and Emmett Solomon.

The band furnished music while the committee deliberated, finally announcing the following officers: President, Frank Solomon; vice-president, George Dickson; secretary-treasurer, Mrs. Ruby Davis. The first Saturday night in the month was selected for the regular meeting night.

Then the matter of the sale of boxes was next in order and the boxes, 45 in number, were sold by H. D. Cuykendall, for around \$75. Bidding was slow at first but soon speeded up.

A cake was auctioned off on a novel plan of Mr. Cuykendall's and brought \$9.05 on the fixed price of 8.80.

Then a box of candy was auctioned off to the most popular girl. The honors went to Miss Lola Bess Todd with 355 votes. Bettie Vitetoe was second with 161 and the others followed with: Lorene Moore, 30 and Estelle Waddell, 25.

A can of Old Dutch Cleanser was auctioned off for the ugliest man. It was won by Raymond Henderson with 213 votes. Robert A. Wells got 61 votes and Ellis Vitetoe, 80 votes.

Everyone then partook of the contents of the boxes and the meeting adjourned about 11:00 o'clock, everyone returning to their homes with memories of a very pleasant evening's entertainment.

The school sold bananas, grapes and popcorn during the course of the evening and raised about \$1.60 from this source. The evenings' total receipts were \$96.66, according to the first count of the money.

## ATTENTION TO POULTRY WILL BRING DESIRED RESULTS

W. KAZMEIER  
three months in particular. Some people when it gets cold, want to and do close up the poultry house, too tight, resulting in colds, roup and chicken pox. We grant that with the approach of cold weather warmer quarters must be provided but not at the expense of fresh air. In Texas and Oklahoma, a portion of the south or east front should be kept open day and night. All the fresh air must come in from one end only. If the opening is in the south, then the north, east and west sides should be as nearly air tight as it is practical to make them. In some sections of our country due to the prevailing high winds it is best to face the houses east. As a general rule however, it is best to face poultry houses south. A lack of fresh air, will cause colds and roup. Close, ill smelling and crowded houses, are ideal causes of colds and roup. In cold weather drafts upon the floor or upon the roosts, surely will develop roup among your flock. In long houses, partitions should be provided to check the strong circulation of air. It is well to build these movable so you can take them out next Spring. We like to bring out the import-

### THE ORPHAN ARRIVES

Unquestionably no greater comedy has ever been produced than "Three Wise Fools" which will be the dramatic attraction on our entertainment attraction. The story of the play centers around an exciting event in the life of three crusty old bachelors who have lived together for years. How the only child of the woman they have all

three loved in their youth comes to them as a legacy from her, and how they are compelled to alter their way of living and adjust their household to the presence of a charming girl of eighteen when they are prepared to receive a young boy, gives material for numerous interesting situations. The play is made up of one laugh after

another with here and there a tear in the big gripping drama that is woven into this finest comedy of recent years. We are promised an exceptional cast with complete scenery required for the play, which is the outstanding attraction of our course. Here is a chance for everyone to see a real New York play with New York cast and production.

LYCEUM NUMBER AT THE HIGH SCHOOL AUDITORIUM FRIDAY NIGHT, DECEMBER 16TH.

## More Money WITH LESS WORK!

The American farmer today is a business man. He makes money with his head as well as with his hands. If your farm can be made to pay you more without so much back-breaking drudgery that is very much worth while.

That is exactly the purpose of the MARTIN—to make your idle loafing acres grow crops—to add to the value of your land—to give you more time for other things than the hard work of trying to coax crops out of unproductive soil.

**DITCH! DRAIN! TERRACE!** That's what wide-awake farmers are doing everywhere. The United States Government preaches it. Some Federal Land Banks require it as a condition of loans. But the best reason is that IT PAYS.

Here is the Great Farm Builder!

**THE Martin**  
O.D. & CO. MEMPHIS

**FARM DITCHER  
FIELD TERRACER  
ROAD GRADER**

**USE IT**

- To drain water-soaked land.
- To cut irrigation ditches.
- To make every acre pay.

**Does the Work of 100 Men**

You can ditch, grade or terrace with the Martin in any kind of soil. It will cut a mile and a half to two miles of V-shaped ditch a day for open surface drains, tiling or irrigation. It makes the finest terraces to stop soil washing. It handles every dirt-moving job.

Let Us Tell You More About the Martin

## Dad's "Secret Sin"

—in the dead of night he hid it  
—the present he bought for his

Finally, the house was dark and still. Secretly he opened the wall-safe door. Furtively, he placed the long, important looking envelope in the strictly private strong-box. No one should know... at least not until his dying day... they would be theirs... until then the joy of it would be his alone.

Years later... when the estate was settled... he learned the truth. Life Insurance for reasonable needs, he had provided well. But that one mysterious envelope was specially marked. "Merry Christmas purposes only." That policy paid the family a check each Christmas Day. It never fails. Always it is there on the table beside the tree, as if placed by Dad's own hand.

And sometimes, just as the candles are lighted it seems that he, too, is really there, laughing and talking with them all. Who knows? Perhaps it really is.

### A Boon to the Bald-Headed Row

A recent successful operation by Prof. Christian Askhagen of Oslo, Norway, should be a boon to the classic front row in the theater. Prof. Askhagen is shown here during his work of sewing hairs into the head of Miss Peggy Tudor of New York city.

#### Local and Personal

Gene Herd was a business visitor here from Clarendon Friday.

Boys, buy your fireworks at Handy-Andy.

A. C. Hendricks of Lubbock was a visitor here latter part of last week.

Supt. and Mrs. R. E. Paige of Newlin were Memphis visitors Saturday.

Shop for the whole family at Orr's Studio and Gift Shop. Something for everybody.

Miss Sunshine Grady of Shamrock visited Miss Sylvan Wrenn last week end.

Africa, China, India and Japan are the principal peanut growing countries besides the United States.

The raisin industry is the most important in the production of dried fruit. In 1923 the crop amounted to 290,000 tons.

Mr. and Mrs. S. E. Lewis, Mr. and Mrs. R. L. Thornton and Mrs. W. E. Gammage went to Hedley last Friday to attend the funeral of Mrs. E. E. Hickerson, daughter of Mrs. C. E. Watkins.

W. J. Lang was here first of the week in the interest of the C. E. Stone chain stores.

Get the Handy-Andy habit. 24tc

Earl Thompson, oil editor of the Amarillo News, spent Sunday here with his parents, Mr. and Mrs. T. J. Thompson.

Rev. and Mrs. J. P. Wheeler left Monday night for Houston where they will spend the winter with their daughter, Mrs. Harry Jones.

Mr. and Mrs. Wesley J. Mangrum moved this week to one of the A. L. Cottingham duplex houses on West Main street, recently vacated by J. H. Lee.

Mrs. Leonard Holt and niece Pauline Brown, went to Quannah Friday night on account of the illness of Mrs. Holt's father, J. C. Cyrus.

Mr. and Mrs. T. A. Singer and son Elton and daughters Juanita and June of Guyton, Oklahoma, visited relatives and friends here from Thursday until Saturday.

You get your Hostess Cakes at Womack's Grocery and save time in baking them. 12-1f

Get it at Tarver's

### MULESHOE PRAISED AS POULTRY SECTOR

Muleshoe, Nov. 29.—M. V. Robinson of Memphis, Texas, has bought a 40-acre tract east of Muleshoe and will raise American strain White Leghorn chickens.

Robinson, an experienced chicken man, says Muleshoe is an ideal place for poultry business, with its abundance of grain and various feedstuffs. This farm will be in operation some time in January.

The Mississippi basin contains about 89,000,000 acres of forested or denuded land which has little or no utility except in growing timber.—W. B. Greeley, chief of the forest service, U. S. department of agriculture.

Coercion can not take the place of education in providing an intelligent, informed and sympathetic membership of a cooperative association.—George O. Gatlin, Market Economist, U. S. department of agriculture.

Eggs represent the only article of animal food produced in a natural package—the shell; so long as the shell is unbroken the egg cannot be adulterated.—Dr. M. A. Jull, U. S. department of agriculture.

The organization and operation of cooperative associations on a crop to crop basis is a shortsighted policy which handicaps the organizations and nullifies many of the services which they might otherwise render.—B. B. Derrick, U. S. department of agriculture.

In view of the advancing values of standing timber and prices now prevailing in the older forest regions, Thornton T. Munger of the forest service of the U. S. department of agriculture thinks it reasonable to expect that by the time the next crop of Douglas fir is merchantable its stumpage value may easily be three times present values.

#### CHILDREN'S FATAL DISEASES

Worms and parasites in the intestines of children undermine health and so weaken their vitality that they are unable to resist the diseases so fatal to child life. The safe course is to give a few doses of White's Cream Vermifuge. It destroys and expels the worms without the slightest injury to the health or activity of the child. Price 35c. Sold by Leverett-Williams Drug Co. 23-5t

## NEW FORD CAR

### Exceeds All Expectations--

Official Announcement of new model last week created unusual interest throughout the Entire Country

#### FEATURES OF THE NEW FORD CAR

- Beautiful new low body lines
- Choice of four colors
- 55 to 65 miles an hour
- Remarkable acceleration
- 40 horse-power
- Four-wheel brakes
- Standard, selective gearshift
- Hydraulic shock absorbers
- 30 miles per gallon of gasoline
- Anti-rattle coincidental lock
- Typical Ford economy and reliability

NEW FORD TUDOR SEDAN

An example of the fine coachwork of the new Ford cars. New military type sun-visor and with crown roof. Narrow pillars and new door construction give unusual vision. Both front seats fold forward, giving easy access to rear seat. Ample space between seats. Your choice of four colors—an unusual feature in a low-price car.

**\$495**  
(F. O. B. Detroit)

Only Ford could sell such a fine car at such a low price.

The low price of the new Ford car and its exceptional performance are the result of manufacturing practices and economies unusual as the car itself. The new Ford is more than a new automobile. It is a new idea in modern, economical transportation.

By all means, take a little while today to learn about this new automobile. You will know that there is nothing quite like it anywhere in quality and price.

#### Beautiful new Ford cars at surprisingly low prices

- New Phaeton - - - - - \$395
  - New Roadster - - - - - \$385
  - New Sport Coupe - - - \$550
  - New Tudor Sedan - - - \$495
  - New Coupe - - - - - \$495
  - New Fordor Sedan - - - \$570
  - 1 1/2 Ton Truck - - - - \$610
- with cab and stake body  
Tires 30x5 front; 32x6 rear  
(All Prices f. o. b. Detroit)

### Dreadful Aches, PAINS Disappeared

"My health had been poor for ten years, before I took Cardui," says Mrs. Anna Cronin, of Rockport, Ind. "I was lifeless and 'no account.' I dragged around day after day, every move an effort, and never feeling the joy of being well.

"At times, I had a dreadful ache across my back, and my sides hurt me. I worried along, sometimes hardly able to leave my bed, but the demands of a growing family had to be attended to; so I would get up, do what was absolutely necessary, and then lie down again.

"One day, someone suggested Cardui to me. I took it for several months, and all the time I was growing stronger, and less nervous. My aches and pains finally disappeared.

"That was two years ago. My improvement has been permanent. The good health, which followed the taking of Cardui, is still with me, so I do not hesitate to recommend it to my friends."

## TEXAS JUDGING TEAM WINS FOURTH

College Station, Texas, Dec. 6.—The record of the agronomy crops judging team of the A. & M. College of Texas in taking fourth place in the national crops judging contest held in connection with the International Livestock Exposition and Grain and Hay show at Chicago recently is considered of more than ordinary interest in view of the fact that this is the first year that A. & M. College of Texas was represented in the national contest.

Members of the team representing the college were: R. C. Mauldin, Italy; W. L. Crawford, Palestine; J. de la Fuente, Saitillo, Coah., Mexico; and R. M. Mart, alternate. The team was coached by Ralph Stewart, associate professor of agronomy, assisted by S. F. Goodsell, Cameron, Ill., who holds a graduate fellowship in the agronomy department.

Eleven teams were entered in the contest and won places as follows: North Carolina, Kansas, Iowa, Texas, West Virginia, Idaho, Oklahoma, Michigan, Nebraska, Illinois, and Pennsylvania.

The contest included crops judging, identification and classification of crop varieties of economic importance in the different sections of the U. S., adaptation of crop varieties, identification and classification of weeds of economic importance in the U. S. and work in commercial grain and hay grading.

### CONCERNING MOTOR CAR FIRES

Here are some very interesting experiments with gasoline as conducted by A. H. Hoffman, agricultural engineering division, University of California.

Nowhere and at no time are knowledge and a cool head more at a premium than when fire reaches gasoline. Every year automobiles and trucks by the hundreds are burned up while their owners stand helplessly looking on.

Mr. Hoffman has repeatedly caused an electric spark to pass between the very closely spaced points of a spark plug placed inverted and submerged in a quart milk bottle filled with gasoline. The spark showed bright and was sharply snapping but no ignition of the gasoline resulted. The same spark made the pass while the plug was held in the mixed gasoline vapor and air above the liquid gasoline at the top of the bottle promptly caused a slight explosion, followed by a surface burning of the gasoline vapor which, while slow at first, became more rapid at the heat generated caused a quicker vaporization of the fuel. Closing the mouth of the bottle with the palm of the hand cut off oxygen supply and in a second extinguished the fire. If the fire had been permitted to burn until the unequal heating had cracked the bottle and permitted the gasoline to flow out, a large surface area would have been exposed to the air making possible a very rapid increase of the fire. Even then, however, the application of anything that would serve to exclude the air from the fluid gasoline would have smothered the flames.

With the same quart bottle half full of gasoline, a lighted match applied to the mouth ignited the one pint of mixed air and gasoline vapor causing a stronger explosion and a slight burning at the surface of the gasoline which was easily put out because it was difficult for air to get in fast enough to keep the fire going. With the bottle emptied of gasoline but still wet, the explosion was much stronger but not enough to endanger the bottle so long as the mouth was not covered.

Similarly with a gasoline tank, the more nearly empty the tank is, the greater will be the volume of mixed gasoline vapor and air and the stronger will be the explosion if fire gets to it. Also the smaller the opening relative to the volume of the mixture the more powerful the explosion. Of course, it is never altogether safe, to say the least, to hold a lighted match to the mouth of a large gasoline tank whether full or empty, because, even if the tank did not burst, there might be enough gasoline and oil soaked wood, upholstery, etc., in the neighborhood to cause an explosion.

FEEDING THE DAIRY COW

The dairy cow's feed requirements can best be supplied in winter by means of hay, silage, roots, and grain. Properly cured legume hays, such as alfalfa, clover, vetches, soy beans, and cowpeas, are well suited for feeding to dairy cows, as they are high in both protein and assimilable minerals and they are also very palatable. Silage and stored root crops supply succulent roughage feeds during the period when no green grass is available. They are of special value in keeping the cow's digestive system in good working order and in stimulating the milk flow. Corn, oats, barley and kaffir are examples of farm-grown grains commonly used for feeding dairy cows. All of these grains should be ground before feeding.

News Reviews

one-half ounces will treat a bushel of seed. A barrel mounted on a naxia with a door in one side for inserting the wheat and powder is a good mixer. A dust mask or a wet handkerchief should be worn over the nose and mouth while the grain is being treated, as the copper carbonate is poisonous when breather.

All pork and pork products should be thoroughly cooked, not only on the outside, but entirely through, to prevent the possibility of their causing the disease known as trichinosis. Have pork chops cut medium thick and after browning them on the outside, cook slowly and longer than other chops. Make sausage meat into flat cakes rather than "balls," which are thicker in the center, and then they will cook evenly throughout. Sear a pork roast at a high temperature to retain the heat and cook at a moderate temperature until all pinkness at the center has disappeared. Ham and other cured pork products also require thorough cooking.

Scrapie is a good example of a food combination in which the incomplete protein of a cereal is supplemented by a little of the more nearly complete protein of meat. It is an old fashioned Pennsylvania-German dish made by cooking corn meal with pork trimmings or lean pork. The U. S. department of agriculture will tell you how to make it.

MILK BY THE CARLOAD

Shipment of milk by tank car instead of in ten gallon cans loaded into express or special cars has increased in the last five years. More than sixty tank-cars handle milk into Chicago. Each car includes two steel tanks of 3,000 gallon capacity, glass lined, cork insulated and protected by a steel jacket. One tank car will transport more milk than two of the more common milk cars.

Several times a year, or whenever waste water begins to run away slowly from your sink drain or from other fixtures, the pipe should be well flushed with boiling hot water to dissolve the grease. This should be followed with a strong solution of caustic or caustic potash (lye), and half an hour later the pipe should be flushed thoroughly with clear hot boiling water.

Use cold water first on egg stains, then hot water and soap. If the yolk leaves a grease spot use carbon tetrachloride or some other grease solvent after sponging with cold water and allowing the stained place to dry.

The legs of children's rompers should not bind. They should be straight or have loose bands. The size of the band should be determined by measuring the child's leg 5 inches above the knee. A knitted band or cuff may be used if the blouse effect at the knee is desired.

The dasheen is a vegetable used in place of potato in southern climates where white potatoes cannot be kept for long stretches of time. Its flavor slightly resembles that of chestnuts. It can be boiled and prepared in any of the ways potatoes are good. As the texture is somewhat dry, it should be liberally seasoned with butter.

FOR HOME AND STABLE

The extraordinary Borozone treatment for flesh wounds, cuts, sores, galls, burns and scalds is just as effective in the stable as in the home. Horse flesh heals with remarkable speed under its powerful influence as for humans. First wash out infectious germs with liquid Borozone, and the Borozone Powder completes the healing process. Price (liquid) 30c, 60c and \$1.20. Powder 30c and 60c. Sold by Leverett-Williams Drug company. 23-5t

Have you made the triple test?

GASOLINE must do more than one thing well if it's to be classified as good gasoline. If it gives you only extra-quick starting but is slow on the getaway and lacks power, it's a very wasteful fuel.

So be sure that your gasoline passes the triple test for (1) starting, (2) acceleration and (3) power and mileage. You can be absolutely sure that it will if you insist upon Conoco—because Conoco is the triple-test fuel that is always dependable. It's the quality gasoline that starts you off and keeps you moving in all kinds of weather.

Get it at stations and garages displaying the Conoco sign.

### Texas and Texans

BY WILL H. MAYES

**Size Is Not Greatness**  
The simple story of the wonderful development of Texas can not be told too much, but we should not think for a moment that mere growth in the wealth or the size of a place measures its greatness. Banks may be bursting with idle money while the majority of the people remain poor. It is only the working, busy dollar that contributes to the prosperity of a people. A vacant store or dwelling, an idle factory is a liability and not an asset. An unemployed individual is worth nothing to a community and may become a potential criminal if unemployment is accompanied by poverty. If Texas is to enjoy the fullest prosperity its money must be in use in the state, its buildings must house happy families and busy workers, its lands must be yielding their fullest fruitage of wealth.

**Beginning at Home**  
The place to begin building for permanent prosperity is close at home. Instead of trying to attract more people and erect more buildings, local chambers of commerce should exert their first efforts toward seeing that the buildings already erected are happily and profitably filled and that its people are prosperously employed. Every such organization should have a hard-working committee on unemployment, one that meets regularly and that does what the universities would call "research work" on unemployment and its causes, and that would undertake to bring about pleasant and profitable employment for every citizen. There should be another committee on vacant buildings that should make some systematic effort to keep every building filled. The worst advertisement a place can have is "For Rent" signs on vacant property.

**Community Wealth**  
Community wealth does not consist of numerous big houses so much as of the ordinary conveniences and comforts of modern life. The small town or country community that has improved streets, or roads, a good water

supply, comfortable homes, good school and church buildings, wholesome entertainment, and a busy, contented population is richer than the cities in which unused wealth and extreme poverty walk side by side. These requisites to good living can be obtained by almost any community whose people work together earnestly enough for them.

**Llano's New Hotel**  
Llano has raised more than the amount necessary to insure the building of a much needed modern hotel. The accomplishment of what was regarded as an extremely difficult undertaking shows that Llano has the spirit of progress that only needs to be aroused. If Llano builders are wise as they are reputed, they will not rest with this achievement, but will keep the progressive spirit awake by starting at an early date upon some other needed community enterprise. "Keeping everlastingly at it brings success" not only to individuals but to groups of individuals as well.

**Strutting Texas Stuff**  
A Lockhart merchant has been doing a good bit of publicity for Texas and incidentally for himself. He assembled in his store an exhibit of all the Texas mercantile products he could find, collection including more than one hundred saleable items, and advertised the Texas products display. The centerpiece of the display was a huge cake made with Texas ingredients, including Texas pecans, by a local banker. On the last day of the show this was cut and divided among the visitors to the store. The Lockhart merchant has advanced an idea that could be carried out at little or no extra expense in every town in the state. Texas producers and manufacturers would profit by cooperating in making such exhibits.

**Poteet Strawberries**  
Poteet is a little town in Atascosa county, but by giving its attention to strawberries, and especially to early winter strawberries, has made a name for itself. Strawberries from Poteet have been selling on the San Antonio market at \$9 a crate and the money has gone to the enrichment of the growers instead of the shippers.

**Coleman "Variety" Show**  
R. L. Bates and wife, who live

on a farm that is partly in Coleman and partly in Runnels county, recently put on a "variety show" of a good sort which was attended by a number of their friends. It was a dinner at which 48 varieties of foodstuffs grown on the farm were deliciously prepared and served. The table was laden with meats, salads, all kinds of vegetables, preserves, pastries and a big peach cobbler from fruit gathered the day before. Can you beat it?

**Rio Grande Valley Fair**  
The lower Rio Grande Valley has held a wonderful "Mid-winter Fair" at Harlingen. The name appears to be a misnomer, for there is no winter around Harlingen. Governor Dan Moody was there and extolled the country as a land of "beautiful farms, fine orchards of grape fruit and oranges, rapidly developing cities and a happy people." The daily papers say that 30,000 people witnessed a street parade during the fair and that everyone was a Texas booster.

**Chrysanthemum Culture**  
A Beville woman has grown and profitably marketed 12,000 chrysanthemums on an acre of land between rows of citrus fruits. The "mums" were well cultivated, and the achievement shows what can be done when intelligence and industry are combined with Texas soils.

**Straightening and Widening Roads**  
Texans should give their united support to the state highway commission in its efforts to straighten and widen the highways of the state. Unnecessary curves in public roads are both dangerous and expensive to maintain, and also increase mileage and the cost of travel. The increase in traffic is requiring wider roads than were thought a few years ago of the necessary.

**Santa Anna Sand**  
Right in the little city of Santa Anna is a mountain that contains two million tons of the best high-grade silica sand used in the making of glass. The sand is being shipped out of the state to glass factories. Around Santa Anna are numerous gas wells of unlimited quantities, the owners of which are seeking markets for gas. Capital should become interested in manufacturing glass where the materials required are right at hand.

in the fall and winter. Allow or provide at least three square feet of floor space per bird. For a flock of 300 hens, this would figure 900 square feet of floor space. A house 30x30, 20x45 or 24x58 will provide enough room for 300 hens. In the winter, due to bad weather, the flock needs more house room. Overcrowding the flock for only a few days will cause trouble. Don't figure that the hens can get outside the house most of the time and that the days they have to spend on the inside, will be only a few in number, hence not cause much trouble. Experience clearly teaches, over-crowding even for only a few days is very bad practice. Over-crowding any kind of live-stock either in the houses on the pasture and yards, is very undesirable.

Recently we visited two large poultry farms, just being built. Both farms have not been established for more than a year. The owners of both, were blessed with plenty of money, but rather short of patience. They want quick results. One is an oil operator, and cannot quite realize that there is no oil money and no oil results in the poultry business. They are willing to spend money lavishly for a year, but then they expect it to come back with high interest. The poultry business is no get rich quick scheme, in no way may it be compared with the oil business. In the poultry business, profits are made in small figures, but sure and all the year round. Discouragements come to the best of us. We have no right, not to expect them and even look for them. The fact is discouragements are just as common in the poultry business, as in any other legitimate business. The fall and winter are more or less hard months for the poultry raisers. Patience, hard work, head work and study will be and is being rewarded every day. The poultry flock is capable of making a little money every day, that when multiplied by 365 days, makes an attractive yearly income.

### CLUB WOMEN

(Continued from page 1.)

fed up more on what is going on in the city than what is really going on in the country.

But if every newspaper in Texas would follow the example of Deskins Wells, editor of the Wellington Leader, and turn his newspaper plant over to the Home Demonstration Clubs once a year, my! my! what would it mean to this country?

This does not mean that our home papers are not giving a lot of fine publicity to the fine work the country women and the farm girls are doing. They are. Practically every paper recognizes their work, every week along with everything else they must put into their paper. But this is a day of speculation and concentration.

And one whole paper devoted entirely to the work of the farm women with even every advertisement thanking them for what they are doing for the whole county and the town in developing better products for all the markets and making more money for the whole country to spend with the home merchants, building up their own bank accounts and paying cash for most everything they need. Well, it not only builds up the business interests of the whole

county but best of all it is building up the morale of every farm home in that county.

You have to do something to be proud of and then somebody must recognize it before it helps your spirits much. The women in Collingsworth county are doing something to be proud of. And the Wellington Leader is recognizing it and broadcasting their good works all over the country. Do you think those girls and women will lay down on their job in 1928? They are already planning what they are going to do to put in that "special" club edition next year.

Every Sunday we see pictures of society women and women of national renown. But for the farm woman to actually see her own picture and the picture of her own club in the home paper thrills her more than to see Albee's once more. And in the last week's Wellington Leader there were the pictures of TWENTY-THREE Women's and Girl's Clubs. Besides the county commissioners got their picture in the paper also. Because they are the fellows that make this great work possible in the county. If they say "NO!" then all this fine work which brings joy and comfort and beauty and cash and contentment and a bigger, better life to every farm home in the county is lost to the home, the county and the state. And all that talent goes to waste. But if they say "YES!" then the whole county begins to grow.

And in those group pictures more than two hundred Collingsworth county girls and women could see themselves. Then there was the picture of the county council of the 4-H club boys and girls and also the pictures of the county, district and state demonstrators. And the whole paper dedicated to Mrs. J. D. Wilson, past demonstrator, who had been the guiding spirit through many trying months.

It's the compact, concentrated efforts of all the women in the county recorded in one publication with no other outside interests to detract your thoughts for one brief minute from it, that counts. You see the whole story of the development of one county at a glance. And the picture STICKS!

Salt and other seasonings draw out meat juices and mask the flavor. When broiling steaks and chops at home, sprinkle salt on them just before serving. Large roasts may be salted when about half done.

(Continued from page 1)

ance of providing comfortable, clean and roomy quarters for your poultry flock the next four months. It will mean money in your pockets to provide them. Close up all cracks, knot holes and ventilators on all three sides of the house. It is equally as important to keep part of the one end, preferably the south or east at least partially open day and night. We prefer to have this opening close to the floor to keep rain and winds from blowing too far into the interior of the house.

If you have not done so, we recommend you give the entire flock a dose of epsom salts, by adding two pounds of it to 100 pounds of mash and keeping this before them for two or three days. This is a simple treatment but will do much to keep your flock healthy.

The average farm flock, is kept in over-crowded houses. Nothing is so sure to cause diseases and poor egg-production as overcrowding in the houses, especially

Give Her the World's Champion

JUST two bright keys in a dainty jewel case! But no Christmas package ever held a greater treasure of happiness—for out in the drive stands a smart, trim Studebaker Commander—and those keys make it her own.

What pleasure you'll take in giving her this world-champion motor car—the car that climaxed its championship career by traveling 25,000 miles in less than 23,000 minutes! This dramatic run was made by strictly stock Studebaker Commanders under the supervision of the American Automobile Association. Nothing else on earth ever traveled so far so fast.

Neither she nor you may be interested in the high speed which The Commander is able to maintain for long distances. But you are interested in the sturdy design which made possible better than a mile a minute for a distance equivalent to a circuit of the world. Such stamina spells utmost reliability on your trips across town or across the continent.

It means long life, low maintenance and superior service.

Drop in today and we'll give you the Commander will be at your disposal for Christmas morning—wherever no one's wife will have a happier Christmas!

## SOCIETY and Club

### HONORED WITH BIRTHDAY DINNER

Mr. and Mrs. W. S. Chancey were honored with a birthday dinner at the home of their daughter, Mrs. U. G. Key at Lakeview last Friday, celebrating Mrs. Chancey's 64th birthday. Besides the hostess and honoree, Mr. and Mrs. Sam Chancey and Mrs. B. Webster were present.

### HOME ECONOMICS CLUB MEETS THURSDAY

The Home Economics Club met Thursday, December 1, in the home economics laboratory in a social meeting with the following hostesses: Faye Bullard, Rheba Bradley, Frankie Brittain and Jeanette Dennis.

The social hour was spent in making various kinds of candy and in conversation.

Everyone present enjoyed making candy and adjourned to meet December 15, in a business meeting.

### THREE BIRTHDAYS CELEBRATED

Mr. and Mrs. C. F. Stout honored their son Lewellyn, their mother, Mrs. M. C. Howell, and Mrs. J. P. Watson with a dinner Sunday, December 4, celebrating their birthdays. A delicious turkey dinner was served with a large birthday cake for each honoree.

The guest list included Mr. and Mrs. J. P. Watson and daughters and Miss Ruth Watson, Dr. and Mrs. J. A. Odum and son Mayo, Mr. and Mrs. Seth Palmeyer and daughter Ann, and Mr. and Mrs. J. G. Gardner.

### WEEK END HOUSE PARTY AT WEBSTER HOME

Mr. and Mrs. B. Webster entertained with a week end house party and a 6 o'clock birthday dinner Sunday evening, celebrating the 30th birthday anniversary of Mrs. J. J. Ogles of Amarillo.

A large birthday cake with thirty candles centered the dining table, and a delicious dinner was served. Those present were Mr. and Mrs. D. H. Greer, Mr. and Mrs. Homer Stewart and daughter Martha Ann, Mr. and Mrs. J. J. Ogles, Wilton Sowell and Miss Ethel Caldwell, all of Amarillo, and Mr. and Mrs. C. W. Broome of this city.

### HANDEL MUSIC CLUB HAS OPEN MEETING

The Handel Music Club held its first open meeting November 30, with Mrs. Conley Ward. A short business meeting was held, after which a program was given. Ola Mae Jones, Marjorie Guill, and Lucille West giving violin and piano numbers. Refreshments were served to the following: Ola Mae Jones, Lucille West, Dorothy Elliott, Dorcas Ruth Wilson, Willie C. Wilson, Tommy Noel, Marjorie Guill, Mary Gamme, Marjorie Lee Sigler, Mary Etta Martin, Ayleen Venard, Dorothy Hart, and Ruth Gamme. A very delightful time was spent.

### METHODIST MISSIONARY SOCIETY MEETS MONDAY

The Missionary Society of the Methodist church met Monday afternoon, December 5, at 3 o'clock in the church parlor for Bible study. Mrs. W. E. Johnson conducted the lesson from the "Missionary Message of the Bible." We studied the last chapter, The Message of the Epistles. This book has proven very interesting and instructive.

Mrs. W. F. McElreath will gather things for a box to be sent to our school at Pharr, Texas, next Friday morning.

The zone meeting will be held at Dodsonville next Tuesday, Dec. 13, and all women are urged to attend.

### L. D. P. P. SOCIETY MEETS IN REGULAR SESSION

The L. D. Y. P. Missionary Society met in regular business meeting, Friday evening, December 2, and elected officers. The meeting was opened with the president presiding. Among other things that were discussed the society decided to play Santa Claus to some of the needy children of the town. After the business meeting the following officers were elected: President, Ruby Hoffman; vice president, Edna Gerlach; corresponding secretary, Mildred Phelan; corresponding and local treasurer, Erin Hoffman; superintendent mission study, Neville Wrenn; superintendent Bible study, Mrs. John Lofland; superintendent supplies and social service, Maidee Thompson; superintendent voice program, Sylvan Wrenn; superintendent local work, Mildred Beckum; superintendent social activities, Ira Hammond; superintendent publicity, Wanelle Hoffman; recording secretary, Wanelle Hoffman.

Social and Lesson Study. Members of the L. D. Y. P. Missionary Society gathered at the home of their superintendent, Mrs. John Lofland, at noon Sunday,

December 4. After a delicious two-course luncheon the mission study book, "The Straightway Toward Tomorrow," was given by Mrs. Lofland.

Those present were: Maidee Thompson, Mildred Phelan, Wanelle Hoffman, Ira Hammond, Edna Gerlach, Neville Wrenn, Maud Worsham and Ina Mae Shannon. Others present were: Misses Mary and Mildred Beckum, Ruth and Ervin Hoffman, Alice Marie McKelvy, Sylvan Wrenn, and Mrs. Jameson. All reported a good time.

### DELPHIAN CLUB MEETS WITH MRS. L. M. HICKS

Mrs. L. M. Hicks was hostess to the Delphian Club Tuesday afternoon, December 6, at her home on South Eighth street. Mesdames Barnes, Brewer, Wiggins, Dickey, Kesterson, Moore, McMurry, Powell, Rogers, Smith, Stokes, Wallace and Miss Milam answered to roll call. Miss Milam told the life of O. Henry. Mrs. J. H. Smith, read his "Courier." Mrs. McMurry, "Hyglia at the Solita," Mrs. Barnes, the "Romance of a Broker." Each subject was very interesting and given in a most pleasing manner. A number of choice children's books were collected and given to the Library.

During the social hour a plate lunch was served by the hostess which was enjoyed by all present.

### WOMAN'S CULTURE CLUB MEETS WITH MRS. HOWARD

Mrs. A. W. Howard was hostess to the Woman's Culture club Wednesday afternoon when the book of books, "The Bible," was the topic for the lesson.

Answer to roll call, Bible references found in Shakespeare plays, proved a pleasing feature showing that this most gifted writer is indeed the supreme master of English literature throughout all ages. The program was unusually interesting with Mrs. D. A. Neely telling the story of the Bible in rhyme, followed by Mrs. Foote's talk on the history of Sarah after which Mrs. Wheat read a paper, "Position of the Bible in the Home," prepared by Mrs. Whaley, who was out of town.

During the social hour the hostess served a two course plate dinner. Favors were unique miniature Christmas trees set in red baskets filled with nuts, carrying out the Christmas color scheme—red and green.

Mrs. J. A. Whaley will be hostess January 4, 1928.

## HIGH POWERED EDUCATION IS EXPENSIVE

BY PHEB EK. WARNER  
Is college education so high this day that it is out of the reach of the common people? By what standards of living are our institutions of higher learning built? The financially poor, the medium or the rich?

Dr. A. P. R. Rucker, dean of the department of business education and banking at Colorado College, believes that the nation's best brain power lies dormant in the minds of the poor who are unable to attend college. Dr. Rucker has such faith in his conviction that he has obtained leave of absence for one year from his duties in Colorado, and will give this year of his life and work free to the Commonwealth College at Mena, Arkansas.

There are not many colleges in the United States like the college at Mena, where the students are required to work 20 hours a week on the college farm and in the laboratories and 20 hours in the class room. In return for their work the students receive their board and room free.

There is something in Dr. Rucker's action that should cause the most of us to stop and THINK a minute. A really high-powered man educationally is giving up his position and his salary in one of our greatest states to give his service to the education of the poor boys of this country who have no rich dads to force an education on them. He is doing this, he says, because we need students from the poorer class as well as the rich in order to have trained men with different points of view on education.

He believes it is the poor man who can not go to college that actually wishes to progress and develop himself.

Now, somebody (if anybody happens to read this) is going to try to knock this theory into a cocked hat by affirming that our colleges and universities are so democratic that anybody who wants an education can get it.

And right here and now we are going to flatly deny that. Now let's choose up, take sides, and go on with the argument.

Granted that the affirmative on this question is right and that every young man or young woman who does enter college may find a way to work his or her way through school, we would like to know why it is that less than ten per cent of all the school children of this nation ever find a way to even get enrolled in a college?

There are at this very hour 25,000,000 school children in this nation every one of whom is entitled to 11 years of free public school. Everyone is entitled by birth to a free high school education. My, my! What would it mean to the future of our country if every normal child in this group could go through high school? But unless we change our school ways and our school records within the next ten years we will still be a nation of SIXTH grade children going about in adult forms instead of a nation of even high school graduates which our government promises every child born in America.

This very day our fields and factories have hundreds of thousands of children in them who ought to be in some good school. How can these children ever get a university education if they are never given a chance to enter a high school? True, the average man and woman get far enough along to get into a college stands some chance of getting through sometime if they hang on and keep trying and don't take on too many other obligations, and if their home people do not need their support and they keep well, and if their public school work prepared them to do anything by which they may climb the university ladder. But just what per cent of our children are within the reach of a high school? And how many of those who do go through high school know how to read and write and spell and figure and work at anything enough to make their way through a college?

All over this land of ours there are boys and girls as bright as new dollars, capable of going to the top in some line of education whose mental resources will never be tapped. Many of them will never be fortunate enough to have one teacher who will see the possibilities of these children and try to open the door of their minds to the possibilities within their mental grasp. Those boys and girls by the thousands and thousands will go through this life limping along wondering why they are dissatisfied and unhappy. And all the time it will be because there is a hungry mind and a hungry, crippled spirit within them. Nobody ever told them they

## In Hero's Honor

Madame Nungesser, mother of the famous war ace who lost his life last spring in an attempt to fly from Paris to New York, is shown here with a check for 133,345 francs. It is part of her share in the American fund raised for the families of Nungesser and his companion, Coli.

could do something worth while. Not even their parents because their parents never saw the light of this new day either. They never had any educational hope, therefore they hold out no hope to their children.

Nobody will ever know what this old world has lost and suffered because less than ten per cent of its people have ever been half way ducated. Our bodies have grown up but our minds have remained in the child stage.

We call our country a democracy. And then choose all our educators, all our law makers, all our ministers, all our teachers in every line of school work, and all our scientists and most of our country's leaders from less than ten per cent of all the people because the other nine-tenths of our American men and women have never passed the sixth grade in school.

How could they go through the universities when all their mental development was cut off in their early childhood? And children that age are not responsible for their limited educational advantages. The weak place in our educational system is not at the TOP. It is at the BOTTOM. Our high-powered education is all right for a few who may reach it. We need them. But what we need most of all in America is a free public school course that will meet the needs of the masses, and prepare, our 25,000,000 boys and girls to face the world and climb the ladder of life to any career within their reach. And when this is done we won't have so many unhappy, homeless, helpless, hopeless people. But as things are today neither our public school nor our universities are designed to fit the conditions of the masses. As a result the rich man's child can go through the university if he

will, while much of our educational taxation goes to waste on empty heads, and idle hands. But the bulk of our American brains has lain dormant throughout the ages because our educational system has not yet been made either practical or democratic.

## Do You Suffer with your Feet?

FLAT FEET?

### KILLED LISION CARS

The following... of C. T. Pal... last week is a... California paper... G. Powell.)... killed, a woman... and four other... injury when two... at the inter-

section of Seventeenth street and Garden Grove boulevard, at 5:30 p. m. yesterday.  
Cornelius T. Palmer, 48, 522 West Washington avenue, Santa Ana, teller in the Security Trust and Savings Bank, at Huntington Beach, was instantly killed. He suffered a fracture of the skull. In the other car, Mrs. T. H. So, Japanese, residing on Santa Ana Route No. 3, received such a bad injury left hand that surgeons later amputated several fingers.  
One of the automobiles was driven by Toshi H. So, the other by Paul Mead, 1410 Bush street, a brother in law of the dead man. Mead filed an accident report at the sheriff's office today. He

reported that he was driving East on Seventeenth street. The car driven by So was headed South on Garden Grove boulevard. According to Mead the So car crashed into the rear side of his machine.  
Mrs. Mead and Cornelia Palmer, the latter a daughter of Palmer, escaped injury. So was not hurt. Soon after the accident deputy sheriffs arrested So and are holding him in the county jail for investigation. No charge has been lodged against him, pending the outcome of the coroner's inquest which has been scheduled for late this afternoon, Coroner Charles Brown said.  
The body of Palmer was rushed to the Orange county hospital, where it was learned that he probably had been killed instantly. Later the body was removed to the Harrell Funeral home where the inquest will be held.  
No funeral arrangements have been made.  
Palmer had been an employe of the bank at Huntington Beach for the past six years and had resided in Santa Ana for a number of years.  
He is survived by his widow, Mrs. Blanche T. Palmer, one son, Temple Palmer, who at present is a student in the University of Oregon, at Eugene, and two daughters, Cornelia, 7, and Clarine 18.  
The Japanese woman is at the Orange county hospital where her condition was reported as satisfactory.

### A MYSTIC WONDER

One of the interesting features of our Lyceum course is the mystery, now given by Mr. C. W. Kringsberg and his assistant, Miss Emma Martin, in which he reproduces the mysteries of the seance room and exposes the tricks of the most famous mediums.  
THURSDAY NIGHT DECEMBER 8, AT HIGH SCHOOL AUDITORIUM

### HIGH SCHOOL

**Chapel Programs**  
Monday—Piano duet, Ina Mae Shannon and Ethel Lucile Balwin. Violin duet, Jackie Rogers and Jack Thomas, accompanied by Mrs. Shelley.  
Tuesday—Music by high school band. Great progress was shown for a band organized only five weeks ago. Some high class music is expected from it soon.  
The Junior class received their pins Tuesday, December 6. They are well pleased.  
The N. O. K. Club will meet Thursday with Mildred Baker, Clovis Cox and Gladys Byrd as hostesses.  
The Home Ec Club is sponsoring the play, "Friendly Enemies" Friday, December 9. The funds are to send the girls to the clothing contest.  
The Home Ec Club met Thursday in the Home Ec department. Everyone enjoyed making and eating candy.

### Cookery Column

Mrs. Tucker Institute of Cookery

Ottis Neighbors, Director  
© I. C. O. R. CO. 1927—All Rights Reserved

**Fruit Cake**  
Four cups sifted flour (white), 1 teaspoon baking powder, 1-2 teaspoon soda, 1-2 teaspoon salt, 1 cup Mrs. Tucker's Shortening, 1-1-2 cups sugar, 1 tablespoon lemon juice, 1 pound Sultana raisins, 1-2 pound citron, cut fine, 1-2 pound each crystallized orange peel, lemon peel, pineapple peel and red cherries cut fine, 1 pound blanched almonds, cut fine, 10 egg whites, beaten stiff.  
Sift flour one, measure, add baking powder, soda, and salt, and sift together 3 times. Sift one cup of this flour mixture over fruits and nuts; mix thoroughly. Cream shortening until light and fluffy, add sugar gradually, and cream together thoroughly. Add remaining flour mixture to cream-mixture, a small amount at a time. Beat in egg whites. Pour in tube pan or small bread pans prepared with a paper lining in the bottom. Bake in slow oven (250 degrees F.) for 2 1-2 hours, then increase to 300 degrees F. for 15 minutes. Makes 6 pounds.

**Deviled Shrimp**  
Four tablespoons butter, 2 tablespoons Worcestershire sauce, 1 teaspoon salt, 1-4 cup onion, sliced, 2 cans tomato, chopped, 1 green pepper, chopped, 1 teaspoon salt, 4 eggs, 2 quarts hot water, approximately, 1-2 cup cooked peas, 1-2 cup cooked corn, 3-4 cup rice, 1-8 teaspoon pepper.  
Cut liver into slices, then into strips and dredge with flour seasoned with salt and pepper. Brown liver with onion and green pepper in the fat, add tomato and half of the hot water, cover and simmer until liver is tender about 1 hour. In meantime, cook rice until tender.  
Add rice, corn and peas to the liver and continue to cook until mixture is thoroughly heated. Slightly beat the eggs, pour into a deep platter or serving dish, sprinkle with a little salt and pepper, add hot liver mixture and serve with boiled spaghetti or macaroni. If liked, grated cheese may be sprinkled over the top. Eight servings. After cheese has

been sprinkled over the top place in oven and brown.  
**Banana Toast**  
Slice bread thinner than for dry toast; trim off crust; slice firm, ripe bananas and place on toast until covered; sprinkle liberally, if desired, with sugar, dot with butter, and bake in moderate oven until bananas are well cooked. If bread is cut in dainty strips, it makes attractive servings with tea or coffee. Serve hot.

**IT PAYS TO CARE FOR PASTURES**  
It pays to take good care of pas-

tures. Poor pastures are like poor feeds of any kind. Good pasture probably furnishes the cheapest source of milk-making nutrients of any farm crop. The cows harvest it themselves. Top-dressing pastures with manure or commercial fertilizer is usually profitable. It will induce faster and heavier growth of the grasses and will also increase their lime and phosphorus content. It is also good management to mow the pastures occasionally to prevent the weeds from reseeding themselves.

Red Picket fence, all lengths. J. C. Woodridge Lbr. Co. 20-tfc

**STOMACH GAS DRIVES MAN FROM BED**  
"I had gas so bad I had to get up nights on account of the pressure on my heart. I used Adlerika and have been entirely relieved."—F. F. Krueger.  
Even the FIRST spoonful of Adlerika relieves gas and often removes astonishing amount of old waste matter from the system. Makes you enjoy your meals and sleep better. No matter what you have tried for your stomach and bowels, Adlerika will surprise you. Leverett-Williams Drug Co. No. 4. Get it at Tarver's.

## SHAMROCK RADIOS

You will be mute in wonder before this new electric powered Shamrock set, lost in amazement at its marvelous simplicity of operation, its perfect selectivity and pure reception. No batteries, eliminators or chargers. Truly a revelation in all round performance and—at its unprecedented low price—an outstanding buy in radio today.

# Make the Wheel Yourself - and Drive!

From one coast to the other, from Canada to the Gulf. Here there is everywhere. A mighty chorus of public acclaim.

Owners talking to owners. Owners talking to friends. Praising this new American car... the Oakland All-American Six.

Praising its brilliant performance... its smoothness, speed and snap. Praising the instant action of its four-wheel brakes... the way its big balloon tires rub out the ruts and cling securely to the road.

Maybe you think they're prejudiced. It's easy to see why you could. But just come in... take the wheel yourself... and drive! Then see how you change your mind.
