A & M Short Course To Clarify Credit In Farm Program

"Credit Costs 5 to 10 Per Cent of Farmers' Cash," Says Extension Economist

Debts which today burden many Texas farmers and ranchmen grew out of credit obtained months and years ago. "Likewise," says Tyrus R. Timm, extension economist in farm management, "the credit farmers and ranchmen use today will be the debts which may plague them tomorrow. In other words, credit is the stuff of which debts are made."

Credit plays an important role in a farmer's program, and the cost of credit in general takes between five and 10 per cent of the total cash receipts for all Texas farmers and a large portion of the income of farmers who are heavily in debt.

During the adult Short Course at A. and M. College on July 14 and 15, rural people will be given an opportunity to ask any questions they may desire relative to the work of government or government-sponsored lending institutions as their functions apply to their farms. This will give farm people a chance to clarify their understanding of new credit institutions developed, as well as of those already established, and see what each has to offer to meet their requirements to best advantage, Timm says.

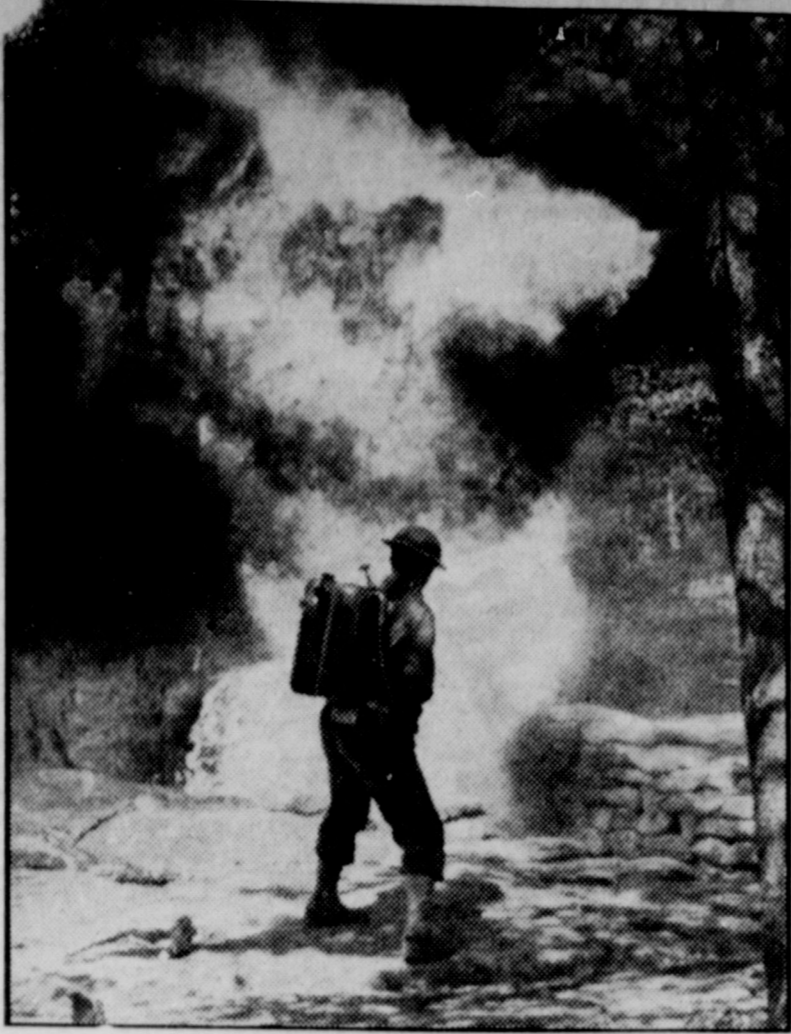

In addition, extension specialists will be available to answer questions by farmers and ranchmen in connection with what might be termed "tools of credit," such as farm record books, budget, financial statements, written leases and kindred matters. Representatives of the Emergency Crop and Seed Loan Office; Federal Housing Administration; Production Credit Corporation; Federal Land Bank; Bank for Cooperatives, and Farm Security Administration also will be present.

CARD OF THANKS

I wish to take this means of expressing my heartfelt thanks to my many friends and neighbors, who were so kind to me during my recent illness. The lovely flowers, and acts of kindness are sincerely appreciated. May you have just such thoughtful friends when trouble comes your way. W. B. Stargel.

Church Activities

Rev. and Mrs. J. P. Cole returned Friday afternoon from the Methodist Encampment at Ceta Canyon near Happy, Texas, in the Palo Duro Canyon, where Rev. Cole had charge of the activities of the camp for the 5 day period. Those attending the camp from here were Hoyt and Mary John Cole, Mary Margaret Knight and Marjorie Hemphill. Revival services will begin at the local Baptist Church Sunday, July 20, with Rev. Noble Crawford of Los Angeles in charge of the services.

Cemetery Board Makes Plans

Theodore Swift and Seth Thomas of Memphis, Frank Solomon and Gus Odom of Newlin met Sunday afternoon at the Newlin Cemetery to decide on a plan of contacting those who have relatives buried here and asking each family for a donation to pay for the fencing and other expense of the beautification of the grounds. The State Highway Department lent 560 yards of fencing, but posts and other items will have to be bought.

Each person interested in donating to this fund please contact Mr. Swift or send your contribution to Mrs. Fred Hemphill, Secretary at Newlin and your donation will be duly acknowledged and placed in the fund. Other persons living out of this district will be contacted by mail.

Miss Hendricks to Teach Here

At a recent meeting of the Newlin School board, a fourth teacher was hired for the fall term to teach the 3rd and 4th grades—Miss Sarah Hendricks of Abilene, who is attending McMurry College. Miss Hendricks' father was pastor of the local Methodist church here about 25 years ago.

Correction on Fire

Correction of an item appearing in this column two weeks ago regarding the burning of a 4-room dwelling on the Rowell farm, in which it was stated that the building was unoccupied at the time. Later information revealed that two young men had been employed there and had moved into the building. Any other details of the fire could not be determined. The house and its contents were completely destroyed.

Horace Jones Injured in Fall

Horace Jones, 8 year-old son of Mr. and Mrs. Mack Jones was thrown from a horse he was riding in the field near his home last week and was painfully hurt, being unconscious when he was found by his brother, Jack, who was plowing nearby. He was taken to a hospital where he remained for several hours before being able to be brought home. He is entirely recovered now.

Club Meets With Mrs. Lawrence

The Newlin Mothers Quilting Club met at the home of Mrs. D. W. Lawrence Thursday of last week with Mrs. C. A. Powell as co-hostess. The all-day affair was a profitable and enjoyable occasion, beginning at 10 a. m. with quilting and piecing and hand work in the morning, the climax of the day being the covered-dish luncheon served buffet-style at noon. At the business session in the afternoon three gifts were auctioned. Four of the 29 members were absent. The next meeting will be with Mrs. Will Kesterson in Memphis.

Rev. Cole Has Foot Injury

Rev. Cole had the misfortune of crushing two toes on his left foot when 100 pounds of ice fell on his foot as he was placing the ice in iceboxes for use at Ceta Canyon last week. The accident occurred Monday and caused him considerable pain throughout the week. He was taken to Canyon for medical attention.

BARNEY WATTENBARGER

The End: NO MORE OIL AND NO MORE ENGINE!

Ruthless Death-Test proves this New oil good for more than Twice the mileage averaged by 5 other big brands

In fiery Death Valley the dry heat hits extremes. And there's where 6 identical everyday cars, using 6 different big-name oils, were burned out on purpose to give you fair and square mileage comparisons on great new

CONOCO Nth MOTOR OIL

Now making Sales Records right Here

Death-Test cars—new—same make, same model—were taken apart for the Referee, to check uniformity; then were broken-in alike. Each got one 5-quart fill of some one big brand—bought retail by Referee. He kept engines under lock—no oil could be added. Cars held the same 57-mile speed, over the same desert, getting the same handling (by alternating the drivers). And there wasn't any end till there wasn't any lubrication... till engine after engine became a hunk of junk.

Conoco Nth oil kept on 5,683 miles longer than any other oil in the Death-Test... Certified. And all five competing Death-Tested oils didn't average half the mileage of Conoco Nth oil. Certified.

Man-Made new Life-Giver does it

Now think a moment of Vaccination—putting protective substance on guard to keep a trouble from starting. And the trouble aiming to start on motor oils lurks in every engine's normal firing. Filth forms that can spoil one drop; then two drops "catch it"—then four—then SIXTEEN... faster, faster, FASTER. As the whole fill weakens, the oil-level sinks too fast... but not when the start of this oil-fouling trouble is inhibited—held back—by life-giving Thialkene

inhibitor, the man-made new economy aid in patented Conoco Nth motor oil.

No, you'll never Death-Test your own Conoco Nth oil. You'll still sensibly drain and refill as recommended. But knowing how Conoco Nth out-mileaged the other Death-Tested oils, you can reasonably believe that every look at the oil-level won't mean adding a quart. Keep count of your saving after changing to Conoco Nth today at Your Mileage Merchant's Conoco station. Continental Oil Company—Pioneers in Bettering America's oil with Synthetics

AND CONOCO Nth OIL OIL-PLATES YOUR ENGINE

Long the keystone of Conoco success, OIL-PLATING comes from another great Conoco synthetic... man-made under the famed Germ Processed oil patent. Magnet-like action bonds OIL-PLATING to inner parts. It can't all quickly drain down—not while you're using Conoco Nth oil. So OIL-PLATING is on guard against wear in advance!... and helps mileage, as it did in Death Valley. An OIL-PLATED engine is one more economy you get from a change to popular-priced new Conoco Nth oil.

CERTIFIED I hereby certify that the Death Valley Test and related work were thoroughly and fairly conducted. Engine Destruction occurred in each case at the mileage stated.

Rise Above Self-Interest

The International Uniform Sunday School Lesson for July 13
Text: Acts 19:8-10, 23-32

WE have been reading about the spread of Christianity to Europe. In this lesson we return to consider its expansion in Asia. It is the quality of Christianity that the more it expands, the stronger it becomes where it has already taken root.

Ephesus, noted for the worship of the goddess Diana, became a centering point for Christianity's growth in Asia Minor, as Paul made that city his headquarters for more than two years.

Christianity made such progress in the city that the worshippers of Diana became alarmed. The alarm particularly concerned those who were making a commercial business out of religion. There were silversmiths in the city, headed by a man named Demetrius, who had a profitable business making silver shrines for the worship of Diana. When they saw their business endangered by Paul's preaching, they became aroused and began to stir up a movement against Paul and his Christian associates.

THESE craftsmen could not have had much success if they had said to the public, "These men are endangering our business." Their self-interest would have been made altogether too apparent, but they aroused the great cry that the worship of Diana was being endangered, and they stirred up mob violence with the rallying slogan, "Great is Diana of the Ephesians."

How true is this to every age! Consider the profiteers from every form of commercialism, be it worthy and legitimate or some unworthy and vicious thing. When profits are endangered those whose interests are affected almost always hide behind some pretense of principle or conviction.

MEN who rise above self-interest manifest the spirit of true religion. A man's religion ceases to be worthy the moment his motive to make a profit from his faith becomes paramount.

One cannot forbear a word of application to our present crisis when some men either voluntarily or under compulsion are giving everything for their country while others are taking advantage of the situation for their own ends.

Let us beware lest the noble ideal of patriotism be tarnished by those who say "our country" when they mean "ourselves." There is nothing finer than saying "our country" or "our religion" when we mean it and our devotion matches our profession.

These men are endangering our business. Their self-interest would have been made altogether too apparent, but they aroused the great cry that the worship of Diana was being endangered, and they stirred up mob violence with the rallying slogan, "Great is Diana of the Ephesians."

PLASKA PULPIT PARAGRAPHS

Albert Cooper, Pastor
Who was it that said, "To err is human, to forgive divine?" May I correct the mistake in scripture quotation week before last, John 1:1, instead of Matt. 1:1.
And sitting down, they watched him there. Matt. 27:36.

Jesus had made many statements, had done many wonderful works. Yet the world still asked that he prove himself and they sat down to watch, not impressed with the burden he carried.

Are you the kind of church member who sits down to watch, and leave the burden of the church on the pastor, the steward, the elder, or the Sunday School superintendent?

Preaching at Plaska July 13. May we lead for the hearty cooperation of every member.

May we extend our deepest sympathy and most earnest prayers for those bereaved, and mournful and burdened.

NOTICE

The Baptist Brotherhood Association will meet at the Lesley Church Tuesday evening, July 15, at 8:30. The speaker of the evening will be Judge A. S. Moss. All men of Donley and Hall counties are urged to be present.

ball on the lighted field. By far the most cultural feature of the entire summer's program is a Spanish Club under the leadership of Miss Helen Yeats. The club was organized last week with Miss Oradel Nuhn as president, Miss Charlotte Coursey as treasurer, and Mrs. T. M. Harrison as secretary. Members of the club are enthusiastic in their praise of Miss Yeats' ability to teach and to entertain. Although there have been two meetings, Miss Yeats announced that other people might join the club without feeling that they are too far behind. This club meets on Friday afternoon at 4 o'clock in the West Ward School Building.

air meeting in Kyle Stadium Monday. Mrs. Nancy Richey Ransom of Dallas, poet laureate of the state, will appear on the same program with the Lieutenant Governor. The adult section of the Short Course will be concluded with a program in the Stadium at 7:30 p. m., Tuesday, at which Roy Dickerson of the Federal Security, Washington, will speak and the students of the Stephen F. Austin High School, Bryan, will perform a pageant, "Freedom We Defend."

Among the highlights on Monday's program are: Discussions of problems submitted by county land use planning committees; agricultural credit clinic; an insect control clinic; planning the family wardrobe; mills for home ground food and feed; cows and how to get them; range management; attractive everyday foods for defense; and Texas cooperatives in action—a moving picture.

Coincidental with the Short Course, the Texas Master Farmer's Association will meet July 14, and the Texas Agricultural Workers Association will hold a luncheon the same day where plans for the annual meeting of the organization at Waco in January will be discussed.

How to Minimize 'Kitchen Travel'

Summertime may be the season for travel but not "kitchen travel" which refers to unnecessary steps and wasted energy in the preparation of meals.

Louise Bryant, Extension Service specialist in home management, says lost motion can be eliminated by efficient arrangement of the kitchen. This will make all meal-time duties—preparation and serving of food as well as the subsequent dish washing—less difficult she says.

Here are some tips on kitchen arrangement which will help reduce "kitchen travel."

If the stove, sink, and cabinet or work tables are arranged around two or three adjoining walls, unbroken by doors, this will form a continuous working surface so that utensils will be more accessible.

If doors break into the wall space, a continuous surface may be provided by a drop leaf or by a table mounted on casters.

If a working surface with cupboards above can be placed at the left of the sink, dishes may be put away as soon as they are dried without extra steps.

If all the doors opening into the kitchen are at one end and there is no passage way through the work center, work is usually simplified. Where work centers cannot be conveniently arranged, a service wagon will cut down the travel, Miss Bryant points out.

merits of these provisions of the bill.

As the bill is now written, General Page pointed out, such men will be subject to discharge if inducted on or before July 1, 1941.

"Based on the statements of Congressional leaders and the provisions making the bill retroactive to July 1, 1941, for discharge, Texas' local boards have been informed by State headquarters that the induction of all men who had attained the age of twenty-eight years on or before July 1, 1941 shall be postponed for a period of 30 days pending final action on the bill."

In Texas, it is estimated, approximately 400,000 of the 825,429 men who registered last October are affected by the bill.

of the Hall County Cotton Stamp Committee, were told.

It was explained that the war had sharply curtailed our exports of American cotton which, more than any other American crop has been dependent on foreign buyers for its market. Accordingly, it is today more in the national interest than ever before that we increase our domestic consumption of cotton goods grown, processed, and manufactured in this country. Retail public should cooperate in.

Keep Eggs Cool For Preservation

In view of the fact that more attention is being given the quality of eggs in this section of the state the information received from the extension this week is interesting as well as informative. The keynote thought was that refrigeration is paramount in preserving the quality of eggs.

According to George P. McCarthy, poultry husbandman of the Texas A. and M. College Extension Service, eggs held at 98 degrees Fahrenheit will deteriorate as much in three days as those held at 45 degrees for 65 days.

To simplify this problem, the Extension Service has prepared plans for an iceless refrigerator. It is constructed along lines of the old type milk cooler with sack material covering the framework. By keeping the fabric moist, air circulating through it reduces the temperature inside from 15 to 20 degrees. Copies of the plans may be obtained from county agricultural agents or from Extension Service headquarters at College Station.

Although eggs will not keep indefinitely in this type of refrigerator, it will help materially in maintaining their quality from one market period to the next. During summer-time it is best to market eggs at least twice weekly regardless of cooling.

Fertile eggs are costing Texas farmers thousands of dollars yearly, McCarthy says. The reason is that fertile eggs deteriorate rapidly and bring a rather low price in summer. The first thing to do on an egg improvement program is to get rid of all male birds and sell only infertile eggs. If all producers of market eggs did this, McCarthy suggests, there would be a large increase in summer consumption, with consequent increase in price.

I not only take this opportunity to thank these loyal workers for and believers in the chamber who this week will give of their time to strengthen the organization, but urge that those whose interest may have been passive, study the activities of the chamber, acquaint themselves with its functions, learn of its accomplishments.

OTTIE JONES, President, Memphis C. of C.

Merchants, farmers, and the general important national objective of increased cotton consumption. According to County Agent Hooser, stamps will be issued around August 1 and farmers should check their compliances soon to be able to receive them.

within its scope. Every added bit of man power, every additional dollar of support is converted into increased effectiveness.

Financial support of the organization is not a donation. It is an investment—a business insurance that pays dividends.

ARE YOU A PART TIME CITIZEN?

BEING a citizen in a democracy is a full time job. In other forms of government, the citizenry make up the background, appearing only in mob scenes to cheer on the rulers of the nation.

But there is no room for part time citizens in our form of government. Our government is us—and we make it. Ours is the fault if the wheels of government do not run smoothly, for the laws we made are the roadbed, and the men we elected are the machine.

Are you a part time citizen? Do you fulfill all your duties as a voter—or do you just show up at election time to cast your vote without due consideration of the full qualifications, record and principles of all candidates?

Are you a part time citizen? Do you obey the laws you had a hand in making—or is your only thought when you break what seems like an inconsequential little law that if you get away with it, it's all right?

Are you a part time citizen? Do you evince interest in all issues or only in those problems which directly concern you—and then object when other groups do the same and infringe on your prerogatives? Only as citizens work for the common good of all can democracy progress.

Are you a part time citizen? Do you lend an ear to alien subversive elements who tell you how much better conditions are or would be for you were there a different form of government? Do you thoughtlessly pass on these tales without checking up on their accuracy or considering their source?

Are you a part time citizen? Do you stand up for democracy or do you condemn its mistakes without consideration for the good it has to offer? Do you stress its shortcomings and never its long range program which slowly but surely and in spite of stumblings, discriminations and detours is making this country of ours the best in which we live?

Now as never before the United States needs the full time allegiance of all its people. Don't be a part time citizen!

RAINS VS. WEEDS

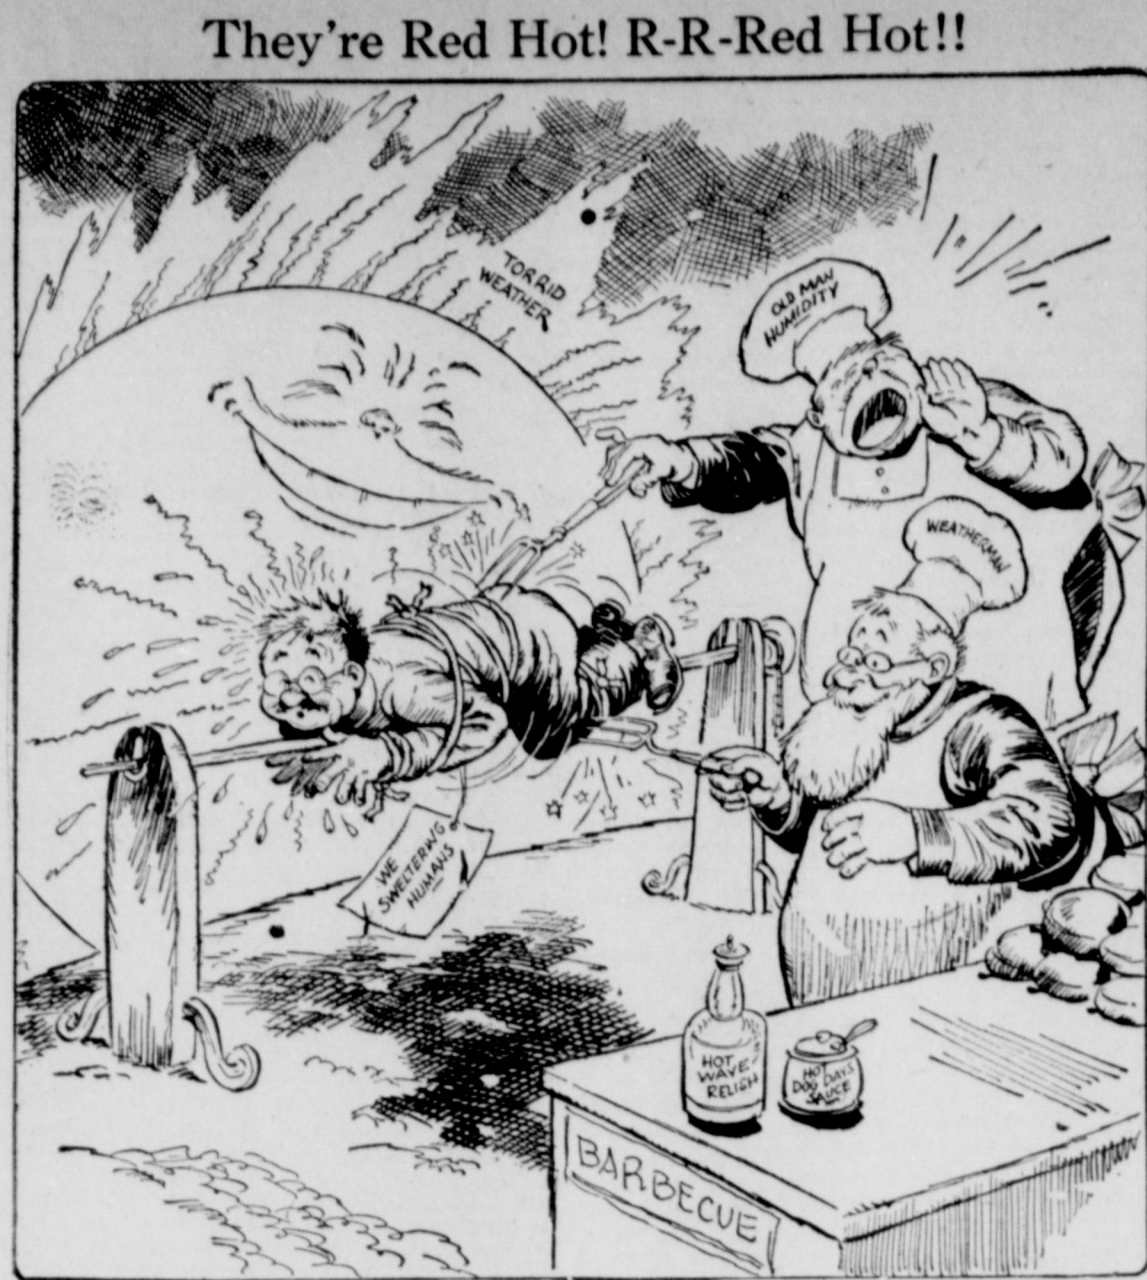

RAIN IS beneficial; rain is an activating force; rain is essential. These truths we hold to be self evident, but a few of the by-products of this, our bumper rain crop, have been relegated to the liability columns of the city ledger. "Weeds to the right of us, weeds to the left of us" . . . surely Kipling had a word for the condition of the Memphis city lots.

Memphians have always held the flag of civic pride aloft, but the hour has arrived when tourists need not be reminded by a greenery display that we do have rain.

Vacant lots should be potential house bearers and visionary mediums of city growth and improvements; not eye sores detracting from work and careful planning which has gone before. No longer can we employ Pollyanna platitudes in rationalizing our way out of this barbaric condition.

There are approximately 500 vacant lots in Memphis sprouting, almost without exception, a jungle growth. This growth is no thing of beauty and should be governed accordingly. There are ways and means of handling emergencies, so let's start an all-out fight on weeds on vacant lots.

Press Paragraphs

CULLED FROM THE DEMOCRATIC EXCHANGES

Inconsistent
 The Tactless Texan in the Amarillo Globe: Have just been up in my downtown weather bureau. How much did it rain last night here in downtown Amarillo? Well, the gauge shows .90 of an inch while the government gauge at the airport shows but 76 hundredths. It's said that there are more variations in the rainfall in the Panhandle of Texas than any area in the world. The weather bureau gauge at the airport doesn't tell the story as to what goes on here. We could be going about our work in outboard motor boats here in Amarillo while they were cutting up from a drought out at the airport.

Vocally Speaking
 Menard News:—Grandpappy Jenkins thinks it's fortunate that the Swiss are good yodlers. Surrounded by Axis states and censorship they'd never be heard.

Frogs Yell "Uncle"
 Quannah Tribune-Obit: A scarcity of frogs has been noticed of late. Croakings which usually follow the rains have been missed. Some have attributed it to too much water and have even gone so far as to predict they drowned. "Not so," says Hubert Smith manager of Hunter's Men Store, who says they are being found in the store of late. Even West Texas bullfrogs are ready for a continued dry spell.

Commodore Hatfield Comments
 Liberty Vindicator: Com-

This Week's Birthdays

Rembrandt Van Ryn, famous painter, was born July 15, 1606.
 John Jacob Astor, pioneer fur trader, was born July 13, 1764.

Commodore B. M. Hatfield, who appeared in Life and in one of Knott's famous cartoons a la Dallas News last week, was crowing Monday over the election results. "I lost more votes than I expected," he declared elatedly. "I made only 42 speeches, but if I had made a few more I'll bet I would have been scratched at least 50 more times." (Note—The Commodore received about 50 votes in the state-wide poll.)

Clothes Problem
 Roy W. Hahn in the Briscoe County News: I talked a long time to T. R. this week and from what he says this buying clothes is liable to get to be a real problem. As an example he showed me some prices and one I remember was on overalls which last year were sold for 98c and \$1.09. Right now they are quoted to him at prices far over that and in dozen lots. Salesmen are refusing to even quote prices on many articles and in other words a merchant has no idea of what he is trying to do. And this was the war where there was to be no profiteering.

No Procrastination
 Lubbock Morning Avalanche (AP): A St. Louis negro woman, who had charged a neighbor with assault and battery, took the stand

in court of criminal correction to tell what happened. "Judge, your honor," she said, "it was like this. I was coming up the back stairs and she was coming down with her laundry. She said to me, 'If your little boy throws mud on this wash I'm goin' to whup him. And if I whup him he's no goin' to like it. And if you don't like it I'm going to whup you. And I don't think you're going to like it so we might as well start now.'"

Speed Record
 The Amarillo Globe: The Army Signal Corps reported in Washington today that "General Mauborgne," one of its messenger pigeons, had established a speed record by flying 600 miles in less than 14 hours. The flight in Kansas and Texas was without the aid of a tail wind, it was said.

Some Fun
 Dalhart Texan: From Austin comes the report that Texas last year was the beneficiary of \$290,543,000 spent for travel and recreation, according to B. Frank White, acting state director for the Office of Government Reports. This was an increase of 4.38 per cent over 1931.

Poor Duncy knew what was in store. When he heard Mister Giant roar, "Please turn the oven fire up high." Thought he, "Now I will surely fry."

He then saw Dotty walking 'round. She said, "Where can a match be found?" The giant answered, "On the shelf. Be careful you don't burn yourself."

"Oh, no," said Dotty. "I'm all right. I'm sure the oven I can light. Tell Goldy if you want some more Hot coffee, there is lots in store."

NEXT WEEK: Duncy finds a way to escape.

"Ah, ha. You're smart," said Dotty. "A plan has popped into my head. But you are wrong. You are locked. All ways out of the room are blocked."

Wee Dotty didn't hear. The next thing she heard was scratch, scratch, the door. The oven then began to fry."

Duncy's face was pale. "I must get out of here," he said. "The door was the only way out. And Duncy promptly unlocked the door."

It is estimated that the increase in the government rate of commodity loans to 85 per cent of parity this year will add about \$224,000,000 to the income of producers of cotton and about the same amount to wheat growers.

Fifth Avenue Goes To The Country

"Cherry," a local lamb, is tethered on the lawn in front under a huge apple tree. . . John Robert Powers, arbiter of hundreds of pretty girls' dreams says, "A natural girl is always in style" . . . hobby-horses proudly toss their colorful heads and endlessly gallop along with their beautiful burdens.

A NEW version of an old experiment is the branch store established by Lord & Taylor, of New York, in nearby Manhasset, Long Island. The recently opened building was designed and decorated with the idea of merging into its suburban surroundings and at the same time preserving the completely modern note of Fifth Avenue. Catering exclusively to women and children, the shop has introduced such novelties to the

average department store as bag-pipes for hat stands; dress racks in the shape of huge pictures hanging from ribbon bows; mannequins, exquisitely dressed, side-saddle on merry-go-round hobby horses in the windows; and luxuriously upholstered park benches instead of conventional lounges. In one corner of the boys' department is the Champ Shop; pictures of local athletic heroes hang on the wall and admirers sign a guest

book. In the tiny youngsters' section, racks are low enough for the tots to thumb their way through and make their own choices; the beauty shop, long a problem for decorators, wavering between a laboratory and overdressed boudoir, emerges as a gay atmosphere enlivened by the soliloquies of famous men-about-town on the subject of women, their immortal comments on the subject are inlaid in white on the rubber tiled floor.

Memphis Ball Club Trims Childress

In an 11 inning thriller that gave local fans more than their money's worth, the Memphis Spudders trimmed the Childress ball club 3-2, Sunday afternoon at the local baseball park, according to a report by Memphis baseball club officials.

It was Memphis all the way as far as hits were tabulated with the locals chalking up 12 in comparison with the 5 hits taken off Pitchers Hoover and Stewart by the visitors. Both teams were charged with 5 errors.

Batteries for Memphis were Hoover, Stewart, and Watkins. Memphis will meet Childress in a return game Sunday afternoon at 3 o'clock at the local ball park, according to Don Wright, manager of the Spudders.

Open Letter to Citizens

By The Memphis City Council

Citizens, as fellow citizens and neighbors, your City Council appeals to you to help make your town the kind of town you would like to live in. Your cooperation is respectfully asked and desired.

RUBBISH HAULING

Citizens of Memphis: Many inquiries are being made lately concerning the hauling of cans and rubbish. The Memphis City Council desires to inform all that a truck will be on the job within a few days, and every person should have his cans and rubbish placed in barrels or sacks on the alleys and most accessible places for the haulers.

Bear in mind that the haulers will be instructed not to pick up any rubbish where it is mixed with any burnable trash of any kind. Weeds, brush, grass, limbs, trees, paper, and any other things that will burn will not be hauled under any consideration, and if rubbish is mixed with such, will be left for you. Heretofore, many loads more have been hauled because of the mixture, making hauling more expensive. This will not be done in the future.

The reason for the delay in hauling: Everyone knows that the old truck and all city equipment have been kept on the City Park WPA job. In order to accommodate the citizens, a new truck has just been bought, and the truck bed has been ordered and is expected any day. When it arrives, hauling will start.

STREET WORK Due to excessive rains and luxuriant growth of vegetation this year the streets of Memphis have

been in worse condition than ever. It has not been the City Council's fault. Instead everything possible has been done, considering conditions, to keep the streets open and to save the gravel from washing away.

An extra man has been employed for the past several weeks to run the maintainer, before and after WPA work hours at the city park, cleaning out the bar ditches and grading the streets.

Removing dirt the vegetation from the ditches has caused a roll of dirt and gravel to be on the roadways. It takes time for this vegetation to decay and take up less room, then the maintainer will be run to level it off so it will not interfere with traffic. This information is given that the citizens might know the why and wherefore.

Your City Council asks your cooperation in keeping the streets in good condition, and in helping to prevent them from washing away. Many people cut their grass and weeds, and even trim trees, and pile the whole lot in the bar ditches, so the first rain that comes along will carry them into culverts and tinholes where they will clog and catch all kinds of drift and dirt, forcing the water to break over onto graveled streets, and thus damage streets that will take money and more taxes to repair.

City officers have been sent to a lot of such ordinance-breakers to kindly ask them to refrain from creating such hazards and obstructions. Some have been kind enough to desist, while others have disregarded the request and persisted in violating the city law by creating such nuisances.

This notice is a warning that hereafter the practice of dumping anything in the bar ditch that will tend to obstruct the course of water will be dealt with in keeping with the law concerning same.

STAKING COWS

It has come to our attention that a number of people are staking cows so they are permitted to cross sidewalks and streets in town, thus creating a nuisance, and also a hazard to human life. It is dangerous practice, and if persisted in, will be considered as maintaining a nuisance. This is also a warning that such must be stopped.

REGARDING WEEDS

The City Council has no authority to force people to clean up vacant lots, but we appeal to all citizens to join in a concerted effort to remove a lot of the eyesores, such as weeds, rubbish, and the like, in order to make Memphis a more desirable place, and at the same time show that civic pride has not died out entirely in the town that once won the prize for being the cleanest town in Texas.

Yuma Is Setting For Burkhart-Bolton Nuptials

Miss Hazel Burkhart of Esteline became the bride of Robert Bolton in a ring ceremony at Yuma, Ariz., June 15.

Mrs. Bolton is the daughter of Mr. and Mrs. J. B. Burkhart of Esteline.

The bride wore a navy blue dress with black and white accessories. For something old she carried a lace handkerchief and for something borrowed she wore her mother's brooch.

Mr. Bolton is the son of Mr. and Mrs. B. W. Bolton of Dumont, Texas. He is employed at San Diego, Calif.

Attendants were Messrs. Alvin and Arthur Burkhart, J. J. Jackson, and Misses Lillian Burkhart, Mary Hansen, and Josephine Moscrop.

The couple will make their home at 4433 Park Blvd., San Diego.

Picnic Shower Is Given Wednesday For Recent Bride

On Wednesday evening, July 2, Mrs. Z. V. Betts, nee Miss Martha Temple, was honored by a picnic shower at the City Park. The gifts were arranged at one end of the table under the semblance of part of the meal.

A hand-painted bride's guest book was presented to Mrs. Betts by Mrs. Lloyd Crow.

Those participating in the shower were Judge and Mrs. M. O. Goodpasture, Mr. and Mrs. Gene Barnett, Mr. and Mrs. Ross Gentry, Mrs. D. A. Neely, Mr. and Mrs. Lloyd Crow, Mr. and Mrs. Roy L. Guthrie, Alton Arnold of Childress, Mrs. J. Dunbar Posey, Miss Frankie Barnes, Miss Helen Boswell, Miss Imogene Knight, Mr. and Mrs. Jim Oakley and children; Mrs. Wilma Watson, Miss Izella Melton, Mrs. George M. Bass, Mrs. Derwood McCool, Mrs. A. G. Rasco, the honoree, and her mother, Mrs. C. B. Temple.

Good Habits Formed by Child Early In Life Prepares Him for Safe Living

The more good habits a preschool or very small child can make automatic, the better prepared he will be for living. That's the philosophy of Dosca Hale, Extension Service specialist in parent education and child development, who says this will also allow a child more time for other things.

For example, Miss Hale emphasizes the importance of teaching children to look to the right and left before they cross a road or street. Here, adults are poor examples for children, she says, since some studies show that 81 per cent of pedestrians look neither way before crossing a street; 17 per cent look only in one direction; and two per cent look both ways.

These days, crossing a street is serious business, so adults should not make this lesson a game. Instead, parents should take enough time to teach their children safe rules as soon as they are old enough to walk across a street. She says children should be encouraged to look to the right and left and continue to look to the right and left until the opposite curb has been reached. With practice this procedure becomes automatic with the child.

The specialist adds that it is necessary for parents to help their children first on streets where there is little traffic; then later on they may try streets with more and more traffic.

She explains further that a child likes to walk alone because it gives him the feeling of accomplishing something. Sometimes adults think the child is contrary because he does not want to be carried or led across the street each time. In this case, he is only attempting to carry out nature's way of helping him to live safely and well in the world around him.

Strictly Fresh

HITLER'S love for music seems to be centered chiefly around "preludes." At least we are always reading about propaganda campaigns that are "preludes" to further attacks.

To camouflage an Army tank, a colonel used a paste made of flour on water, to which grass and mistletoe is attached. Sounds like a recipe for a tasty dish, to be baked in the sun.

A partial shade helps rooted cuttings and young seedlings get through the summer.
